SCOPE OF WORK AND GENERAL SPECIFICATIONS
FOR Medistim L15 Probes

1. **Background:** The Michael E. DeBakey VA Medical Center (MEDVAMC) currently owns multiple Medistim L15 Probes but they will need to be replaced. The Cardiothoracic Section is in need of these instrument sets so they can replace the current ones. These instruments are designed to reduce the risk of early graft failure, stroke, myocardial infarction or recurrent angina, and provide improved quality of life for your patients. Medistim's L15 imaging probe is unique in being approved for direct contact with cardiac tissue and the central circulation system. The instruments must be matched to currently owned sets at MEDVAMC. These instruments are only manufactured by Medistim.

2. **Project Scope**: The overall price of this project is $[redacted]

PN	Product Description	Qty	Unit Price	Extended Amt
EL100015	L15 High-frequency Ultrasound Imaging Probe	6	[redacted]	[redacted]
			Total:	[redacted]

3. **Supply Specifications – Requirements**

- Must meet VA sterilization standards

4. **Warranty and Support:** N/A
