Notice of Intent – 341 WOC System Technology Upgrade

Notice of Intent to Sole-Source: The 341st Missile Wing intends to award a sole-source contract to Rhodes Research to provide a critical system upgrade and modernization of the Crestron AV system located in the Wing Operations Center (WOC). This system is currently experiencing critical software issues that have rendered its projectors non-functional. As the original developer, installer, and sole proprietor of the system's custom-engineered architecture, Rhodes Research holds the exclusive copyright and ownership of the proprietary software source code. To resolve existing system degradation and restore full operational capabilities, Rhodes Research will deliver and integrate an upgraded, updated system configuration. A competitive award to another source would result in substantial cost duplication and unacceptable operational delays, as it would necessitate the complete replacement of the system and the development of new software from scratch.

THIS IS NOT A REQUEST FOR COMPETITIVE OFFERS, and a solicitation will not be issued. All responsible sources may submit a quotation which shall be considered. Any response to this notice must show clear and convincing evidence that the competition of this requirement would be advantageous to the Government. All responsible sources may submit a capability statement, proposal, or quotation, which shall be considered by the agency. If no affirmative written response is received, the award will be made without further notice. Oral communications are not acceptable in response to this notice.

RESPONSES ARE DUE NO LATER THAN 09 July 2026 by 5:00 PM MDT at 341 CONS, Malmstrom AFB to the points of contacts below.

Please see the attached Statement of Objectives for further details.
