The purpose of Amendment 0001 is to:

1. Correct CLIN 0004 description.
2. Amend DFARS 252.211-7003 (Item Unique Identification and Valuation).
3. Change ADDENDUM TO 52.212-1, Instructions to Offerors - Commercial Products and Commercial Services. The required Delivery Date has changed from 30-Sep-2026 to No Later Than (NLT) 15-Jan-2027.
4. Answer Industry Questions.

AFTER AMENDMENT 0001 THE US GOVERNMENT SHALL NOT ACCEPT QUESTIONS ANY LONGER.

Questions (Q) and (A) Answers:

(Q1) Could the Government please confirm whether the Italian Anti-Mafia self-certification requirement applies only to Italian offerors, or whether it would also apply to a U.S.-registered prime contractor using an Italy-based subcontractor/supplier?

(A1) Anti-Mafia self-certification applies only to Italian offerors.

(Q2) Could the Government please clarify the correct description for CLIN 0004? The RFQ schedule and Annex 1 appear to describe this item differently, and we would like to make sure the quotation is prepared against the correct technical requirement.

(A2) See amended description of CLIN 0004.

(Q3) For the ABB-brand requirement, will the Government require the offeror or subcontractor to submit proof of ABB authorization/distributor status, or will technical datasheets, CE documentation, and confirmation of genuine ABB supply be sufficient?

(A3) Proof of ABB authorization/distributor status is not required. The offeror shall comply with the technical requirements of the solicitation. Reference also Addendum to 52.212-1, Paragraph A, Volume I, Factor I, Technical.

(Q4) Could the Government please confirm that all prices should be submitted exclusive of Italian VAT/IVA, and that the Article 72 tax exemption process will apply to this procurement?

(A4) Confirmed. Please refer to RFQ, Clauses '252.229-7001' Tax Relief' and 252.229-7003 'Tax Exemptions (Italy).'

(Q5) Could the Government please confirm whether UID marking and reporting will be required for each applicable CLIN item, and whether the manufacturer's serial number/standard marking will be sufficient or if MIL-STD-130 UID marking is specifically required?

(A5) Confirmed. UID marking and reporting for each applicable CLIN item and MIL-STD-130 UID marking are required in accordance with DFARS Clause 252.211-7003.

(Q6) Could the Government please confirm whether the contractor's delivery responsibility ends at Caserma Ederle, Building #57 warehouse, or whether any further movement to the Del Din substations will be required from the contractor?

(A6) The contractor's delivery responsibility ends at Caserma Ederle, Building #57 warehouse.

(Q7) We would respectfully like to request one additional technical clarification regarding the scope of the ABB brand-name requirement. Please note that this question is separate from our earlier Question No. 3, which concerned the supporting documentation or proof of ABB authorization that may be required with the quotation. During our technical review, a potential Italian manufacturer advised that it could manufacture the required medium-voltage switchgear and panels using its own certified structures and enclosures, while integrating genuine ABB components, including ABB VD4 vacuum circuit breakers and ABB REF-series protection relays. Under this proposed configuration, the complete switchgear or panel would be manufactured and branded by the Italian manufacturer, while the principal circuit breakers, protection relays, and other specified components would be original ABB products. Could the Government please confirm whether this configuration would satisfy the RFQ's ABB brand-name requirement, provided that the completed equipment:

- fully complies with the required technical specifications, ratings, dimensions, drawings, and applicable CE/IEC standards;
- incorporates genuine ABB circuit breakers, protection relays, and other specified ABB components;
- is fully compatible with the Government's existing electrical infrastructure; and
- is supported by complete technical documentation and evidence confirming the origin of the ABB components?

Alternatively, does the RFQ require the complete assembled switchgear and panels themselves to be manufactured, supplied, and branded by ABB?
This clarification will help {Vendor} determine whether the proposed technical solution may be considered or whether only fully ABB-manufactured and ABB-branded assemblies are acceptable.

(A7) Alternative configurations shall not be accepted. The RFQ requires that the complete assembled switchgear and panels themselves be entirely manufactured, supplied, and branded by ABB. Consequently, only quotes providing assemblies that are fully manufactured, assembled, and branded by ABB shall be considered compliant with the technical requirements and therefore considered for award. Reference Addendum to 52.212-1, Paragraph A, Volume I, Factor I, Technical.

(Q8) We would like to bring an important industry lead-time matter to the Government's attention concerning the required delivery date of 30 September 2026. Based on our discussions with qualified medium-voltage switchgear manufacturers, the equipment required under this RFQ is not standard material that can normally be supplied from available stock. The switchgear must be engineered and configured against the Government's technical specifications, drawings, protection requirements, dimensions, wiring arrangements, and compatibility requirements.
The manufacturing process normally includes:

- detailed engineering review and technical approval
- procurement of ABB circuit breakers, protection relays, transformers, and other components
- fabrication and assembly of the switchgear
- wiring and integration of protection and control systems
- factory inspections and routine testing
- preparation of CE, technical, warranty, and operating documentation
- packaging and transportation
- final delivery to Vicenza

The market feedback obtained to date indicates a production period of approximately 21 to 22 weeks from receipt of the purchase order and final technical approval, excluding the customary two-week factory shutdown in August. The effective delivery period is therefore approximately 23 to 24 weeks.
By comparison, the current period between the quotation deadline of 29 June 2026 and the required delivery date of 30 September 2026 is only approximately 13 weeks. The actual performance period will be even shorter once the time required for evaluation, award, technical review, and final approval is taken into account.
Maintaining the current fixed delivery date may therefore significantly limit competition and could prevent qualified manufacturers from submitting technically compliant quotations. It may also create pressure to propose available stock, substitute configurations, or incomplete technical solutions that do not fully satisfy the Government's brand-name, compatibility, testing, and documentation requirements.
To preserve meaningful competition and support delivery of fully compliant and properly tested equipment, {Vendor} respectfully recommends that the solicitation delivery schedule be amended to one of the following

commercially realistic bases:
Preferred basis:
Delivery within 24 weeks after receipt of the purchase order and Government approval of the final technical submittals.
Alternative basis:
Allow each offeror to state its earliest achievable delivery schedule after award and final technical approval, with the proposed schedule evaluated as part of technical acceptability.
This approach would allow the Government to obtain firm and accountable manufacturer commitments while maintaining the technical integrity, safety, compatibility, and quality objectives of the procurement.
{Vendor} and its proposed supply partners will continue to explore every reasonable opportunity to shorten the schedule, including phased delivery of individual components where commercially and technically practical. However, establishing a realistic contractual delivery period at the solicitation stage would materially reduce performance risk and improve the likelihood of receiving complete and technically compliant quotations.
We respectfully submit this recommendation for the Government's consideration and for incorporation into the RFQ through an amendment.

(A8) Required delivery date has been changed from 30 September 2026 to 15 January 2027. See amended solicitation.

(Q9) We are seeking clarification regarding the applicability of DFARS 252.211-7003 (Item Unique Identification and Valuation) within the subject solicitation.
We note a potential inconsistency in the solicitation language:
• Pages 16–17 indicate that UID requirements appear to be exempt for CLINs 0001 through 0007.
• Page 30 references DFARS 252.211-7003 stating that UID requirements apply "where applicable," in accordance with the clause.
To ensure full compliance, we respectfully request confirmation on the following:
1. Whether CLINs 0001–0007 are fully exempt from UID requirements under DFARS 252.211-7003, or whether UID-related costs should be included in our quotation.

(A9) Please see amended DFARS 252.211-7003 clause.

Instructions to Offerors—Commercial Products and Commercial Services. (Deviation)

(a) Submission of offers. Submit signed and dated offers to the office specified in this solicitation at or before the exact time specified in this solicitation. As a minimum, offers shall include—

(1) The solicitation number;

(2) The name, address, telephone number of the Offeror;

(3) The Offeror's Unique Entity Identifier (UEI) and, if applicable, Electronic Funds Transfer (EFT) indicator;

(4) Information necessary to evaluate the factors contained in the provision at 52.212-2 or as described in the solicitation;

(5) Responses to provisions that require Offeror completion of information, representations, and certifications (other than those collected via the System for Award Management (SAM)); and

(6) A statement specifying the extent of agreement with all terms, conditions, and provisions included in the solicitation and any solicitation amendments.

(b) Period for acceptance of offers. The Offeror agrees to hold the prices in its offer firm for 60 calendar days from the date specified for receipt of offers, unless another time period is specified in an addendum to the solicitation.

(c) Late submissions, modifications, revisions, and withdrawals of offers.

(1) Offerors are responsible for submitting offers and any modifications or revisions to the Government office designated in the solicitation by the time specified in the solicitation.

(2) Any offer, modification, or revision received after the time specified for receipt of offers is "late" and will not be considered unless it is received before award is made and the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition. However, a late modification of an otherwise successful offer that makes its terms more favorable to the Government will be considered at any time it is received and may be accepted.

(3) If an emergency or unanticipated event interrupts normal Government processes so that offers cannot be received at the Government office designated for receipt of offers by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation or other notice of an extension of the closing date, the time specified for receipt of offers will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(4) Offerors may withdraw their offers by written notice to the Government received at any time before award.

(d) Contract award (not applicable to Invitation for Bids). The Government intends to evaluate offers and award a contract without discussions with Offerors. Therefore, the Offeror's initial offer should contain the Offeror's best terms. However, the Government reserves the right to conduct discussions, if necessary. The Government may reject any or all offers if such action is in the public interest, accept other than the lowest offer, and waive informalities and minor irregularities in offers received.

(e) Debriefings. If a postaward debriefing is given to requesting Offerors, the Government will disclose the following information, if applicable:

(1) The agency's evaluation of the significant weak or deficient factors in the debriefed Offeror's offer.

(2) The overall evaluated cost or price and technical rating of the successful Offeror and the debriefed Offeror and past performance information on the debriefed Offeror.

(3) The overall ranking of all Offerors when any ranking was developed by the agency during source selection.

(4) A summary of the rationale for award.

(5) For acquisitions of commercial products, the make and model of the product to be delivered by the successful Offeror.

(6) Reasonable responses to relevant questions posed by the debriefed Offeror as to whether the agency followed source-selection procedures set forth in the solicitation, applicable regulations, and other applicable authorities.

252.204-7017	Prohibition on the Acquisition of Covered Defense Telecommunications Equipment or Services-Representation.	2021-05

PROHIBITION ON THE ACQUISITION OF COVERED DEFENSE TELECOMMUNICATIONS EQUIPMENT OR SERVICES—REPRESENTATION (MAY 2021)

The Offeror is not required to complete the representation in this provision if the Offeror has represented in the provision at 252.204-7016, Covered Defense Telecommunications Equipment or Services—Representation, that it "does not provide covered defense telecommunications equipment or services as a part of its offered products or services to the Government in the performance of any contract, subcontract, or other contractual instrument."

(a) *Definitions*. "Covered defense telecommunications equipment or services," "covered mission," "critical technology," and "substantial or essential component," as used in this provision, have the meanings given in the 252.204-7018 clause, Prohibition on the Acquisition of Covered Defense Telecommunications Equipment or Services, of this solicitation.

(b) *Prohibition*. Section 1656 of the National Defense Authorization Act for Fiscal Year 2018 (Pub. L. 115-91) prohibits agencies from procuring or obtaining, or extending or renewing a contract to procure or obtain, any equipment, system, or service to carry out covered missions that uses covered defense telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system.

(c) *Procedures*. The Offeror shall review the list of excluded parties in the System for Award Management (SAM) at https://www.sam.gov for entities that are excluded when providing any equipment, system, or service to carry out covered missions that uses covered defense telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system, unless a waiver is granted.

(d) *Representation*. If in its annual representations and certifications in SAM the Offeror has represented in paragraph (c) of the provision at 252.204-7016 , Covered Defense Telecommunications Equipment or Services—Representation, that it "does" provide covered defense telecommunications equipment or services as a part of its offered products or services to the Government in the performance of any contract, subcontract, or other contractual instrument, then the Offeror shall complete the following additional representation:

The Offeror represents that it [ ] will [ ] will not provide covered defense telecommunications equipment or services as a part of its offered products or services to DoD in the performance of any award resulting from this solicitation.

(e) *Disclosures*. If the Offeror has represented in paragraph (d) of this provision that it "will provide covered defense telecommunications equipment or services," the Offeror shall provide the following information as part of the offer:

(1) A description of all covered defense telecommunications equipment and services offered (include brand or manufacturer; product, such as model number, original equipment manufacturer (OEM) number, manufacturer part number, or wholesaler number; and item description, as applicable).

(2) An explanation of the proposed use of covered defense telecommunications equipment and services and any factors relevant to determining if such use would be permissible under the prohibition referenced in paragraph (b) of this provision.

(3) For services, the entity providing the covered defense telecommunications services (include entity name, unique entity identifier, and Commercial and Government Entity (CAGE) code, if known).

(4) For equipment, the entity that produced or provided the covered defense telecommunications equipment (include entity name, unique entity identifier, CAGE code, and whether the entity was the OEM or a distributor, if known).

252.211-7003	Item Unique Identification and Valuation.	2023-01

ITEM UNIQUE IDENTIFICATION AND VALUATION (JAN 2023)

(a) *Definitions*. As used in this clause—

"Automatic identification device" means a device, such as a reader or interrogator, used to retrieve data encoded on machine-readable media.

"Concatenated unique item identifier" means—

(1) For items that are serialized within the enterprise identifier, the linking together of the unique identifier data elements in order of the issuing agency code, enterprise identifier, and unique serial number within the enterprise identifier; or

(2) For items that are serialized within the original part, lot, or batch number, the linking together of the unique identifier data elements in order of the issuing agency code; enterprise identifier; original part, lot, or batch number; and serial number within the original part, lot, or batch number.

"Data matrix" means a two-dimensional matrix symbology, which is made up of square or, in some cases, round modules arranged within a perimeter finder pattern and uses the Error Checking and Correction 200 (ECC200) specification found within International Standards Organization (ISO)/International Electrotechnical Commission (IEC) 16022.

"Data qualifier" means a specified character (or string of characters) that immediately precedes a data field that defines the general category or intended use of the data that follows.

"DoD recognized unique identification equivalent" means a unique identification method that is in commercial use and has been recognized by DoD. All DoD recognized unique identification equivalents are listed at https://www.acq.osd.mil/asda/dpc/ce/ds/unique-id.html .

"DoD item unique identification" means a system of marking items delivered to DoD with unique item identifiers that have machine-readable data elements to distinguish an item from all other like and unlike items. For items that are serialized within the enterprise identifier, the unique item identifier shall include the data elements of the enterprise identifier and a unique serial number. For items that are serialized within the part, lot, or batch number within the enterprise identifier, the

unique item identifier shall include the data elements of the enterprise identifier; the original part, lot, or batch number; and the serial number.

"Enterprise" means the entity (e.g., a manufacturer or vendor) responsible for assigning unique item identifiers to items.

"Enterprise identifier" means a code that is uniquely assigned to an enterprise by an issuing agency. "Government's

unit acquisition cost" means—

(1) For fixed-price type line, subline, or exhibit line items, the unit price identified in the contract at the time of delivery;

(2) For cost-type or undefinitized line, subline, or exhibit line items, the Contractor's estimated fully burdened unit cost to the Government at the time of delivery; and

(3) For items produced under a time-and-materials contract, the Contractor's estimated fully burdened unit cost to the Government at the time of delivery.

"Issuing agency" means an organization responsible for assigning a globally unique identifier to an enterprise, as indicated in the Register of Issuing Agency Codes for ISO/IEC 15459, located at http://www.aimglobal.org/?Reg_Authority15459.

"Issuing agency code" means a code that designates the registration (or controlling) authority for the enterprise identifier.

"Item" means a single hardware article or a single unit formed by a grouping of subassemblies, components, or constituent parts.

"Lot or batch number" means an identifying number assigned by the enterprise to a designated group of items, usually referred to as either a lot or a batch, all of which were manufactured under identical conditions.

"Machine-readable" means an automatic identification technology media, such as bar codes, contact memory buttons, radio frequency identification, or optical memory cards.

"Original part number" means a combination of numbers or letters assigned by the enterprise at item creation to a class of items with the same form, fit, function, and interface.

"Parent item" means the item assembly, intermediate component, or subassembly that has an embedded item with a unique item identifier or DoD recognized unique identification equivalent.

"Serial number within the enterprise identifier" means a combination of numbers, letters, or symbols assigned by the enterprise to an item that provides for the differentiation of that item from any other like and unlike item and is never used again within the enterprise.

"Serial number within the part, lot, or batch number" means a combination of numbers or letters assigned by the enterprise to an item that provides for the differentiation of that item from any other like item within a part, lot, or batch number assignment.

"Serialization within the enterprise identifier" means each item produced is assigned a serial number that is unique among all the tangible items produced by the enterprise and is never used again. The enterprise is responsible for ensuring unique serialization within the enterprise identifier.

"Serialization within the part, lot, or batch number" means each item of a particular part, lot, or batch number is assigned a unique serial number within that part, lot, or batch number assignment. The enterprise is responsible for ensuring unique serialization within the part, lot, or batch number within the enterprise identifier.

"Type designation" means a combination of letters and numerals assigned by the Government to a major end item, assembly or subassembly, as appropriate, to provide a convenient means of differentiating between items having the same basic name and to indicate modifications and changes thereto.

"Unique item identifier" means a set of data elements marked on items that is globally unique and unambiguous. The term includes a concatenated unique item identifier or a DoD recognized unique identification equivalent.

"Unique item identifier type" means a designator to indicate which method of uniquely identifying a part has been used. The current list of accepted unique item identifier types is maintained at https://www.acq.osd.mil/asda/dpc/ce/ds/unique-id.html .

(b) The Contractor shall deliver all items under a contract line, subline, or exhibit line item.

(c) *Unique item identifier.*

END OF ADDENDUM TO 52.212-1

ADDENDUM TO 52.212-2 - EVALUATION - COMMERCIAL PRODUCTS AND COMMERCIAL SERVICES

A. BASIS OF AWARD

1. Method: The Government will award a contract resulting from this solicitation to the responsible quoter whose quote conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors shall be used to evaluate quotes:
    - Factor I: Technical
    - Factor II: Price
2. Selection Process: Award will be made on the basis of the Lowest Priced Technically Acceptable (LPTA) quote. The evaluation process will proceed as follows:
    - Quotes will first be evaluated for Eligibility (SAM compliance) and, as applicable, Responsibility (Anti-Mafia documentation, for Italian offerors only). Quotes failing these checks will not be evaluated further.
    - Eligible quotes will be evaluated for Technical Acceptability (Factor I) on an "Acceptable/Unacceptable" basis. The Government reserves the right to evaluate for Technical Acceptability only the eligible Apparent Lowest Price Quote (ALPQ). The Government reserves the right not to evaluate other eligible quotes, if the eligible ALPQ is rated acceptable.
    - Quote(s) found technically acceptable will then be evaluated for Price (Factor II).

- Award will be made to the technically acceptable quoter with the lowest Total Evaluated Price.

B. EVALUATION

FACTORS FACTOR I -

TECHNICAL

Offerors are put on notice that:

a. The non-price factors will be evaluated on an "acceptable/unacceptable" basis.
b. The non-price factors are evaluated for acceptability.
c. The Offerors must provide all required information or the Quotation will not be considered.
d. In order to be eligible for an award, a Quotation shall be rated "ACCEPTABLE" on all non-price factors.
e. Before awarding, the Government will make a responsibility determination by analyzing whether the apparent successful Offeror complies with the requirements of RFO FAR subpart 9.104.
f. The following factors shall be used to evaluate Quotations:

FACTOR I - TECHNICAL
FACTOR II – PRICE

EVALUATION APPROACH: Non-price factors are evaluated on an Acceptable/Unacceptable basis, assigning ratings of "acceptable" or "unacceptable" as defined below

Rating	Description
Acceptable	The quote clearly meets the minimum requirements of the solicitation.
Unacceptable	The quote does not meet the minimum requirements of the solicitation.

In addition to the changes otherwise authorized by the changes clause of this contract, should the Force Protection Condition (FPCON) at any individual facility or installation change, the Government may require changes in contractor security matters or processes.

For contractors that do not require CACs, but require access to a DOD facility or installation. Contractor and all associated sub-contractors employees shall comply with adjudication standards and procedures using the National Crime Information Center Interstate Identification Index (NCIC-III) and Terrorist Screening Database (TSDB) (Army Directive 2014-05/AR 190-13), applicable installation, facility and area commander installation/facility access and local security policies and procedures (provided by government representative), or at OCONUS locations, in accordance with status of forces agreements and other theater regulations.

For Contracts That Require Performance or Delivery in a Foreign Country. DFARS 252.225-7043. The clause will be used in solicitations and contracts that require delivery in a foreign country. This clause applies to both contingencies and non-contingency support. The key AT requirement is for non-local national contractor personnel to comply with theater clearance requirements and allows the combatant commander to exercise oversight to ensure the contractor's compliance with combatant commander and subordinate task-force commander policy and directives.
