Section L	B.2.2.2 Sample Tasks	Sample Task 1 states the following: Hazard Risk Index (HRI) is rated as an 8 (Remote/Catastrophic). Per F/A-18 Tailored Matrix codified in the System Safety Program Plan (SSPP), the HRI should be a 6, Medium risk if it is Remote/Catastrophic. If the HRI is an 8, then per F/A-18 Tailored Matrix the risk would be Occasional/Critical. Please confirm which is correct or if an alternate risk matrix is being used for this sample task.	For the sample task, assume the initial risk is assessed as Serious, 1D (Catastrophic/Remote) using the Risk Assessment Matrix from Table 3 of MIL-STD-882E.
Section L	B.2.2.2 Sample Tasks	At what level is risk acceptance? Per the F/A-18 Tailored Matrix, for a HRI-6, Remote/Catastrophic, the risk would be Medium with risk acceptance at the PMA level. For a HRI-8 on the F/A-18 Tailored Matrix, Occasional/Critical, the risk would also be Medium with risk acceptance at the PMA level. Please confirm which is correct or if an alternate risk matrix is being used for this sample task and at what level is risk acceptance for this task.	For the sample task, assume the initial risk is assessed as Serious, 1D (Catastrophic/Remote) using the Risk Assessment Matrix from Table 3 of MIL-STD-882E.
