W911SF26RA008 SOLICITATION – PROPANE QUESTIONS & ANSWERS
17 JUN 2026

CLIN Pricing

QUESTION 1: Is CLIN 0001 (and corresponding option year delivery CLINs) intended to include all contractor costs associated with delivery, contract administration, transportation, subcontractor management, overhead, and profit?

ANSWER: Yes, this would be the contractors bid price for everything other than the cost of the propane, which would be covered under the OPIS CLIN

QUESTION 2: Is the contractor prohibited from adding any additional fuel, transportation, or environmental surcharges beyond the delivery CLIN pricing?

ANSWER: Yes, these charges should be covered under the bid price CLIN

OPIS Pricing

QUESTION 3: We understand that CLIN 0002 is a pricing placeholder and that all offerors are instructed to use the placeholder amount of **$2.25**. Will the Government reimburse the actual propane cost based solely on the published monthly OPIS index, or is any contractor markup permitted on the propane itself?

ANSWER: This CLIN is strictly for OPIS pricing.

Estimated Quantities

QUESTION 4: The schedule reflects an estimated quantity of **7,500 gallons** for Fort Benning and **7,500 gallons** for Camp Merrill. Are these annual estimated quantities, guaranteed minimum quantities, or estimated ordering quantities only?

ANSWER: This is only estimated quantity. Actual quantities will be dependent upon weather, etc...

Maintenance CLIN

QUESTION 5: For the Maintenance CLIN, should contractors provide a pricing schedule (labor rates, hourly rates, etc.), or will maintenance services be negotiated and authorized individually under the Not-to-Exceed provision?

ANSWER: Maintenance CLIN needs to be hourly rate based.

Subcontracting

QUESTION 6: May the prime contractor utilize a qualified local propane supplier as a subcontractor for fuel delivery and maintenance services, with the prime contractor remaining fully responsible for contract administration, invoicing, quality control, and overall contract performance?

ANSWER: Yes, subcontracting to a local propane provider for delivery services is acceptable. Prime will still hold all responsibility.
