STATEMENT OF REQUIREMENT

GE Ultrasound Venue Go

1. General Objectives

Overview The purpose of this project is to acquire and commission a GE Venue GO Ultrasound to assist with emergency department daily functions which include the flexibility to scan, diagnose and treat patients in the emergency department.

Background The KCVA emergency department requires a compact, adaptable bedside assessment ultrasound tool to perform fast and precise POCUS (point of care ultrasound) which is standard of care in emergency medicine. The GE Venue go helps physicians to quickly triage patients and determine a care pathway in emergency situations, can help in bedside intervention such as placement of central lines or peripheral IV's and enables confident diagnostic scans without ionizing radiation for complete evaluation.

2. Requirements

Description	Qty
Venue Go R5 Premier	1
3sc-Rs Phased Array Robe Wideband Phased Array Probe	1
L4-12t-Rs Linear Array Probe	1
C1-5-Rs Wideband Convex Array Probe (USA POC Only)	1
Venue Go Cart	1

3. Scope and methodology

• Procure one GE venue GO ultrasound and required accessories including three active probes accessible and in good condition.

• Verify site cleaning and infection-control efforts.

• Install and connect the probes, and fittings in accordance with the manufacturer's instructions.

• Perform startup and functional checks, and proper cleaning behavior.

• Provide operator training covering use, settings, safety precautions, shutdown, and routine maintenance.

4. Tasks and Associated Deliverables

Equipment delivery and inspection

• Task: Receive the GE Venue Go, and accessories; inspect for shipping damage and verify contents against the packing list and the existing KCVA configuration.

• Deliverable: Receiving and inspection report, including serial numbers and configuration details.

Installation and setup

• Task: Position the instrument, charge unit, and boot up per manufacturer guidance.

• Deliverable: Installation record noting completion without issues.

Startup and functional verification

• Task: Conduct trial runs with ultrasound scanning including training on use.

• Deliverable: Report any defects or missing components.

Documentation handover

• Task: Compile and transfer relevant documents to the customer, including manuals, quick reference procedures, and maintenance/consumables list, and indicate alignment with current KCVA validation and SOP documents.

• Deliverable: Documentation package (physical or electronic) and a list of recommended spare parts and consumables.
