- Is the contractor permitted to provide dental services in bordering states, such as those located in Bristol, TN? **Yes, as long as the SM is not driving more than 50 miles one way to receive treatment.**

- How many Soldiers in Southwest Virginia are currently classified as Dental Class 3? **30-35 Soldiers in the Southwest part of the State that are currently untreated and classified as DRC 3.**
- What CLIN (Contract Line Item Number) structure should we use for this requirement? **See attached pricing report as an example**
- How would the government like proposals to structure pricing?
    - Price per treatment service, if so can the government specify which treatments and services should be priced: **See attached pricing report as an example .**
- Some services listed in Appendix 5.1.10d require nitrous or IV sedation, but that procedure code is not listed. Can those procedures be added to the list? **No, SM will need to provide a clearance memo from their PCP if sedation is utilized.**
- Most dental offices today will not do amalgam procedures because of the protracted requirements on handling and disposal. Is the government satisfied with only composite-based restorative services? **If amalgam is available, please proceed with doing so. However, if amalgams are not available, the government will be satisfied with using composite-based restorative services.**
- Is a voucher fee, a line item per service member that is referred to the contractor for dental treatment, authorized in the pricing? **Yes**
- Does the government intend for this BPA to be awarded to one contractor or multiple contractors? **Only if it is in best interest of the government.**
