1 INTRODUCTION AND OVERVIEW

1.1 PURPOSE

The purpose of this Request for Proposal (RFP) (hereafter referred to as “solicitation” or “RFP”) is to obtain proposals from qualified bidders and secure a prime Contractor (System Integrator) to provide a System Development, Maintenance, and Operations (SDMO) solution for the California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS) Project.

The Affordable Care Act of 2010, known as federal health care reform, allowed states to establish Health Benefit Exchanges and provided the opportunity for states to expand Medicaid coverage for individuals to obtain affordable health care coverage. CalHEERS is an automated system that:

- Serves as the consolidated system support for eligibility, enrollment, and retention for the California Health Benefit Exchange (also known in the marketplace as Covered California) and the Medi-Cal Program for individuals subject to the use of Modified Adjusted Gross Income (MAGI).
- Streamlines the use of resources from which individuals can research, compare, check their eligibility for, and purchase health coverage.

The CalHEERS Project is sponsored by Covered California and the Department of Health Care Services (DHCS). The Office of Technology & Solutions Integration (OTSI) is responsible for overall project management. While the Project has a single point of management, it will be guided by the Project Sponsors, Program Partners, and its programmatic objectives.

The SDMO solution is defined as services, products, or a combination of products and services provided by the Contractor in support of the obligations and responsibilities required by the CalHEERS Contract (hereafter referred to as “Contract”). Key services include system development, ongoing maintenance, operation, and enhancement of the CalHEERS, reporting, and customer service.

Responses to this RFP will be evaluated based on the total proposal, and the award, if made, will be to a single bidder who is responsive, responsible, and awarded the highest scored points as calculated in accordance with the methodology defined in RFP Section 9, EVALUATION, of this RFP.

1.2 SCOPE OF SOLICITATION

This solicitation is being conducted under the policies and procedures developed by the CalHEERS Sponsor organizations, Covered California and the Department of Health Care Services (DHCS), per California Government Code (GC) 100505 and the Negotiation Process for the CalHEERS Project. The OTSI will be executing the Contract on behalf of the Sponsor organizations. Refer to RFP Section 2, RULES GOVERNING COMPETITION, for further instructions on the full set of requirements the bidder must comply with for this solicitation.

This solicitation contains the instructions governing the requirements for a proposal to be submitted by interested bidders. The format for how that proposal information is to be submitted and the material to be included therein follows. This solicitation also addresses the requirements that bidders must meet to be eligible for consideration, as well as addressing bidder responsibilities before and after Contract award.

1.2.1 Negotiation Process

This procurement is being conducted under California GC 100505 and a Negotiation Process. The following steps are included in the Negotiation Process:

Submission of bidder proposals, including cost;
Evaluation of proposals, as defined in RFP Section 9, EVALUATION;
During Evaluation, there may be opportunity for bidder discussion(s);
Negotiations (may include Key Staff interviews and oral presentations);
Best and Final Offer (BAFO) submission & evaluation, if requested;
Award of Contract.

1.2.2 Bidder Admonishment

This RFP contains the instructions governing the requirements for a firm quotation to be submitted by interested bidders. The format that the bid information is to be submitted in and the material to be included therein follows. This RFP also addresses the requirements that bidders must meet to be eligible for consideration.

IF A BIDDER EXPECTS TO BE AFFORDED THE BENEFITS OF THE STEPS INCLUDED IN THIS SOLICITATION, THE BIDDER MUST TAKE THE RESPONSIBILITY TO:

- Carefully read the entire solicitation.
- Attend the mandatory Bidders Conference.
- Submit written questions by the date noted in RFP Section 1.4, KEY ACTION DATES AND TIMES, if clarification is necessary.
- Submit all required responses, completed to the best of the bidder's ability, by the required dates and times.
- Ensure that all procedures and requirements of the solicitation are accurately followed and appropriately addressed.
- Carefully re-read the entire solicitation before submitting proposal.

1.2.3 Availability

The selected Bidder must meet the requirements of this solicitation and be available to start work on the Contract Execution date as determined by the Negotiation Process.

1.2.4 Financial Stability

In order to minimize the potential risk of default due to financial issues, the State reserves the right to request additional documentation during the RFP process and throughout the life of the awarded Contract.

1.2.5 Americans with Disabilities Act

To comply with the nondiscrimination requirements of the Americans with Disabilities Act, it is the policy of the State to make every effort to ensure that its programs, activities, and services are available to all persons, including persons with disabilities.

For persons with a disability needing a reasonable accommodation to participate in the procurement process, or for persons having questions regarding reasonable accommodations of the procurement process, you may contact the Procurement Official. Persons with a disability needing a reasonable accommodation may also contact the State using the California Relay Service telephone numbers listed below.

Important: To ensure that we can meet your need, it is best that we receive your request for reasonable accommodations at least ten (10) State business days before the scheduled event (e.g. meeting, conference, workshop, or deadline due date for procurement documents).

The California Relay Service telephone numbers are:

Voice: 1-800-735-2922 or 1-888-877-5379

TTY: 1-800-735-2929 or 1-888-877-5378

Speech to Speech: 1-800-854-7784

1.3 TERM OF CONTRACT

Effective upon approval of the OTSI, the initial term of the Contract resulting from this solicitation will be five (5) years (core term).

The Contract term shall commence upon receipt of required State and federal approvals, or the agreed upon start date, whichever is later.

The State, at its sole discretion, may exercise its option to execute five (5) one-year optional extensions for a maximum Contract term of ten (10) years.

1.4 KEY ACTION DATES AND TIMES

The Key Action Dates and Times in the following table contain the important actions, dates and times associated with this solicitation by which the actions must be taken or completed. If the State finds it necessary to change any of these dates prior to the submission of the proposal, it will be accomplished via an addendum to this solicitation.

Table 1-1: Key Action Dates and Times

KEY ACTION DATES		
Item #	Action	Date
1.	Release of Solicitation	9/17/2025
2.	Last day to submit questions for clarification of solicitation for Bidder's Conference	10/10/2025
3.	Mandatory Bidders Conference	10/15/2025
4.	Last day to submit: Intent to Bid (Appendix B-3, INTENT TO BID FORM) & Signed Confidentiality Statement (Appendix B-4, CONFIDENTIALITY STATEMENT FORM)	10/22/2025
<u>5.</u>	<u>Release of RFP Addendum 1</u>	<u>10/31/2025</u>
<u>6.</u>	<u>State issues response to bidder questions</u>	<u>10/31/2025</u>
<u>7.</u>	Last day to: Submit written questions or request for changes regarding the RFP prior to submittal of proposals (See Section 1.5.1)	11/ <u>17</u> /2025 <u>by 9 a.m. PT</u>
<u>8.</u>	State issues response to bidder questions and bidder requests for change to the RFP requirements	12/ <u>5</u> /2025
<u>9.</u>	<u>Release of RFP Addendum 2 (if needed)</u>	<u>12/5/2025</u>
<u>10.</u>	Last day to submit proposals	1/ <u>20</u> /2026 by <u>11 a.m. PT</u>
<u>11.</u>	Begin Evaluation Process	1/ <u>24</u> /2026 <u>Post Submission</u>
<u>12.</u>	Notification of Award ¹	<u>5/13/2026</u>
<u>13.</u>	Contract Award ¹	8/ <u>31</u> /2026
<u>14.</u>	Contract Execution ¹	<u>9/1</u> /2026
¹ All dates after submission of proposals are approximate and may be adjusted as conditions indicate without addendum to this solicitation. These dates will also be determined through the Negotiation Process.		

1.4.1 Mandatory Bidders Conference

A mandatory Bidders Conference will be held, during which prospective bidders will meet with State personnel and discuss the content of the solicitation and the procurement process. The time, date, and place of the conference are specified in Cal eProcure. Written questions received prior to the cutoff date for submission may be answered at the conference without divulging the source of the query.

Vendors who wish to submit a proposal in response to this RFP must attend the Bidders Conference in person. Proposals submitted by vendors who do not attend the Bidders Conference will be rejected.

If questions are asked at or before the conference, prospective bidders will be asked to submit the question(s) in writing to the Procurement Official, specified in RFP Section 1.5, PROCUREMENT OFFICIAL AND CONTACT INFORMATION. Answers to these questions will be published in a question-and-answer set. Oral responses shall not be binding on the State. A transcript of the Bidders Conference will not be created.

1.4.2 Intention to Bid

Vendors who intend to submit a proposal must submit a notification of Intent to Bid on this procurement in accordance with instructions provided in RFP Section 2, RULES GOVERNING COMPETITION.

Only those vendors acknowledging interest in this solicitation will continue to receive additional correspondence throughout this procurement.

- The letter should identify the contact person for the solicitation process, plus include an e-mail address, and phone number.
- See Appendix B-3, INTENT TO BID FORM.
- The State is responsible for notifying one (1) contact person per bidder. Information related to a bidder will be given to the designated contact person.
- It shall be the bidder's responsibility to immediately notify, in writing, the Procurement Official identified in RFP Section 1.5, PROCUREMENT OFFICIAL AND CONTACT INFORMATION, regarding any revision to the information.
- The State shall not be responsible for proposal correspondence not received by the bidder if the bidder fails to notify the State, in writing, about any change pertaining to the designated contact person.

1.5 PROCUREMENT OFFICIAL AND CONTACT INFORMATION

This procurement is conducted by the OTSI CalHEERS Procurement Team. Bidders are directed to communicate with the Procurement Official, as a single point of contact, to request access for RFP related materials, proposals, and all other formal correspondence regarding this procurement. The Procurement Official and the mailing address for that official are listed below.

1.5.1 General E-mail Inquiries

All inquiries should be sent electronically, unless otherwise specified in this solicitation, to:

Alina Corpus, Procurement Official
Office of Technology and Solutions Integration
Phone: (916) 634-2905
E-mail: CalHEERSProcurement@otsi.ca.gov

1.5.2 Deliveries by Mail

Alina Corpus

CalHHS, Office of Technology & Solutions Integration (OTSI)

California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS)

2329 Gateway Oaks, Suite 250

Sacramento, CA 95833

1.5.3 Access to Bidders' Library/Submit RFP Question or Request for Change

To obtain a User ID and password for RFP related materials (Bidders' Library), the ability to submit questions, and/or the ability to submit a request for change, bidders must sign and submit Appendix B-4, CONFIDENTIALITY STATEMENT FORM and Appendix B-5, ACCESS AUTHORIZATION FORM to the Procurement Official.

It is the bidder's responsibility to provide the Procurement Official the required documentation to obtain a User ID and password for SharePoint access. The bidder must identify a single point of contact, e-mail, street address, and phone number. The User ID, password, and instructions will be provided to the single company contact within five (5) State business days after receipt of required documentation.

This will be the sole method for bidders to submit RFP questions, clarifications, and/or Request for Change. If questions, clarifications, and/or Request for Change are submitted using another method, bidders will be redirected to the SharePoint site.

1.6 BIDDERS' LIBRARY

1.6.1 Use and Purpose

The State will make available a Bidders' Library containing reference documentation that bidders may review and use to prepare its proposals. The State will provide updated information as it becomes available during the course of the solicitation. The State will ensure the latest documents are provided in the Bidders' Library.

Bidders are encouraged to review the information in the Bidders' Library to gain a thorough understanding of CalHEERS and the SDMO effort in the business and technical environments in which it operates. It is each bidder's responsibility to check for updates to the Bidders' Library. Bidders are advised to review and use the CalHEERS architecture and technical composition data provided in the bidders' library for the development of their proposals and are cautioned against using external sources of information or making assumptions about the system without reaching out to the State for confirmation in the form of a submitted question to the procurement official identified in RFP Section GENERAL 1.5.1 E-MAIL INQUIRIES ~~4.5.4~~ above. It is the responsibility of bidders to contact the Procurement Official for a User ID, password, and link for access to the Bidders' Library. Bidders should check back frequently for updates to the Bidders' Library. Bidders are strictly forbidden to share access information with anyone.

2 RULES GOVERNING COMPETITION

2.1 IDENTIFICATION AND CLASSIFICATION OF REQUIREMENTS

2.1.1 Requirements

The State has established certain requirements with respect to proposals to be submitted by prospective bidders. The use of "shall," "must," or "will" (except to indicate simple futurity) in the RFP indicates a requirement or condition which is Mandatory. A deviation, if not material, may be waived by the State. A deviation from a requirement is material if the deficient response is not in substantial accord with the RFP requirements, provides an advantage to one bidder over other bidders, or has a potentially significant effect on the delivery, quantity or quality of items proposed, amount paid to the vendor, or on the cost to the State. Material deviations cannot be waived.

2.1.2 Desirable Items

The words "should" or "may" in the RFP indicate desirable attributes or conditions but are nonmandatory in nature. Deviation from, or omission of, such a desirable feature, even if material will not in itself cause rejection of the proposal.

2.2 BIDDING REQUIREMENTS AND CONDITIONS

2.2.1 General

This RFP, the evaluation of responses, and the award of any resultant contract shall be made in conformance with current competitive bidding procedures as they relate to the procurement of goods and services by public bodies in the State of California.

2.2.2 Irrevocable Offer

A bidder's Final Proposal is an irrevocable offer for 180 calendar days following the scheduled date for submission of Final Proposal or Best and Final Offer (BAFO). A Bidder may extend the offer in the event of a delay of contract award.

2.2.3 RFP Document

This RFP includes, in addition to an explanation of the State's requirements, which must be met, instructions which prescribe the format and content of proposals to be submitted and the model of the contract to be executed between the State and the successful Bidder. Refer to the following RFP sections for the full scope of Bidder requirements:

- Section 1, INTRODUCTION & OVERVIEW
- Section 2, RULES GOVERNING COMPETITION
- Section 5, ADMINISTRATIVE REQUIREMENTS
- Section 6, BIDDER REQUIREMENTS
- Section 7, COST
- Section 8, PROPOSAL FORMAT
- Section 9, EVALUATION

If a bidder discovers any ambiguity, conflict, discrepancy, omission, or other error in this RFP, the bidder shall immediately notify of such error in writing and request clarification or modification of the document. Refer to RFP Section 1.5.3, ACCESS TO BIDDERS'

LIBRARY/SUBMIT RFP QUESTION OR REQUEST FOR CHANGE on how to request access with the Procurement Official.

This solicitation document is an RFP, the word "proposal" as used throughout is intended to mean "proposed," "propose" or "proposal" as appropriate. Modifications will be made by addenda issued pursuant to the Addenda Section below. Such clarifications shall be given by written notice to all vendors who have identified themselves as bidders to the Procurement Official identified in RFP Section 1, INTRODUCTION & OVERVIEW, without divulging the source of the request for same. Insofar as practicable, the State will give such notices to other interested vendors, but the State shall not be responsible therefore.

If the RFP contains an error known to the Bidder, or an error that reasonably should have been known, the bidder shall propose at its own risk. If the Bidder fails to notify the State of the error prior to the date fixed for submission of proposals, and is awarded the contract, the Bidder shall not be entitled to additional compensation or time by reason of the error or its later correction.

2.2.4 Examination of Work

The bidder should carefully examine the entire RFP and any addenda thereto, and all related materials and data referenced in the RFP or otherwise available to the bidder and should become fully aware of the nature and location of the work, the quantities of the work, and the conditions to be encountered in performing the work.

2.2.5 Questions Regarding the RFP

2.2.5.1 ~~2.2.4.1~~ Clarification Questions

Bidders requiring clarification of the intent or content of this RFP or on procedural matters regarding the competitive proposal process may request clarification by submitting questions in our SharePoint site. Refer to RFP Section 1.5.3, ACCESS TO BIDDERS' LIBRARY/SUBMIT RFP QUESTION OR REQUEST FOR CHANGE on how to request access with the Procurement Official.

This will be the sole method for bidders to submit RFP questions, clarifications, and/or Request for Change. If questions, clarifications, and/or Request for Change are submitted using another method, bidders will be redirected to the SharePoint site.

Question and Answer (Q&A) sets will be provided to all bidders without identifying the submitters. At the sole discretion of the State, questions may be paraphrased by the State for clarity. These will be posted on Cal eProcure.

2.2.5.2 ~~2.2.4.2~~ Confidential Questions

A bidder who desires clarification or further information on the content of the RFP, but whose questions relate to the proprietary aspect of that bidder's proposal and which, if disclosed to other bidders, would expose that bidder's proposal, may submit such questions in the same manner as above, but also marked "CONFIDENTIAL," and not later than the scheduled date identified in RFP Section 1.4, KEY ACTION DATES AND TIMES, to ensure a response.

The bidder must explain why any questions are sensitive in nature. If the State concurs that the disclosure of the question or answer would expose the bidder's proprietary information, the question will be answered, and both the question and answer will be kept in confidence. If the State does not concur with the proprietary aspect of the question, the question will not be answered in this manner and the bidder will be so notified.

2.2.5.3 ~~2.2.4.3~~ Requests for Changes to RFP Requirements

If the bidder believes that one or more of the RFP requirements is onerous, unfair, or imposes unnecessary constraints to the bidder in proposing less costly or alternate solutions, the bidder may request a change to the RFP in the same manner as above, Clarification Questions. This will be the sole method for bidders to submit RFP questions, clarifications, and/or Request for Change. If questions, clarifications, and/or Request for Change are submitted using another method, bidders will be redirected to the SharePoint site.

The bidder must explain the recommended change(s), facts substantiating this belief, and reasons for making the recommended change. Refer to RFP Section 1.5.3, ACCESS TO BIDDERS' LIBRARY/SUBMIT RFP QUESTION OR REQUEST FOR CHANGE on how to submit such request. The State, at its sole discretion, will determine if the recommended changes will be accepted.

Request for changes and State's response will be published as a Q&A set.

Oral answers shall not be binding on the State.

2.2.6 Mandatory Bidders Conference

A mandatory Bidders Conference will be held, during which prospective bidders will be afforded the opportunity to meet with State personnel and discuss the content of the RFP and the procurement process.

- The time, date, and place of such conference is specified in Cal eProcure.
- Written questions received prior to the cutoff date for submission of such questions may be answered at the conference without divulging the source of the query.
- The State may also accept oral questions during the conference and will make a reasonable attempt to provide answers prior to the conclusion of the conference.
- If questions asked at the conference cannot be adequately answered during the discussion bidders will be asked to submit the questions(s) in writing to the Procurement Official.
- Answers will be published in a Q&A set. Oral answers shall not be binding on the State.

2.2.7 Intention to Bid

Vendors who would like to participate in the bidding process are required to state their intention by the date specified in RFP Section 1.4, KEY ACTION DATES AND TIMES with respect to submission of proposals.

The State is also interested as to a vendor's reason(s) for not submitting a proposal. For example, requirements that cannot be met or unusual terms and conditions that arbitrarily raise costs. Vendors who are not intending to participate in the bidding process are asked to share their reasons by the date specified in RFP Section 1.4, KEY ACTION DATES AND TIMES.

If a vendor intends to submit a bid, the letter should include the additional information identified in RFP Section 1.4.2, INTENTION TO BID. If vendors have indicated significant problems with the RFP requirements, the State will examine the stated reasons for the problems and will attempt to resolve any issues in contention, if not contrary to the State's interest, and will amend the RFP if appropriate. All suppliers who have submitted an intention will be advised by the State of any actions taken as a result of the suppliers' responses.

Hereafter, for the purposes of the instructions of this RFP, all vendors who have indicated their intent to submit a proposal are called bidders until such time that the bidder withdraws, or other

facts indicate that the bidder has become nonparticipating. Should a bidder not participate in a bid step, the State reserves the right to remove them from the participating bidder list and they will not receive any further correspondence until they contact the Procurement Official to indicate that they would like further correspondence.

2.2.8 Addenda

The State may modify the RFP prior to the date fixed for Contract Award by issuance of an addendum. Addenda will be numbered consecutively and posted to Cal eProcure. If any bidder determines that an addendum unnecessarily restricts its ability to propose, the bidder is allowed five (5) business days to submit a Request for Change to the addendum.

2.2.9 Bonds

The State reserves the right to require a faithful performance bond or other security document as specified in the RFP from the bidder in an amount not to exceed the amount of the contract. In the event a surety bond is required by the State that has not been expressly required by the specification, the State will reimburse the bidder, as an addition to the purchase price, in an amount not exceeding the standard premium on such bond.

2.2.10 Discounts

In connection with any discount offered, except when provision is made for a testing period preceding acceptance by the State, time will be computed from date of delivery of the supplies or equipment as specified, or from date correct invoices are received in the office specified by the State if the latter date is later than the date of delivery. When provision is made for a testing period preceding acceptance by the State, date of delivery shall mean the date the supplies or equipment are accepted by the State during the specified testing period. Payment is deemed to be made, for the purpose of earning the discount, on the date of mailing the State warrant or check.

Cash discounts offered by bidders for the prompt payment of invoices will not be considered in evaluating offers for award purposes; however, all offered discounts will be taken if the payment is made within the discount period, even though not considered in the evaluation of offers.

2.2.11 Loss Leader

“Loss leader” is defined in section 17030 of the California Business and Professions Code (BPC) as any article or product sold at less than cost: (a) Where the purpose is to induce, promote or encourage the purchase of other merchandise; or (b) Where the effect is a tendency or capacity to mislead or deceive purchasers or prospective purchasers; or (c) Where the effect is to divert trade from or otherwise injure competitors.

It is unlawful for any person engaged in business within this State to sell or use any article or product as a “loss leader” as defined in section 17030 of the California Business and Professions Code.

2.2.12 Joint Venture Submittals

As applied to this RFP, the term “joint venture” means is a partnership between the persons or companies formed for the purpose of submitting a proposal and of performing the Contract if one is awarded to the joint venture.

If the Contract is awarded to a joint venture, it shall be one indivisible contract. The joint bidders must designate, in writing, one individual having authority to represent them in all matters relating to the contract that will be solely liable for the performance of the entire contract. The State assumes no responsibility or obligation for the division of orders or purchases among joint bidders.

2.2.13 Fair Employment and Housing Commission Regulations

California Government Code section 12990 requires all State bidders to have implemented a Nondiscrimination Program before entering into any contract with the State. The Civil Rights Department randomly selects and reviews State bidders to ensure their compliance with the law. The Civil Rights Department periodically disseminates a list of vendors who have not complied. Any vendor so identified is ineligible to enter into any State contract.

2.2.14 Exclusion of Conflict of Interest

No consultant shall be paid out of State funds for developing recommendations on the acquisition of information technology (IT) products or services or assisting in the preparation of a feasibility study if that consultant is to be a source of such acquisition or could otherwise directly and/or materially benefit from State adoption of such recommendations or the course of action recommended in the feasibility study. Further, no consultant shall be paid out of State funds for developing recommendations on the disposal of State surplus IT products if that consultant would directly and/or materially benefit from State adoption of such recommendations.

2.2.15 Seller's Permit

This RFP is subject to all requirements set forth in sections 6452, 6487, 7101 and 18510 of the Revenue and Taxation Code, and section 10295.1(b) of the California Public Contract Code, requiring bidders to provide a copy of their California seller's permit or certification of registration, and, if applicable, the permit or certification of all participating affiliates issued by the California Department of Tax & Fee Administration (CDTFA). Unless otherwise specified in this RFP, a copy of the bidder's seller's permit or certification of registration, and, if applicable, the permit or certification of all participating affiliates, must be submitted within five (5) State business days of the State's request. Failure of the bidder to comply by supplying the required documentation will cause the bidder's proposal to be considered ~~nonresponsive~~ [non-responsive](#) and the proposal rejected.

2.2.16 Disclosure of Financial Interests

Proposals in response to State procurements for assistance in preparation of feasibility studies or the development of recommendations for the acquisition of IT products and services must disclose any financial interests (e.g., service contract, Original Equipment Manufacturer (OEM) agreements, remarketing agreements) that may foreseeably allow the individual or organization submitting the proposal to materially benefit from the State's adoption of a course of action recommended in the feasibility study or the acquisition recommendations. If, in the State's judgment, the financial interest will jeopardize the objectivity of the recommendations, the State may reject the proposal.

2.2.17 Unfair Practices Act and Other Laws

Bidder warrants that its proposal complies with the Unfair Practices Act (California Business and Professions Code section 17000 et seq.) and all applicable State and Federal laws and

regulations.

2.2.18 Plastic Trash Bag Certification Violations

California Public Resources Code section 42290 et seq. prohibits the State from contracting with any vendor, manufacturer, or wholesaler, and any of its divisions, subsidiaries, or successors that have been determined to be noncompliant to the recycled content plastic trash bag certification requirements. This includes award of a State contract or subcontract or renewal, extension, or modification of an existing contract or subcontract. Prior to award the State shall ascertain if the intended awardee or proposed Subcontractor is a business identified on the current California Integrated Waste Management Board noncompliant list(s). In the event of any doubt of the status or identity of the business in violation, the State will notify the California Integrated Waste Management Board of the proposed award and afford the California Integrated Waste Management Board the opportunity to advise the State. No award will be made when either the bidder or a Subcontractor has been identified either by published list or by advice from the California Integrated Waste Management Board, to be in violation of certification requirements.

2.2.19 Air or Water Pollution Violations

Unless the contract is less than \$25,000 or with a noncompetitively bid contractor, California Government Code section 4477 prohibits the State from contracting with a person, including a corporation or other business association, who has been determined to be in violation of any state or federal air or water pollution control law.

Prior to an award, the State shall ascertain if the intended awardee is a person included in notices from the Boards. In the event of any doubt of the intended awardee's identity or status as a person who is in violation of any state or federal air or water pollution law, the State will notify the appropriate Board of the proposed award and afford the Board the opportunity to advise the Department that the intended awardee is such a person.

No award will be made to a person who is identified either by the published notices or by advice, as a person in violation of state or federal air or water pollution control laws.

2.3 BIDDING STEPS

2.3.1 Negotiations

The State of California reserves the right to negotiate. This solicitation is being conducted under the policies and procedures, per California Government Code section 100505 and the Negotiation Process. The purpose of the Negotiation Process is to maximize the State's ability to obtain a best value solution, based on the requirements and the evaluation factors set forth in the solicitation.

2.3.2 Compliance Phase (Not Applicable)

2.3.3 Confidentiality

THE CONTENTS OF ALL PROPOSALS, CORRESPONDENCE, AGENDA, MEMORANDA, WORKING PAPERS, OR ANY OTHER MEDIUM WHICH DISCLOSES ANY ASPECT OF A BIDDER'S PROPOSAL SHALL BE HELD IN THE STRICTEST CONFIDENCE UNTIL CONTRACT EXECUTION. BIDDERS SHOULD BE AWARE THAT MARKING A DOCUMENT "CONFIDENTIAL" OR "PROPRIETARY" IN A PROPOSAL MAY EXCLUDE IT FROM CONSIDERATION FOR AWARD AND WILL NOT KEEP THAT DOCUMENT FROM BEING

RELEASED AFTER NOTICE OF AWARD AS PART OF THE PUBLIC RECORD, UNLESS A COURT HAS ORDERED THE STATE NOT TO RELEASE THE DOCUMENT. THE CONTENT OF ALL WORKING PAPERS AND DISCUSSIONS RELATING TO THE BIDDER'S PROPOSAL SHALL BE HELD IN CONFIDENCE INDEFINITELY UNLESS THE PUBLIC INTEREST IS BEST SERVED BY AN ITEM'S DISCLOSURE BECAUSE OF ITS DIRECT PERTINENCE TO A DECISION, AGREEMENT OR THE EVALUATION OF THE PROPOSAL. ANY DISCLOSURE OF CONFIDENTIAL INFORMATION BY THE BIDDER IS A BASIS FOR REJECTING THE BIDDER'S PROPOSAL AND RULING THE BIDDER INELIGIBLE TO FURTHER PARTICIPATE. ANY DISCLOSURE OF CONFIDENTIAL INFORMATION BY A STATE EMPLOYEE IS A BASIS FOR DISCIPLINARY ACTION, INCLUDING DISMISSAL FROM STATE EMPLOYMENT, AS PROVIDED BY CALIFORNIA GOVERNMENT CODE SECTION 19570 ET SEQ. TOTAL CONFIDENTIALITY IS PARAMOUNT; IT CANNOT BE OVER EMPHASIZED.

2.3.4 Submission of Proposals

The instructions contained herein apply to the Bidder's Proposal. The Proposal must be complete, including all cost information and required signatures.

2.3.4.1 ~~2.3.4.1~~—Preparation

Proposals are to be prepared in such a way as to provide a straightforward, concise delineation of capabilities to satisfy the requirements of this RFP. Expensive bindings, colored displays or promotional materials are not necessary or desired. EMPHASIS SHOULD BE CONCENTRATED ON CONFORMANCE TO THE RFP INSTRUCTIONS, RESPONSIVENESS TO THE RFP REQUIREMENTS, AND ON COMPLETENESS AND CLARITY OF CONTENT.

2.3.4.2 ~~2.3.4.2~~—Bidder's Cost

Costs for developing proposal are the responsibility entirely of the bidder and shall not be chargeable to the State.

2.3.4.3 ~~2.3.4.3~~—Completion of Proposals

Proposals must be complete in all respects as required by RFP Section 8, PROPOSAL FORMAT. A proposal may be rejected if it is conditional or incomplete, or if it contains any alterations of form or other irregularities of any kind. A proposal must be rejected if any such defect or irregularity constitutes a material deviation from the RFP requirements. The proposal must contain all costs required by RFP Section 7, COST, setting forth a unit price and total price for each unit price item, and a total price for each lump sum price item in the schedule, all in clearly legible figures.

2.3.4.4 ~~2.3.4.4~~—False or Misleading Statements

Proposals that contain false or misleading statements, or that provide references that do not support an attribute or condition claimed by the bidder, may be rejected. If, in the opinion of the State, such information was intended to mislead the State in its evaluation of the proposal, and the attribute, condition, or capability is a requirement of this RFP, it will be the basis for rejection of the proposal.

2.3.4.5 ~~2.3.4.5~~—Signature of Proposal

The bidder must submit a cover letter (which shall be considered an integral part of the proposal) on the company's official letterhead that includes a statement that substantiates that

the individual who signs the letter is authorized to bind the bidding firm contractually and a statement that the bidder commits to fulfilling the requirements of the RFP. The signature block must indicate the title or position that the individual holds in the firm. An unsigned proposal may be rejected.

2.3.4.5.1 Electronic Signatures

Each party of this Proposal agrees to the use of electronic signatures, such as digital signatures that meet the requirements of the California Uniform Electronic Transactions Act (“CUETA”) Cal. Civ. Code §§ 1633.1 to 1633.17), for executing this Proposal. The parties further agree that the electronic signatures of the parties included in this Proposal are intended to authenticate this writing and to have the same force and effect as manual signatures. Electronic signature means an electronic sound, symbol, or process attached to or logically associated with an electronic record and executed or adopted by a person with the intent to sign the electronic record pursuant to the CUETA as amended from time to time. The CUETA authorizes use of an electronic signature for transactions and contracts among parties in California, including a government agency. Digital signature means an electronic identifier, created by computer, intended by the party using it to have the same force and effect as the use of a manual signature, and shall be reasonably relied upon by the parties. For purposes of this section, a digital signature is a type of “electronic signature” as defined in subdivision (h) of Section 1633.2 of the Civil Code.

2.3.4.6 ~~2.3.4.6~~—Delivery of Proposals Email Submissions

The Proposal must be delivered physically and electronically to the Procurement Official (listed in RFP Section 1, INTRODUCTION & OVERVIEW).

Electronic submissions of the Proposal must be sent to the Procurement Official’s email address at: **CalHEERSProcurement@otsi.ca.gov**

For procurement purposes, emailed responses will be considered properly “sealed” if received prior to the time and date specified in Section 1.4, KEY ACTION DATES AND TIMES.

Solicitation responses sent to any other email will not be considered. If necessary, multiple emails can be submitted as long as the subject of the email contains, “Part X of Y” (X identifies the number assigned to this email, and Y identifies the total number of emails expected).

Physical submission of the Proposal shall be mailed or delivered to the Procurement Official (listed in RFP Section 1, INTRODUCTION & OVERVIEW). If mailed, it is suggested that you use certified or registered mail with return receipt requested as delivery of documents is at the Bidder’s own risk of untimely delivery, lost mail, etc.

The complete Proposal must be submitted in the number of copies indicated in the RFP Section 8.2, PROPOSAL CONTENT and no later than the dates and times specified in RFP Section 1.4, KEY ACTION DATES AND TIMES. One copy must be clearly marked “Master.” The overall package shall be sealed, labeled, and properly identified as outlined in RFP Section 8.6.6, PACKAGING AND LABELING. Bidders should be aware that marking the proposal “confidential” or “proprietary” may exclude it from consideration for award. Proposals, both electronic and physical, not postmarked or received by the date and time specified in RFP Section 1.4, KEY ACTION DATES AND TIMES, or not sealed, will be rejected. Proposals submitted under improperly marked covers may be rejected. If discrepancies are found between two or more copies of the proposal, the proposal may be rejected. However, if not so rejected, the Master Copy will provide the basis for resolving such discrepancies. If one copy of the

proposal is not clearly marked "Master Copy," the State may reject the Proposal; however, the State may at its sole option select, immediately after proposal opening, one copy to be used as the Master Copy.

2.3.4.7 ~~2.3.4.7~~—Withdrawal and Resubmission/Modification of Proposals

A bidder may withdraw its proposal at any time prior to the proposal submission date and time specified in RFP Section 1.4, KEY ACTION DATES AND TIMES, by submitting a written notification of withdrawal signed by the bidder authorized in accordance with ~~Paragraph Subsection 2.3.4.5, Signature~~ SIGNATURE OF Proposal ~~PROPOSAL~~, to the Procurement Official. The bidder may thereafter submit a new or modified proposal prior to such proposal submission date and time. Modification offered in any other manner, oral or written, will not be considered. Other than as allowed by law, proposals cannot be changed or withdrawn after the date and time designated for receipt, except as provided in this section.

2.3.5 Rejection of Proposals

The State may reject any or all proposals and may waive any immaterial deviation or defect in a proposal. The State's waiver of any immaterial deviation or defect shall in no way modify the RFP documents or excuse the bidder from full compliance with the RFP specifications if awarded the contract.

2.3.6 Evaluation and Selection Process

Proposals will be evaluated according to the procedures contained in the RFP Section 9, EVALUATION. This process may also apply as the State continues negotiations with up to the three (3) highest scored Proposals and the possible submission of a bidder(s)' Best and Final Offer (BAFO). Upon completing the evaluation of the BAFOs, final selection will be determined on the responsive and responsible bidder submitting the Highest Total Scored bid, after preferences and incentives are considered. The State reserves the right at any time to reject any or all proposals.

2.3.6.1 ~~2.3.6.1~~—Evaluation Questions

During the evaluation and selection process, the State may desire the presence of a bidder's representative for answering specific questions, orally and/or in writing. During the evaluation of Proposals, the State may ask the bidder to clarify their submitted information.

2.3.6.2 ~~2.3.6.2~~—Errors in the Proposal

An error in the proposal may cause the rejection of that proposal; however, the State may at its sole option retain the proposal and make certain corrections.

In determining if a correction will be made, the State will consider the conformance of the proposal to the format and content required by the RFP, and any unusual complexity of the format and content required by the RFP.

1. If the Bidder's intent is clearly established based on review of the complete proposal submittal, the State may at its sole option correct an error based on that established intent.
2. The State may at its sole option correct obvious clerical errors.
3. The State may at its sole option correct discrepancy and arithmetic errors on the basis that if intent is not clearly established by the complete proposal submittal the Master

Copy shall have priority over additional copies, the proposal narrative shall have priority over the contract, the contract shall have priority over the cost sheets, and within each of these, the lowest level of detail will prevail. If necessary, the extensions and summary will be recomputed accordingly, even if the lowest level of detail is obviously misstated. The total price of unit-price items will be the product of the unit price and the quantity of the item. If the unit price is ambiguous, unintelligible, uncertain for any cause, or is omitted, it shall be the amount obtained by dividing the total price by the quantity of the item.

4. The State may at its sole option correct errors of omission, and in the following four situations, the State will take the indicated actions if the bidder's intent is not clearly established by the complete proposal submittal.
 - a) If an item is described in the narrative and omitted from the contract and cost data provided in the proposal for evaluation purposes, it will be interpreted to mean that the item will be provided by the bidder at no cost.
 - b) If a minor item is not mentioned at all in the proposal and is essential to satisfactory performance, the proposal will be interpreted to mean that the item will be provided at no cost.
 - c) If a major item is not mentioned at all in the proposal, the proposal will be interpreted to mean that the bidder does not intend to supply that item.
 - d) If a major item is omitted, and the omission is not discovered until after contract award, the bidder shall be required to supply that item at no cost.

The determination of whether an item is minor or major is the responsibility of the State.

5. If a bidder does not follow the instructions for computing costs not related to the contract (e.g., State personnel costs), the State may reject the proposal, or at its sole option, recompute such costs based on instructions contained in the RFP.

If the re-computations or interpretations, as applied in accordance with this section, Subsection 2.3.6.2, ERRORS IN THE PROPOSAL, result in significant changes in the amount of money to be paid to the bidder (if awarded the contract) or in a requirement of the Bidder to supply a major item at no cost, the Bidder will be given the opportunity to promptly establish the grounds legally justifying relief from its proposal.

IT IS ABSOLUTELY ESSENTIAL THAT BIDDERS CAREFULLY REVIEW THE COST ELEMENTS IN THEIR FINAL PROPOSAL, SINCE THEY WILL NOT HAVE THE OPTION TO CORRECT ERRORS AFTER THE TIME FOR SUBMITTAL.

In the event an ambiguity or discrepancy between the general requirements described in RFP Section 4, PROPOSED SYSTEM and the specific bidder requirements set forth in RFP Section 6, BIDDER REQUIREMENTS is detected after the opening of proposals, RFP Section 6, BIDDER REQUIREMENTS and the bidder's response thereto, shall have priority over RFP Section 4, PROPOSED SYSTEM and the bidder's response thereto. Refer to prior SubParagraph-section 2.2.2, RFP document, regarding immediate notification to State contact when ambiguities, discrepancies, omissions, etc., are discovered.

At the State's sole discretion, it may declare the Proposal(s) to be a draft Proposal(s) in the event that the State determines that Proposals from all bidders contain material deviations, or if it is in the best interest of the State. If draft Proposals are declared, the State may issue an addendum to the RFP. Should this occur, confidential discussions will be held with bidders who are interested in continuing to be considered. Each bidder will be notified of the due date for the submission of a new Proposal to the State. This submission must conform to the requirements of the original RFP as amended by any subsequent addenda. The new Proposals will be

evaluated as required by RFP Section 9, EVALUATION.

2.3.7 Protests

This procurement process does not include any provisions to protest either the process or resulting contract award(s). An unsuccessful Bidder may file a petition for a writ of mandate in accordance with Section 1085 of the California Code of Civil Procedure. The venue for the petition for a writ of mandate will be Sacramento, California.

2.3.8 Award of Contract

Award of contract, if made, will be in accordance with RFP Section 9, EVALUATION, to a responsible bidder whose proposal complies with all the requirements of the RFP documents and any addenda thereto, except for such immaterial defects as may be waived by the State. Award, if made, will be made within 90 calendar days after the scheduled date for Contract Award specified in RFP Section 1, INTRODUCTION & OVERVIEW, however, a bidder may extend the offer beyond 90 days in the event of a delay of contract award.

The State reserves the right to determine the successful bidder(s) either on the basis of individual items or on the basis of all items included in its RFP, unless otherwise expressly provided in the State's RFP. Unless the bidder specifies otherwise in its proposal, the State may accept any item or group of items of any proposal. The State reserves the right to modify or cancel in whole or in part its RFP.

Written notification of the State's award will be made to all bidders submitting a proposal.

2.3.9 Debriefing

A debriefing may be held after contract award at the request of any Bidder for the purpose of receiving specific information concerning the evaluation. The discussion will be based on the evaluations of the bidder's proposal. A debriefing is not the forum to challenge the RFP specifications or requirements.

2.4 CONTRACTUAL INFORMATION

2.4.1 Contract Form

The State has model contract forms to be used by State agencies when contracting for information technology (IT) goods and services. The model contract(s) appropriate for the specific requirements of this RFP are included in the RFP.

2.4.2 Specific Terms and Conditions (Not applicable)

2.4.3 Approval of Proposed Contract

The State will, at any time after submission of the Proposals or as outlined in the RFP Section 9, EVALUATION, negotiate changes to the Contract pursuant to California Government Code section 100505 and the Negotiation Process. The State, at its sole discretion, may choose to negotiate with all bidders if it is in the State's best interest. A vendor who intends to submit a Proposal on this RFP must submit its Proposal to the State in accordance with the schedule contained in RFP Section 1.4, KEY ACTION DATES AND TIMES.

2.4.4 Contacts for Information

Bidders may contact the Procurement Official listed in RFP Section 1, INTRODUCTION &

OVERVIEW to request visits to the physical installation for purposes of familiarization and evaluation of the current processes. Visits shall be made by appointment only, during normal business hours, and will be limited to the Procurement Official listed in RFP Section 1, INTRODUCTION & OVERVIEW or the Official's designee. Visits may be permitted based at the State's discretion, and to the extent that they do not unduly interfere with the conduct of State business.

Oral communications of department officers and employees concerning this RFP shall not be binding on the State and shall in no way excuse the bidder of any obligations set forth in this RFP.

3 CURRENT SYSTEM

3.1 INTRODUCTION

This section of the solicitation provides an overview of the current California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS) Project and the system that was implemented by the project. The CalHEERS Project is a cloud-based solution that supports eligibility, enrollment, and retention for consumers for healthcare affordability programs in the state of California. It is jointly sponsored by the California Health Benefit Exchange (Covered California) and the Department of Health Care Services (DHCS). The CalHEERS is an integrated and automated system that:

- Acts as the single streamlined application for the eligibility, enrollment, and retention of consumers into a health care insurance affordability programs, including:
 - o Modified Adjusted Gross Income (MAGI) Medi-Cal
 - o Children's Health Insurance Program (CHIP), which includes the Medi-Cal Access Program (MCAP)
 - o Advanced Premium Tax Credit (APTC)
 - o Cost Sharing Reductions (CSR) and CSR Surcharge Plans
 - o Unsubsidized Coverage
 - o Family Planning, Access, Care and Treatment (FPACT)
- Provides a user-friendly resource for families and individuals seeking to determine their eligibility for affordability programs, evaluate, select, enroll in, purchase, and maintain healthcare coverage.

3.1.1 Background

Two federal laws, at the highest level, govern the activities of the CalHEERS: the Patient Protection and Affordable Care Act (PPACA or ACA), signed into law on March 23, 2010, and the Health Care and Education Reconciliation Act of 2010, signed into law on March 30, 2010. The federal ACA provided the opportunity for the development of state-based exchanges as “a mechanism for organizing the health insurance marketplace to help consumers and small businesses shop for coverage in a way that permits easy comparison of available plan options based on price, benefits, services, and quality.” Federal and state goals for health insurance marketplaces include streamlining access to increase efficiency, avoiding adverse selection, ensuring continuity of care, consumer education via public outreach and stakeholder engagement, and ensuring public and financial accountability via transparency.

In the fall of 2010, California enacted the first state law in the nation establishing a health benefit exchange under the Affordable Care Act, the California Patient Protection and Affordable Care Act (CPPACA). The CPPACA included legislative intent for the creation of the Exchange to:

- Reduce the number of uninsured Californians by creating an organized, transparent marketplace for Californians to purchase affordable, quality health care coverage, to claim available federal and state tax credits, cost-sharing subsidies, and to meet the personal responsibility requirements imposed under the federal act.
- Strengthen the health care delivery system.
- Guarantee the availability and renewability of health care coverage through the private health insurance market to qualified individuals and qualified small employers.
- Serve as an active purchaser, including creating competitive processes to select participating carriers and other contractors.
- Require that health care service plans and health insurers (collectively “carriers”) issuing coverage in the individual and small employer markets compete based on price, quality, and service, and not on risk selection.

- Meet the requirements of the federal act and all applicable federal guidance and regulations.

In addition, the Affordable Care Act (ACA) introduced changes to Medi-Cal through the introduction of Modified Adjusted Gross Income (MAGI) based Medi-Cal. This change added a new method to determine eligibility, incorporating the MAGI Medi-Cal household composition methodology, which utilizes federal tax filing rules. The ACA also introduced a new household income counting methodology using federal tax filing rules to determine Medi-Cal eligibility.

The Affordable Care Act (ACA) changed Medi-Cal by authorizing the states to expand Medicaid to many low-income individuals under age 65 who were previously ineligible for coverage. The ACA established a new income eligibility limit of 138 percent of the federal poverty level, increasing the number of Californians eligible.

In May 2012, the project sponsors (Covered California and DHCS) completed the planning and establishment phase for the health benefit exchange and formally initiated the CalHEERS Project to create the IT solution to support it. In June 2012, the project sponsors received federal approval for, and signed, the contract with the selected System Integrator (SI) - Accenture, LLP, to develop, implement, maintain, and operate CalHEERS. The development effort was formally launched at the end of June 2012 and CalHEERS went live to the public 15 months later on October 1, 2013. CalHEERS is the California solution for the implementation of federal and state requirements and goals for eligibility, enrollment and retention into insurance affordability programs. The system provides functionality that supports a multitude of programs related to health care enrollment, including eligibility, plan preview and selection, financial management, and ongoing retention (including management of available healthcare plans and affordability options). CalHEERS interfaces with a variety of sources including the Federal Data Services Hub (FDSH), insurance carriers, and State companion systems such as DHCS' Medi-Cal Eligibility Data System (MEDS) and the California Statewide Automated Welfare Systems (CalSAWS) consortia to support shared case management among the programs and organizations. CalHEERS validates eligibility using data interfaces with Centers for Medicare & Medicaid Services (CMS), the Internal Revenue Service (IRS), Franchise Tax Board (FTB), Department of Homeland Security (DHS), and Employment Development Department (EDD) and Verify Current Income (VCI). CalHEERS interfaces with health insurance carriers via Electronic Data Interface (EDI) transactions to complete health plan enrollment.

The CalHEERS Project is governed by Covered California and DHCS and is managed by the Office of Technology & Solutions Integration (OTSI). While the project has a single point of management, it is guided by its sponsors and its programmatic objectives. The following information describes the project sponsors, program partners, and oversight agencies. While not all groups directly participate in governance decisions, they collaborate with OTSI and the project sponsors on matters relating to the CalHEERS.

3.1.1.1 Covered California

California chose early on to operate its own state-based marketplace, Covered California, under the Affordable Care Act. Covered California is an independent entity within state government governed by a five member board. Covered California supports the operations of CalHEERS through the review of project planning deliverables, initiating system change requests, and participation in user acceptance testing (UAT) including defect mitigation.

3.1.1.2 California Department of Health Care Services (DHCS)

The DHCS is the single state agency responsible for effective administration and operation of the California's Medicaid Program, known as Medi-Cal and its Children's Health Insurance Program (CHIP) and Family Planning, Access, Care and Treatment (Family PACT). The DHCS

supports the operations of CalHEERS through the review of project planning deliverables, system change requests and participation in UAT.

3.1.1.3 Office of Technology & Solutions Integration – CalHEERS Project Office (OTSI)

The OTSI is a state agency that provides project management, oversight, procurement, and Support Services for the CalHEERS Project. OTSI manages the CalHEERS System Integrator contract, is the primary participant in UAT and facilitates participation from CovCA and DHCS.

3.1.1.4 CalHEERS System Integrator

Under the current contract, the SI (Deloitte) has transitioned into the System Development, Maintenance & Operations (SDMO) phase where the SI:

- Performs and supports daily operations of CalHEERS, including ensuring the system is operational, stable, and secure; providing back office support; providing service desk services; and providing project management office services.
- Performs maintenance and development activities, including implementing system changes required by policy and federal program changes and enhancements requested by the project sponsors and program partners via formal Change Requests (CRs).
- Delivers and maintains CalHEERS Project Deliverables.

3.1.1.5 County Welfare Directors Association of California (CWDA)

The CWDA is an association representing the human services directors from each of California's 58 counties. The CWDA provides guidance and support with program changes for counties and attends Joint Application Design (JAD) sessions. The assigned CWDA staff are co-located with the project team at the CalHEERS Project site.

3.1.1.6 California Statewide Automated Welfare Systems Collaboration (CalSAWS)

The CalHEERS Project collaborates and works with the California Statewide Automated Welfare System (CalSAWS). The system provides coordination of consumer health information and request for benefits between the CalHEERS and CalSAWS. The activities include communicating changes made to electronic Health Information Transfer (eHIT) and other interfaces that are used to transmit data to and from the CalSAWS system. Our CalSAWS partners are included in all aspects of the Systems Development Lifecycle (SDLC) processes.

3.1.2 Oversight Agencies

3.1.2.1 Centers for Medicare and Medicaid Services (CMS)

The CMS is the federal agency, under the U.S. Department of Health and Human Services, that is responsible for overall oversight of the implementation of ACA, including federal and state exchanges. CMS approves solicitation documents and final contracts. The Center for Medicaid and CHIP Services within CMS is responsible for oversight of California's Medi-Cal and CHIP programs.

3.1.2.2 California Health and Human Services Agency (CalHHS)

The CalHHS oversees twelve departments that provide a range of health care and social services, including the programs managed by DHCS, and the Secretary of CalHHS is a voting member on Covered California's Board of Directors.

3.1.2.3 California Department of Finance (DOF)

The DOF monitors and reviews the direction and progress of State projects ensuring appropriate funding for acquisition, development and implementation activities. DOF has funding approval of all automated System Projects developed or contracted by state departments within the executive branch.

3.1.2.4 Internal Revenue Service (IRS)

The IRS is the federal agency CalHEERS reports on the processes, procedures and security controls in place to protect Federal Tax Information (FTI).

3.1.2.5 Center for Consumer Information & Insurance Oversight (CCIIO)

The CCIIO is a federal oversight entity within CMS, which oversees the implementation of the provisions related to private health insurance. In particular, CCIIO works with states to establish new Health Insurance Marketplaces.

3.1.3 CalHEERS Project Overview

The following graphic provides an at-a-glance view of the current CalHEERS Project. These Project components include Staffing Resources, the CalHEERS System, Project Management, System Change & Enhancements,) Program Support and Operations.

Figure 3-1: Current CalHEERS Project

CalHEERS is a cloud-based system that supports a combination of public-facing and State administrator portals, backend validation, and transfer of information supporting both Covered California and DHCS programs. The CalHEERS key business function is to provide an integrated experience for consumers seeking healthcare and affordability assistance as follows:

- Allow consumers to respond to a single set of eligibility determination criteria either on their own via the Web Portal or by utilizing consumer assistance services such as:
 - o Selecting a Certified Assister or Certified Insurance Agent via the Web Portal,
 - o Using the online help within the Web Portal,
 - o Contacting a Covered California Service Center staff via online chat or a toll-free phone line,
 - o Locating and requesting assistance from their closest DHCS county assistance office, or
 - o Submitting an application via U.S.P.S mail;
- Serve as the single consolidated system supporting eligibility, enrollment, and retention for insurance affordability programs administered by both Covered California and DHCS;
- Interface with federal and state services to verify application information to support automated real-time eligibility determinations;
- Present eligibility determination results to consumers and, if determined eligible, provide options for subsidies enabling more affordable coverage for consumers;
- Electronically transfer consumer enrollment electronic verification and eligibility determination factors between the CalHEERS and CalSAWS via the eHIT interface.
- Allow consumers to shop for health plans and make side-by-side comparisons of the different options available;
- Provide Electronic Data Information (EDI) 834 transaction processing to health insurance carriers; and
- Provide financial management and carrier invoicing capabilities, including the initial and retroactive calculation of premium assessments to carriers.

3.2 CALHEERS SYSTEM OVERVIEW

CalHEERS was developed under an extremely aggressive timeline (15 months from project initiation to solution implementation), enabling the public to apply for and obtain healthcare insurance and benefits beginning October 1, 2013, as scheduled and mandated. CalHEERS has been fully operational since, and has subsequently supported annual cycles of renewals, open enrollment, special enrollment, and tax reporting while continuing to be refined and enhanced through system development, maintenance and operations processes.

There are three core applications that make up the CalHEERS which support the capabilities of the CalHEERS Architecture that rely on each other for services and data.

- Eligibility – A custom application referred to as Health Benefit Exchange (HBX)
- Enrollment – A custom application referred to as Plan Choice and Assister Portal (PCAP)
- Billing Engine – A custom application referred to as Accenture Billing Engine (ABE)

The system is designed to support a flexible number of users and concurrent sessions depending on high peak public access. During the most recent annual Renewal and Open Enrollment period, the CalHEERS was configured to support 134,000 users a day with 10,500 concurrent logged on user sessions.

The CalHEERS Security Services perform authorization and access management utilizing ForgeRock, 3 Scale, and Camel verification processing ensuring that consumers accessing the CalHEERS application are authenticated and authorized.

The CalHEERS Decision Services engine provides encapsulation and isolation of complex business rules using Drools which is the Red Hat Decision Manager, Decision Services which is consumed real-time, and via batch for internal and external business decision automation.

The CalHEERS technical architecture represents a composition of multiple enterprise, technology, security, and systems architectures that form a best of breed framework to support

all aspects of the application.

Figure 3-2: CalHEERS Business Model Overview

3.2.1 CalHEERS Architecture

The CalHEERS Architecture design is aligned to the Centers for Medicare & Medicaid Services (CMS) Medicaid Information Technology Architecture (MITA) Technical Architecture and Eligibility Reference Architecture (ERA).

The CalHEERS runs in Amazon Web Services (AWS) utilizing AWS Content Delivery Network (CDN) and AWS Network Load Balancer (NLB), and AWS Storage. It has been modernized to a containerized, open source, and lightweight architecture utilizing 3 Scale Gateway + Fuse, Smarty Streets-USPS, JWS Tomcat, ForgeRock, RedHat Fuse and Aurora PostgreSQL.

To further increase flexibility, the system uses lightweight services containerized on a Red Hat OpenShift Container platform using the strangler fig pattern. The Red Hat OpenShift platform is based on Kubernetes and includes a suite of open-source development, operations, and management tools that integrate with both AWS and the other management tools in use within CalHEERS today.

Figure 3-3: CalHEERS Architecture

Figure 3-4: CalHEERS Data Architecture

3.2.2 System Functionality

The architecture supports the following system functionality:

3.2.2.1 Eligibility – Health Benefits Exchange (HBX)

The Health Benefits Exchange (HBX) is a customized software product that provides the core program functionality for fulfilling the requirements of determining eligibility for insurance affordability programs, based on policy guidance from Covered California and DHCS.

The consumer-facing front-end system provides access for individuals, families, and enrollment assisters to input application information for individuals applying for insurance affordability programs. This component also allows consumers to shop for health plans and make side-by-side comparisons of the different plans available in Covered California.

The CalHEERS solution leverages HBX, which is designed and configured to meet the business needs for Modified Adjusted Gross Income (MAGI) Medi-Cal and insurance marketplace eligibility processes. The HBX system performs Remote Identify Proofing (RIDP) for all consumers creating accounts and accessing the system. RIDP utilizes the Federal Data Services Hub (FDSH) and services of the CalHEERS RIDP vendor. If real-time RIDP is not possible, alternative methodologies employed by county social services offices, agents/enrollers, coupled with the CalHEERS RIDP vendor support, to provide consumers the ability to ID proof.

Key Eligibility Functions include:

- Application Submission and Update
- Application Information Verification
- Document Upload and Verification
- Eligibility Determination
- Renewals
- Appeals
- Case Management
- Reporting Changes to application information (Report a Change)
- Consumer secure mailbox

3.2.2.2 Enrollment - PCAP

The Plan Choice and Assister Portal (PCAP) is a custom software product that provides the marketplace capabilities for the Individual Shop and Compare, Assister Management, Plan Management, and Qualified Health Plan Agencies, Agents, and Enrollment specialists.

3.2.2.3 Financial Management (Accenture Billing Engine – ABE)

The Accenture Billing Engine (ABE) is a commercial customized software product that provides the capabilities for the Financial Management business area. This includes billing, collections, and reconciliation.

3.2.2.4 Integration and Interfaces

The CalHEERS System supports an Enterprise Integration Architecture. The Integration Application Style uses Service Oriented Architecture (SOA) Architectural Styles, Service Oriented Modeling and Architecture (SOMA), Model Driven Architecture (MDA), and Extensible Markup Language (XML) Schema design best practices, including National Information Exchange Model (NIEM), using two methodologies: (1) Service Identification Framework (SIF)

and (2) end-to-end business process analysis and modeling methodology.

The CalHEERS services adhere to the Web Services Interoperability (WS-I) standard and are based on the Service Contract Specification providing interoperability guidance for core web services specifications such as Service Oriented Application Protocol (SOAP), JavaScript Object Notation (JSON), Web Services Definition Layer (WSDL), and Universal Description, Discovery, and Integration (UDDI).

Where the CalHEERS does not interconnect via web services, the system provides reusable, non-invasive connectivity with end applications. Connectivity is provided through interface adapters that are either uni- or bi-directional with transport services supporting Hypertext Transfer/Transport Protocol (HTTP(S)) and Secure File Transfer Protocol (SFTP).

3.2.2.5 CalHEERS Batch Processing

CalHEERS supports batch processing and consists of over 400 jobs supporting plan management, billing, notices, scheduled reporting (FTB, IRS, CMS), and enrollment processing via carrier interfaces (EDI/834). Batch processing is primarily supported by Autosys, but also supplemented by CRON, database, and Enterprise Grid Management job scheduling.

3.2.2.6 Consumer Assistance

The Consumer Assistance functionality supports multiple user types presenting information in the most useful format which differ based on the different users. The online customer service functionalities are comprised of the following:

- Web Portal online help for consumer application
- Web Portal online help for consumer shop and compare for health plans
- Web Portal ability for consumer to review and select a Certified Enrollment Counselor (CEC) to assist and act on the consumer behalf. The functionality allows for the consumer to search and select a CEC based on several variables (i.e., location, name, language preference). The information displayed tells the consumer how to contact the CEC directly, either through email or phone, but also prompts the CEC to contact the consumer. This functionality further allows for the delegation of authority from the consumer to the CEC to act on their behalf in the completion of the application, introduction of life events and/or selecting and changing health plans.

3.2.2.7 Analytics & Reporting

CalHEERS provides reporting capabilities required by the ACA, Covered California, DHCS, and the State of California. Additionally, as described in 3.6 below, CalHEERS supports its sponsors with data and analytics through an agile process for ad-hoc analytics and report enhancements as new questions and needs for information and analysis arise. Together, these solutions ensure that program operations for CalHEERS and its sponsors are supported by data that is timely, accurate, and insightful.

The foundation of the CalHEERS data platform is a Data Warehouse solution implemented in a cloud-native technology stack that enables reporting and analytics on large datasets with high performance using a range of data modeling and analytic tools and techniques.

The Data Warehouse solution includes the ability for CalHEERS, DHCS, and Covered California to generate monthly reports for CMS, data reports on internal, state, and federal audit and oversight requirements, as well as monthly reports related to Covered California and DHCS enrollees. The data domains for CalHEERS reports include, but are not limited to:

- Enrollment and premium trends

- Eligibility determination outcomes
- Consumer experience, including website interaction data
- Consumer assistance reporting (such as by broker, certified assister, service center or county eligibility workers)
- Notices and member communications
- Financial Reports
- Audit and compliance reporting, including related to data interfaces (such as with IRS)
- Transactional and system monitoring reports

The analytics solution provided by CalHEERS is a robust data platform that, among other features:

- Ingests data from both CalHEERS (HBX and PCAP) and external sources such as Google Analytics, Salesforce, and other data feeds (including from other state agencies and custom datasets);
- Uses an extract transform and load (ETL) design built on Databricks platform. The ETLs are capable of delivering data refreshes at the latency required by the business (e.g. daily for many financial reports, but hourly or even more real-time for consumer actions requiring immediate response);
- Hosts analytics platform on AWS S3 and Snowflake with data assets at staging, curated, and final reporting;
- Provisions role-based access to all layers (across both production and test environments), and applies role-based security controls (such as column-level masking, etc.);
- Documents and catalogs data lineage and metadata;
- Enables User Acceptance Testing (UAT) for new report and data product development that is capable of running on a production-like copy to simulate realistic data behaviors and volumes;
- Allows users to obtain data and results using both no-code and advanced self-service, leveraging tools such as Tableau for visualization, direct access for querying in Snowflake, Databricks, and over ODBC with industry standard data analytic tools (Python, R, etc.);
- Enables the integration and governance of external data sources needed by DHCS or Covered California;
- Hosts and integrates data with separate servers (such as SQL Server and ArcGIS);
- Automates data integrations with other cloud data platforms, such as SAS Viya;
- Provides secured data environments integrated with the core data platform for approved data engineers and analysts at either Covered California or DHCS to securely test, develop, and maintain new data products.

3.2.2.8 Document and Forms Management

As part of normal CalHEERS operations, notices and forms must be generated and sent to a variety of consumers. These notices are mailed to consumers to request an action be taken or to provide a status update of an individual's application, enrollment, and eligibility or in support of annual tax reporting. Senate Bill SB1341 (Reg. Sess. 2013-2014) implemented functionality into the CalHEERS Application that determines whether the notice is printed and mailed by the CalHEERS Print Services or sent to the consumer's county (via electronic file) for generation, printing, and delivery. In addition to applying for coverage and uploading documents (in formats such as: pdf, word, excel, etc.) online, consumers can mail or fax applications and verification documents. Once these documents are received, they are scanned and uploaded for visibility in CalHEERS. Covered California printing and mailing services and all inbound document management services are currently provided by a source subcontracted by the SI. The SI is

solely responsible for the performance of its Subcontractor and provides direct oversight of Outbound and Inbound Print Processing, which includes providing Print Services for Outbound and Inbound Mail. These services are provided by KP and DFS for Covered California.

3.3 CALHEERS STAFFING RESOURCES

3.3.1 CalHEERS State and System Integrator (SI) Staff

The CalHEERS Project is staffed by a team that consists of State and SI resources all of whom are expected to possess personal and human character aligned with our defined and realized culture statement:

“The CalHEERS Project, business partners, and sponsors are a single team that enjoy and take pride in doing important work in support of our Mission. We strive to operate with trust, integrity, and a positive state of mind. We respect the time, expertise, and contributions of all team members. We seek to understand different viewpoints and assume positive intent. We are accountable for our individual and group obligations, actions, and outcomes.”

Specific traits identified by our team members as positive influences on our culture include creativity, optimism, insightfulness, interest, trust, ownership, gratitude, collaboration, innovation, accountability, and reliability.

As a team, these resources are responsible for implementing, maintaining, and continuously improving the business functions and operational efficiency as the project and system mature. Staff is currently organized into four (4) quadrants defined as:

1. Project Management Office and Quality Assurance (PMO / QA)
2. Operations
3. Change Capacity
4. System Integrator (includes Offshore Delivery Services)

These quadrants are staffed as follows:

Figure 3-5: Existing CalHEERS Project Staffing

3.3.2 CalHEERS State and SI Key Staff

The State and SI Key Staff are aligned by project or service area to ensure consistency, coverage, and appropriate direction across the project. For example, the CalHEERS Project staff works in concert with the SI PMO to perform the processes and procedures related to deliverables and contract management, invoice approval and payment, as well as several oversight and management activities on behalf of Covered California and DHCS. The key State and SI staff members are co-located at the State project site and are functionally aligned as counterparts as shown below:

Figure 3-6: Existing State and SI Key Staff Counterpart Mapping

The CalHEERS State Project Management Team is comprised of the State Project Director, Assistant Project Director, Project Management Office Chief, Administration Chief, Operations Readiness Chief, and the Systems Development Chief. At the highest level, these team members support the following tasks and activities:

- The State Project Director or designee directs the CalHEERS Project and holds the primary responsibility for the success of the project and the effectiveness of all resources assigned to the project. The State Project Director or designee manages issue resolution assessing impact to schedule or risk and is an active participant and approver in the Change Control Process (CCP), including the escalation of items to the project sponsors and/or Executive Steering Committee (ESC) as necessary. The State Project Director or designee serves as the primary liaison between the CalHEERS Project and the project sponsors, ESC, Covered California Legal Counsel, OTSI Management, and sponsor stakeholder communities. The State Project Director or designee reviews and approves all SI contract Deliverables and approves payment for Services rendered. The SI Project Manager is the direct counterpart supporting the State Project Director or designee.
- The State Assistant Project Director reports directly to the State Project Director and ensures information related to the CalHEERS Project is consistent, correct, accurate, and timely. This role reviews and approves all information provided to the various stakeholders and any external agencies; oversees the day-to-day operations of the State and SI teams' activities; supports the Change Control process; and is responsible for managing the project (i.e., schedule, cost, scope, issues, risks, etc.) and overall project status reporting. The SI Deputy Project Manager is the direct counterpart supporting the State Assistant Project Director.
- The Chief of Technology reports directly to the Assistant Project Director. The Chief of Technology has full management responsibility for organizing, planning, coordinating, directing, and controlling all day-to-day activities spanning across the following units: Application Development and Enterprise Infrastructure, Operational Readiness, Functional Business Analysis, and User Acceptance Testing. They also are responsible for effective oversight of the Project's service delivery, production operations, system testing, performance management and adherence to processes and procedures, which are all critical for the successful delivery of system services.
- The CalHEERS Financial & Contract Management Chief reports directly to the State Project Director and ensures all Fiscal, contract management, procurement, and quality management activities are conducted in compliance with all state and federal requirements. Additionally, the Financial & Contract Management Chief assists both State and SI staff in resolving contract-related questions. The Financial & Contract Management Chief's counterparts are directly or indirectly the SI Deputy Project Manager and the SI PMO Manager.
- The CalHEERS Project Management Office (PMO) Chief reports directly to the Assistant Project Director and works closely with the State Project Director to manage State and consultant resources in support of operations for the Project. In this role, the PMO Chief identifies and implements methods to reduce or mitigate risk; monitors the overall project progress; and coordinates with stakeholders to ensure timely involvement and response. The SI PMO Manager, Application Maintenance Manager and Technical Maintenance Manager are either direct or indirect counterparts in support of this position. In some instances, the counterpart Staff may have a relationship with State staff reporting to Chief.

- The Quality Management & System Integrator Procurement Project chief reports to the CalHEERS Financial & Contract Management Chief and has responsibilities that include managing all quality management activities and procurement project activities.
- The CalHEERS Fiscal & Contract Management Chief reports to the CalHEERS Financial & Contract Management Chief and has responsibilities that include all fiscal and budget activities and various administrative responsibilities. The SI PMO Manager is a direct counterpart to the activities of the Fiscal & Contract Management Chief as they relates to administration and facilities.
- The Operations Readiness Chief plans and directs the activities of the CalHEERS Operations Readiness Team. This position is responsible for ensuring all operational readiness communication, planning, management and support activities lead to a thorough and well documented process to implement the CalHEERS solution. Also, the position is responsible for overseeing the CalHEERS System Integrator (SI) implementation, data strategy, and analytics efforts and provides general leadership and supervision to the CalHEERS Operations Readiness unit consisting of State IT staff and consultants.
- The CalHEERS Functional Business Chief plans, directs, and oversees the day-to-day development and maintenance activities of State and SI staff, ensuring that system development practices are executed in accordance with the documented project processes. This role facilitates weekly stakeholder and project meetings to review progress; discuss priorities; and address issues, changes, and risks. The role also oversees and manages project Change Requests, from inception to implementation, on behalf of the project stakeholders. The SI Application Maintenance and Technical Maintenance Manager(s) are the direct counterparts to this position.
- The CalHEERS Application Development and Enterprise Architecture Chief reports directly to the Chief of Technology and is responsible for ensuring that the CalHEERS Project architecture fits within the State's overall architecture strategy and meets the needs of the State, counties and other stakeholders.
- The CalHEERS User Acceptance Testing (UAT) Chief reports to the Chief of Technology and works closely with the Functional Business Chief, and other CalHEERS divisions to ensure the successful implementation of new and updated system functionalities. This role is responsible for verifying that all functionalities adhere to design specifications and perform as intended. Additionally, the UAT Chief provides leadership and supervision to the UAT team which is responsible for developing and executing test scripts to validate system functionality, and the UAT Test Automation Team to enhance efficiency, accuracy, and testing coverage. The UAT chief is also responsible for managing CalHEERS system integrator (SI) testing, ensuring coverage, and compliance with system requirements, and alignment with overall project objectives.

3.3.3 State and SI Non-Key Staff

In addition to the State and SI Key Staff, the project is supported by various Non-Key Staff, as described in Statement of Work (SOW) Section 2, CONTRACTOR PERSONNEL REQUIREMENTS. These Non-Key Staff members are located both onsite, at the State project site, and offshore. The Non-Key Staff support the project functions and teams depicted in Figure 3-5: Existing CalHEERS Project Staffing, above.

The group of Non-Key (System Change) Staff include numerous roles that are billable under Change Requests as defined within the Appendix D-7, System Changes Costs tabs.

3.4 PROJECT MANAGEMENT

The CalHEERS Project employs a Project Management Methodology consistent with Project Management Institute (PMI) Project Management Body of Knowledge (PMBOK®) and the CMS System Lifecycle Framework guidelines for project management. The project is managed using a structured, repeatable, and disciplined approach to plan, design, develop and implement changes into CalHEERS.

3.4.1 Schedule Management

The project team uses the schedule (work plan) to manage the project, including tracking project tasks, task durations, task resourcing, and progress towards completion. Schedule analysis and reporting is conducted to inform project management of performance risks so they can be mitigated in a timely manner. The project uses the following tools to track, manage, and report on the Contractor and the CalHEERS Project schedule:

- Microsoft® Project Professional
- Microsoft® Project Online
- Microsoft® Project Web App
- Microsoft® SharePoint
- Microsoft® Office (Word, Excel, PowerPoint, Outlook)
- Adobe

The schedule development processes captures hours worked as well as work completed by both Contractor and State resources. The project schedule is organized in a format that permits accurate measurement and reporting of accomplishments and potential schedule impacts.

3.4.2 Cost / Cost Estimating Management

The CalHEERS Operations and Program Support costs are based on set number of hours and a firm fixed price per month. As part of the System Development (Change Request) aspect of the project, the CalHEERS State Management Team works with sponsors and stakeholders to identify enhancements, changes, and modifications and lays out the schedule of those on a rolling 24-month roadmap. The System Change & Enhancements costs are based on either time & materials or firm fixed price, as determined within the change request process.

3.4.3 Human Resources Management

The SI maintains a resource management matrix that contains a month-by-month staffing forecast for the full duration of the project. The matrix is used to drive start and end dates documented on each position description. The SI maintains position descriptions for the CalHEERS Project Team resources that work on the Project.

3.4.4 Risk and Issue Management

Project risks and issues are reviewed by the Risk and Issue Management Group (RIMG). The RIMG evaluates each potential risk to confirm or deny it as a risk; set an agreed-upon risk level; confirm mitigation steps are appropriate; and track and monitor progress toward mitigation or resolution. The SI PMO administers the risk and issue management process. The RIMG members consist of:

- CalHEERS Project Director
- CalHEERS Assistant Project Director

- CalHEERS Chief of Technology
- CalHEERS Operational Readiness Chief
- CalHEERS Enterprise Infrastructure Chief
- CalHEERS Functional Business Analysis Chief
- CalHEERS User Acceptance Testing Chief
- CalHEERS PMO Manager
- CalHEERS Financial & Contract Management Chief
- CalHEERS Fiscal & Contract Management Chief
- CalHEERS Quality Management Chief
- CalHEERS Risk and Issue Lead
- SI Project Manager
- SI Deputy Project Manager
- SI PMO Manager
- SI Risk and Issue Lead
- Risk Owners
- IV&V Vendor Representative
- DHCS Representative
- Covered California Representative

3.4.5 Communication Management

Communication is critical to project success. The CalHEERS Project places a high value on timely, useful, transparent, and effective communications to project sponsors, program sponsors and stakeholders. Open, ongoing communication among project participants is critical to the success of the CalHEERS.

The Communication Plan identifies the procedures used to manage communications for the project. The plan focuses on formal communication elements and channels. Other communication channels exist on informal levels, augmenting those discussed within the plan. The plan is intended to enhance rather than limit communication practices. All project team members are expected to adhere to the established project's Communication Plan.

3.4.6 Document Management

The CalHEERS SharePoint project site provides a central repository for all project information, working documents, and formal deliverables. While it is the primary document management tool for the project, it also serves as a primary communication tool for quick access to key information as well as sharing information across the teams and with project stakeholders and program partners. Key Functions of document management include but is not limited to:

- Deliverables management
- Version control, document naming conventions and standards
- Work Product management process
- Content management

3.4.7 Incident / Problem Management

Incident and problem management consists of the activities used to identify, manage, diagnose and resolve service delivery interruptions. The primary objective of problem management is to solve current interruptions, prevent future interruptions, and to minimize the number and impact of any that cannot be prevented. The State is responsible for providing the overall strategy for incident and problem management and the SI is responsible for implementing the agreed upon resolutions.

3.4.8 Contract Requirements Management

The contract management team is responsible for managing compliance with the terms and conditions in the SI Contractor and Subcontractors' contract; ensuring the processes used by the CalHEERS Project Team align with project objectives and requirements. The project teams understand and fulfill those obligations in a timely manner. Contract Management tracks specific processes related to the following outline areas:

- Deliverables management
- Equipment and Software purchases and ongoing maintenance and support
- Schedule management
- Key Staff performance
- Service Level Agreements (SLAs) management
- Payment management
- Warrant assessment and reporting
- Subcontractor management

3.4.9 Quality Management

To achieve predictable performance and minimize errors and defects as early as possible, team leads are charged with executing quality activities in accordance with plans and defined processes. Deliverable reviews assess and confirm the integrity of individual pieces while reviews across teams verify that the integrated solution satisfies requirements. The Project Management Plan (PMP) and Quality Assurance Methodology define quality reviews on the project.

3.4.10 SI / Subcontractor Management

Subcontractors follow the same PMP rules and standards established for the management of the project. All Subcontractor work is governed by a written contract. Subcontractor provisions and terms are aligned and consistent with Prime Contract and include flow down clauses.

The SI Contract Manager is responsible for the overall management of the subcontract life cycle, which includes solicitation, negotiation, selection, development, implementation, management, and closeout of any and all subcontracts.

Each Subcontractor is assigned a SI project team executive-level resource. The assigned executive is responsible for directing the day-to-day activities and responsibilities of the Subcontractor.

3.4.11 CalHEERS Strategic Planning and Management

The CalHEERS mission is to provide an integrated eligibility, enrollment, and retention solution that supports the Sponsor organizations in delivering health insurance services to consumers in collaboration with business partners throughout California. This is accomplished using industry methodologies that support Strategic Planning Methodology and Activities. Existing Strategic Plan and Roadmap process are located in the Bidders' Library.

3.4.12 Policy & Legislative Impact Analysis and Change Management

State and federal statutory and regulatory changes in support of the healthcare affordability options provided to consumers within the CalHEERS Application are subject to constant change. Analysis of these changes and assessment of system and project impact are a large part of ongoing project work.

3.4.13 Audit Evaluation and Findings Services

CalHEERS manages numerous audits throughout the year and relies heavily on support of the SI pertaining to audit assessments, data analysis, recommendations and reporting, presentation of findings, and finally the implementation of any changes resulting from audit findings.

3.5 SYSTEM CHANGE & ENHANCEMENTS

3.5.1 System / Software Development Lifecycle

The CalHEERS software development lifecycle (SDLC) is composed waterfall, modified agile and iterative development methodologies. The current process diagrams are located in Deliverable D-4.2-1 SDLC Plan in the Bidders' Library.

3.5.2 Change Management

The Change Management Process (CMP) is used to manage changes to scope, schedule, costs, requirements, and project deliverables and documentation. The SI PMO and State PMO jointly administer the CCP, with the State having ultimate decision authority over it. The flow for the Change Management process follows:

Figure 3-7: Change Management Process

3.5.3 Change / Refresh / Upgrades

3.5.3.1 System Enhancements / Changes

The CalHEERS Project follows a development lifecycle associated with completing and implementing system enhancements and changes through Change Requests. The software development approach as defined in the CD-4.12-1 - SDLC Plan and CD-4.2-1 - Change Request Process deliverables, which provide the methodology, key activities, responsibilities, and the outcomes expected for each phase of the SDLC for any CR being executed at CalHEERS and documents the approved SDLC methodology for designing, developing, testing, implementing, operating, and maintaining CalHEERS.

A feature is a logical unit of work defined by the design team and approved by the State team. A feature usually consists of many requirements which satisfy a particular component or flow. However, a developer's intimate knowledge of the CalHEERS architecture and code may require them to be part of the requirement gathering and detailed design phase.

3.5.3.2 Change Management

The SI PMO and the State PMO jointly administer the Change Control Process with the State having ultimate decision authority over it.

Potential Change Requests (CRs) can be raised and entered into IBMs' EWM by any CalHEERS project member. In the CR Intake and Prioritization swimlane of the CR Process Flow diagram above, sponsors and program partners can initiate a change by providing details to a project team member to enter on their behalf.

The Change Request Process Deliverable describes the detailed process that will be followed during CalHEERS Project's SDLC detailed in SDLC Plan for both Traditional Waterfall, Agile, and Agile-Hybrid Initiatives. CRs that do not follow the SDLC Plan for Traditional Waterfall, Agile, or Agile-Hybrid Initiatives are considered exceptions to the CR Process and are detailed in section 8.3, Exceptions to the CR Process, of the CD-4.2-1 - Change Request Process deliverable. Please note that the methodology, activities, and outcomes updated for each SDLC phase are detailed in SDLC Plan. The CR Process will expand upon each SDLC phase by providing detailed guidelines of how activities are performed in order to move through the phases of the SDLC.

3.5.3.3 Architectural Design Document

The development architecture supports the development of the application and technical architecture for the project. It consists of the technical services, tools, processes and standards for designing, building, testing application and architecture components. The development architecture is described in four sections:

- Development Architecture Diagram
- Tools Specification
- Procedures and Standards Approach
- Development Architecture Environments

The Architectural Design Document is updated and maintained based on implemented changes. The current document resides in the Bidders' Library.

3.5.3.4 Detailed System Design

The Detailed System Design (DSD) document is divided into multiple documents detailing the components of how the features were built and released during the CalHEERS development.

The document incorporates both system design and wire frame details. The DSD can be found in the Bidders' Library.

The CalHEERS solution is the integration of three products, HBX, PCAP, and ABE. Design components of the System are modified via the Change Request (CR) process and approved on an incremental basis. Detailed design documentation is included as part of the Bidders' Library for review.

3.5.3.5 Database Design

The CalHEERS Database Design is a combination of materials, data and information, some of which is proprietary to the current SI. All components of design that are not proprietary are available for review in the Bidders' Library. In general, the design is comprised of the following three high level components:

- **Data Governance** – The CalHEERS Data Management Strategy (DMS) focuses on implementation strategies for complying with relevant statewide and Covered California data policies and processes.
- **Data Architecture** – The CalHEERS DMS focuses on strategies of data sizing, storage and management of physical data models. Data retention and deletion are addressed with archive and purge policies.
- **Data Sharing Architecture** – CalHEERS adheres to CMS required national standards such as the NIEM and the Health Information Portability and Accountability Act (HIPAA) standards for exchanging data with external entities.

3.5.4 System Requirements Management

The OpenText (Micro Focus) ALM serves as the current source of record for all requirements.

3.5.4.1 System Requirements Management Plan

A complete Requirements Management Plan is documented in Deliverable CD-4.5-1 – System Requirements Management Plan deliverable. This Deliverable provides further details on the requirements documentation, the requirements traceability matrix (RTM) maintenance approach, and the reporting mechanisms for requirements.

3.5.5 Release Management

There are three types of releases that occur as part of the existing release management process.

- **Feature Release** – implementation of key features but can include defect fixes and change requests.
- **Maintenance / Priority Feature Release** – implementation of defect fixes, change requests, enhancements, technical configurations, and deferred functionality.
- **Priority Release** – implementation of critical defect fixes and workarounds to address urgent business needs.

Feature Releases include major enhancements and integration changes with the CalHEERS major business partners such as CalSAWS, MEDS, and carriers. Priority Releases are restricted in scope and are scheduled to implement required fixes and necessary workarounds and to allow the project flexibility for change and defect fixes throughout the year. The number of feature and priority Releases are planned in advance and mapped to support the 24-Month Roadmap referenced earlier in this document.

3.5.5.1 Release Management Plan

The Release Management Plan describes the portions of CalHEERS functionality that will be developed and implemented in each defined release and the rationale for each release. It includes the roles and responsibilities of all participating teams, processes and procedures, assumptions, constraints, risks, and referenced documents used as part of the release approach.

3.5.6 Testing

CalHEERS is in a constant state of change. The teams support multiple concurrent releases and conduct varying levels of testing. Testing components include but are not limited to unit, assembly, integration, system, interface, performance and load, security, end-to-end build validation, regression, UAT, smoke, and the Americans with Disabilities Act (ADA Section 508 compliance testing).

CalHEERS supports a large number of interface partners representing both electronic and batch interface. Significant effort is invested in testing activities including these interface partners to ensure that migration of any change is seamless and does not cause disruption in any operational environment.

The components of the CalHEERS testing methodology are documented in the Master Test Plan (refer to Bidders' Library). The posted plan includes existing activities supporting Release Testing, Installation Verification Reporting, Certification Results, Performance Testing, and Management.

3.5.7 Defect Management

The CalHEERS defect management process is used to manage all defects to resolution and verification. Defects may be found at any point during the testing cycle or in pre-production or production environments. Defects are organized, prioritized, and allocated to SI resources to properly manage each defect through the defect lifecycle. The defect management lifecycle is further described in the Defect Management Plan.

3.6 Program Support Services

The SI is responsible for providing all aspects of Program Support, which includes back-office support activities such as change, release, defect, issue, risk, incident, service request, asset, and contract management. The functional processes related to those activities are embedded in highly customized, hosted, and internal solutions consisting of Application Lifecycle Management (ALM), Engineering Workflow Management™ (EWM), Microsoft® SharePoint, and ServiceNow / ITIL to support the project, its Staff (State and Subcontractors), and sponsors.

3.6.1 Insurance Carrier Support

The SI is responsible for providing support to insurance carriers in their use of CalHEERS, which includes ensuring the quality and technical accuracy of the carrier interfaces and supporting the carriers directly. Support activities include monitoring, reviewing, supporting, testing and communicating changes to the CalHEERS Portal application, system interfaces, and supporting software. It also includes changes and/or upgrades to the technical architecture and infrastructure as it relates to the CalHEERS carrier Interfaces to the carriers. Some of the more common support functions with carrier support includes, but is not limited to:

- Supporting Federally mandated changes with interfaces
- Reviewing transmission of the EDI 834 files to carriers
- Troubleshooting of the inbound and outbound transactions

- Monitoring and troubleshooting data reconciliation processes
- Developing the monthly CMS carrier reconciliation reports
- Monitoring and reporting for the CMS reports
- Supporting annual plan loading for QHPs (health and dental)

3.6.2 Website Management

The SI is responsible for the CalHEERS website that supports the online portal applications. These support services include deployment, monitoring, security reviews, as well as the coordination and execution of communications via the website. These communications include both emergency and non-emergency messages, conveying system outage notifications, extension of annual open enrollment periods and variables, as well as other information.

3.6.3 Consumer Journey

CalHEERS actively maintains and monitors both a self-service and an assisted consumer journey. Consumers are asked focused questions about their experience within the initial application, eligibility determination, and other aspects of the enrollment and retention process, and responses are actively reviewed and considered during limited data analysis including application abandonment rates.

3.6.4 Annual Renewal and Open Enrollment

Each year, members currently enrolled in a Covered California health plan, need to confirm their healthcare coverage for the next calendar year. The process of notifying and managing the automated renewal process constitutes an extremely high volume of online and batch processes for CalHEERS.

Adjacent to the Renewal period is the Annual Open Enrollment period which allows for Californians to apply, have eligibility for financial assistance determined, and, if appropriate, select and enroll in health coverage for the next calendar year. Both Medi-Cal and Covered California programs use the same application and, depending on factors such as family size, income and citizenship or immigration status, eligibility is determined for a Covered California health plan, with or without financial assistance; Medi-Cal, County Children's Health Initiative Program (CCHIP) or Medi-Cal Access Program for pregnant women (MCAP).

Annual Renewal and Open Enrollment cover the majority of the 4th calendar quarter each year and require the CalHEERS online portal to support over 2 million applications with associated back-end integration and noticing components reaching maximum capacity.

3.6.5 IRS / CMS Reporting and 1095 Processing

CalHEERS is required to adhere to the CMS Business Services Definitions (BSD) and IRS §36B(f)(3), which requires monthly and end-of-year reporting for individuals who enroll, or enroll a family member, in a Qualified Health Plan (QHP) through the Marketplace. To comply with these requirements, CalHEERS has a defined number of batch jobs to support this effort that must be supported by the SDMO provider. File generation processes utilizes the Spring Batch framework scheduled by the Autosys batch scheduling system. File transfer is provided by 3scale for communication and transfer between Marketplace and CMS.¹

The ACA added section 6055 to the Internal Revenue Code, which provides that every provider of minimum essential coverage will report coverage information by filing an information return with the IRS and furnishing a statement to individuals. The information is used by the IRS to administer – and individuals to show compliance with – the individual shared responsibility

¹ BSD – Federal And State Interfaces – Internal Revenue Service (IRS) 1095 End-of-Year Reporting

provision in section 5000A.²

CalHEERS complies by providing all consumers Qualified Health Plans (QHPs), active or terminated, a 1095-A form annually for tax reporting purposes. CalHEERS annually generates 1.3 million IRS 1095-A notices composed of original and corrections with 1.1 million produced in January each year. Job queuing, coordination, and communications with the CalHEERS print contractor is critical to the success of the annual effort.

3.6.6 CalHEERS 3895 Processing

Beginning with tax year 2020, the state of California requires residents and their dependents to obtain qualifying health care coverage, also referred to as Minimum Essential Coverage (MEC). This requirement reinstates a state penalty on individuals who do not have MEC, with revenues collected by the Franchise Tax Board. The legislature appropriates the revenue, collected as the Health Care Affordability Reserve Fund (HCARF), and allocates it for use by Covered California to provide financial assistance for marketplace enrollees. This program is known as the Premium Assistance Subsidy (PAS) or the California Premium Subsidy (CAPS).

The amount of CAPS available to a household is calculated when the taxpayer enrolled in the qualified health care plan based on the projected household income for the year. CAPS) paid throughout the year will need to be reconciled at the end of the year with the actual amount allowed based on the actual household income for the year, less federal Premium Tax Credit (PTC) amounts. The decision to provide the CAPS is made on a year-by-year basis by Covered California based on legislative authority and budget.

CalHEERS complies with the Covered California request in determining eligibility for CAPS and providing the applicable tax reporting documents required to claim the subsidy on the California Tax Forms. Covered California consumers, active or terminated, are provided with a 3895 form annually for tax reporting purposes. If Covered California opts to not provide the subsidy in any given year, CalHEERS must continue to provide access to historical documents and regenerate them for the consumers upon request as well as continuing to execute the annual file processes as if the decision was to provide the subsidy

3.6.7 CalHEERS Project Processes

The CalHEERS PMO supports a wide variety of project processes in support of daily operations. These processes are documented in a series of guides that cover a range of activities including communication, fiscal oversight, deliverables management, change and organizational management. When appropriate, the guides include instructions on the use of the associated project management and reporting tools. The processes have been defined in partnership with the sponsor organizations and with updates managed by both the State and vendor Staff.

3.6.8 CalHEERS Application Training

The CalHEERS Application training for Covered California Service Center staff, Certified Enrollment Counselors (CEC) and DHCS County Eligibility Workers is provided by Covered California University (CCU). Modifications to training curriculum based on system enhancements are developed as a component of the CR process and delivered to CCU for inclusion as appropriate.

² IRS Website: <https://www.irs.gov/affordable-care-act/questions-and-answers-on-information-reporting-by-health-coverage-providers-section-6055>

3.6.9 CalHEERS Data Warehousing, Analytics, and Reporting

The CalHEERS data and analytics program is designed to enable CalHEERS and its sponsors to run its programs and operations, and answer critical business questions, with accurate and insightful data. The CalHEERS data warehouse and associated data solutions described in [Subsection 3.2.2.7](#) provide a platform for data warehousing, reporting, dashboards, and analytics activities.

The CalHEERS data and analytics program provides a broad range of operational and analytical support services throughout the data and analytics lifecycle to help CalHEERS and the sponsors leverage the data platform.

Support activities include, but are not limited to:

- **Data platform administration** – maintain configuration, security, maintenance, archival and retention policy (including purging), access control, performance monitoring), across all tools and systems (including AWS S3, Databricks, Snowflake, Tableau, SQL Server, Okta, etc.)
- **Data quality oversight and lifecycle** – including quality reporting, defect identification, root cause analysis and mitigation
- **Performance monitoring and support** – to ensure data users receive timely results from the system.
- **New development** – an agile monthly sprint process is used to triage new requests and ensure that the data and analytics provided to Covered California and DHCS adapt timely to evolving business needs and questions.
- **Training & technical assistance** – technical assistance through venues such as team-led trainings, ad-hoc support, investigations, and weekly office hour sessions.
- **Ad-hoc analytics** – upon request from sponsors, provides data investigations and analyses on emerging or urgent issues.
- **Strategic updates and roadmap** – ensures CalHEERS data and analytics program evolves to meet business needs in a changing landscape, and ensures that the data platform grow sustainably while leveraging new opportunities for modernization.
- **Documentation and data cataloging** – all new data, reporting, and analytics products are fully documented and cataloged to ensure that data about the program is accessible, understood, and used as efficiently as possible.
- **Audit and operational reporting support** – provides responsive reporting for federal and state oversight activities and other audits, as needed.

3.7 OPERATIONS

The existing Operations Plan and Management Report (including the Operations Manual) are located in the Bidders' Library. At the highest level, the artifacts describe the details outlined by the following Framework:

Figure 3-8: Operations and Maintenance Integrated Delivery Framework

The Integrated Delivery Framework identifies the four main activities or Operational Groups that serve as the baseline methodology for the M&O Phase of the CalHEERS Project.

- **Manage Service** – The Operational Areas that define the interface between the State and the SI and govern all aspects of service delivery.
- **Deliver Service** – The Operational Areas focused on delivering specific services, which can be classified as Infrastructure, Application, or Business Process areas.
- **Manage Service Delivery** – The Operational Areas focused on verifying that an appropriate level of service and performance has been and is being provided.
- **Support Operations** – The Operational Areas that provide tangible resource support to the other Operational Areas.

M&O team members are responsible for implementing, maintaining, and continuously improving the material in each Operational Area as the project grows and matures. To support the as-is state of the project, the CalHEERS Project provides 24/7 support from an application development and maintenance and operations perspective. The definition of the existing structure is located in the Bidders' Library.

3.7.1 CalSAWS Collaboration

The CalHEERS Project collaborates and works with the CalSAWS. The system provides coordination of consumer health information and request for benefits between the CalHEERS and the CalSAWS. The activities include communicating changes made to eHIT and other interfaces that are used to transmit data to and from the CalSAWS System, inclusion of CalSAWS representatives in the Change Management Process and UAT testing and support.

3.7.2 Medi-Cal Eligibility Data System (MEDS) Interface

MEDS is the designated system used for verification of consumer status in State-subsidized

eligibility and benefit programs. Both CalSAWS and CalHEERS send updates to MEDS regarding the eligibility into the respective health care assistance programs within CalHEERS.

The CalHEERS to MEDS interface is comprised of both real-time Web Services and scheduled Batch Processes. Together, these systems implement the data transfer necessary to update MEDS with data collected from the CalHEERS Single Streamline Application Case Management Solution.

3.7.3 System Security

The CalHEERS enterprise security framework provides a structured approach to establish the baseline controls across CalHEERS and its interfacing partner systems and the security functions necessary to support CalHEERS' current security policies. It also facilitates the analysis of processes, governance, interfaces, and technical capabilities employed by CalHEERS while aligning with federal and state-level standards.

Furthermore the framework focuses on protecting the sensitive data the CalHEERS processes, transmits, and stores. It is the foundation of the data protection and privacy activities in compliance with industry standards, best practices, and regulations governing data protection. The risk management and operational activities within the framework provide the necessary processes and procedures to support the data protection effort all of which are operated within the governance and compliance structure of the framework.

Figure 3-9: CalHEERS Enterprise Security Framework

Guidelines and compliance drivers CalHEERS must adhere to include IRS Publication 1075, FIPS 140-2 (Federal Information Processing Standard), and MARS-E v2.2 (Minimum Acceptable Risk Safeguards for Exchanges) which is derived from NIST SP 800-53 rev 4 (National Institute of Standards and Technology). Effective 2025, MARS-E retires and will be replaced by ARC-AMPE (Acceptable Risk Controls for ACA, Medicaid, and Partner Entities), which is derived from NIST SP 800-53 rev 5, final effective date pending.

3.7.4 System Hardware / Software

Equipment and Third-Party Software licenses to which the State takes title or holds under prime contract shall reside in the Asset Management Software (AMS). Extracts of this data can be found in the Bidders' Library.

3.7.5 Forms Support

As part of the normal CalHEERS Project operations, notices and forms must be generated and sent to a variety of Covered California consumers and Medi-Cal consumers. Notices are mailed to consumers to request an action be taken or to provide a status update of an individual's application, enrollment, or eligibility.

Consumers send application and verification documents to Covered California. Once these documents are received, they are scanned and sent to the CalHEERS. The SDMO SI is responsible for the performance of its Subcontractor and provides direct oversight of Outbound and Inbound Print Processing. This process includes providing Print Services for outbound and inbound mail. Operational detail of the Print Processing Facility is in the Program Support Plan deliverable.

3.7.6 Service Center Services

The current Contractor, at the direction of the State, took over providing service center services for CalHEERS in January, 2024. The service center services include hosting provider and service maintenance and operations, planning, execution, reporting, performance monitoring, capacity planning and sizing, technology recovery, and evaluating and resolving issues. See SOW Section 6.19, SERVICE CENTER SERVICES.

3.8 PROJECT CLOSEOUT

Project closeout is the process of closing out all the obligations of the SI over the duration of the contract term. This effort begins during the final year of the contract.

The existing CalHEERS Services contract with Deloitte includes Project Closeout tasks (SOW 3.1.3 CONTRACT CLOSEOUT) and activities related to the existing contract which ensures that nothing is missed regarding existing contract commitments.

Not to be confused with project closeout, the existing contract also includes specific transition-related activities under a separate contract section SOW 7 TRANSITION to assist with transition essentials between the existing contract and the new contract.

4 PROPOSED SYSTEM

4.1 INTRODUCTION

This section describes the vision for the ongoing CalHEERS System Development, Maintenance and Operations (SDMO) services and proposed system sought through this procurement. Bidders are strongly encouraged to first read RFP Section 3, CURRENT SYSTEM, and any documents referenced in the Bidders' Library prior to reading this section.

4.1.1 Overview

Covered California, the Department of Health Care Services (DHCS), and the Office of Technology & Solutions Integration (OTSI) are committed to partnering with a Contractor that will assist in ensuring that the CalHEERS System is a 'Best in Class' solution and that the CalHEERS Project Office is working with a 'Best in Class' Contractor. The State is seeking a bidder who shares this commitment and can bring foresight, efficiencies, and innovation into consideration by submitting a proposal that will ensure affordability for maintaining existing services.

The selected Bidder must guide the project, with creativity and collaboration, through the transformation of our solution to obtain higher levels of maturity, innovation, cost efficiency, and responsiveness, all while retaining the stability required to support the State's healthcare needs. The selected Bidder must also be nimble and able to quickly adapt to changes in legislation, emerging technologies, and new market opportunities. Finally, the Bidder will identify and deploy accompanying business solutions which represent the best value to the State.

The concepts presented in this section frame the State's vision and high-level outcomes, but do not constrain nor prescribe the bidder's solution methodology, toolset, or approach for achieving the vision and outcomes. The bidder's response must highlight the approach, methodology, and creativity of its proposed offerings to enable the bidder to set itself apart from its competitors. Refer to RFP Section 6, BIDDER REQUIREMENTS for instructions for submitting the proposal.

4.1.2 CalHEERS Vision

The CalHEERS Vision Statement documents that we want to "be the most customer centric portal and a trusted leader in providing access to affordable, high-quality health and human services." To enact that vision, CalHEERS has identified several strategic priorities which are shown in the figure below.

4.1.3 CalHEERS Strategic Roadmap

The CalHEERS Strategic Roadmap records the outcomes of strategic planning efforts between CalHEERS Management and Sponsors and documents the timeline for introduction of change into the CalHEERS Solution (refer to the Bidders' Library – CalHEERS 24-Month Roadmap). The 24-month roadmap is regularly and continuously updated to reflect changes in the environment. As stated above, Covered California, DHCS and OTSI are extremely motivated to select a Bidder who will assist in the continued development of the 24-month Roadmap. Keeping an eye on the future and transformation via applied innovation, while improving the value and quality of changes implemented will be key components of this partnership.

Figure 4-1: CalHEERS Strategic Plan Priorities

4.1.4 Opportunities for Transformation

This section identifies some of the changes the State seeks to accomplish through the execution of this new contract. The term transformation refers to changes between the existing contract services and the services of the new contract, which combine the vision from both the CalHEERS STRATEGIC ROADMAP (discussed in 4.1.3 above) and any new requirements, marked as "NEW" in the Req # column throughout the Statement of Work (SOW), in the new contract. For more information on the roadmap and timelines for transformation, refer to [Section 4.7 TRANSITION](#) (below).

Covered California, DHCS, and OTSI have identified transformation areas within specific SOW sections where desired improvements are to be brought about via the new contract.

The remainder of this document is devoted to providing Bidders with a guide to the areas in the SOW where enhancements were applied to encourage maturing of project process and tools during, or immediately following, the transition (take-over) period. These focus areas are depicted in the figure below (in the context of their application) and further described in the subsequent subsections.

Figure 4-2: RFP Section 4 – Focus Areas

4.2 CONTRACTOR STAFFING

RFP Section 3, CURRENT SYSTEM, describes the vision and culture of the CalHEERS Project, including the types of skills the SDMO Contractor must possess to support both CalHEERS and its partners. While the CalHEERS Project expects staffing levels appropriate to support services delivery comparable to the current system integrator, refer to RFP Appendix A-4, SOW SECTION 2, CONTRACTOR PERSONNEL REQUIREMENTS, there are particular staffing areas where the State wants to increase focus by applying changes in both Key and Non-Key Staffing, associated skill sets, addressing the hybrid work environment, and refinements applied to both onsite/offsite & onshore/offshore staffing activities. These changes were applied to support the further maturing of the CalHEERS business processes and the anticipated expansion of CalHEERS' business functionality and technology throughout the term of this Contract.

4.2.1 Updates to Key and Non-Key Staffing

The State seeks high quality resources who are both trained and experienced with human services systems and programs with an emphasis on healthcare. These resources will not only need to and have the right skillsets and certifications for maintaining CalHEERS today but also the creativity and experience in collaboration and innovation to help enhance the system with newly emerging technology. The Bidder will also need to bring a breadth in staffing that will permit the ability to ramp up/down staffing as needed to meet both the M&O and Innovation demands of the project. The State also seeks a Bidder team that is organized to complement CalHEERS' organizational structures.

4.2.2 Updates Onsite/Offsite Staffing & Onshore/Offshore Activities

The State will consider the use of both onshore(onsite/offsite) and offshore staffing resources for this Contract, as the State would like to realize the highest value while delivering quality services and client interactions. To do this, the Bidder must ensure that its Staff is knowledgeable and responsive to program needs; willing to make customer satisfaction a priority; and has the ability to obtain, train, and utilize subject matter experts (SMEs) who understand the business and technology of the CalHEERS System. Additionally, the use of Bidder offshore staff requires compliance with security requirements.

4.2.3 Hybrid Remote Work Environment

Following the COVID Pandemic the State has maintained a hybrid remote work/office model on the CalHEERS Project. As of July 1, 2025, the policy includes working remotely one (1) day a week and working in the office four (4) days a week. The State is looking for a Bidder that will work with the State to determine the best onboarding plan, including determining the employees that will be required to work at the CalHEERS office(s) or participate in a hybrid remote work/office model.

4.3 PROJECT MANAGEMENT

The State values and recognizes the quality of people that a Bidder brings to the table are paramount to successful partnerships. Project Management as discussed in RFP Section 3, CURRENT SYSTEM, covers the areas and relationship to managing the project. While the CalHEERS Project maintains much of the same expectations for project management as with the current system (refer to RFP Appendix A-4, SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS), the following are particular project management areas on which the State wants to focus as it plans for the future.

4.3.1 Updates to Schedule Management

The State seeks a Bidder that will implement exceptional Schedule Management practices across the many project work plans. In addition, the State Project Management Office (PMO) has identified the desired improvements to the Schedule Management services provided by the Bidder:

- Improved planning and tracking of Discovery and Pre-JAD efforts, via the implementation of tracking tools, which support Change Requests within the Software Release Work Plans (SRWP).
- Implementation of an automated solution for soliciting and applying schedule updates into the project work plans.
- Schedule Management Transformation – The State desires to transition the project to effort driven schedules, which would promote schedule management efficiencies, improved resource management, and provide transparency pertaining to actual efforts for project activities.

4.3.2 Updates to Cost/Cost Estimation

The State Financial Team seeks a Bidder that can implement a financial tracking system, and bring experienced staff to operate the system. The State is also interested in applying improvements to project cost estimation process, integrating benefit realization and return on investment (ROI) into project cost considerations, and having the Bidder take benchmark data to track key performance indicators (KPI) through system enhancement efforts.

4.3.3 Updates to Staffing Management

The State is looking to apply additional improvements to staffing, including the development of a more comprehensive set of desk procedures, refinement of process/procedures related to long term vacation, absences or illness, and finally delineating between Operations and Change Management staffing.

4.3.4 Updates to Communication

SDMO services of the Bidder must be transparent, meaning that all forms of communication are clear, open, comprehensive, and timely. The Bidder must provide transparency in the cost and effort for system changes; resolution for system or service issues/defects; and system performance for daily operations. Whether through e-mails, phone calls, in-person discussions, formal notifications, deliverables, reports, or structured meetings, transparency must be maintained to ensure the overall health and success of the CalHEERS Project. An area the State desires having the Bidder bring improvements to is the project SharePoint site, including how it's organized and maintained for use by the different project teams. Additionally, the State desires to improve communication with stakeholders specifically as part of planning for Pre-JAD and change request meetings.

4.3.5 Updates to Document Management & Contract Management

The CalHEERS Project depends on exceptional document management techniques in the oversight of the system enhancements and coordination to maintain the high demand for system changes throughout the year. With a myriad of interdependencies between CRs, and teams making changes/updates to system documentation, the State seeks a Bidder that can manage the sophisticated CalHEERS document management processes with great vigilance. To that end, the State has updated the Contract to ensure that deficiencies found in documentation are fixed at no additional cost to the State.

In addition, the State has also augmented the content management services required within the future Contract ~~to better~~ to better utilize some of the content management tools on the project, most notably SharePoint. The Bidder will need to augment their staffing with resources that bring substantial experience in this area.

The State is also looking for a Bidder who will take over and maintain the Project Artifact Inventory, which organizes and identifies the relationships between Deliverables and project artifacts, which include project processes, standard operating procedures (SOP), reports, work plans, tools, reference materials, and work products. Finally, the State desires to have the Bidder work collaboratively with the State management to prioritize the review and update of CalHEERS Project Deliverables.

4.3.6 Updates to Quality Management

The State has applied updates throughout the Contract to provide for improved quality and vendor oversight.

4.3.7 Access to Enterprise Tools

The CalHEERS Project has two main sponsor entities whose staff play large roles in the project's processes. The State is looking for a bidder that not only maintain all the tools used for the project, but also seamlessly provide and manage access to those tools for the large number of CalHEERS or Sponsor staff who use them.

4.3.8 Enhancing Strategic Planning and Management

A lot of effort goes into the Strategic Planning activities on CalHEERS, as they look at least five (5) years into the future strategizing needed system maintenance and desired project innovation, feeding into the Strategic Plan and Roadmap development. And with the number of State desired innovations identified in Section 4.5.4 – GENERAL INNOVATIONS (below), there are a lot of inputs for the Bidder and State to consider.

Additionally, with the rapid advancement of technology and use of data, the State desires a Bidder that will focus on aligning the CalHEERS strategic planning with our Sponsor strategic plans (Covered California and the Department of Health Care Services), as well as the IT and Data Strategic Plan of the California Health and Human Services (CalHHS).

4.3.9 Policy & Legislative Impact Analysis and Change Support

The State desires a Bidder that will bring the experience and needed expertise and lead the project in legislative analysis and policy impact assessment.

4.3.10 Updates to Audit Evaluation and Findings Services

The State is also looking for a Bidder that will provide a dedicated Audit Data Support team.

4.4 SYSTEM CHANGE & ENHANCEMENTS

System Change & Enhancements covers the changes/enhancements to the system that are approved through the formal change control process. These changes include, but are not limited to, new or updated system features/functions, system upgrades or improvements, technical refresh activities, as well as innovations that come from strategic planning, prioritized stakeholder requests, and policy or legislative mandated changes. Please refer to RFP Appendix A-4, SOW SECTION 4, SYSTEM CHANGE & ENHANCEMENTS REQUIREMENTS, the following are particular areas where special attention should be given.

4.4.1 Updates the CalHEERS Solution to keep it Relevant

CalHEERS is an evolving, ever-improving System that must meet the ongoing challenges of healthcare eligibility, options and consumer retention. The State seeks a Bidder who can support these challenges with the right mix of strategic planning, technological innovation, process, and efficiency, all while ensuring the security of the system. Areas of particular importance, include but are not limited to:

- Continuous Improvement
- Adopting/implementing technologies that keep the system relevant and secure
- Improving the CalHEERS Project's ability to manage changes with efficiency, effectiveness and quality
- Focus on the self-service and assisted consumer journey/experience with an emphasis on access to care for all consumers (based on program eligibility and regulation)
- Reconciling cost estimates with actual costs (as appropriate)

4.4.2 Updates to Strategic Planning

The State has moved the Strategic Plan and Strategic Roadmap Deliverables under APPENDIX A-4 – SOW 3 PROJECT MANAGEMENT REQUIREMENTS, aligning the deliverables with the project's structure.

4.4.3 Updates to System/Software Development Lifecycle

It is critical for the Bidder to fully understand all aspects of CalHEERS' functional and technical design and be able to both accurately and efficiently maintain the system design documentation as they implement a high volume of change requests for the project.

Additionally, the State has need for a Bidder that can coordinate and support translation services as required to support CalHEERS public facing client portals and all notices required to support threshold languages within the CalHEERS system as defined by our sponsor organizations.

4.4.4 Updates to Change Management and Configuration Management

The State has applied several updates under the Change Management and Configuration Management areas of the Contract, ranging from smaller improvements to larger updates:

- Improvements for Pre-JAD Planning and other change request meetings to include stakeholders
- Improvements to the Change Request Cost Summary
- Improvements to the Cost True-up methodology
- Integrating the Basis of Estimate content into the Change Request Process Deliverable
- Improvements to Change Management resource capacity planning
- Ensuring Plans of Action and Milestones (POAM) and Corrective Action Plan (CAP) updates are at no cost to the State
- Separating modernization vs mandatory security upgrades
- Improvements around the definitions of work-at-risk and enhancement vs. maintenance
- Improved functional and technical design document compositions
- Defining the required Project Management support for large scope change requests
- Decreasing the "Innovation-to-Implementation" pipeline execution duration

- Improvements to Outcome Realization to identify opportunities to produce the best return on investment (ROI) for change requests

4.4.5 Staffing for Innovation

With the additional technological innovations CalHEERS is considering implementing, it is expected that the Bidder will augment the standard change management staffing with additional, specialized staff. Staff should have proven experience when it comes to implementing and supporting specific technologies. Experience that ranges from confirming proof of concepts through design, development, testing, implementation and the evaluation of KPI's during and post implementation. Technologies include but are not limited to : GenAI, LLM, Consumer Journey/Experience solutions, consumer feedback collection solutions, etc.

4.4.6 Updates to Defect Management

The State seeks a Bidder who will take responsibility of the CalHEERS System, including any existing defects and make it a priority to resolve all defects, maintaining the system to the best of their abilities.

4.5 PROGRAM SUPPORT

Program Support Requirements cover a set of activities and services that support the day-to-day needs of CalHEERS and will be carried out under the fixed price portion of the Contract. Please refer to Appendix A-4, SOW Section 5, PROGRAM SUPPORT REQUIREMENTS, for the scope of this work. The State Points out the following areas of program support services where the State wants to give special attention with an eye towards the future Contract.

4.5.1 Updates to Program Support Services

The State seeks a Bidder who will strive to clearly understand the business needs of the CalHEERS Project and is willing to enhance their understanding as the affordable healthcare options within CalHEERS continue to mature. The State is seeking a Bidder that understands the Affordable Care Act (ACA) regulations, policies, and procedures, and values an understanding of the DHCS programs and how these programs interact as a result of their integration and implementation in the CalHEERS System. The State will expect that the Bidder train their personnel on how affordability programs are administered in the State of California.

The State is seeking a Bidder who will integrate into and actively support the needs of the business. It is critical to the CalHEERS Project that the Bidder develop, deliver, and conduct Program Support activities that clearly defines the roles and responsibilities of the Bidder staff in the day-to-day activities partnering with the business to make informed decisions about the introduction of change into the organization. The State requires the Bidder to update and maintain a Program Support Plan that details out the roles and responsibilities for all activities associated with program support.

4.5.2 Operationalizing Processes

The State is seeking a Bidder able to operationalize and integrate a specific set of activities with a focus on reducing overhead, impact, and costs to the State. The State expects the Bidder to remain consistent with the delivery of quality services while automating, innovating, making efficient and properly documenting each of the following services.

4.5.2.1 Updates to Consumer Experience Support

The State desires to have a Bidder team take over the existing consumer experience services, provided by the incumbent Bidder, assess and improve upon those services and properly

document the process and procedures associated with that body of scope.

4.5.2.2 Reasonable Opportunity Period (ROP) Batch Processing

The State is seeking a Bidder team to assist in operationalization the ROP timeframes associated with healthcare assistance eligibility on behalf of our sponsors. The ROP period is the period of time that a consumer is determined conditionally eligible for healthcare assistance while providing additional documentation to support a final determination of eligible or ~~not-eligible~~not eligible.

4.5.2.3 BOT Services

The State wants a Bidder who can provide skilled staff resources able to assist in the identification, design, deployment and ongoing performance of the current CalHEERS BOT technology services. The responsibilities include both assessing ~~current services~~current services as well as proposing future innovation.

4.5.2.4 Small Change Notices Services

The Bidder will take over and provide the Small Change Notices Services, facilitating small textual changes to system notices.

4.5.2.5 Salesforce Application Maintenance Services

The State is looking for the Bidder to support Salesforce application maintenance, assessing and providing improvements to these services.

4.5.2.6 Intelligent Document Processing (IDP) Services

The State is interested in having the Bidder take over and provide IDP services, expanding the functionality to provide additional benefits to CalHEERS.

4.5.2.7 Application Maintenance Support

Bidder shall provide the Application Maintenance support services

4.5.2.8 Usability Research Services

The State desires a capable, knowledgeable Bidder team to take over and provide usability research services for CalHEERS. The usability research function will align and collaborate with ongoing existing customer research activities at Covered California and DHCS.

4.5.2.9 Eligibility System Interface (EHIT) Services

The Bidder shall take over and operationalize the ongoing process and services supporting the Eligibility System Electronic Health Information Transfer (EHIT) interface.

4.5.2.10 Federal Regulatory analysis and implementation Services

The State desires a Bidder that will take over and improve the Federal Regulatory Analysis and implementation services, including:

- Advanced Premium Tax Credit (APTC) Reporting Support
- Evaluate and design, code and implement the changes required by Federal regulation to the IRS Tax forms
- Modifications to CalHEERS based on Federal Regulation changes

4.5.2.11 State Regulatory analysis and implementation Services

The State desires a Bidder that will take over and improve the State Regulatory Analysis and implementation services, including:

- State Regulatory Analysis and Implementation support
- Evaluate and design, code and implement the changes required by State regulation to the FTB Tax forms
- Modifications to CalHEERS based on State Regulation changes

4.5.2.12 Analytics Enhancement and Support Services

The Bidder shall take over and support the existing CalHEERS data analytics services and assess future enhancements.

4.5.3 Print and Mail Support

The Bidder shall provide the Print Mail Center Services in support of the Contract, as well as any future needs as requested by the State. Additionally, the Bidder shall be responsible for all unused inventory related to these services.

4.5.4 General Innovations

With technology advancing at an ever-increasing pace, the State is looking for a Bidder that can bring to bear a world class team of resources to lead the project into the future via the execution of innovation. The State needs a team experienced in the technology of today with an eye on the horizon for future technology innovations. A team that can quickly pilot new innovative technology. This team needs to bring knowledge and experience in Public Benefit Policy (both state and federal) and be able to identify when innovation might conflict with policy. The team needs to bring customer conversion and consumer experience skillsets to identify improvements that better the system and add value for its end users. The team needs experience in state-of-the-art data research and analysis to help identify system changes/innovations that provide the highest return on investment to the State. And finally, the team will need to be experienced in the very latest security standards and trends, keeping the system as secure as possible. Some of the innovations the State is interested in are discussed in the subsections below.

4.5.4.1 Private Sector-Like Ideation

The State desires to work with a Bidder that can bring innovation ideation processes to the project like those used in the private sector, analyzing, and aiding the state in finding the desired balance between innovation speed to market and risk tolerance, in order to provide the most benefit to the CalHEERS consumers.

4.5.4.2 World Class Innovation Team

Pertaining to Innovation, the State is in need of a Bidder that will not only bring a staffing level to takeover and execute the existing services of CalHEERS but will also bring staff that are world class innovators with specialized skills in project areas where the State desires enhancement and/or innovation. Some of the teams the State anticipates needing include but are not limited to:

- Innovations Team
- Specialized Research and Strategy Team
- Artificial Intelligence (AI) Team
- Dedicated Data Analytics Team
- Dedicated Enrollment Data Team

- Dedicated PRA Data Team
- Dedicated Audit Support Team

4.5.4.3 Time to Market SDLC Innovation

The State is looking for a Bidder to analyze and enhance the project SDLC, with the goal of reducing the time between enhancement or innovation ideation and implementation.

4.5.5 Data & Analytics Innovations

4.5.5.1 Data & Analytics Program Innovations

In March 2024, California Health and Human Services (CalHHS) introduced their CalHHS IT & Data Strategic Plan which outlined the strategic direction for the future of data. As part of the strategy, CalHHS identified seven (7) key elements of the Future Digital Ecosystem (FDE) that enables them to:

1. Identify a set of services that can improve an Individual, Community, and/or Population's (ICPs) overall wellness, with consent (Holistic Assessment).
2. Understand the potential for specific service delivery to ICPs (Screening).
3. Connect with ICPs with services (Referral and Outreach).
4. Validate service conditions and permissions across all services (Eligibility).
5. Formally initiate service delivery (Enrollment).
6. Coordinate, provide and inform service usage (Care Management).
7. Understand the impact and continuously improve services through longitudinal data analysis (Evaluation).

The State seeks a Bidder who will advise the CalHEERS towards alignment with the IT & Data Strategic Plan that provide an outcome which maximizes such benefits.

4.5.5.2 Data & Analytics Platform Innovations

The State seeks an assessment of the CalHEERS data platform to identify opportunities for expansions and innovations. In addition to generating innovations across the spectrum of data analytics technologies and processes, CalHEERS seeks to improve its data governance tools and processes (including metadata and catalogs) that can integrate effectively with Covered California and DHCS's own processes and environment. The CalHEERS data platform also seeks to leverage innovations that allow seamless integration between environments to reduce the redundant copying and transferring of data and thereby reduce total cost of ownership. Attention to data retention and archiving for analytics is also increasingly important as CalHEERS matures.

Examples of some of the data platform innovations that CalHEERS might consider through a future change request enhancement include:

- Enhancement and improvement of the shared oversight between secured sponsor-controlled data environments and the broader CalHEERS-specific data platform.
- Simplification of data product and visualization sharing across environments (such as Covered California service center representatives, DHCS staff, etc.), stakeholders (e.g. sharing data assets or reports with carriers or counties) and the public (such as publicly accessible visualizations).
- Deployment of a modern technology for data catalog and discovery, collaboration and sharing, meta-data and data governance management, etc.
- Integration of a full geo-coding and geo-spatial enrichment data into the CalHEERS System.

- Leverage new technologies and processes to strengthen analytics development lifecycle.
- Data and Analytics Development Lifecycle Innovations.

4.5.5.3 Data & Analytics Development Lifecycle Innovations

CalHEERS is a continually evolving system and requires an approach to Data & Analytics that grows with the platform. Delivering insights requires a development approach to data and analytics that includes the strategic, flexible, and creative approaches of an agile environment, while still retaining the sustainability, dependability, and security of traditional development lifecycles. CalHEERS seeks to partner with a Data & Analytics team that is committed to making data meaningful and using it to evaluate CalHEERS operations and improve the way it serves Californians.

CalHEERS seeks to move beyond merely fulfilling report requests and instead ensure that data and its insights are infused throughout system design and development. Among the innovations we see for Data and Analytics Development Lifecycle include, but are not limited to:

- An operating model for analytics that includes both data management and analytical activities.
- A development lifecycle that includes active partnership with CalHEERS and its sponsors to build shared purpose and allow the Bidder to anticipate program analytical needs and achieve easy and fluid communication with data customers.
- A roadmap for incrementally building “customer 360” data products (including foundational components like identity resolution).
- The integration of Bidder, CalHEERS, sponsor staff, and other stakeholders as needed, as key subject matter experts on nimble data product teams.
- Potential deployment of analytics pods or communities that build knowledge and capabilities in analytics and can be deployed with system product owners to derive new insights and help CalHEERS innovate.

4.5.5.4 Advanced Analytics & Data Science Innovations

For advanced analytics and data science, CalHEERS seeks a team with expertise to both envision and implement the data foundation to power artificial intelligence (AI) and other data-driven technologies that can accelerate innovation in our service to consumers.

The advanced analytics and data science innovations sought by CalHEERS include, but are not limited to:

- Potential for turning structured and unstructured data (e.g. call center recording, web interaction data, etc.) from a variety of consumer interactions into opportunities for improving service.
- Leveraging advanced empirical techniques to increase automation and generate insights into consumer behavior – accompanied always by assessments of the empirical and ethical appropriateness of model applications to generate impact at scale in a government setting.
- Building experiments and evaluation frameworks informed by expert research design attuned to make strong causal inferences.
- Highlighting other Covered California data assets (surveys, health care utilization data, product data, etc.) that could be used to develop new data products.

4.5.5.5 Outcome Realization Innovations

The State wants a Bidder data analytics team to mature the existing CalHEERS data analytics, analyzing data from the data warehouse and change management process, focusing on

outcomes, to inform the strategic planning and prioritization processes on what changes provide the most return on the State's investment.

4.5.6 Consumer Journey & Experience Innovations

4.5.6.1 Self-service & Assisted Consumer Journey and Experience Innovations

The State desires a Bidder that is highly experienced in analyzing and improving the consumer journeys of their clients. A Bidder that can analyze and make recommendations pertaining to the CalHEERS' consumer journey and data boundaries, and identify improvements to data management, (e.g., moving towards Consumer 360 data, conducting analysis and road-mapping, advancing A/B Testing, providing input for next best action campaigns, and permitting focus on equity). Ultimately bringing innovation to both the self-service and assisted consumer journeys and experiences on CalHEERS with a focus on outcome realization.

4.5.6.2 Consumer Feedback Collection Solution Innovations

The State is interested in having a Bidder institute consumer feedback collection functionality, e.g., consumer surveys, to collect data on the consumer experience to inform the Bidder and State on future innovations.

4.5.6.3 Choice Architecture & Nudging Innovations

The State is interested in having a Bidder improve the CalHEERS' choice architecture and nudging functionality, identifying options for how the system could better promote decisions that benefit the consumer, and trigger next best action nudges, being mindful of government restrictions or policies.

4.5.7 Artificial Intelligence Innovations

4.5.7.1 Artificial Intelligence (AI) & Generative Artificial Intelligence (GenAI) innovations

The State is interested in a Bidder that is an expert in implementing Artificial Intelligence (AI) and Generative Artificial Intelligence (GenAI), and desires to enhance the AI functionality in use today and propose GenAI solutions that would allow CalHEERS to "do more with less," e.g., implementing a chatbot or assistant which takes advantage of Large Language Models (LLM) and would be accessible to all users of CalHEERS.

4.5.8 Organizational Innovations

4.5.8.1 Multi-Sponsor Design Strategy

The State would like to have a Bidder analyze, make recommendations, and assist with implementing organizational changes moving the State closer to a single design strategy shared by CalHEERS and Sponsor organizations.

4.5.8.2 Project to Product Management

The State has interest in having a Bidder conduct research and analysis, providing advice/guidance on organizational changes for CalHEERS that move the State from a project management focus to a product management focus. This shift in focus should bring efficiencies to CalHEERS, via improved Sponsor product team involvement, leading to improved products and services for consumers. Additionally, Covered California is already using Prosci's OCM methodology within their organization and desires the Bidder be experienced with and utilize that methodology for implementing this shift in focus.

4.5.9 Security Innovations

4.5.9.1 Security Innovations

In the Security realm, the State is looking for a Bidder to bring a best-in-class Security Operations Center (SOC) that will ensure CalHEERS is compliant with all applicable security standards, whether that be Minimum Acceptable Risk Standards for Exchanges (MARS-E) or Acceptable Risk Controls for ACA, Medicaid, and Partner Entities (ARC-AMPE) and any other dictated standards. The Bidder will need to be capable of bringing the most state-of-the art, iron-clad security solutions, able to enhance existing AI security solutions, able to automate incident reporting, provide transparency with internal security metrics, and provide more stringent security monitoring of third-party vendors on the contract.

4.6 OPERATIONS

Operations covers all things related to supporting the day-to-day needs of the system and infrastructure supporting the system for things such as: planning, problem management, processes, reporting, interfaces, site/facilities, capacity, backup and recovery, data retention, environments, performance, and hardware/software. Although the CalHEERS Project will maintain much of the same expectations for operations as the current system (refer to RFP Appendix A-4, SOW Section 6, OPERATIONS REQUIREMENTS), the following are particular areas related to operations where the State wants to give special attention, with an eye towards the future Contract.

4.6.1 Effective/ Efficient Operations

This procurement seeks to improve the maintainability, reliability, and efficiency of CalHEERS. The Bidder must be able to leverage emerging technologies and industry best practices in their implementation of policy and program changes. Ideally, the Bidder must blend system maintenance and strategic planning to provide a well-planned roadmap for system improvements that include evaluation and recommendation of SDMO service improvements to save costs and provide better functionality. The State is also looking for a Bidder to take on more operations process responsibilities, reducing State overhead in areas like management of end-user licensing agreements (EULA).

4.6.2 Updates to the CalHEERS Infrastructure

One of the largest changes CalHEERS has undergone was the migration of the system from an on-prem infrastructure to the cloud. The State will continue to work with the Bidder to ensure that all applicable CalHEERS System components are cloud-based and optimized to ensure that the advantages of the cloud are achieved.

4.6.3 Updates to Capacity Management

The State has applied updates to ensure the Bidder has the ability to accurately forecast and transparently cost both system capacity and storage.

4.6.4 Updates to Interface Support Activities

The State has applied updates to acquire additional support services around EDI 834 transactions.

4.6.5 Updates to Technical Refresh

CalHEERS conducted technical refresh activities which accomplished the following:

- Access Gateway Modernization
- Lightweight Modernization
- IAM Modernization
- Data Warehouse Modernization
- CDN Modernization
- Database Modernization
- Poller Services Modernization
- Rules Engine Modernization

These updates to the system open the door for future improvements to be planned/implemented which the State has identified improvements in the areas of planning and cost effectiveness.

4.6.6 Updates to Security

The State is interested in a Bidder that will bring a world class Information Security Team, with comprehensive expertise and capabilities across all security domains, to ensure a robust cybersecurity defense for the project. Requirement updates were also applied to address FTB and EDD security requirements, changes around processing Audits or POAM findings, and 3rd Party Vendors that provide services to CalHEERS.

The State seeks to continue to add different data sources to CalHEERS (as with EDD and FTB) that may involve different legal requirements. As such, the state is interested in a bidder who can provide a security framework that is adaptable to a variety of data with diverse security, audit, and privacy requirements.

4.6.7 Operations Service Delivery

The Bidder shall assume responsibility of maintaining CalHEERS and continually improve the SDMO services described in Section 3, CURRENT SYSTEM, while meeting all the requirements stated in Appendix A-4, STATEMENT OF WORK (SOW). The Bidder must ensure the stability, consistency, and reliability of the system functionality while delivering the SDMO services and process improvements.

4.6.8 Website Management

The State desires a Bidder that will not only takeover the existing website management activities on CalHEERS, but bring needed improvements, like regression testing of system links, accessibility testing or ADA compliance for updates, etc.

4.6.9 Service Center Services

The Bidder needs to bring a team with extensive Service Center Services experience to the project that can both continue to provide the day-to-day maintenance, support, and operational stability of the Services and technology provided today. The Bidder will provide development and support related to the Service Center applications, currently Amazon Connect and Verint, assessing and providing improvements and enhancements to these services.

4.7 TRANSITION

Transition will take place from the current contract to the new contract, and possibly between the incumbent Contractor and a new Contractor. Therefore, transition is articulated into the three critical areas needed to ensure a timely and successful changeover takes place upon Contract Award/Execution. The three areas are: Transition-In (Takeover), Transition-In (Transformation), and Transition-Out.

Figure 4-3: Transition Phases

4.7.1 Transition-In Phase 1 (TIP1) - Takeover

Transition-In (Takeover) is the period of time starting at contract execution with the winning bidder, through assumption of operation of CalHEERS. If the winning bidder is also the incumbent contractor, the Transition-In (Takeover) effort may be minimized or not be applicable. SOW Appendix A-4, SOW SECTION 7.1, TRANSITION-IN PHASE 1 (TIP1) TAKEOVER of this RFP covers this body of work in detail.

NOTE: Refer to the Bidder Library for Transition-In artifacts to guide Bidders in preparation for their proposal response.

4.7.1.1 A Timely Transition-In

Transition between the start of the new contract (referred to as transition-in) and the closeout of the existing contract (referred to as transition-out) will occur concurrently with the normal operation of the CalHEERS system. Under the contract that results from this procurement, the transition period (overlaps between the two contracts) is set for up to one (1) year. It is vital that this complex and risky first part of transition be completed without disrupting the stability of normal business operations and CalHEERS system availability. If the winning bidder is also the incumbent contractor, the Transition-In period will be minimal or may not be applicable.

4.7.1.2 Minimizing and Mitigating Risk in Transition-In

The State understands there is risk associated with “contractor” transition-in and “contract” transition-in; and values a partner that can minimize risk throughout the transition-in period. It is imperative that bidders articulate how they will identify, minimize, manage, and mitigate risks during the transition-in period.

4.7.1.3 Collaboration, Transparency, and Leadership During Transition-In

Transition-In of the CalHEERS contract (and potentially the bidder) will require a great deal of collaboration and leadership to ensure it is successful. The State seeks a bidder who will be able to balance the needs of the CalHEERS Project, the sponsors, and other bidder resources to lead and navigate the transition-in to success. It is highly important that bidders articulate how they will work with the incumbent contractor to ensure a smooth transition. If the winning bidder is also the incumbent contractor, the Transition-In period will be minimal or may not be applicable.

4.7.2 Transition-In Phase 2 (TIP2) - Transformation

The Transition-In (Transformation) period will begin concurrently with the Transition-In (Takeover) phase. The timeframes for TIP2 will be planned collaboratively with the State and documented via updates to the Transition-In Master Plan (TIMP). Contract Transformation will incrementally roll out changes between the old and new contract into the CalHEERS culture. The Contract Transformation body of work is spelled out in the new contract, Appendix A-4, SOW SECTION 7.2, TRANSITION-IN PHASE 2 (TIP2) TRANSFORMATION.

4.7.3 Transition-Out

4.7.3.1 Transition-Out of the Winning Bidder

Under this RFP, the Transition-Out period occurs at the tail end of the current Contract. This work is described in the new contract Appendix A-4, SOW SECTION 7.3, TRANSITION-OUT. This body of work requires the winning bidder to collaborate with the State and winning bidder to transition-out the system and management infrastructure to the winning bidder of any follow-on contract that may exist at contract term end.

4.7.3.2 Transition-Out for the Deloitte Contract

Under the current Deloitte contract Appendix A-4 SOW SECTION 7.3, [TRANSITION-OUT Deloitte](#) also has transition-out expectations which spell out detailed expectations. This body of work requires that Deloitte collaborate with the State and winning bidder to transition-out the system and management infrastructure to the winning bidder. Refer to the Bidders Library for this information. If the winning bidder is also the incumbent contractor, the Transition-out period will be minimal or may not be applicable.

5 ADMINISTRATIVE REQUIREMENTS

5.1 INTRODUCTION

Section 5, ADMINISTRATIVE REQUIREMENTS must be met to be considered responsive to the Request for Proposal (RFP), Office of Technology & Solutions Integration (OTSI) California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS), System Development, Maintenance and Operations (SDMO) RFP 73040873. Bidders will provide their responses within the corresponding forms located in Appendix B, FORMS. The highest scored, responsive and responsible bidder, as a result of this solicitation, will become the new CalHEERS SDMO Contractor.

- Mandatory Administrative Requirements listed are denoted as (M) and are scored on a pass/fail basis.
- Optional Administrative Requirements are denoted as (O) and are not required to be offered by the bidder to be compliant with the solicitation requirements. Bidders may choose whether to meet Optional Administrative Requirements, such as those relating to preference points. However, if a bidder offers any of these optional requirements, the bidder must meet the minimum requirements as stated. The State's Evaluation Team will review responses to optional requirements and apply points, if applicable, per the criteria stated in RFP Section 9, EVALUATION.
- A "Fail" may result in a proposal being deemed nonresponsive and, therefore, may be disqualified.
- Failure to provide a response to each mandatory requirement, where indicated, may result in disqualification.

Bidders must indicate their willingness and ability to satisfy mandatory requirements by marking "Yes" in the "Bidder Agrees Yes/No" column on the Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM. Answering "No" to any of the mandatory administrative requirements in the bidder's proposal may result in the proposal being deemed [nonresponsive and](#) therefore disqualified.

5.2 CONFIDENTIALITY (M)

To preserve the integrity of the security and confidentiality measures integrated into the State's automated information systems, each bidder is required to sign the Confidentiality Statement attached as Appendix B-4, CONFIDENTIALITY STATEMENT FORM, and submit it by the date specified in RFP Section 1.4, KEY ACTION DATES AND TIMES.

Similarly, any Bidder providing in IT services to the State, requiring them to come into contact with confidential State information, will be required to exercise security precautions for such data that is made available, including the signing of an additional confidentiality statement. Appropriate language must be in the contract.

Table 5-1: Confidentiality Requirements

Admin Req #	Requirement
A1	The bidder shall complete and submit, via email, Appendix B-4, CONFIDENTIALITY STATEMENT FORM, and Appendix B-3, INTENT TO BID FORM, for the Bidder's firm. The forms must be submitted by the time and date specified within RFP Section 1.4, KEY ACTION DATES AND TIMES.

Admin Req #	Requirement
A2	The bidder shall, upon Contract execution, submit a signed CONFIDENTIALITY STATEMENT FORM from all employees and Subcontractor Staff assigned to the awarded Contract.

5.3 PRODUCTIVE USE REQUIREMENTS

The objective of the Productive Use Requirements is to protect the State from being an experimentalist for new equipment and software that has no record of proven performance.

5.3.1 Customer In-Use (M)

The purpose of the Customer In-Use requirement is to allow time for the Bidder to correct defects that could prevent new equipment and software from performing correctly in support of State programs.

The State requires that each equipment and software component proposed as part of an automated system must have been installed and in productive use, in substantially the configuration proposed, for a paying customer external to the bidder's organization, for at least the number of months shown in the tables below prior to the required date of installation.

Table 5-2: Critical Software Requirement

Product/Project Cost	Installation	Final Proposal Submission
Category 1 - Critical Software Critical software is software that is required to control the overall operation of a computer system or peripheral equipment. Included in this category are operating systems, data base management systems, language interpreters, assemblers and compilers, communications software, and other essential system software.		
(1) More than \$100,000	8 months	6 months
(2) \$10,000 up to \$100,000	4 months	3 months
(3) Less than \$10,000	1 month	1 month

Table 5-3: All Information Technology Equipment and Noncritical Software

Product/Project Cost	Installation	Final Proposal Submission
Category 2 – All Information Technology Equipment and Noncritical Software (Information technology equipment is defined in SAM Section 4819.2)		
(1) More than \$100,000	6 months	4 months
(2) \$10,000 up to \$100,000	4 months	3 months
(3) Less than \$10,000	1 month	1 month

Substantial design changed in required system control modules, or in components critical to the processing requirements of the State's workload are also subject to the In-Use requirement. Increases or decreases in numbers of components or minor alteration in equipment or minor modifications or updates to software to provide improvements or features, to correct errors, or to accommodate hardware changes may be exempt from the In-Use requirement by the State, if no substantial changes in logic, architecture or design are involved.

Table 5-4: All Information Technology Equipment and Noncritical Software

Admin Req #	Requirement
A3	The Bidder shall identify their compliance with the Productive Use Requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its proposal.

5.3.2 Reliability Data (Not Applicable)

The State will not be utilizing the Reliability Data Requirements step for the CalHEERS SDMO Services procurement.

The purpose of the Reliability Data requirement is to allow the State, in critical applications, to determine actual performance of proposed equipment prior to its being considered for installation.

Data must be submitted which indicates the performance of each type of equipment proposed by the bidder and attests that the equipment is currently on the premises of three (3) different paying customers, none of which is owned by the bidder or owns the bidder. The data must include, but is not limited to:

1. Equipment Availability:

Equipment availability data must be based on at least ____ hours of use within a six-month period. To qualify, each of the availability figures must equal or exceed ____ percent. Availability is calculated as follows:

$$\text{Percent Availability} = \frac{\text{UT}}{\text{UT} + \text{DT}} \times 100$$

UT (Up Time) is defined as the time the machine is available to and staffed by the customer for productive work (e.g., the time the machine is processing customer programs or awaiting the processing of such programs, but excluding Preventive Maintenance and Down Time).

DT (Down Time) is defined as the time the machine could have been processing customer programs but is being repaired or is awaiting repairs, or is awaiting changes to its control program(s) (excluding any time the supplier must wait for the machine to be released by the customer for repair).

2. Mean Time Between Failure (MTBF):

These figures refer to the average time between the beginning of one failure to the beginning of the next failure for each machine installed at customer sites. To qualify, each figure must not be less than ____ hours for electronic equipment and ____ hours for mechanical or electromechanical equipment during the same period specified in (a.) above. MTBF is calculated by dividing UT by the total number of failures for that item of equipment.

3. Mean Time to Repair (MTTR):

Each figure must be for the same period specified in (a.) above and not exceed ____ hours. MTTR is calculated by dividing the total down time (DT) due to equipment failure by the total number of failures for each item of equipment. Note that equipment failure is any failure due to machine error or failure of the operating software. (See definitions in the contract).

5.3.3 Customer Reference (M, If Applicable)

The bidder must provide a list of customers who presently have the proposed Equipment installed and operating. Include at least one (1) customer meeting that requirement. However, at least one customer reference must be included for each type of machine and feature proposal that is subject to the requirements of that subsection (e.g., one customer having the specific Central Processing Unit).

The State has the option to request from the bidder supporting evidence of compliance to the Customer In-Use requirements. Supporting evidence could include, but is not necessarily limited to, one or more of the following:

- Customer Purchase Order or Contract showing installation dates for subject equipment or software.
- Acceptance Document containing verification of installation by a paying customer.
- Customer Invoice for subject equipment or software.
- Shipping Invoice or Bill of Lading.
- Dated Maintenance Records.
- Sworn Notarized Statement from an officer of the bidding firm and/or a paying customer.
- State visit to the site of a paying customer.

Table 5-5: Customer Reference Requirement

Admin Req #	Requirement
A4	The bidder shall identify their compliance with the Productive Use Requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its Proposal.

5.3.4 Exceptions

The State may consider exceptions to the Productive Use Requirements for this procurement.

5.4 BIDDER RESPONSIBILITY

Prior to award of the Contract, the State must be assured that the bidder selected has all of the resources to successfully perform under the Contract. This includes, but is not limited to:

- Number of personnel with the skills required.
- Equipment of appropriate type and in sufficient quantity.
- Financial resources sufficient to complete performance under the Contract.
- Experience in similar endeavors.

If, during the evaluation process, the State is unable to assure itself of the bidder's ability to perform under the Contract, if awarded, the State has the option of requesting from the bidder any information that the State deems necessary to determine the bidder's responsibility. If such information is required, the bidder will be so notified and will be permitted five (5) State business days to submit the information requested. Examples of the type of financial responsibility information requested may include annual reports and current audited balance sheets from the bidder's firm.

5.4.1 Workers' Compensation Insurance Requirements (M)

The bidder must maintain statutory Workers' Compensation for all of its employees who will be engaged in the performance of the Contract, as described in Appendix A-4, STATEMENT OF WORK (SOW) Section 2.5.5.3, WORKERS' COMPENSATION INSURANCE.

Table 5-6: Workers' Compensation Insurance Requirement

Admin Req #	Requirement
A5	The bidder shall complete and submit Appendix B-7, WORKERS' COMPENSATION CERTIFICATION FORM, in its proposal, upon contract execution, and each time it is renewed, or at any time the State may so request.

5.4.2 Commercial General Liability Insurance (M)

The bidder must maintain Commercial General Liability Insurance with limits of not less than \$1,000,000 per occurrence and \$2,000,000 aggregate for bodily injury property damage combined. The policy shall include coverage for liabilities arising out of premises, operations, independent contractors, products, completed operations, personal and advertising injury and liabilities assumed under this Contract. The insurance shall apply separately for each insured against whom claim is made or suit is brought subject to the Bidder's limit of liability.

Table 5-7: Commercial General Liability Insurance Requirement

Admin Req #	Requirement
A6	The bidder and each of its Subcontractors shall maintain Commercial General Liability Insurance with limits of not less than \$1,000,000 per occurrence and \$2,000,000 aggregate for bodily injury and property damage combined and agree to furnish the State a certificate of insurance in its proposal and at any time upon request by the State during the term of the Contract.
A7	The bidder shall identify their compliance with the Commercial General Liability Insurance, Motor Vehicle Liability Insurance, and Professional Liability Insurance and Fidelity Bond by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.4.3 Technology Professional Liability/Errors and Omissions (M)

The Bidder shall maintain appropriate coverage to the Bidder's profession and work hereunder, on a claims-made form covering any damages caused by a negligent error, act, or omission with a limit of not less than \$5,000,000. Coverage shall be sufficiently broad to respond to the duties and obligations as is undertaken by the Bidder in this Agreement and shall include, but not be limited to, claims involving infringement of intellectual property, copyright, trademark, invasion of privacy violations, information theft, intentional and/or unintentional release of private information, extortion, and network security.

Table 5-8: Technology Professional Liability/Errors and Omissions Requirement

Admin Req #	Requirement
A8	The bidder and each of its Subcontractors shall maintain Technology Professional Liability/Errors and Omissions coverage with a limit of not less than \$5,000,000 and agree to furnish the State a certificate of insurance in its proposal and at any time upon request by the State during the term of the Contract.
A9	The bidder shall identify their compliance with the Technology Professional Liability/Errors and Omissions by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.4.4 Cyber Liability Insurance (M)

Bidder shall maintain Cyber Liability insurance with limits of not less than \$4,000,000 for each occurrence and an annual aggregate of \$8,000,000 covering claims involving privacy violations, information theft, damage or destruction of electronic information, intentional and/or unintentional release of State and or private information, alteration of electronic information, extortion and network security. The policy must name The State of California, its officers, agents, and employees as additional insured with respect to work performed under the contract. Claims involving privacy violations, information theft, damage or destruction of electronic information, intentional and/or unintentional release of State and or private information, alteration of electronic information, extortion and network security. The policy must name The State of California, its officers, agents, and employees as additional insured with respect to work performed under the contract.

Table 5-9: Cyber Liability Requirement

Admin Req #	Requirement
A10	The bidder and each of its Subcontractors shall maintain Cyber liability coverage with a limit of not less than \$8,000,000 and agree to furnish the State a certificate of insurance in its proposal and at any time upon request by the State during the term of the Contract.
A11	The bidder shall identify their compliance with the Cyber liability by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.4.5 Bonds and Other Security Documents (M, If Applicable)

ALL BIDDERS MUST SUBMIT APPLICABLE ITEMS AS DESCRIBED BELOW WITH ITS PROPOSAL RESPONSE. FINAL PROPOSAL RESPONSES SUBMITTED WITHOUT ONE OF THE FOLLOWING SHALL BE CONSIDERED NONRESPONSIVE AND THE PROPOSAL SHALL BE REJECTED. FOR THIS REQUIREMENT, THE LENGTH OF TIME FOR EACH SURETY CONSIDERATION SHALL BE FOR A PERIOD OF FIVE (5) YEARS WITH THE OPTION FOR THE STATE TO EXTEND FOR FIVE (5) ADDITIONAL PERIODS OF ONE (1) YEAR.

5.4.5.1 Letter of Bondability – Applicable

The Letter of Bondability shall be from an admitted surety insurer which states the surety unconditionally offers to guarantee to the extent of thirty percent (30%) of the bidder's proposed base Contract price, in addition to fifty percent (50%) of the Transition-In Contract Award amount to ensure the bidder's performance in all respects of, and subject to, the terms and conditions and provisions of the Contract for this phase of the Contract, and that within 21 calendar days after the effective start date of the contract, the surety will execute the Performance Bond requirement.

5.4.5.2 Letter of Certificate of Deposit – Nonapplicable

The Letter, guaranteeing issuance of a Certificate of Deposit shall be from a bank doing business in this State, and shall be insured by the Federal Deposit Insurance Corporation and shall state that if the bidder is successful, a Certificate of Deposit in the amount of {fifty percent (50%) of the contract price for service contracts, or twenty-five percent (25%) for all other

contracting as identified in the RFP, or specify \$\$\$\$ amount here} will be furnished to the State within 21 calendar days after the effective start date of the contract.

5.4.5.3 Letter of Irrevocable Letter of Credit – Nonapplicable

The Letter, guaranteeing issuance of an Irrevocable Letter of Credit shall be from a bank doing business in this State, and shall be insured by the Federal Deposit Insurance Corporation and shall state that if the bidder is successful, an Irrevocable Letter of Credit, as appropriate, in the amount of ***{fifty percent (50%) of the contract price for service contracts, or twenty-five percent (25%) for all other contracting as identified in the RFP, or specify \$\$\$\$ amount here}*** will be furnished to the State within 21 calendar days after the effective start date of the contract.

5.4.5.4 Bidders Bond – Nonapplicable

A Bidders Bond executed by an admitted surety insurer, made payable to the Office of Technology and Solutions Integration, (or specify delegated department name) State of California, guaranteeing the bidder's performance in all respects of the terms, conditions, and provisions of the contract commencing on the effective start date. The security shall be in an amount ***of {fifty percent (50%) of the contract price for service contracts, or twenty-five percent (25%) for all other contracting as identified in the RFP, or specify \$\$\$\$ amount here}***.

5.4.5.5 Certificate of Deposit – Nonapplicable

The bidder shall furnish to the Deputy Director of the Department of General Services Procurement Division, (or specify delegated department name) at no cost to the State, a Certificate of Deposit. The Certificate of Deposit shall be a Security Deposit Time Certificate of Deposit from a bank insured by the Federal Deposit Insurance Corporation, in the amount of ***{fifty percent (50%) of the contract price for service contracts, or twenty-five percent (25%) for all other contracting as identified in the RFP, or specify \$\$\$\$ amount here}***, made payable to the Department of General Services. The Certificate of Deposit shall be automatically renewable during the contract period and remain in effect until Bidder's satisfactory compliance with the terms of the contract have been completed.

5.4.5.6 Irrevocable Letter of Credit – Nonapplicable

The bidder shall furnish to the Deputy Director of the Department of General Services Procurement Division, (or specify delegated department name) at no cost to the State, an Irrevocable Letter of Credit in the amount of ***{specify {fifty percent (50%) of the contract price for service contracts, or twenty-five percent (25%) for all other contracting as identified in the RFP, or specify \$\$\$\$ amount here}***. The Letter of Credit must be insured by a bank doing business in this State and insured by the Federal Deposit Insurance Corporation. The Department of General Services, State of California, (or specify delegated department name) shall be identified as the beneficiary.

The Letter of Credit shall further provide for honor of a draft or demand for payment presented with the State's written statement (signed by the Deputy Director of the Department of General Services Procurement Division certifying that there has been loss, damage or liability resulting from the Bidder's performance or nonperformance of duties and obligations under the contract, or from the negligence or act of omission by the Bidder or its agents, servants, and employees, and that the amount of the demand or draft is, therefore, now due and payable.

Because the security represented by the Letter of Credit must remain in effect until the Bidder's

satisfactory completion of the contract requirements, the Bidder, by offering the Letter of Credit, agrees to amend, if necessary, the Letter of Credit for the purpose of extending the expiration date.

Note: Within 21 calendar days after notification of Contract execution (unless submitted with the proposal), the successful bidder(s) MUST submit the instrument satisfying the bond requirement in the form of a Bidders Bond, Certificate of Deposit, Irrevocable Letter of Credit, or Performance Bond. Failure to submit the required document within 21 calendar days may be cause for termination of the contract.

Because of the potential consequences which might result if the successful Bidder is unable to furnish any of the specified documents, bidders should take the necessary steps, prior to submittal of their proposals, to ensure that if awarded the contract (purchase order), they will be able to comply with these requirements.

5.4.6 Performance Bonds for Contract and Transition-In (M)

Per Section 12112 of the California Public Contract Code, the State shall require a performance bond for certain services being remunerated with the use of progress payments:

Contract: The awarded Bidder shall supply a performance bond in the amount of thirty percent (30%) of the bidder's proposed base Contract price. The bond shall be on a form from an admitted surety insurer and must guarantee Bidder's compliance with the terms of this Contract.

Transition-In: The awarded Bidder shall supply a performance bond in the amount of fifty percent (50%) of the Transition-In Contract execution amount to ensure the Bidder's performance in all respects of, and subject to, the terms and conditions and provisions of the Contract, for this phase of the Contract. For example, a bond amount of \$1 million shall be procured for a Transition-In phase valued at US \$2 million.

The bonds shall be delivered to the State within 21 calendar days of Contract execution. In completion of Transition-In, the bond will be returned to the Bidder upon successful completion. Failure to submit the required documents within 21 calendar days may be cause for termination of the Contract. The bond will not be returned upon cancellation due to nonperformance.

Table 5-10: Performance Bond Requirement

Admin Req #	Requirement
A12	The bidder shall complete their compliance with the Performance Bond requirement by providing their response with Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, by submitting the required Letter of Bondability in its proposal.

5.5 INSTALLATION

5.5.1 Certification of Facility Readiness (Not Applicable)

The State will not be utilizing the Certification of Facilities of Readiness step for the CalHEERS SDMO Services procurement.

5.5.2 Equipment (M)

All Equipment offered must be new and the latest model in current production. Used, shopworn, refurbished, demonstrator, prototype, or discontinued models are not acceptable.

Table 5-11: Equipment Requirement

Admin Req #	Requirement
A13	The bidder shall identify their compliance with the Equipment requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its proposal.

5.5.3 Certification of Equipment Readiness (M)

Any Equipment proposal must be installed and certified ready for acceptance testing as provided in Appendix A-4, SOW. Such certification must be in writing and presented to the individual specified in the Contract.

Table 5-12: Certification of Readiness Requirement

Admin Req #	Requirement
A14	The bidder shall identify their compliance with the Certification of Readiness requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its proposal.

5.5.4 Interface to Existing Equipment (M)

If any proposal equipment must interface to existing installed equipment in order to meet the specifications contained in Appendix A-4, SOW, the bidder must agree to be responsible for making any necessary arrangements with the owner(s) of such installed equipment, for such interface. The Contract must then provide for such responsibility.

Table 5-13: Conditions to Existing Equipment Requirement

Admin Req #	Requirement
A15	The bidder shall identify their compliance with the Interface to Existing Equipment requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its proposal.

5.6 CONDITIONS TO BE EXAMINED (NOT APPLICABLE)

The State will not be utilizing the Conditions to be Examined step for the CalHEERS SDMO procurement.

Visits to the physical installation site or to appropriate persons within the department may be made in accordance with RFP Section 2, RULES FOR GOVERNING COMPETITION, for the purpose of familiarization with the current system(s), environment, applications, etc. Conditions appropriate for examination include, but are not limited to any of the following:

5.7 SPECIAL SPECIFIC MAINTENANCE REQUIREMENTS (NOT APPLICABLE)

The State will not be utilizing the Special Specific Maintenance Requirements step for the CalHEERS SDMO procurement.

5.8 DISABLED VETERAN BUSINESS ENTERPRISE (DVBE) PARTICIPATION (M)

5.8.1 California DVBE Program Requirement (M)

The State has established goals for DVBE participation in State contracts. For this procurement the participation goal is three percent (3%) of the total CalHEERS SDMO Contract price. The bidder must meet or exceed the DVBE goal of three percent (3%).

PLEASE READ THIS REQUIREMENT CAREFULLY. FAILURE TO COMPLY WITH THE DVBE REQUIREMENT MAY CAUSE YOUR PROPOSAL RESPONSE TO BE DEEMED NONRESPONSIVE AND YOUR FIRM INELIGIBLE FOR AWARD OF THE PROPOSED CONTRACT(S).

Table 5-14: California DVBE Program Requirements

Admin Req #	Requirement
A16	The bidder shall complete and submit Appendix B-8, GSPD-05-105 BIDDER DECLARATION FORM, in its proposal The form and its complete instructions may be accessed at: https://www.documents.dgs.ca.gov/dgs/fmc/gspd/gspd05-105.pdf

5.8.2 DVBE Incentive (M)

In accordance with Section 999.5(a) of the California Military and Veterans Code (MVC), an incentive will be given to bidders who meets or exceeds the three percent (3%) DVBE mandatory participation. The State shall apply the incentive amount based on the amount of DVBE participation obtained above the three percent (3%) requirement. The incentive is only given to those bidders who are responsive to the DVBE Program Requirement and propose DVBE participation in the resulting Contract that meets or exceeds the mandatory three percent (3%) requirement.

Participation incentives will be awarded based on the table that follows: and is further described in and examples in RFP Section 9, EVALUATION.

Table 5-15: DVBE Incentive Point Scale Requirement

DVBE Incentive Point Scale	
Confirmed DVBE Participation	DVBE Incentive Points
5% or more	150 (3% of 5,000 points)
4% - 4.99%	100 (2% of 5,000 points)
3% - to 3.99%	50 (1% of 5,000 points)
Less than 3%	0 points

Table 5-16: DVBE Incentive Requirement

Admin Req #	Requirement
A17	If the bidder is claiming a DVBE incentive, the bidder shall complete and submit Appendix B-10, BIDDING PREFERENCES AND INCENTIVES FORM and Appendix B-8, GSPD-05-105 BIDDERS DECLARATION FORM in its proposal.

5.8.3 DVBE Declarations (M)

Bidders who have been certified by California as a DVBE (or bidders who are not certified but

are bidding rental equipment and have obtained the participation of Subcontractors certified by California as a DVBE) must complete the form Std. 843, Disabled Veteran Business Enterprise Declaration. An online version of the form is available at the Department of General Services, Procurement Division, Office of Small Business and DVBE Services (OSDS) website at: <https://www.dgs.ca.gov/PD-OSDS>. All disabled veteran owners and disabled veteran managers of the DVBE(s) must sign the form(s). The completed form(s) should be submitted with your proposal. Failure to provide the form within the time frame specified by the State may cause your bid to be rejected.

Table 5-17: STD 843 Disabled Veteran Business Declarations Requirement

Admin Req #	Requirement
A18	The bidder shall complete and submit Appendix B-9, STD 843 DISABLED VETERAN BUSINESS ENTERPRISE DECLARATIONS FORM in its proposal. https://www.documents.dgs.ca.gov/dgs/fmc/gs/pd/pd_843.pdf

5.9 DEVELOPMENT/CONVERSION (NOT APPLICABLE)

The State will not be utilizing the Development/Conversion step for the CalHEERS SDMO procurement.

5.10 CONTRACTOR'S LICENSE (NOT APPLICABLE)

The State will not be utilizing the Contractor's License for the CalHEERS SDMO procurement.

Bidders and Subcontractors performing cable and/or wiring installation work or structural modifications for the State are required to have the appropriate State Contractor's License. **THE COMPANY SUBMITTING THE BID MUST HAVE THE APPROPRIATE LICENSE AS WELL AS ANY SUBCONTRACTORS.** The License must be in the name of the company or the name of the "qualifying individual" of the company.

The bidder certifies under penalty of perjury, the accuracy of the representations made with regard to the Contractor's license number, class, and expiration date.

The Bidder shall pay the rate of wages for regular, overtime, and holiday work plus employer payments for benefits generally prevailing in the locality in which the work is performed, for all crafts, classifications or types of workmen used on State premises at the point of delivery by the Bidder for the assembly and installation of material purchased under this Contract.

A proposal that does not contain the above information, or if the information is later proven false, shall be considered nonresponsive and rejected by the State.

5.11 PUBLIC WORKS REQUIREMENTS (INSTALLATION ONLY) (NOT APPLICABLE)

The State will not be utilizing the Public Works Requirements (Applicable to Installation Only) step for the CalHEERS SDMO procurement.

1. In accordance with the provisions of Section 1773 of the California Labor Code, the Bidder shall conform and stipulates to the general prevailing rate of wages, including employer benefits as defined in Section 1773.1 of the California Labor Code, applicable to the classes of labor to be used for public works such as at the delivery site for the assembly and installation of the equipment of materials purchased under the Contract.

Pursuant to Section 1770 of the California Labor Code, the Department of Industrial

Relations has ascertained the general prevailing rate of wages in the county in which the work is to be done, to be as listed in the Department of Transportation booklet entitled General Prevailing Wage Rates. The booklet is required to be posted at the job site. Contact the Department of Industrial Relations, Prevailing Wage Unit at (415) 972-8628.

2. Prior to the commencement of performance, the Bidder must obtain and provide to the State, a payment bond, on California STD 807 Form when the Contract involves a public works expenditure (labor/installation costs) in excess of \$5,000.00. Such bond shall be in a sum not less than one-half the Contract price for the public works portion of the labor/installation costs. Forms will be made available to the Bidder.
3. Each participating bidder shall submit with their proposal a list of proposed Subcontractors or indicate that none are to be used. The State reserves the right to approve or object to the use of proposed Subcontractors on the list.
4. Each participating bidder must certify that it is aware of the provisions of Section 3700 of the California Labor Code which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that [Code and](#) will comply with such provisions before commencing with the performance of work of this Contract. A Workers' Compensation Certification must be completed and submitted with an original signature with the bidder's proposal.
5. Laws to be observed:

a) Labor

Pursuant to Section 1775 of the California Labor Code, the Bidder shall, as a penalty to the State or political subdivision on whose behalf the Contract is made or awarded, forfeit not more than fifty dollars (\$50) for each calendar day, or portion thereof, for each worker paid by the Bidder, or its Subcontractor, less than the prevailing wage so stipulated; and in addition, the Bidder further agrees to pay to each worker the difference between the actual amount paid for each calendar day, or portion thereof, and the stipulated prevailing wage rate for the same. This provision shall not apply to properly registered apprentices.

Pursuant to Sections 1810-1815 of the California Labor Code, inclusive, it is further agreed that the maximum hours a worker is to be employed is limited to eight hours a day and forty hours a week and the Bidder shall forfeit, as a penalty to the State, twenty-five dollars (\$25) for each worker employed in the execution of the Contract for each calendar day during which a worker is required or permitted to labor more than eight hours in any calendar day or more than forty hours in any calendar week, in violation of Sections 1810-1815 of the California Labor Code, inclusive.

b) Travel and Subsistence Payments

The Bidder shall pay the travel and subsistence of each worker needed to execute the work, as such travel and subsistence payments are defined in the applicable collective bargaining agreements filed in accordance with California Labor Code Section 1773.8.

c) Apprentices

Special attention is directed to Sections 1777.5, 1777.6, and 1777.7 of the California Labor Code and Title 8, California Code of Regulations Section 200 et seq. Each Bidder and/or Subcontractor must, prior to commencement of the public works contract, contact the Division of Apprenticeship Standards, 525 Golden Gate Avenue, San Francisco, CA, or one of its branch offices to insure compliance and complete understanding of the law regarding apprentices and specifically the required rationale thereunder. Responsibility for compliance with this Section lies with the Bidder.

d) Payroll

The Bidder shall keep an accurate payroll record showing the name, address, Social Security Account Number, work classification and straight time and overtime hours worked by each employee. A certified copy of the employee's payroll record shall be made available for inspection as specified in Section 1776 of the California Labor Code.

5.12 TARGET AREA CONTRACT PREFERENCE ACT (TACPA) (NOT APPLICABLE)

Preference will be granted to California-based Bidders in accordance with Government Code Section 4530 whenever contracts for goods and services are in excess of \$100,000 and the Bidder meets certain requirements as defined in the California Code (Title 2, Section 1896.30) regarding labor needed to produce the goods or provide the services being procured. Bidders desiring to claim Target Area Contract Preferences Act (TACPA) must complete California STD 830 Form and submit it with their proposal.

5.13 OTHER ADMINISTRATIVE REQUIREMENTS

5.13.1 Cover Letter and Executive Summary (M)

The Cover Letter and Executive Summary must be included in the bidder's proposal, and contain all of the elements listed in the following table, Cover Letter and Executive Summary Requirements.

Table 5-18: Cover Letter and Executive Summary Requirements

Admin Req #	Requirement
A19	The bidder shall submit a Cover Letter on the bidder's official business letterhead in its proposal.
A20	The bidder's Cover Letter shall include the legal name and address of the bidder's organization.
A21	The Bidder's Cover Letter shall include a statement that the bidder commits to fulfilling the requirements of the RFP.
A22	The Bidder's Cover Letter shall include a statement that the bidder's offer is good for 180 calendar days from the scheduled date to submit proposal or Best and Final Offer (BAFO).
A23	The bidder's Cover Letter shall include a statement indicating that the bidder has available Staff with the appropriate skills to complete the Contract for all services and provide all deliverables as described in this solicitation.
A24	The bidder's Cover Letter must <u>not</u> include any cost information.
A25	The bidder's Cover Letter shall have a statement identifying that the bidding firm has the financial stability to support the CalHEERS SDMO Contract.
A26	The bidder's Cover Letter shall include a statement that substantiates that the person who signs the letter is authorized to bind the bidding firm contractually. The individual's name must also be typed and include the title or position that the individual holds in the firm. A proposal with an unsigned Cover Letter may be rejected.
A27	The bidder's Cover Letter shall include the email and phone number of the person signing the letter and include the date it was signed.
A28	The bidder's Executive Summary shall condense and highlight the contents of the overall proposal in such a way as to provide a broad understanding of the entire proposal.
A29	The bidder's Executive Summary shall not exceed 20 single-sided pages or ten (10) double-sided pages, and in no smaller than Arial, <u>11-point</u> font.

5.13.2 Amendment (M)

Each contract executed as a result of this RFP must be able to be amended by mutual consent of the State and the Bidder.

Table 5-19: Amendment Requirement

Admin Req #	Requirement
A30	The bidder shall identify their compliance with the Amendment requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its proposal.

5.13.3 Subcontractors (M)

Bidders must complete the Bidder's Declaration GSPD-05-105, listing all Subcontractors that will be used to provide the services required in this RFP. All proposed Subcontractors must be identified on the Appendix B-8, GSPD-05-105 BIDDER DECLARATION FORM. Nothing contained in the resulting contract shall create a relationship between the State and any Subcontractor, and no subcontracting shall relieve the bidder of its responsibilities and obligations. The CalHEERS SDMO Bidder is fully responsible to the State for the acts and omissions of its Subcontractors and of persons either directly or indirectly employed by them.

The CalHEERS SDMO Bidder shall not change Subcontractor(s) or Disabled Veteran Business Enterprise (DVBE) Subcontractor(s) if such changes conflict with the work to be performed under this Contract. For DVBE Subcontractor changes, the Bidder shall use another DVBE Subcontractor. The State recognizes that changes to Subcontractor(s) may be necessary and in the best interest of the State; however, advance notification of a contemplated change and the reasons for such change must be made to the State no less than seven (7) State business days prior to the existing Subcontractor's termination. If this should occur, the Bidder should be aware that the State contract administrator or designee must approve any changes to the Subcontractor(s) prior to the termination of the existing Subcontractor(s). This also includes any changes made between submittal of the proposal and actual start of the Contract.

An award, if made, will be awarded to a single Bidder. The selected Bidder will be responsible for the successful performance of all Subcontractors and support services offered in response to this solicitation. All State policies, guidelines, and requirements that apply to the Bidder also apply to Subcontractors, as applicable to the products and services they provide and to their role as a Subcontractor. Furthermore, the State will consider the Bidder to be the sole point of contact regarding contractual matters for the term of the resulting Contract. The bidder must not assign financial documents to a third-party without prior written approval by the State and an amendment to the resulting Contract.

The State will not compensate the CalHEERS SDMO Bidder for any of the CalHEERS SDMO Bidder's time or effort to educate or otherwise ensure the new Subcontractor(s) are ready to begin work on the Contract.

The bidder's obligation to pay its subcontracts is an independent obligation from the State's obligation to pay or to enforce the payment of any money to any Subcontractor. The Bidder is solely responsible for any payments to or claims made by Subcontractors.

Table 5-20: Subcontractors Requirement

Admin Req #	Requirement
A31	The bidder shall comply with the Subcontractors requirement by providing a completed Appendix B-8, GSPD-05-105 BIDDER DECLARATION FORM, with their response, in addition to identifying compliance within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its proposal.

5.13.4 Commercially Useful Function (M)

Suppliers, whether the bidder or a Subcontractor, who have a California certification for one or more of the socio-economic programs (e.g., small business or DVBE), must perform a commercially useful function (CUF) in the resulting Contract. CUF is defined in the Military and Veterans Code Section 999(b)(5)(B) for DVBEs and in the Government Code Section 14837(d)(4)(A) for small business. Describe CUF compliance and complete Appendix B-11, COMMERCIALLY USEFUL FUNCTION (CUF) CERTIFICATION FORM.

At the State's option, bidders may be required to submit additional written clarifying information regarding CUF. Failure to submit the requested written information as specified may be grounds for proposal rejection.

Table 5-21: Commercially Useful Function Requirement

Admin Req #	Requirement
A32	The bidder shall complete and submit Appendix B-11, COMMERCIALLY USEFUL FUNCTION CERTIFICATION FORM, in its proposal.

5.13.5 Small Business Preference (O)

California Government Code Section 14835 et seq. requires that a five percent (5%) preference be given to bidders who qualify as a small business or bidders who qualify as a non-small business claiming at least twenty-five percent (25%) California-certified small business Subcontractor participation. The rules and regulations of this law, including the definition of a small business, or qualifying non-small business, are contained in Title 2, California Code of Regulations Section 1896 et seq. The definition of nonprofit veteran service agencies qualifying as a small business is contained in the California Military and Veterans Code Section 999.50 et seq.

Table 5-22: Small Business Preference Requirement

Admin Req #	Requirement
A33	If claiming the Small Business preference, the bidder shall complete and submit Appendix B-10, BIDDING PREFERENCES AND INCENTIVES FORM and Appendix B-8, GSPD-05-105 BIDDER DECLARATION FORM in its proposal.

5.13.6 Financial Stability (M)

To minimize the potential risk of default due to financial issues, the State reserves the right to request additional documentation during the RFP process and throughout the term of the awarded Contract.

Table 5-23: Financial Stability Requirement

Admin Req #	Requirement
A34	The bidder shall identify their compliance with the Financial Stability requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM in its proposal.

5.13.7 Secretary of State Certification (M)

The bidder will submit a Certificate of Status from the California Secretary of State (SOS), showing the bidder is certified with the SOS to do business in the State of California. If the bidder does not currently have this certification, the firm must be certified before a Contract award can be made, and the bidder must provide information in its proposal to support the status of its application to be certified to do business in the State of California.

Domestic and Foreign Corporations, Limited Liability Companies, Limited Liability [Partnerships](#), and Limited Partnerships must be registered with the California SOS to be awarded the Contract. The SOS Certificate of Status must be included with the proposal. The required document(s) may be obtained through the SOS, Certification and Records Unit at (916) 657-5448 or through the following website: <http://sos.ca.gov/>.

Table 5-24: Secretary of State Certification Requirement

Admin Req #	Requirement
A35	The bidder shall include, within its proposal, a Certificate of Status (indicating the business is in good standing) from the California Secretary of State's Office. Information on how to obtain this form is provided in, Appendix B-12, SECRETARY OF STATE CERTIFICATION.

5.13.8 Seller's Permit (M)

This proposal is subject to all requirements set forth in Sections 6452, 6487, 7101 and 18510 of the California Revenue and Taxation Code, and Section 10295 of the California Public Contract Code, requiring bidders to provide a copy of their seller's permit or certification of registration, and, if applicable, the permit or certification of all participating affiliates issued by the California Department of Tax & Fee Administration (CDTFA). The seller's permit must be submitted within five (5) State business days of the State's request or at the time of proposal submission. For more information on seller's permit or certification of registration refer to the following link:

<https://cdtfa.ca.gov/formspubs/pub73.pdf>

Table 5-25: Seller's Permit Requirement

Admin Req #	Requirement
A36	The bidder shall include, within its proposal, a seller's permit or certification issued by the California Department of Tax & Fee Administration (CDTFA). Information on how to obtain this form is provided in, Appendix B-13, SELLER'S PERMIT.

5.13.9 Payee Data Record (M)

The successful bidder as a result of this RFP will be required to sign the Payee Data Record, California STD 204 Form. The Payee Data Record (STD 204) indicates the bidder is subject to

State income tax withholdings pursuant to the California Revenue and Taxation Code Section 18662. To obtain the Payee Data Record, California STD 204 Form and related instructions, please refer to the following link:

<http://www.documents.dgs.ca.gov/dgs/fmc/pdf/std204.pdf>

Table 5-26: Payee Data Record Requirement

Admin Req #	Requirement
A37	The bidder shall complete and submit Appendix B-14, PAYEE DATA RECORD FORM, in its proposal.

5.13.10 Iran Contracting Act of 2010 (M)

Division 2, Part 1, Chapter 2.7 of the California Public Contract Code (PCC) is the Iran Contracting Act of 2010 (Act). This Act requires at §2203 that no one shall submit a proposal for a contract, or enter into or renew a contract, with a public entity for goods or services valued at \$1,000,000 or more if that person (e.g., Bidder or Contractor) engages in investment activities of \$20,000,000 or more as described in PCC §2202.5 pursuant to all provisions of the Act. The Act, at §2204 requires bidders to certify at the time the proposal is submitted or the contract is renewed, that the person is not identified on a list created pursuant to subdivision (b) of PCC §2203 as a person engaging in investment activities in Iran described in subdivision (a) of PCC §2202.5, or as a person described in subdivision (b) of PCC §2202.5, as applicable.

Table 5-27: Iran Contracting Act of 2010 Requirement

Admin Req #	Requirement
A38	The bidder shall complete and submit Appendix B-15, IRAN CONTRACTING ACT OF 2010 FORM, in its proposal, and again each time their awarded Contract is renewed.

5.13.11 Federal Debarment (M)

Bidders are required to provide a Federal Debarment certification to the State. This certification is required by the Federal regulations implementing Executive Order 12549, Debarment and Suspension, 29 Code of Federal Regulations, Part 98, Section 98.510, [Participants](#), responsibilities. This certification states that neither the bidder nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any federal department or agency. The regulations were published as Part VII of the May 26, [1988](#), Federal Register (pages 19160-19211).

Table 5-28: Federal Debarment Requirement

Admin Req #	Requirement
A39	The bidder shall complete and submit Appendix B-16, FEDERAL DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY EXCLUSION - CERTIFICATION FORM, in its proposal.

5.13.12 Tax Debtor List: Franchise Tax Board (FTB) and California Department of Tax & Fee Administration (CDTFA) (AB 1424) (M)

All bidders must address the requirements of the Tax Debtor List: California Franchise Tax

board (FTB) and California Department of Tax and Fee Administration (CDTFA) for the reason described in California Public Contract Code Section 10295.4. Companies are ineligible to enter [into or](#) renew any contract with the State for goods or services if the company appears on either list of the 500 largest tax delinquencies. Prior to submitting a proposal or prior to executing any State contract or renewal of goods or services, a company must certify that it is not on the list of ineligible companies prohibited from doing business with the State of California. The procurement official shall check the following website(s) to ensure bidders do not appear on the list of ineligible companies.

<https://www.ftb.ca.gov/help/business/entity-status-letter.asp>

<https://cdtfa.ca.gov/taxes-and-fees/top500.htm>

Table 5-29: Tax Debtor Lists: FTB and CDTFA Requirement

Admin Req #	Requirement
A40	The bidder shall identify their compliance with the Tax Debtor List: FTB and CDTFA requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.13.13 California Civil Rights Law Certification (M)

Pursuant to California Public Contract Code Section 2010, if a bidder or proposer executes or renews a contract over \$100,000 on or after January 1, 2017, the bidder or proposer hereby certifies compliance with the following:

- CALIFORNIA CIVIL RIGHTS LAWS: For contracts over \$100,000 executed or renewed after January 1, 2017, the Contractor certifies compliance with the Unruh Civil Rights Act (Section 51 of the California Civil Code) and the Fair Employment and Housing Act (Section 12960 of the Government Code); and
- EMPLOYER DISCRIMINATORY POLICIES: For contracts over \$100,000 executed or renewed after January 1, 2017, if the Contractor has an internal policy against a sovereign nation or peoples recognized by the United States government, the Contractor certifies that such policies are not used in violation of the California Unruh Civil Rights Act (Section 51 of the California Civil Code) or the Fair Employment and Housing Act (Section 12960 of the California Government Code).

Table 5-30: California Civil Rights Law Certification Requirement

Admin Req #	Requirement
A41	The bidder shall complete and submit Appendix B-17, CALIFORNIA CIVIL RIGHTS LAW CERTIFICATION FORM, in its proposal.

5.13.14 Air or Water Pollution Violation (M)

Under the State laws, the Bidder shall not be: (1) in violation of any order or resolution not subject to review promulgated by the California State Air Resources Board or an air pollution control district; (2) subject to cease and desist order not subject to review issued pursuant to Section 13301 of the Water Code for violation of waste discharge requirements or discharge prohibitions; or (3) finally determined to be in violation of provisions of federal law relating to air or water pollution.

Table 5-31: Air or Water Pollution Violation Requirement

Admin Req #	Requirement
A42	The bidder shall identify their compliance with the Air or Water Pollution Violation requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.13.15 AI Reporting and Risk Assessment Form (M)

The successful bidder, resulting from this RFP will be required to fill out and, sign and submit the CalHEERS Artificial Intelligence Risk Assessment form any time a proposed solution involves an AI component. The form enables the State to obtain critical information about the potential use of AI on CalHEERS. The CalHEERS Artificial Intelligence Risk Assessment form can be obtained from the Bidders' Library.

Table 5-32: AI Reporting and Risk Assessment Form Requirement

Admin Req #	Requirement
A43	The bidder shall complete and submit Appendix B-24, CALHEERS ARTIFICIAL INTELLIGENCE RISK ASSESSMENT FORM, in its proposal.

5.14 ADDITIONAL EQUIPMENT PURCHASES (M)

The State reserves the right, at its sole option, of ordering additional hardware and software as a result of this Contract for ten (10) years with the same ten (10) years of warranty and maintenance terms and conditions following Contract execution at the prices quoted or the manufacturer's then current list price, whichever is lower. The State is not obliged to procure any specific quantity of equipment. Applicable costs for the additional items must be shown on the appropriate cost sheet in Appendix D, COST WORKBOOK; these costs will be evaluated and considered as part of the total proposal for evaluation purposes. Items delivered must be current releases of the specific hardware and software products offered by the bidder and must continue to meet the State's productive in-use requirement and all technical requirements included in this RFP.

Table 5-33: Additional Equipment Purchases Requirement

Admin Req #	Requirement
A44	The bidder shall identify their compliance with the Additional Equipment Purchases requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.15 BIDDER PERFORMANCE RESPONSIBILITY

5.15.1 Ability to Perform (M)

If, during the evaluation process, the State is unable to assure itself of the bidder's ability to perform under the Contract, if awarded, the State has the option of requesting from the Bidder any information that the State deems necessary to determine the bidder's responsibility. If such information is required, the bidder will be so notified and will be permitted five (5) State business days to submit the information requested. Examples of the type of financial responsibility

information requested may include annual reports and current audited balance sheets from the bidding company.

Table 5-34: Ability to Perform Requirement

Admin Req #	Requirement
A45	The bidder shall identify their compliance with the Ability to Perform requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.15.2 Availability (M)

Replacement services must meet the original RFP requirements associated with services or Staff with no additional cost to the State. If, at any time after award of this Contract, the CalHEERS SDMO Bidder becomes unable to provide any part of its contracted services, the CalHEERS SDMO Bidder must, within ten (10) State business days, notify the State in writing to seek a potential resolution, and if appropriate, propose a replacement of those services that it can no longer provide. The replacement must be at no cost to the State, and shall be equivalent to or exceed the proposed service that was previously offered and accepted by the State in the CalHEERS SDMO Bidder's proposal or awarded Contract.

Table 5-35: Availability Requirement

Admin Req #	Requirement
A46	The bidder shall identify their compliance with the Availability requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.15.3 Proposal Rejection (M)

A proposal may be rejected if it is conditional or incomplete, or if it contains any alterations of forms or other irregularities of any kind, in accordance with RFP Section 2.3.6.2, ERRORS IN THE PROPOSAL. Deviation from terms and conditions previously approved for this solicitation may be a cause for rejection of the proposal. Bidders submitting conditional proposals may be disqualified.

Table 5-36: Proposal Rejection Requirement

Admin Req #	Requirement
A47	The bidder shall identify their compliance with the proposal rejection requirement by providing their response within Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM, in its proposal.

5.16 STATEMENT OF WORK COMPLIANCE REQUIREMENTS (M)

Appendix A-4, SOW, identifies and describes the tasks and responsibilities of the Bidder and the responsibilities of the State during the Contract. The bidder shall identify their compliance with all the mandatory requirements within SOW by indicating an "X" in the Yes column. An "X" in the Yes column indicates that, the bidder confirms that they have:

- Read the individual requirements within Appendix A-4, SOW;

- Understands each individual requirement within each Section of the SOW; and
- Agrees to comply with each individual requirement within each Section of the SOW.

Table 5-37: Statement of Work Compliance Requirement

Admin Req #	Requirement
A48	The bidder shall complete and submit Appendix B-18, STATEMENT OF COMPLIANCE WITH SOW REQUIREMENTS FORM, demonstrating their willingness to fully comply with all of the requirements in Appendix A-4, SOW, in its proposal.

5.17 BIDDER (COMPANY) QUALIFICATION (M)

The State identifies that a bidder proposal may be deemed nonresponsive if the bidder does not submit the required forms, causing the bidder to be disqualified.

Table 5-38: Bidder (Company) Qualifications Administrative Requirement

Admin Req #	Requirement
A49	The bidder shall complete and submit an Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM within its proposal.

5.18 BIDDER (COMPANY) REFERENCE FORMS (M)

The State identifies that a bidder proposal may be deemed nonresponsive if the bidder does not submit the required forms, causing the bidder to be disqualified.

Table 5-39: Bidder (Company) Reference Administrative Requirement

6 BIDDER REQUIREMENTS

6.1 INTRODUCTION

This Section contains the bidder requirements that must be responded to within the bidder's proposal, permitting the State to validate that the bidder has the qualifications and experience necessary to provide the solution and services requested in this solicitation. The requirements in this Section are broken out as follows:

- Bidder (Company) Qualifications
- Bidder (Company) References
- Bidder Key Staff Qualifications
- Bidder Key Staff References
- Understanding and Approach Requirements

The Mandatory Qualification requirements in this Section are designated as either Mandatory Pass / Fail, Mandatory Scorable or Mandatory Optional. The Desirable Qualification requirements in this Section are designated Desirable Scorable. Requirements will be evaluated by the State in accordance with the evaluation processes outlined within RFP Section 9, EVALUATION.

Please review the following RFP Sections for all the additional requirements which must be met in order for a bidder to be considered responsive:

- Section 2, RULES GOVERNING COMPETITION
- Section 5, ADMINISTRATIVE REQUIREMENTS
- Section 7, COST
- Section 8, PROPOSAL FORMAT
- Section 9, EVALUATION

Section 6.2.1, BIDDER (COMPANY) QUALIFICATION REQUIREMENTS, includes company qualifications that are specific to the evaluation process. These requirements are detailed below for bidders to provide a written response.

The requirements bidders are to provide a written response in this section stem from Appendix A-4, STATEMENT OF WORK (SOW) scope. These areas of interest also align with the proposed system described in RFP Section 4, PROPOSED SYSTEM, and are of particular importance to the State.

Note: Bidders must agree to satisfy all of the requirements in the Statement of Work by completing the Appendix B-18, STATEMENT OF COMPLIANCE WITH SOW REQUIREMENTS FORM. Therefore, RFP Section 6, BIDDER REQUIREMENTS, does not contain any new scope not already stated in the SOW.

6.1.1 Qualification Requirements

Bidders must qualify in order to make it to the evaluation scoring round. The figure below depicts the areas that Bidders must meet in order not to be disqualified.

Figure 6-1: Bidder Requirements Traceability – Qualification (Pass / Fail)

6.1.2 Technical Requirements

The figure below identifies the areas where the evaluation and scoring criteria will be applied, except for cost, in the evaluation process; and the traceability between the Request for Proposal (RFP) Sections from which the evaluation areas are derived.

Figure 6-2: Bidder Requirements Traceability – Technical Evaluation (Scored)

6.1.3 Cost Requirements

The figure below identifies the areas where cost-specific criteria will be applied to the evaluation and their association with other applicable Sections of the RFP.

Figure 6-3: Bidder Requirements Traceability – Cost Evaluation (Scored)

6.2 BIDDER (COMPANY) QUALIFICATIONS & REFERENCES

Bidders who respond to this solicitation are expected to have a proven track record of success in the transition, as well as maintenance and operations, of Large and Complex Information Technology (IT) Systems. The Bidder that is awarded the contract resultant from this solicitation will be responsible for all aspects of the System Development, Maintenance and Operations (SDMO) Services for CalHEERS, including Contractor and Subcontractor (if applicable) project Staff.

6.2.1 Bidder (Company) Qualification Requirements

The State seeks a responsive, responsible bidder (company) that has the right experience to support the CalHEERS over the term of the contract. Therefore, it is imperative that the bidder provide enough detail in their response for the State to evaluate the bidder's ability to meet the requirements herein and perform the services as described within the Statement of Work (SOW).

The Bidder (Company) Qualification requirements are designated as Mandatory Pass / Fail. It is mandatory for bidders to respond, providing all of the required information regarding the company qualifications on the required Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM. Bidders that either do not submit the required information or fail to satisfy any of the mandatory qualification requirements for the Company Qualifications will be considered nonresponsive.

Table 6-1: Bidder (Company) Qualifications Form Requirement

Req #	Evaluation Type	Requirement
6.2-1	Mandatory Pass / Fail	The bidder shall submit a completed Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM to substantiate the company's experience for each of the Company MQ requirement.

Table 6-2: Bidder (Company) Qualification Step Requirement

Req #	Evaluation Type	Requirement
6.2-2	Mandatory Pass / Fail	The bidder shall submit a completed Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM to substantiate each of the Company MQ Requirements identified in RFP Section 6.2.1, BIDDER (COMPANY) QUALIFICATIONS REQUIREMENTS.

The Bidder (Company) MQ requirements are defined in the table below. Companies that partner in order to provide the State with the best service offering should review RFP Section 2, RULES GOVERNING COMPETITION, to ensure they adhere to the guidelines therein.

Table 6-3: Bidder (Company) Mandatory Qualification Requirements

MQ #	Evaluation Type	Requirements
1	Mandatory Pass / Fail	At least two (2) years of experience as the System Integrator (SI) on a health care eligibility or health care enrollment system that meets the definition of Large and Complex IT System ¹ , or at least two (2) years of experience as the prime contractor of Maintenance and Operations (M&O) on a health care eligibility or health care enrollment system that meets the definition of Large and Complex IT System.
2	Mandatory Pass / Fail	Experience with the implementation of two (2) projects involving Large and Complex IT Systems, one (1) of the projects having been on a health care eligibility or health care enrollment system. Each of the two (2) projects must have occurred within the last ten (10) years.
3	Mandatory Pass / Fail	Experience performing maintenance and system modifications on two (2) projects involving Large and Complex IT Systems, with one (1) of the projects having been on a health care eligibility or health care enrollment system. Each of the two (2) projects must have occurred within the last ten (10) years.
4	Mandatory Pass / Fail	Experience performing operational activities including system engineering, capacity planning, performance testing, performance monitoring, batch processing, and system modifications on two (2) projects involving Large and Complex IT Systems hosted in the cloud. Each of the two (2) projects must have occurred within the last ten (10) years.
5	Mandatory Pass / Fail	Experience providing service desk activities on two (2) projects involving Large and Complex IT Systems using Information Technology Infrastructure Library (ITIL) standards and framework, one (1) of the projects having been on a health care eligibility or health care enrollment system. Each of the two (2) projects must have occurred within the last ten (10) years.
6	Mandatory Pass / Fail	Experience with the transition of one (1) project, involving a Large and Complex IT System, from one company to another. The project must have occurred within the last ten (10) years.
7	Mandatory Pass / Fail	Experience with the implementation and utilization of both Artificial Intelligence (AI) and Generative Artificial Intelligence (GenAI) on two (2) projects involving

¹ See Appendix C – Glossary for the definition of Large and Complex IT System.

MQ #	Evaluation Type	Requirements
		Large and Complex IT Systems, with one (1) of the projects having been on a health and human services system. Each of the two (2) projects must have occurred within the last five (5) years.
8	Mandatory Pass / Fail	Experience with execution of the complete implementation lifecycle for newly emerging technologies, including identification, ideation, strategizing, to implementation, on two (2) projects involving Large and Complex IT Systems using Information Technology Infrastructure Library (ITIL) standards and framework, one (1) of the projects having been on a health care eligibility or health care enrollment system.

6.2.2 Bidder (Company) Reference Requirements

The bidder (company) reference requirements within this Section are designated as Mandatory Pass / Fail. It is mandatory for bidders to respond, providing all of the required information regarding the company references on the required Appendix B-20, BIDDER (COMPANY) REFERENCE FORM INSTRUCTIONS. Bidders that either do not submit the required forms or information will be considered nonresponsive.

It is Mandatory that bidder's send a copy of Appendix B-20, BIDDER (COMPANY) REFERENCE FORM INSTRUCTIONS, to each reference identified within the Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM.

Each reference must complete and return the Appendix B-20, BIDDER (COMPANY) REFERENCE FORM, to the bidder for submission within their proposal. Photocopies will be accepted as long as the form, response, and signature are legible. No information corrections or changes may be made on the reference form by the bidder. Proposals with forms that have alterations or changes to the entered information will be considered ~~nonresponsive~~non-responsive.

The State may contact references listed to verify the information provided by the bidder. Any conflicting information may result in the proposal being deemed ~~nonresponsive~~non-responsive.

Table 6-4: Bidder (Company) References Form Requirement

Req #	Evaluation Type	Requirement
6.2-3	Mandatory Pass / Fail	The bidder shall submit a completed Appendix B-20, BIDDER (COMPANY) REFERENCE FORM, for each project reference identified on the Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM, to substantiate the company experience stated to meet the Company MQ Requirements, in order to be considered compliant.

Table 6-5: Bidder (Company) References Qualification Step Requirement

Req #	Evaluation Type	Requirement
6.2-4	Mandatory Pass / Fail	The bidder shall submit a completed Appendix B-20, BIDDER (COMPANY) REFERENCE FORM, as part of the proposal to substantiate each of the Company MQ Requirements identified in RFP Section 6.2.1, BIDDER (COMPANY) QUALIFICATIONS REQUIREMENTS.

6.3 BIDDER KEY STAFF QUALIFICATIONS & REFERENCES

6.3.1 Bidder Key Staff Qualification Requirements

The purpose of this Section is to provide the Key Staff Mandatory & Desirable Qualification requirements for the bidder's leadership team that will work alongside the State's leadership team for the duration of the Contract. The requirements within this Section are designated as either Mandatory (Pass / Fail) or Mandatory Scorable. In either case, bidders must respond to the requirement. Mandatory requirements will be assessed as either Pass or Fail, while Mandatory Scorable requirements will be evaluated and receive a score based on the evaluation criteria defined in RFP Section 9, EVALUATION.

Table 6-6: Key Staff Qualifications Form Requirement (Mandatory Qualifications)

Req #	Evaluation Type	Requirement
6.3-1	Mandatory Pass / Fail	The bidder shall submit a completed Appendix B-22, KEY STAFF QUALIFICATIONS FORM, for each required Key Staff, to substantiate the Key Staff experience against each of the Key Staff Mandatory Qualification requirements identified within RFP Section 6.3.1, BIDDER KEY STAFF QUALIFICATION REQUIREMENTS.

Table 6-7: Key Staff Qualification Form Requirement (Desirable Qualifications)

Req #	Evaluation Type	Requirement
6.3-2	Mandatory	The bidder shall include a completed Appendix B-22, KEY STAFF QUALIFICATIONS FORM, as part of the proposal to substantiate each of the Key Staff Desirable Qualification requirement(s) the bidder chooses to respond to, identified within RFP Section 6.3.1, BIDDER KEY STAFF QUALIFICATION REQUIREMENTS.

Please refer to Appendix B-21, KEY STAFF QUALIFICATIONS INSTRUCTIONS for directions on completing an Appendix B-22, KEY STAFF QUALIFICATIONS FORM for each proposed Key Staff position.

The cost associated with all bidder Key Staff, except for the Transition Manager, shall be captured within Appendix D-5, SDMO FIXED PRICE ONSHORE COSTS, D-5.4 SDMO FIXED PRICE OFFSHORE COSTS. The cost associated with the Transition Manager shall be captured in the activities specified within Appendix D-8, TRANSITION-IN COSTS, and Appendix D-8.2, TRANSITION-OUT COSTS.

Table 6-8: Bidder Key Staff Mandatory & Desirable Qualification Requirements

#	Key Staff	MQ #	Type	Requirements
1	Project Manager	6.3.1-1	Mandatory Scorable	The Project Manager shall have a minimum of five (5) years' experience within the past ten (10) years, supervising teams of 50 people or greater on projects that involved Large and Complex IT Systems.
		6.3.1-2	Mandatory Scorable	The Project Manager shall possess and maintain a valid Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.
		6.3.1-3	Mandatory Scorable	The Project Manager shall have a minimum of three (3) years of experience within the past ~~ten~~ <u>fifteen</u> ~~(10)~~ <u>(15)</u> years, on a project that implemented, or performed the

#	Key Staff	MQ #	Type	Requirements
				maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
		6.3.1-4	Desirable Scorable	The Project Manager shall have a minimum of one (1) years' experience within the past ten (10) years, on an Affordable Care Act (ACA) project.
		6.3.1-5	Desirable Scorable	The Project Manager shall have a minimum of one (1) year of experience within the past ten (10) years, managing the development of, or managing the system change requests for, a Large and Complex IT System utilizing an Agile development methodology.
2	Deputy Project Manager	6.3.1-6	Mandatory Scorable	The Deputy Project Manager shall have a minimum of five (5) years' experience within the past ten (10) years, in Business or Information Technology (IT) Project Management.
		6.3.1-7	Mandatory Scorable	The Deputy Project Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing/co-managing a project, including but not limited to, experience managing Contract requirements and deliverables on large and complex IT projects; and have experience with human services systems and programs with emphasis on healthcare.
		6.3.1-8	Mandatory Scorable	The Deputy Project Manager shall possess and maintain a valid Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.
		6.3.1-9	Desirable Scorable	The Deputy Project Manager shall have a minimum of one (1) year of experience within the past ten (10) years, supervising teams of 10 people or greater on projects that implemented or performed the maintenance and operations on a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
3	Technical Manager	6.3.1-10	Mandatory Scorable	The Technical Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing a system development life cycle (SDLC), including business and system requirement specification, design, development, testing, and implementation, on projects involving Large and Complex IT Systems.
		6.3.1-11	Mandatory Scorable	The Technical Manager shall have a minimum of five (5) years' experience within the past ten (10) years, performing oversight of technical resources, resolving system defects and reporting resolutions.
		6.3.1-12	Mandatory Scorable	The Technical Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing the system development life cycle (SDLC) on maintenance and operations projects which involved Large and Complex IT Systems.
		6.3.1-13	Desirable Scorable	The Technical Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.

#	Key Staff	MQ #	Type	Requirements
		6.3.1-14	Desirable Scorable	The Technical Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a Large and Complex IT System using Information Technology Infrastructure Library (ITIL) standards and framework.
4	Project Management Office (PMO) Manager	6.3.1-15	Mandatory Scorable	The PMO Manager shall have a minimum of five (5) years' project management experience within the past ten (10) years, managing and supervising PMO teams on projects involving Large and Complex IT Systems.
		6.3.1-16	Mandatory Scorable	The PMO Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing a PMO, in accordance with industry best practices, including experience managing Contract requirements and deliverables on projects involving Large and Complex IT Systems.
		6.3.1-17	Mandatory Scorable	The PMO Manager shall possess and maintain a valid Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.
		6.3.1-18	Desirable Scorable	The PMO Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
5	Schedule Management Lead	6.3.1-19	Mandatory Scorable	The Schedule Management Lead shall have a minimum of five (5) years' experience within the past ten (10) years, supervising schedule management teams on projects involving Large and Complex IT Systems.
		6.3.1-20	Mandatory Scorable	The Schedule Management Lead shall have a minimum of five (5) years' experience within the past ten (10) years, managing project schedules, including an integrated master schedule (multiple schedules merged into a single master schedule), on projects involving Large and Complex IT Systems.
		6.3.1-21	Mandatory Scorable	The Schedule Management Lead shall possess and maintain a valid, in good standing, Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.
		6.3.1-22	Desirable Scorable	The Schedule Management Lead shall have three (3) year experience within the past ten (10) years, on projects involving Large and Complex IT Systems, that implemented or migrated to effort-driven schedules.
		6.3.1-23	Desirable Scorable	The Schedule Management Lead shall have a minimum of three (3) years' scheduling experience within the past ten (10) years, managing effort driven schedules on projects involving Large and Complex IT Systems.
6	Operations Manager	6.3.1-24	Mandatory Scorable	The Operations Manager shall have a minimum of five (5) years' experience within the past ten (10) years, supervising teams of 20 people or greater on maintenance and operations projects involving Large and Complex IT Systems.
		6.3.1-25	Mandatory Scorable	The Operations Manager shall have a minimum of five (5) years' experience within the past ten (10) years, ensuring the continuity of IT operations services,

#	Key Staff	MQ #	Type	Requirements
				including both local and wide area networks and cloud based services on projects involving Large and Complex IT Systems.
		6.3.1-26	Mandatory Scorable	The Operations Manager shall have a minimum of three (3) years' experience within the past ten (10) years, on maintenance and operations projects involving Large and Complex IT Systems which were hosted at in the cloud.
		6.3.1-27	Desirable Scorable	The Operations Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
		6.3.1-28	Desirable Scorable	The Operations Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a Large and Complex IT System using Information Technology Infrastructure Library (ITIL) standards and framework.
		6.3.1-29	Desirable Scorable	The Operations Manager shall have a minimum of one (1) year of experience within the past ten (10) years, working within a data warehouse environment, with a demonstrated understanding of data structures, ETLs, and reporting tools on a Large and Complex IT System.
7	Applications Maintenance Manager	6.3.1-30	Mandatory Scorable	The Applications Maintenance Manager shall have a minimum of five (5) years' experience within the past ten (10) years, as the application manager or lead on projects involving Large and Complex IT Systems.
		6.3.1-31	Mandatory Scorable	The Applications Maintenance Manager shall have a minimum of four (4) years' experience within the past ten (10) years, on projects involving Large and Complex IT Systems that integrated one (1) or more COTS applications.
		6.3.1-32	Mandatory Scorable	The Applications Maintenance Manager shall have a minimum of five (5) years' experience, within the past ten (10) years, managing application maintenance resources, scope, and prioritizing applications maintenance activities within the project work plan.
		6.3.1-33	Desirable Scorable	The Applications Maintenance Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
		6.3.1-34	Desirable Scorable	The Applications Maintenance Manager shall have a minimum of one (1) year of experience within the past ten (10) years, working within the data warehouse environment requiring a solid understanding of data structures, ETLs, and reporting tools on a Large and Complex IT System.
		6.3.1-35	Desirable Scorable	The Applications Maintenance Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a Large and Complex IT System using Information Technology Infrastructure Library (ITIL) standards and framework.

#	Key Staff	MQ #	Type	Requirements
8	Enterprise Architect	6.3.1-36	Mandatory Scorable	The Enterprise Architect shall have a minimum of five (5) years' experience within the past ten (10) years as an Enterprise Architect on projects involving Large and Complex IT Systems.
		6.3.1-37	Mandatory Scorable	The Enterprise Architect shall have a minimum of five (5) years' experience within the past ten (10) years in architecting and building high performance internet scale distributed systems and/or in architecting and building enterprise scale distributed systems, on projects involving Large and Complex IT Systems; and have experience with human services systems and programs with emphasis on healthcare.
		6.3.1-38	Mandatory Scorable	The Enterprise Architect shall have a minimum of five (5) years' experience within the past ten (10) years, of advanced technical expertise in at least one (1) of the following core areas: • Service Oriented Architecture (SOA) • Data Architecture and Data Warehousing • Security/Identity Management • Cloud Computing • Infrastructure Architecture
		6.3.1-39	Desirable Scorable	The Enterprise Architect shall have a minimum of one (1) year of experience within the past five (5) years, executing technology modernization on a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
9	Release Manager	6.3.1-40	Mandatory Scorable	The Release Manager shall have a minimum of five (5) years' experience within the past ten (10) years as the release manager or lead on projects involving Large and Complex IT Systems.
		6.3.1-41	Mandatory Scorable	The Release Manager shall have a minimum of five (5) years' experience within the past ten (10) years, on projects involving Large and Complex IT Systems, that manage, plan, schedule and control software build through different stages and environments; including testing and deploying software releases.
		6.3.1-42	Mandatory Scorable	The Release Manager shall have a minimum of five (5) years' experience within the past ten (10) years, working with project management principles and best practices in an information systems operations environment, within systems analysis or in the system development life cycle (SDLC).
		6.3.1-43	Desirable Scorable	The Release Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
10	Transition Manager	6.3.1-44	Mandatory Scorable	The Transition Manager shall have a minimum of three (3) years' experience within the past ten (10) years, performing operational transition and the related organization change management activities on projects involving Large and Complex IT Systems.

#	Key Staff	MQ #	Type	Requirements
		6.3.1-45	Mandatory Scorable	The Transition Manager shall have a minimum of two (2) years' experience within the past ten (10) years, managing the successful transition of Large and Complex IT Systems from one (1) company to another on at least two (2) separate projects. The Transition Manager's experience shall have been for a minimum duration of three (3) months for each project.
		6.3.1-46	Mandatory Scorable	The Transition Manager shall have a minimum of five (5) years' experience within the past ten (10) years building and maintaining strong working relationships with clients, key internal and external stakeholders; Conveying relevant information to an executive-level audience, ensuring client (internal management or customer) is aware of assignment progress/service status; and building credibility and fostering business-partnering relationships.
		6.3.1-47	Desirable Scorable	The Transition Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
11	Quality Assurance Manager	6.3.1-48	Mandatory Scorable	The Quality Assurance Manager shall have a minimum of five (5) years of lead experience within the past ten (10) years, applying quality assurance principles, methods, and techniques to processes on projects involving Large and Complex IT Systems.
		6.3.1-49	Mandatory Scorable	The Quality Assurance Manager shall have at least five (5) years of lead experience within the past ten (10) years, applying quality assurance principles, methods, and techniques to the development of project deliverables on projects involving Large and Complex IT Systems.
		6.3.1-50	Mandatory Scorable	The Quality Assurance Manager shall have a minimum of five (5) years' experience within the past ten (10) years, supervising QA staff on projects that involved Large and Complex IT Systems.
		6.3.1-51	Desirable Scorable	The Quality Assurance Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
		6.3.1-52	Desirable Scorable	The Quality Assurance Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a Large and Complex IT System using Information Technology Infrastructure Library (ITIL) standards and framework.
12	Agile Manager	6.3.1-53	Mandatory Scorable	The Agile Manager shall have a minimum of five (5) years' lead experience within the past ten (10) years, applying agile principles, methods, and techniques to processes on projects involving Large and Complex IT Systems.
		6.3.1-54	Mandatory Scorable	The Agile Manager shall have a minimum of two (2) years' experience within the past five (5) years assisting

#	Key Staff	MQ #	Type	Requirements
				IT projects with the transition from Waterfall to Agile methodology.
		~~6.3.1-55~~ ~~6.3.1-56~~ 56	Desirable Scorable	The Agile Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on a federal or state health and human services eligibility and/or enrollment system meeting the definition of Large and Complex IT System.
		~~6.3.1-56~~ ~~6.3.1-57~~ 57	Mandatory Scorable	The Data Scientist must have a minimum of 5 years' experience within the past ten (10) years of leading teams of programmers that develop machine learning algorithms or design predictive modeling processes.
		~~6.3.1-57~~ ~~6.3.1-58~~ 58	Mandatory Scorable	The Data Scientist must have a minimum of 10 years' experience within the past fifteen (15) years in sorting, analyzing, and managing large amounts of data (commonly referred to as "big data").
		~~6.3.1-58~~ ~~6.3.1-59~~ 59	Mandatory Scorable	The Data Scientist must have a minimum of 10 years' experience within the past fifteen (15) years writing high-quality machine learning models and algorithms required to support statistics and probability. The ability to collect, interpret, organize, and present data, and an advanced degree in applied statistics, economics, epidemiology, biostatistics, or a related field, with at least a concentration in quantitative methods relevant to work described for CalHEERS.
13	Data Scientist	~~6.3.1-59~~ ~~6.3.1-60~~ 60	Mandatory Scorable	The Data Scientist must have a minimum of 10 years' experience within the past fifteen (15) years writing providing services in support of data wrangling including cleaning and organizing complex data sets to make them easier to access and analyze. Manipulating the data to categorize it by patterns and trends to assist in making data-driven decisions. A solid understanding of database management, with proven experience extracting data from different sources and transforming it into a suitable format for query and analysis, and then load it into a data warehouse system is required.
		~~6.3.1-60~~ ~~6.3.1-64~~ 64	Desirable Scorable	The Data Scientist shall have a minimum of three (3) years of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on a federal or state health and human services eligibility and/or CA Health and Human Services Agency system meeting the definition of Large and Complex IT System.
		~~6.3.1-61~~ ~~6.3.1-62~~ 62	Mandatory Scorable	The Data Analytics Expert shall have a minimum of ten (10) years' lead experience within the past fifteen (15) years, developing, implementing, and improving data analytics strategies and solutions on projects involving Large and Complex IT Systems.
14	Data Analytics Expert	~~6.3.1-62~~ ~~6.3.1-63~~ 63	Mandatory Scorable	The Data Analytics Expert shall have a minimum of five (5) years' experience within the past ten (10) years leading a team of data architects, data scientists, report developers, or related analytics staff resources on projects involving Large and Complex IT Systems.

#	Key Staff	MQ #	Type	Requirements
		~~6.3.1-636.3.1-64~~	Mandatory Scorable	The Data Analytics Expert shall have a minimum of three (3) years' experience/knowledge within the past seven (7) years in business processes including research and data analysis, application of statistical research techniques, report or application development.
		~~6.3.1-646.3.1-65~~	Desirable Scorable	The Data Analytics Expert shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
		~~6.3.1-656.3.1-66~~	Desirable Scorable	The Data Analytics Expert shall have a minimum of one (1) year of experience within the past ten (10) years, working within the data warehouse environment requiring a solid understanding of data structures, ETLs, and reporting tools on a Large and Complex IT System.
15	Security Officer	~~6.3.1-666.3.1-67~~	Mandatory Scorable	The Security Officer shall have a minimum of ten (10) years' lead experience within the past fifteen (15) years', developing, implementing, improving and monitoring industry standard Security strategies, solutions, and processes on projects involving Large and Complex IT Systems.
		~~6.3.1-676.3.1-68~~	Mandatory Scorable	The Security Officer shall have a minimum of five (5) years' experience within the past ten (10) years' applying Information Security principles, methods, and techniques in the development of project security deliverables on projects involving Large and Complex IT Systems.
		~~6.3.1-686.3.1-69~~	Mandatory Scorable	The Security Officer shall have a (ISC) ² ® Certified Information Systems Security Professional (CISSP) certification, or equivalent, including experience in Healthcare, Business Administration and Information Technology.
		~~6.3.1-696.3.1-70~~	Desirable Scorable	The Security Officer shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a federal or state health and human services eligibility and/or enrollment system meeting the definition of Large and Complex IT System.
16	Organizational Change Manager (OCM)	~~6.3.1-706.3.1-71~~	Mandatory Scorable	The OCM Manager shall have a minimum of ten (10) years' lead experience within the past fifteen (15) years', developing, implementing, and improving change management, gap analysis strategies and solution implementation on projects involving Large and Complex IT Systems.
		~~6.3.1-716.3.1-72~~	Mandatory Scorable	The OCM Manager shall have a minimum of five (5) years' experience within the past ten (10) years' leading a team of change management agents on projects involving Large and Complex IT Systems.
		~~6.3.1-726.3.1-73~~	Mandatory Scorable	The OCM Manager shall have a minimum of five (5) years' experience within the past ten (10) years' working with human services systems and programs with an emphasis on healthcare; experience building and maintaining strong working relationships with clients, key internal and external stakeholders; communicating

#	Key Staff	MQ #	Type	Requirements
				relevant information to an executive-level audience, ensuring the client (internal management or customer) is aware of the impact of impending changes.
		~~6.3.1-73~~ ~~6.3.1-74~~	Desirable Scorable	The OCM Manager shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.
		~~6.3.1-74~~ ~~6.3.1-75~~	Desirable Scorable	The OCM Manager shall have a minimum of one (1) year of experience within the past ten (10) years, managing change on a Large and Complex IT System that utilizes an Agile development methodology.
17	Consumer Experience Lead	~~6.3.1-75~~ ~~6.3.1-76~~	Mandatory Scorable	The Consumer Experience Lead shall have a minimum of seven (7) years' experience within the past ten (10) years, in marketing analytics, customer experience/customer insights and/or customer strategy; and have experience with human services systems and programs with emphasis on healthcare.
		~~6.3.1-76~~ ~~6.3.1-77~~	Mandatory Scorable	The Consumer Experience Lead shall have a minimum of five (5) years' experience within the past ten (10) years, gathering consumer and user business data, analyzing of the data, to quantify and inform User Experience (UX) strategies.
		~~6.3.1-77~~ ~~6.3.1-78~~	Mandatory Scorable	The Consumer Experience Lead shall have a minimum of five (5) years' experience within the past ten (10) years, applying UX Design, implementing UX methodologies and best practices, and designing wireframes or prototypes for research validation.
		~~6.3.1-78~~ ~~6.3.1-79~~	Desirable Scorable	The Consumer Experience Lead shall have a minimum of one (1) year of experience within the past ten (10) years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.

6.3.2 Bidder Key Staff Reference Requirements

The purpose of the Staff reference requirements is to provide the State with the ability to assess Key Staff experience in providing similar or relevant services to those identified in this solicitation. The requirements within this Section are designated as either Mandatory (Pass / Fail) or Mandatory Scorable. In either case, bidders must respond to the requirement. Mandatory requirements will be assessed as either pass or fail, while Mandatory Scorable requirements will be evaluated and receive a score based on the evaluation criteria defined in RFP Section 9, EVALUATION.

It is Mandatory that bidder's send a copy of Appendix B-23, STAFF REFERENCE FORM, to each reference identified within each Key Staff's Appendix B-22, KEY STAFF QUALIFICATIONS FORM.

Each reference must complete and return the Appendix B-23, STAFF REFERENCE FORM, to the bidder for submission within their proposal. Photocopies will be accepted as long as the form, response, and signature are legible. No information corrections or changes may be made on the reference form by the bidder. Proposals with forms that have alterations or changes to the entered information will be considered nonresponsive.

If the Key Staff Reference is not allowed either legally or by company/organization policy to sign the Appendix B-23, STAFF REFERENCE FORM, the Key Staff Reference must type in their full name with a brief statement on the form outlining the reason they are not permitted to sign the State's Key Staff reference form.

The State may contact references listed to verify the information provided by the bidder. Any conflicting information may result in the proposal being deemed nonresponsive.

Table 6-9: Key Staff Reference Requirements

Req #	Type	Requirement
6.3-3	Mandatory Pass / Fail	The bidder shall only submit Key Staff references from individuals external to the bidder's organization and corporate structure. The individual providing the reference must have performed in a managerial or supervisory role on the project referenced on Appendix B-22, KEY STAFF QUALIFICATIONS FORM.
6.3-4	Mandatory Pass / Fail	The bidder shall validate that each Key Staff Reference returned the Appendix B-23, STAFF REFERENCE FORM, to the bidder, properly filled out, signed and dated, for inclusion within the bidder's proposal. All reference forms associated with Key Staff Mandatory or Desirable Qualification requirements must be submitted within the proposal in order to be considered compliant.

Table 6-10: Key Staff References Form Requirement

Req #	Type	Requirement
6.3-5	Mandatory Pass / Fail	The bidder shall submit a completed Appendix B-23, STAFF REFERENCE FORM, for each project reference identified on the Appendix B-22, KEY STAFF QUALIFICATIONS FORM, to substantiate the Key Staff experience stated to meet the Key Staff Mandatory Qualification Requirements, in order to be considered compliant.
6.3-6	Mandatory	The bidder shall submit a completed Appendix B-23, STAFF REFERENCE FORM, for each project reference identified on the Appendix B-22, KEY STAFF QUALIFICATIONS FORM, to substantiate the Key Staff experience stated to meet any of the Key Staff Desirable Qualification Requirements, in order for the state to evaluate whether or not the experience meets the requirement.

Table 6-11: Key Staff Reference Qualification Step Requirement

Req #	Type	Requirement
6.3-7	Mandatory Pass / Fail	The bidder shall include completed Appendix B-23, STAFF REFERENCE FORMS, as part of the proposal to substantiate each of the Key Staff MQ Requirements identified in RFP Section 6.3.1, BIDDER KEY STAFF QUALIFICATION REQUIREMENTS.

6.4 UNDERSTANDING AND APPROACH REQUIREMENTS

The bidder must provide a narrative response to each of the Understanding and Approach requirements located within this Section, in fulfillment of the requirements identified in Appendix A-4, STATEMENT OF WORK (SOW), and in consideration of the M&O service improvements identified in RFP Section 4, PROPOSED SYSTEM. The bidder shall provide their response to these requirements in accordance with the instructions provided in this Section and within RFP Section 8, PROPOSAL FORMAT.

6.4.1 Understanding and Approach to Project Management Requirements

The State has chosen Project Management related topics identified in RFP Section 4, PROPOSED SYSTEM for which the bidder is required to respond. These topics also correlate with the requirements the Bidder will perform in SOW Section 3, PROJECT MANAGEMENT

REQUIREMENTS upon contract award.

Mandatory Scorable (MS) requirements herein will apply to the Understanding and Approach Sections. It is mandatory for the bidders to provide their Understanding and Approach to each of the topics identified. The responses will then be scored by the State in accordance with the evaluation process outlined in RFP Section 9, EVALUATION.

Table 6-12: Page Count Limit for Project Management Requirements Response

Req #	Type	Requirement
6.4-1	Mandatory Pass / Fail	The bidder shall submit their response to the Understanding and Approach to Project Management Requirements within this Section. The bidder's narrative response shall not exceed 50 single-sided pages or 25 double-sided pages, with a minimum of 11 pt. font size. If the requirement specifically calls for the submission of an alternate product (e.g., Figure or Diagram) they will not be counted against the narrative response page count for the Section.

6.4.1.1 Approach to Strategic Planning

Table 6-13: Strategic Planning Methodology

Req #	Type	Requirement
6.4-2	Mandatory Scorable	Describe the bidder's proposed methodology for strategic planning on CalHEERS. Considering the requirements within SOW Section 3.15, STRATEGIC PLANNING AND MANAGEMENT, as well as SOW Section 5 PROGRAM SUPPORT REQUIREMENTS, Sections 5.15 – 5.20 pertaining to innovation for context, provide the State with an outline for and description of how the bidder's Strategic Planning will address the following areas: 1. Analysis of CalHEERS Program SDMO needs (e.g., testing automation). 2. Methods to collect, facilitate, collaborate, lead, and maintain a strong sense of buy-in with all stakeholder groups, including but not limited to: a. DHCS b. Covered California c. OTSI d. CWDA e. CalSAWS f. Counties g. CalHEERS State Team h. Health insurance carriers and insurance agents 3. Activity prioritization and scheduling based on stakeholder guidance, CalHEERS program needs, desired innovation, SDMO needs, and resource availability. 4. Processes and procedures used specifically to perform and maintain strategic plan activities, goals, and objectives. 5. Methodology for identifying and implementing technology innovation. 6. Approach to addressing User Experience considerations to ensure a consistently positive user and consumer experience (e.g., performing usability testing within the SDLC to understand how users will interact with the solution). 7. Methods to incorporate short-term and long-term planning objectives.

6.4.1.2 Approach to Policy and Legislative Impact Analysis and Change Support

Table 6-14: Policy and Legislative Impact Analysis and Change Support

Req #	Type	Requirement
6.4-3	Mandatory Scorable	The bidder shall, considering SOW Section 3.16, POLICY AND LEGISLATIVE IMPACT ANALYSIS AND CHANGE SUPPORT, describe their approach to identifying, analyzing, and addressing the impacts to CalHEERS caused by Policy and/or legislative changes, and address the following: 1. Identify the major considerations associated with legislative and/or policy changes (e.g., contract impact, system impact, organizational impact, end user impact, readiness impact, capacity planning, and implementation of services). 2. Identify the activities, major milestones and success criteria associated with conducting this in-depth analysis. 3. Describe how the bidder will communicate system and project constraints to project stakeholders. 4. Identify the risks and challenges these changes can pose to the 24-month Road Map and release schedule. 5. Describe how the bidder will help mitigate those risks and challenges and prevent release delays.

6.4.1.3 Total Cost of Ownership (TCO) Methodology

Total Cost of Ownership (TCO) is closely related to the outcome realization desires of the State (See also Section 6.4.3.5 Approach to Outcome Realization) to ensure that changes and innovation improvements to CalHEERS are a good decision and are justified for the money spent for implementation.

Table 6-15: Total Cost of Ownership (TCO) Methodology

Req #	Type	Requirement
6.4-4	Mandatory Scorable	The bidder shall describe their approach for implementing a Total Cost of Ownership (TCO) methodology on CalHEERS, and ~~its~~ <u>its</u> inclusion with outcome realization by describing how the methodology will: 1. Provide a comprehensive consolidation of total project costs beyond just one-time implementation cost considerations. 2. Incorporate outcome realization expectations through a comparison of product/project proposed business value versus actual business value. 3. Provide data for informed project decision-making regarding what product/project to invest in and not to invest in. 4. Identify and track key performance indicators (KPI) throughout implementation 5. Result in the best value products and projects for the State

6.4.1.4 Approach to Management of Hardware, Software & Cloud Hosting Services

Table 6-16: Management of Hardware, Software & Cloud Hosting Services

Req #	Type	Requirement
6.4-5	Mandatory Scorable	The bidder shall describe their approach to providing and managing Hardware, Software and Cloud Hosting Services on CalHEERS, considering SOW Section 3.3 COST/COST ESTIMATING MANAGEMENT. In addition to the approach above, bidders shall describe how the proposed process will reduce the State's management overhead, while at the same time providing the lowest cost. Finally, the bidder shall identify how their proposed process will provide complete cost transparency to the State.

6.4.2 Understanding and Approach to System Change & Enhancements

The State has chosen topics from the System Change & Enhancements challenges identified in RFP Section 4, PROPOSED SYSTEM for which the bidder is required to respond. These topics also correlate with the requirements the Bidder will perform in SOW Section 4, SYSTEM CHANGE & ENHANCEMENTS REQUIREMENTS upon contract award.

Mandatory Scorable (MS) requirements herein will apply to the Understanding and Approach Sections. It is mandatory for the bidders to provide their Understanding and Approach to each of the areas identified. The responses will then be scored by the State in accordance with the evaluation process outlined in RFP Section 9, EVALUATION.

Table 6-17: Page Count Limit for System Change & Enhancements Response

Req #	Type	Requirement
6.4-6	Mandatory Pass / Fail	The bidder shall submit their response to the Understanding and Approach to System Changes & Enhancements requirements within this Section. The bidder's narrative response shall not exceed 50 single-sided pages or 25 double-sided pages, with a minimum of 11 pt. font size. If the requirement specifically calls for the submission of an alternate product (e.g., Figure or Diagram) they will not be counted against the narrative response page count for the Section.

6.4.2.1 Approach to Timely System Changes/Enhancements

Table 6-18: Demonstrated Experience with Change Management

Req #	Type	Requirement
6.4-7	Mandatory Scorable	The bidder shall describe their experience implementing complex system changes, while maintaining system stability, on a previous project similar to CalHEERS and discuss the following: 1. Describe the similarities between the previous project and CalHEERS. 2. Describe the methods bidder used on the previous project to lead, facilitate, elicit, and document detailed requirements with agreement and buy-in from all stakeholder groups. 3. Describe the bidder's activities conducted on the previous project to ensure system changes didn't impact system stability and provided the best value solution. 4. Describe the bidder's activities conducted on the previous project to ensure system changes/enhancements carried on unimpacted by bidder innovation initiatives. 5. Describe the bidder's activities used on the previous project to

Req #	Type	Requirement
		conduct and incorporate user and consumer feedback prior and post change implementation. 6. Provide the top five (5) challenges or risks to implementing the system/service changes. 7. Describe how the bidder mitigated those challenges or risks. 8. Describe how the bidder organized change requests/enhancements within scheduled releases, moved between releases, outcomes and how the bidder measured their success on a previous project.

Table 6-19: Approach to Change Management

Req #	Type	Requirement
6.4-8	Mandatory Scorable	The bidder shall review the ~~CD-4.23~~ -1 - Change Request Process deliverable, located in the Bidders' Library, and provide their proposed approach to implementing complex system changes and enhancements for CalHEERS, provide any proposed process improvements, as well as address the following: 1. Describe the methods that will be utilized to lead, facilitate, elicit, and document detailed requirements with agreement and buy-in from all stakeholder groups (e.g., DHCS, Covered California, and CalHEERS State Team). 2. Identify how the bidder will implement fast track changes, outside of the normal change request process, required due to regulatory requirements. 3. Identify the major milestones and activities associated with the bidder's execution of major system changes / enhancements, and the related success criteria. 4. Identify how the bidder will integrate user or consumer journey and experience feedback into the bidders' approach to system changes and enhancements. 5. Provide the top five (5) challenges the bidder foresees in implementing system changes/enhancements into CalHEERS today. 6. Describe how the bidder will mitigate those challenges or risks. 7. Describe the bidder's approach to researching alternative analysis for change requests and address the following: a. Describe the bidder's process that will be utilized to identify solution options available for each change request (CR). b. Describe the bidder's process that will be utilized to calculate and communicate the analysis around alternatives considered for CR solutions or that communicate the recommended approach to ensure the State has transparency into the factors that support best value decision making.
6.4-9	Mandatory Scorable	The bidder shall review the ~~CD-4.23~~ -1 - Change Request Process, the ~~4.23.2-26~~ - Basis of Estimate (BOE) DELIVERABLE, and the ~~CD-3.3-1~~ - Cost Management Plan deliverables, provided in the Bidders' Library, and describe their approach to transparent change request planning and cost estimation, addressing the following: 1. Identify the bidder's process for estimating/calculating the full SDLC effort of a change request and how that data will be shared transparently with the State. 2. Identify your process for determining the breakout of a CR's effort between onshore and offshore resources, and how that data will be shared transparently with the State.

Table 6-20: Change Management Process Scalability

Req #	Type	Requirement
6.4-10	Mandatory Scorable	The bidder shall consider the role the State plays in Change Management today and the process the bidder proposed in Req. 6.4-6 (above) and address the following: 1. How the bidder's proposed process and staffing approach will be scalable to compensate for fluctuation in State change request demands. 2. How the bidder's proposed process is scalable to compensate for potential staffing fluctuations on the State's side of the process.

6.4.3 Understanding and Approach to Program Support Requirements

The State has chosen a subset of topics from the Program Support challenges identified in RFP Section 4, PROPOSED SYSTEM for which the bidder is required to respond. These topics also correlate with the requirements the Bidder will perform in SOW Section 5, PROGRAM SUPPORT REQUIREMENTS upon contract award. When responding to the requirements within this Section, a bidder shall consider that the State is seeking solution options and efficient processes that provide the ability to determine best value.

Additionally, the State has chosen a subset of topics on innovation for which the bidder is required to respond. These topics also correlate with the requirements the Bidder will perform in SOW Section 5, PROGRAM SUPPORT REQUIREMENTS upon contract award. When responding to the requirements within this Section, a bidder shall consider that the State is seeking services, solutions, and efficient processes that provide the ability to determine best value.

Table 6-21: Page Count Limit for Program Support Response

Req #	Type	Requirement
6.4-11	Mandatory Pass / Fail	The bidder shall submit their response to the Understanding and Approach to Program Support requirements within this Section. The bidder's narrative response shall not exceed 80 single-sided pages or 40 double-sided pages, with a minimum of 11 pt. font size. If the requirement specifically calls for the submission of an alternate product (e.g., Figure or Diagram) the alternate product will not be counted against the narrative response page count for the Section.

6.4.3.1 Approach to Program Support Planning

Table 6-22: Program Support Planning

Req #	Type	Requirement
6.4-12	Mandatory Scorable	Describe the bidder's approach to operationalizing the program support services on CalHEERS, addressing the following: 1. The proposed strategy to be utilized to identify, document, and improve the program support services. 2. The approach to establish and maintain the organizational infrastructure for the program support activities. 3. The methods to collect, facilitate, collaborate, lead, and maintain a strong sense of buy-in with CalHEERS staff and managers. 4. The development of processes, procedures, and project documentation used to perform and maintain Program Support Service activities, goals, and objectives. 5. The approach to maintain high quality program support services. 6. The approach to executing the initiation and maintenance and operations support of the innovations identified in SOW Section 5.15 - 5.20.

6.4.3.2 Approach to Operationalizing Annual Processes

Table 6-23: Operationalizing Annual Processes

Req #	Type	Requirement
6.4-13	Mandatory Scorable	The bidder shall describe their proposed methodology and approach to operationalizing the annual process identified within SOW Section 5.3, REASONABLE OPPORTUNITY PERIOD (ROP) BATCH SERVICES, providing their understanding and knowledge of requirements in SOW Section 5.3.1, ROP BATCH SERVICES, as context, describe the following: 1. Conduct forecasting of future needs and provider greater efficiency for annual changes through the use of technology and automated processes. 2. Describe how the bidder will reduce processing timeframes through the utilization of industry best practices, innovation, or enhancement while maintaining quality assurance. 3. Describe how the bidder will operationalize the annual process to reduce annual costs over time.

6.4.3.3 Approach to General Innovations

Table 6-24: World Class Innovation

Req #	Type	Requirement
6.4-14	Mandatory Scorable	The bidder shall define Innovation, their approach to applying innovation, describe how they would bring their approach to CalHEERS, including a culture of continuous improvement and applied innovation, providing examples of where the bidder successfully implemented innovations, using a similar approach to that described for CalHEERS, on previous public or private projects, including Large and Complex IT Systems.

6.4.3.4 Approach to Consumer Journey & Experience Innovations

Table 6-25: Self-Service Consumer Journey & Experience Innovations

Req #	Type	Requirement
6.4-15	Mandatory Scorable	The bidder shall identify how they will measure consumer satisfaction and optimize the consumer journeys and improve experiences, addressing the following: 1. Approach to analyze consumer journey to identify and track “top Tasks” that consumers are attempting to accomplish. 2. Approach to continually monitor the consumer experience and improve the consumer’s experience for each top task, ensuring that consumer needs are met. 3. How consumer journey will integrate with data management and AI innovations. And additionally demonstrate how the bidder successfully used a similar approach to improve the consumer journey and experience on a previous project, involving a Large and Complex IT System, specifying the specialized skillsets or experience utilized, the approach they employed, and the outcomes obtained.

Table 6-26: Assisted Consumer Journey & Experience Innovations

Req #	Type	Requirement
6.4-16	Mandatory Scorable	The bidder shall identify how they will measure and optimize our assister (an individual who assists a consumer with a Medi-Cal or Covered California application, examples include call center representatives, community health navigators, community non-profit organizations, authorized representatives, licensed insurance agents) journey and improve our assister’s experience, addressing the following: 1. Approach to analyze the assisted consumer journey to identify and track “top Tasks” that consumers are attempting to accomplish. 2. Approach to continually monitor the assister’s experience and improve their experience for each top task, ensuring that assister needs are met. 3. How consumer journey will integrate with data management and AI innovations. And additionally demonstrate how the bidder conducted similar Assister Experience activities on a previous project, involving a Large and Complex IT System, specifying the specialized skillsets or experience utilized, the approach they employed, and the outcomes obtained.

6.4.3.5 Approach to Outcome Realization

Table 6-27: Outcome Realization

Req #	Type	Requirement
6.4-17	Mandatory Scorable	The bidder shall describe their approach to incorporating Outcome Realization mechanisms into the enhancements of CalHEERS, achieved through SOW Section 4.2.1, CHANGE REQUEST PROCESS. It is expected that the bidder shall address the following: 1. The bidder's mindset, staffing approach, and culture for delivering products and services with Outcome Realization that brings the best value to the State for the cost incurred to achieve it. 2. The approach for analyzing the CalHEERS ecosystem utilizing such things as data analytics/metrics information to qualitatively evaluate against the desired outcomes of the State, including such techniques as: a. Insight (Learning from existing data/reporting) b. Hindsight (Identifying factors impacting outcomes) c. Foresight (using Data Analysis to understand/anticipate the future) 3. The strategy for identifying and utilizing such things as key performance indicators (KPI), incorporating Total Cost of Ownership (TCO), and incorporating return on investment (ROI), to the Outcome Realization picture in order to achieve beneficial and worthy outcomes. 4. The approach to establish and maintain outcome realization activities, that will: a. Provide data for improved decision making as early as possible in the SDLC. b. Improve processing efficiency c. Increase data accuracy d. Utilize seamless data exchange e. Improve user experience f. Integrate with areas on the project such as, but not limited to, Usability Research Services, Strategic Planning & Management, 24 Month Roadmap, Change Request Processes, Defect and Warranty Management. 5. Demonstrated experience where the Outcome Realization mindset was incorporated on a previous project, involving a Large and Complex IT System (e.g., health systems), specifying any specialized staffing skillsets they utilized, the approach employed, and the outcomes obtained.

Table 6-28: Data & Analytics Innovations

Req #	Type	Requirement
6.4-18	Mandatory Scorable	The bidder shall provide their approach to supporting the CalHEERS Data & Analytics Innovations, as discussed in SOW Section 5.16 – DATA USAGE & ANALYTICS INNOVATIONS, leading project innovation efforts to turn data into knowledge and action. Please address the following items within your approach: 1. Data and analytics program 1. Data platform 2. Data & Analytics development 3. Advanced analytics & data science

Req #	Type	Requirement
		The Bidders shall provide examples of successful implementations of similar data & analytics innovations, which drove decision making that lead to positive outcomes on either public or private projects, addressing the following: 1. Data strategy and outcome realization 2. Data integration and governance 3. Data products teams and operating models 4. Curating both structured and unstructured data for use with Artificial Intelligence (AI) /Machine learning (ML) solutions to provide insights

6.4.3.6 Approach to Organizational Innovations

Table 6-29: Project to Product Management

Req #	Type	Requirement
6.4-19	Mandatory Scorable	The Bidder shall define their approach to implementing a shift from a Project to Product orientation on CalHEERS. The Bidder shall address how they will transition the State to a product focus to produce improved products that better serve future consumers. Bidders should address the following: 1. The strategy for transitioning CalHEERS from project to product management 2. Identification and tracking of key product metrics 3. Proposed product strategies that align with business goals 4. Proposed CalHEERS development methodology improvements 5. Proposed CalHEERS organization structure improvements 6. Proposed improvements to CalHEERS product vision 7. Process for streamlining project documentation 8. How the project will meet State regulatory requirements 9. How sponsor Product Owners will be integrated into the product management process Additionally, the bidder shall demonstrate how they facilitated similar OCM changes, including multiple State and Federal requirements, on a previous project, involving a Large and Complex IT System, specifying any specialized staffing skillsets or experience they utilized, the approach employed, and outcomes obtained.

6.4.4 Understanding and Approach to Operations Requirements

As described in RFP Section 4, PROPOSED SYSTEM, the State seeks a Bidder that has knowledgeable and skilled Staff who can improve upon current processes and services at CalHEERS by leveraging tools, technologies, and best practices. The State is looking for improvements in services such as system maintenance, service desk, technical change management, and system usability (including consumers). When responding to the requirements within this Section, bidders shall consider that the State is seeking solution options and efficient processes that provide the ability to determine best value.

Table 6-30: Understanding and Approach to Operations Requirement

Req #	Type	Requirement
6.4-20	Mandatory Pass / Fail	The bidder shall submit their response to the Understanding and Approach to Operations requirements within this Section. The bidder's narrative response shall not exceed 30 single-sided pages or 15 double-sided pages, with a minimum of 11 pt. font size. If the requirement specifically calls for the submission of an alternate product (e.g., Figure or Diagram) they will not be counted against the narrative response page count for the Section.

6.4.4.1 Approach to Improving Service Center Services

Table 6-31: Service Center Services

Req #	Type	Requirement
6.4-21	Mandatory Scorable	The bidder shall provide their approach to providing CalHEERS with a cost-effective Service Center, as defined within SOW Section 6.19, SERVICE CENTER SERVICES, which conforms to ITIL Service Desk function best practices and address the following: 1. How the bidder's approach will increase the level of support currently provided by leveraging available technology solutions (e.g., self-services, AI, mobile applications). 2. How the bidder's service center approach will provide the best value to the State, support the ITIL Service Desk function, and will improve responsiveness to CalHEERS end users, consumers, and business/interface partners. 3. Approach to addressing the seasonal peaks and valleys of service center needs. 4. Identify a previous project, preferably an M&O project, where the bidder provided service center services with a similar approach, describing the solutions used and how customer satisfaction was improved while reducing operational costs.

6.4.4.2 Approach to Data & Analytics Services

Table 6-32: Data & Analytics Support Services

Req #	Type	Requirement
6.4-22	Mandatory Scorable	The bidder shall provide their approach to supporting the CalHEERS Data & Analytics, as discussed in SOW Section 5.13 – DATA & ANALYTICS SUPPORT SERVICES, providing support throughout the data and analytics development lifecycle. Please address the following within your approach: 1. Data and analytics program 2. Data platform 3. Data & Analytics development 4. Advanced analytics & data science The bidder shall demonstrate how they successfully implemented a similar approach, including data management strategies and techniques, to drive decisions that led to positive outcomes on either public or private projects, addressing: 1. Outcome realization 2. Data integration and governance 3. Data products teams and operating models

6.4.4.3 Approach to Operations Reporting, Data & Analytics

Table 6-33: Operations Reporting, Data & Analytics

Req #	Type	Requirement
6.4-23	Mandatory Scorable	The bidder shall provide their approach to providing CalHEERS with operations reporting, data & analytics, as defined within SOW Section 6.3 – OPERATIONS REPORTING, DATA, AND ANALYTICS, addressing the following: 1. How the bidder's approach will improve the functionality and reliability of the current CalHEERS data and analytics solution. 2. How the bidder's approach will provide the best value to the State. The bidder shall demonstrate how they successfully implemented a similar approach on previous projects where the bidder provided operations data and analytics, preferably an M&O project, describing the solutions used and how customer satisfaction was improved while reducing operational costs.

6.4.5 Understanding and Approach to Transition-In Requirements

As described in RFP Section 4, PROPOSED SYSTEM, the State is seeking a bidder that can execute, and successfully take over the maintenance and operations of CalHEERS from the current CalHEERS M&O service provider.

The Bidder must provide a Transition-In Master Plan (TIMP) and Transition Work Plan that demonstrate that the Bidder has a general understanding of the current state, identifies clear vision of their post transition operational baseline, and describes a realistic and achievable approach to transition from the current state to the Bidder's proposed post transition operational baseline. Upon contract execution, the selected Bidder is required to update the TIMP. The State approved TIMP will be the governing document for Transition In.

The bidder approach to Transition-In must describe how the bidder will collaborate with the incumbent contractor to plan for and carry out transition activities. After Contract execution and upon receipt of the updated Contractor TIMP, the incumbent contractor is required to update (within 30 calendar days) their Project Closeout Plan to conform to the Contractor's TIMP. The bidder should anticipate a planning period during which the Contractor and incumbent contractor collaborate to adjust and align their two plans. Transition planning must consider the approach to transition the CalHEERS application including CalHEERS component subsystems and all other services and functions contained within the SOW.

The bidder must submit their response to the Understanding and Approach requirements for Transition In within this Section, which correlates with SOW Section 7, TRANSITION REQUIREMENTS. When responding to the requirements within this Section, Bidders shall consider that the State is seeking solution options and efficient processes that provide the ability to determine best value.

Table 6-34: Understanding & Approach to Transition-In Requirements

Req #	Type	Requirement
6.4-24	Mandatory Pass / Fail	The bidder shall submit their response to the Understanding and Approach to Transition-In requirements within this Section. The bidder's narrative response shall not exceed 50 single-sided pages or twenty 25 double-sided pages, with a minimum of 11 pt. font size. If the requirement specifically calls for the submission of an alternate product (e.g., Figure or Diagram, Master Plan, or Work Plan) they will not be counted against the narrative response page count for the Section.

6.4.5.1 Approach to the Transition-In Master Plan (TIMP)

Table 6-35: Transition-In Master Plan (TIMP) Requirements

Req #	Type	Requirement
6.4-25	Mandatory Scorable	The bidder shall submit with their response a Transition-In Master Plan (TIMP). Considering SOW Section 7, TRANSITION REQUIREMENTS, requirements 7.1.1-01 through 7.1.1-33 for context, the bidder shall define within the TIMP the bidder's approach to transitioning all CalHEERS components and SDMO responsibilities, as defined within this RFP, and the documents in the Bidders' Library. The bidder's approach shall contain the following: 1. Description of the overall transition approach and process the bidder will use to transition all components identified in the four (4) Transition Areas detailed within RFP SOW Sections 3, 4, 5 and 6. The transition approach shall include the bidder activities to plan, execute, verify, cutover, implement initial operations and conduct the final review (refer to SOW Section 7.1.9, TIP1 SERVICE AND FUNCTION MIGRATION), along with assumptions and constraints that are inherent with the proposed approach. 2. Description of the bidder's rationale for selecting this approach. 3. The bidder's planned transition activities and tasks that include the planning, implementing, executing, tracking, and reporting for the overall transition effort as well as for each transition component. 4. Roles and responsibilities for implementing transition activities to include those for the State and incumbent contractor. For context in developing a response, 20 State subject matter experts from the DHCS and Covered California Program and State Project Office are available for fifteen percent (15%) of their working time for issue resolution and coordination of state and county activities required to support the transition. 5. Description of how the bidder will collaborate with the incumbent contractor to plan for and carry out transition activities as well as what the bidder requires of the incumbent contractor regarding knowledge transfer, data/information, and support for mitigating risk. 6. Identification of the steps and activities the bidder will take to confirm their Key Staff are ready for assumption of Operations. 7. The bidder's approach to transition training and knowledge transfer to include: a. What knowledge transfer activities the Contractor requires to obtain knowledge from the incumbent Contractor; and b. What training the Contractor will provide State staff and CalHEERS users related to transition activities/tools and any changes to how services and functionality will be delivered. 8. The bidder's approach to conduct transition component readiness reviews to obtain approval for cutover that includes stakeholder involvement.

6.4.5.2 Approach to the Transition-In Schedule

Table 6-36: Transition-In Microsoft Project (MS Project) Plan Requirements

Req #	Type	Requirement
6.4-26	Mandatory Scorable	The bidder shall develop and submit with their response a Microsoft Project

Req #	Type	Requirement
		2019 or later “.mpp” file containing an intermediate transition work plan, showing schedule activity durations, dependencies and milestones for the transition-in and transformation period. The work plan shall be in accordance with SOW Section 7.1.7, TIP1 WORK PLAN (SCHEDULE), and SOW Section 7.2.4, TIP2 PROJECT WORK PLAN UPDATES, and consist of the following: 1. A CalHEERS SDMO Contract Execution software milestone task with a finish date equal to the “Contract Execution” date specified in RFP SECTION 1.4, KEY ACTION DATES AND TIMES. 2. A CalHEERS SDMO Migration Completed software milestone task with a finish date defined that will support bidder approach to transition. 3. A subproject summary task (WBS Outline Structure level 1) for each SOW Section 3, 4, 5, 6, 7 and 8. 4. Milestone summary tasks (WBS Outline Structure level 2) corresponding to the components of SOW Sections 3.1 – 3.17 and placed subordinate to the SOW Section 3 subproject summary task. 5. Milestone summary tasks (WBS Outline Structure level 2) corresponding to the components of SOW Sections 4.1 – 4.9 and placed subordinate to the SOW Section 4 subproject summary task. 6. Milestone summary tasks (WBS Outline Structure level 2) corresponding to the components of SOW Sections 5.1 – 5.20 and placed subordinate to the SOW Section 5 subproject summary task. 7. Milestone summary tasks (WBS Outline Structure level 2) corresponding to the components of SOW Sections 6.1 – 6.20 and placed subordinate to the SOW Section 6 subproject summary task. 8. Milestone summary task (WBS Outline Structure level 2) corresponding to the component of SOW Section 7.1 – 7.4 and placed subordinate to the SOW Section 7 subproject summary task. 9. Milestone summary tasks (WBS Outline Structure level 2) corresponding to the deliverable groupings identified in SOW Sections: 8.7, 8.8, 8.9, 8.10, 8.11, and 8.13 and placed subordinate to the SOW Section 8 subproject summary task. 10. Deliverable summary tasks (WBS Outline Structure level 3) for each SOW Section 3, 4, 5, 6, 7.1 and 7.2 milestone summary task representing the planning, execution, assessment, cutover, initial operations and final review required to migrate the component services, functions and maintenance and operations responsibilities to the Contractor, followed by transformation. 11. Deliverable summary tasks (WBS Outline Structure level 3) for each deliverable grouping milestone summary task, representing each deliverable listed in SOW Sections: 8.7, 8.8, 8.9, 8.10, 8.11, and 8.13. 12. Activity (WBS Outline Structure level 4) summary tasks for all deliverable summary tasks. 13. Tasks (WBS Outline Structure level 5) for all activity summary tasks, representing the Contractor, state, and incumbent contractor work required to complete the activity. 14. Task durations (in whole Days or percentage of a Day),

Req #	Type	Requirement
		dependencies (finish-to-start, start-to-start or finish-to-finish) and resource assignments (Contractor, state, and incumbent Contractor resources) for all tasks. 15. Milestones, deliverables, activities and tasks with start and finish dates that are consistent with high-level milestones included in the Transition-In Master Plan (TIMP). 16. Project critical path comprising all tasks with total slack of three (3) Business days or less including tasks from component migration planning, execution, assessment, cutover, initial operations and final review and the CALHEERS SDMO Migration Completed software milestone task. 17. Summary task names that are unique and descriptive. 18. Task names that are unique and descriptive and begin with the abbreviation of the organization primarily responsible for completing the task.
6.4-27	Mandatory Scorable	The bidder shall provide supporting narrative in relation to the intermediate transition-in work plan that describes the following: 1. Why the proposed schedule is realistic and achievable. 2. How the schedule minimizes transition risk (e.g., number of dependencies between transition components, phased transition, minimal bottlenecks as measured by State resources demands, use of checkpoints, handling delays). 3. How the schedule plans out transformation.

6.4.5.3 Approach to Minimizing Transition-In Risks

Table 6-37: Approach to Minimize Transition-In Risks

Req #	Type	Requirement
6.4-28	Mandatory Scorable	The bidder shall describe their approach to minimizing the transition-in risks associated with the following Statement of Work (SOW) sections: 1. SOW Section 3 – Project Management Requirements 2. SOW Section 4 – System Change & Enhancements Requirements 3. SOW Section 5 –Program Support Requirements 4. SOW Section 6 – Operations Requirements For each of the SOW sections above, the bidder shall: • Identify the associated risks, the mitigation approaches with rationale for their selection to ensure no disruption to CalHEERS services • Identify what the bidder requires of the incumbent contractor regarding knowledge transfer, data/information support and staff. • Identify what steps the bidder will take to ensure key staff are ready to assume operational control at the end of the Transition-In period.

6.5 MANDATORY/OPTIONAL REQUIREMENTS

The bidder's narrative response to the requirements within this section shall not exceed thirty-two (32) single-sided pages or sixteen (16) double-sided pages, with a minimum of 11 pt. font size. If the requirement specifically calls for the submission of an alternate product (e.g., Resource Staffing Chart or organizational chart) they will not be counted against the narrative response page count for the section.

The requirements within this section are designated as Mandatory Optional (M/O), which means that it is “mandatory” for the bidder to respond to the requirement and the response will receive a score based on the scoring criteria defined in RFP Section 9, EVALUATION, however, it is “optional” whether the State will implement the proposed solution.

Table 6-38: Understanding & Approach Mandatory/Optional Requirements

Req #	Type	Requirement
6.5-1	Mandatory Pass / Fail	The bidder's narrative response to the Mandatory/Optional Requirements within this section shall not exceed 32 single-sided pages or 16 double-sided pages, with a minimum of 11 pt. font size. If the requirement specifically calls for the submission of an alternate product (e.g., Resource Staffing Chart or organizational chart) they will not be counted against the narrative response page count for the section.

6.5.1 Effort Driven Schedule Management

Table 6-39: Schedule Management Transformation Project (Mandatory/Optional)

Req #	Type	Requirement
6.5-2	Mandatory/ Optional	The bidder shall develop and provide the State with an analysis and cost estimate associated with implementing an effort-driven scheduling solution on CalHEERS. Bidders shall provide, within their response to each identified section, the following: 1. A detailed description of the proposed solution and the benefits it will provide to CalHEERS, such as resource balancing, more accurate schedules, etc. 1. A staffing plan for the effort 2. A schedule for solution development/implementation 3. The set of pre and post solution implementation metrics utilized to track the improved efficiency 4. A detailed cost estimate for each solution proposed including ongoing maintenance of the solution The State will consider the Bidder's proposed solutions and associated costs for inclusion in the Contract.

6.5.2 Operationalized Service Enhancements

Table 6-40: Operationalized Service Enhancements (Mandatory/Optional)

Req #	Type	Requirement
6.5-3	Mandatory/ Optional	The bidder shall develop and provide the State with an analysis and cost estimate associated with the implementing solution enhancements, where applicable, for each of the Operationalized Services identified in SOW 5 – PROGRAM SUPPORT REQUIREMENTS, Sections 5.1 through 5.14. Bidders shall provide, within their response to each identified section, the following: 1. A detailed description of the proposed solution and how it will make the service more efficient 2. A staffing plan for the effort 3. A schedule for solution development/implementation 4. The set of pre and post solution implementation metrics utilized to track the improved efficiency 5. A detailed cost estimate for each solution proposed including ongoing maintenance

Req #	Type	Requirement
		The State will consider the Bidder's proposed solutions and associated costs for inclusion in the Contract.

6.6 COST REQUIREMENTS

Table 6-41: Cost Requirements

Req #	Type	Requirement
6.6-1	Mandatory Pass / Fail	Bidders shall develop and submit Appendix D, COST WORKBOOK, in accordance with the instructions provided within RFP Section 7, COST, as well as, within Appendix D, COST WORKBOOK, and in the format and packaging defined within RFP Section 8, PROPOSAL FORMAT.

7 COST

7.1 INTRODUCTION

Cost, from an evaluation perspective, is weighted at 35% of the total points for this solicitation. The evaluation of cost will be conducted based on the methodology and processes identified within RFP Section 9, EVALUATION.

The bidder must fill out the Appendix D, COST WORKBOOK, entering in all project costs, in accordance with the instructions provided within the RFP and cost workbook, to and subsequently determine the total proposal amount and the total proposed Contract amount. The bidder must not change any formulas in Appendix D, COST WORKBOOK. Proposed costs for all line items are all inclusive, thereby including the cost of any and all services required in this solicitation.

The Office of Technology and Solutions Integration (OTSI) requires that each bidder's cost be in the format outlined in this section. Bidders are advised that failure to comply with the instructions listed in this section, such as submission of incomplete proposals or use of alternative pricing structures or different formats than the one requested, may result in the proposal being deemed nonresponsive, leading to the bidder being disqualified.

7.2 COST WORKSHEETS

The cost worksheets list all cost items required to maintain and operate the proposed services. Cells highlighted in Yellow, indicate the cells which the bidder may enter information.

The bidder is required to complete all of the cost worksheets, even if there are no costs for the item indicated on the worksheets. In these instances the bidder must indicate the cost as a zero (\$0.00). In addition, if any character other than a numeral is used (e.g., a dash), the State will assume the cost of the item to be zero (\$0.00). All other fields must not be modified. If a cost worksheet is modified or the State determines that the bidder has not provided all the required cost data, the State may deem the proposal nonresponsive and disqualify the bidder.

The State has populated some of the cost workbook cells with formulas, however it is the responsibility of the bidder to ensure the worksheets accurately convey the bidders cost data. If the bidder questions whether a formula or calculation is working properly within the cost workbook, the bidder may request clarification by submitting questions via our SharePoint site. At the sole discretion of the State, questions submitted beyond the last day to submit questions may not be answered.

The State will not assume responsibility for any cost figures that do not calculate properly.

Below is a list of the individual cost worksheets:

- Appendix D-1 TOTAL COST SUMMARY
- Appendix D-2 SDMO HARDWARE COSTS
- Appendix D-3 SDMO SOFTWARE COSTS AND SERVICE CENTER SOFTWARE COSTS
- Appendix D-4 CLOUD HOSTING DATA CENTER SERVICES COSTS AND SERVICE CENTER CLOUD HOSTING DATA CENTER SERVICES COSTS
- Appendix D-5 SDMO FIXED PRICE ONSHORE COSTS
- Appendix D-5.1 SDMO FIXED PRICE ONSHORE COSTS (YEAR 1)
- Appendix D-5.2 SDMO FIXED PRICE ONSHORE-PROJECT SUPPORT SERVICES COSTS
- Appendix D-5.3 SDMO FIXED PRICE ONSHORE-PROJECT SUPPORT SERVICES COSTS (YEAR 1)
- Appendix D-5.4 SDMO FIXED PRICE OFFSHORE COSTS
- Appendix D-5.5 SDMO FIXED PRICE OFFSHORE COSTS (YEAR 1)
- Appendix D-5.6 SDMO FIXED PRICE OFFSHORE-PROJECT SUPPORT SERVICES COSTS
- Appendix D-5.7 SDMO FIXED PRICE OFFSHORE-PROJECT SUPPORT SERVICES COSTS (YEAR 1)
- Appendix D-6 TRANSACTION-BASED COSTS
- Appendix D-7 ONSHORE SYSTEM CHANGE COSTS
- Appendix D-7.1 ONSHORE SYSTEM CHANGE COSTS RATES
- Appendix D-7.2 OFFSHORE SYSTEM CHANGE COSTS
- Appendix D-7.3 OFFSHORE SYSTEM CHANGE COSTS RATES
- Appendix D-8. TRANSITION-IN COSTS
- Appendix D-8.1 TRANSITION-IN PAYMENT
- Appendix D-8.2 TRANSITION-OUT COSTS
- Appendix D-8.3 TRANSITION-OUT PAYMENT

7.3 ~~APPENDIX D-8.3 TRANSITION-OUT PAYMENT~~ COST DETAIL FORMAT AND REQUIREMENTS

The bidder must complete Appendix D, COST WORKBOOK, and submit with the bidder's Proposal in accordance with the format and instructions identified in RFP Section 8, PROPOSAL FORMAT.

7.4 COST OPENING

No public cost opening is planned for this solicitation.

7.5 COST EVALUATION

Cost proposals will be evaluated and scored in accordance with the process set forth in RFP Section 9, EVALUATION.

Section 8 Proposal Format

8 PROPOSAL FORMAT

This section of the Request for Proposal (RFP) presents information on the format the bidder's response needs to adhere to. Refer to RFP Section 2.3.4, SUBMISSION OF PROPOSALS, for additional information. Refer to RFP Section 6.4, UNDERSTANDING AND APPROACH REQUIREMENTS, for specific page count limits.

8.1 INTRODUCTION

These instructions prescribe the mandatory format of the proposal and approach for the development and presentation of proposal data. Format instructions must be adhered to, all requirements and questions in the RFP must be responded to, and all requested data must be supplied.

8.2 PROPOSAL CONTENT

The complete Proposal must be submitted in the number of copies indicated and include the items identified in the subsections below. Please submit the volumes for the Proposal as follows:

Volume Title
Volume I – Response to Administrative and Bidder Requirements
Volume II – Completed Contract
Volume III – Cost Data

For each volume, the bidder must submit one (1) hard copy in a three-ring binder and one (1) electronic copy in PDF format via email (see RFP Section 2.3.4, SUBMISSION OF PROPOSALS for the email address). Pertaining to the binder, the one (1) copy must be marked as "Master".

8.3 VOLUME I – RESPONSE TO ADMINISTRATIVE AND BIDDER REQUIREMENTS

The bidder must ensure that Volume I includes the following:

- Volume I must contain all responses to the RFP Section 5, ADMINISTRATIVE REQUIREMENTS
- Volume I must contain all responses to the RFP Section 6, BIDDER REQUIREMENTS.
- Volume I must include all completed Appendix B forms and questionnaires, as identified within Appendix B-2, PROPOSAL SUBMISSION CHECKLIST.
- Volume I shall be organized in accordance with the structure below and include the contents defined within the PROPOSAL SUBMISSION CHECKLIST FORM found in Appendix B.
- No cost data shall be submitted within Volume I.

8.3.1 Table of Contents

Volume I must contain a Table of Contents identifying information to the fourth outline or heading level to include page numbers. All tables, exhibits, and forms must also be listed in a Table of Tables and/or Table of Figures.

8.3.2 Section 1 – Cover Letter and Executive Summary

The Cover Letter and Executive Summary section must contain the following:

- Section 1.1 – Cover Letter (original signed)

- **Section 1.2 – Executive Summary**

The Cover Letter and Executive Summary must be developed in accordance with the requirements presented in RFP Section 5.13.1, COVER LETTER AND EXECUTIVE SUMMARY.

No cost data shall be included in the Cover Letter or Executive Summary.

The primary objective of the Executive Summary is to provide an overview of the key points in the proposal for the State. The Executive Summary must include salient and significant points and minimize the use of highly technical terms.

8.3.3 Section 2 – Administrative Response

This section of the bidder's proposal must include the following forms (in the order shown below), which are found in Appendix B, as well as the required Letter of Bondability.

- Section 2.1 - Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM
- Section 2.2 - Appendix B-7, WORKERS' COMPENSATION CERTIFICATION FORM
- Section 2.3 - Appendix B-8, GSPD-05-105 BIDDER DECLARATION FORM
- Section 2.4 - Appendix B-9, STD 843 DISABLED VETERAN BUSINESS ENTERPRISE (DVBE) DECLARATIONS FORM
- Section 2.5 - Appendix B-10, BIDDING PREFERENCES AND INCENTIVES FORM
- Section 2.6 - Appendix B-11, COMMERCIALLY USEFUL FUNCTION (CUF) CERTIFICATION FORM
- Section 2.7 - Appendix B-12, SECRETARY OF STATE CERTIFICATION
- Section 2.8 - Appendix B-13, SELLER'S PERMIT
- Section 2.9 - Appendix B-14, PAYEE DATA RECORD
- Section 2.10 - Appendix B-15, IRAN CONTRACTING ACT OF 2010
- Section 2.11 - Appendix B-16, FEDERAL DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY EXCLUSION – CERTIFICATION FORM
- Section 2.12 - Appendix B-17, CALIFORNIA CIVIL RIGHTS LAWS CERTIFICATION
- Section 2.13 – LETTER OF BONDABILITY
- Section 2.14 – Appendix B-24, CALHEERS ARTIFICIAL INTELLIGENCE RISK ASSESSMENT FORM

8.3.4 Section 3 – Bidder Response

This section of the bidder's proposal must contain the bidder's completed Appendix B-18, STATEMENT OF COMPLIANCE WITH SOW REQUIREMENTS, and the bidders' mandatory responses to RFP Section 6, BIDDER REQUIREMENTS. The bidder must, where applicable, reference the requirement by number, to which it is responding and then provide its response.

- Section 3.1 – Appendix B-18, STATEMENT OF COMPLIANCE WITH SOW REQUIREMENTS FORM
- Section 3.2 – Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM(s)
 - o Section 3.2.1 – Appendix B-20, BIDDER (COMPANY) REFERENCE FORMs
- Section 3.3 – Appendix B-22, KEY STAFF QUALIFICATIONS FORM(s), including required certifications.
 - o Section 3.3.1 – Appendix B-23, STAFF REFERENCE FORM(s)

- Section 3.4 – RESPONSE TO UNDERSTANDING AND APPROACH TO PROJECT MANAGEMENT REQUIREMENTS
 - o Section 3.4.1 – RESPONSE TO APPROACH TO STRATEGIC PLANNING
 - Section 3.4.1.1 – Requirement 6.4-2
 - o Section 3.4.2 – RESPONSE TO APPROACH TO POLICY AND LEGISLATIVE IMPACT ANALYSIS AND CHANGE SUPPORT
 - Section 3.4.2.1 – Requirement 6.4-3
 - o Section 3.4.3 – RESPONSE TO TOTAL COST OF OWNERSHIP (TCO) METHODOLOGY
 - Section 3.4.3.1 – Requirement 6.4-4
 - o Section 3.4.4 – RESPONSE TO MANAGEMENT OF HARDWARE, SOFTWARE & CLOUD HOSTING SERVICES
 - Section 3.4.4.1 – Requirement 6.4-5
- Section 3.5 – RESPONSE TO UNDERSTANDING AND APPROACH TO SYSTEM CHANGE & ENHANCEMENTS REQUIREMENTS
 - o Section 3.5.1 – RESPONSE TO APPROACH TO TIMELY SYSTEM CHANGES & ENHANCEMENTS
 - Section 3.5.1.1 – Requirement 6.4-7
 - Section 3.5.1.2 – Requirement 6.4-8
 - Section 3.5.1.3 – Requirement 6.4-9
 - Section 3.5.1.4 – Requirement 6.4-10
- Section 3.6 – RESPONSE TO UNDERSTANDING AND APPROACH TO OPERATIONALIZED PROGRAM SUPPORT REQUIREMENTS
 - o Section 3.6.1 – RESPONSE TO APPROACH TO PROGRAM SUPPORT PLANNING
 - Section 3.6.1.1 – Requirement 6.4-12
 - o Section 3.6.2 – RESPONSE TO APPROACH TO OPERATIONALIZING ANNUAL PROCESSES
 - Section 3.6.2.1 – Requirement 6.4-13
 - o Section 3.6.3 – RESPONSE TO APPROACH TO GENERAL INNOVATIONS
 - Section 3.6.3.1 – Requirement 6.4-14
 - o Section 3.6.4 – RESPONSE TO APPROACH TO CONSUMER JOURNEY & EXPERIENCE INNOVATIONS
 - Section 3.6.4.1 – Requirement 6.4-15
 - Section 3.6.4.2 – Requirement 6.4-16
 - o Section 3.6.5 – RESPONSE TO APPROACH TO OUTCOME REALIZATION
 - Section 3.6.5.1 – Requirement 6.4-17
 - Section 3.6.5.2 – Requirement 6.4-18
 - o Section 3.6.6 – RESPONSE TO APPROACH TO ORGANIZATIONAL INNOVATIONS
 - Section 3.6.6.1 – Requirement 6.4-19
- Section 3.7 – RESPONSE TO APPROACH TO UNDERSTANDING AND APPROACH TO OPERATIONS REQUIREMENTS
 - o Section 3.7.1 – RESPONSE TO APPROACH TO IMPROVING SERVICE CENTER SERVICES
 - Section 3.7.1.1 – Requirement 6.4-21
 - o Section 3.7.2 – RESPONSE TO APPROACH TO DATA & ANALYTICS SERVICES
 - Section 3.7.2.1 – Requirement 6.4-22

- o Section 3.7.3 – RESPONSE TO APPROACH TO OPERATIONS REPORTING, DATA & ANALYTICS
 - Section 3.7.3.1 – Requirement 6.4-23
- Section 3.8 – RESPONSE TO UNDERSTANDING AND APPROACH TO TRANSITION-IN REQUIREMENTS
 - o Section 3.8.1 – RESPONSE TO APPROACH TO THE TRANSITION-IN MASTER PLAN (TIMP)
 - Section 3.8.1.1 – Requirement 6.4-25
 - o Section 3.8.2 – RESPONSE TO APPROACH TO THE TRANSITION-IN SCHEDULE
 - Section 3.8.2.1 – Requirement 6.4-26
 - Section 3.8.2.2 – Requirement 6.4-27
 - o Section 3.8.3 – RESPONSE TO APPROACH TO MINIMIZING TRANSITION-IN RISKS
 - Section 3.8.3.1 – Requirement 6.4-28
- Section 3.9 – RESPONSE TO UNDERSTANDING AND APPROACH TO MANADATORY/OPTIONAL REQUIREMENTS
 - o Section 3.9.1 – RESPONSE TO APPROACH TO EFFORT DRIVEN SCHEDULE MANAGEMENT
 - Section 3.9.1.1 – Requirement 6.5-2
 - o Section 3.9.2 – RESPONSE TO APPROACH TO OPERATIONALIZED SERVICE ENHANCEMENTS
 - Section 3.9.2.1 – Requirement 6.5-3

8.4 VOLUME II – COMPLETED CONTRACT

Volume II must be composed in the following order:

- Section 1 – Appendix A, STD 213 IT STANDARD AGREEMENT
- Section 2 – Appendix A-1, GENERAL PROVISIONS – INFORMATION TECHNOLOGY
- Section 3 – Appendix A-2, SPECIAL PROVISIONS FOR CALHEERS SDMO CONTRACT #73040873
- Section 4 – Appendix A-3, SDMO ADDITIONAL FEDERAL PROVISIONS
- Section 5 – Appendix A-4, STATEMENT OF WORK

8.5 VOLUME III – COST DATA

The Cost Data component of the bidder's proposal must be submitted in Volume III, containing both a completed Appendix D, COST WORKBOOK and any necessary Additional Cost Data documentation.

Volume III must be composed in the following order:

- Section 1 – Completed Appendix D, COST WORKBOOK.
- Section 2 – Additional Cost Data
 - o [Subsection 2.1 – Cost Details related to the Cost Workbook](#)
 - o [Subsection 2.2 – Cost Details related to U&A Requirements 6.5-2 & 6.5-3](#)

8.6 ADDITIONAL FORMAT AND SUBMISSION INSTRUCTIONS

It is the bidder's responsibility to ensure its proposal is submitted in a manner that enables the Evaluation Team to easily locate all response descriptions and exhibits for each requirement of this RFP.

8.6.1 Documentation Formatting Standards

The following general format guidelines apply to bidder's physical and electronic proposal:

- Ensure the Proposal is marked with "CalHEERS System Development, Maintenance and Operations (OTSI CalHEERS SDMO RFP # 73040873)."
- Include the bidder's name on and in the proposal.
- Page number and total number of pages.
- Page numbering should be located in the same page position, listed by Proposal section, and include reference to the total number of pages for that section (e.g., Section 1, Page 1 of 10).
- Bidders shall use of Arial, eleven (11) point font for response body text and Arial, ten (10) point font for table text.
- Figure and exhibit font size shall be eight (8) point or larger.
- Margins shall be one (1) inch on the top, bottom, left, and right.
- Pages, other than foldouts, shall not exceed 8 ½ by 11 inches.
- Foldouts shall be limited to a size no larger than 11 by 17 inches.
- If presenting demographic data as examples, generic names and addresses must be used (e.g., 123 Standard Avenue, Any town, USA).
- Figures, tables, and charts shall be assigned index numbers, be referenced by these numbers in the content, and in the Table of Figures and Table of Tables. Figures, tables, and charts should be placed as close to text references as possible.

8.6.2 Physical Proposal Binding and Tabs

All proposals must be submitted using three-ring binders to protect the document.

Each Volume must be delivered in its own binder with tabs clearly marking the delineation between Volume sections.

For Volume I, Section 3, BIDDER RESPONSE, bidders should provide tabs down to the subsection level (e.g., 3.1– Appendix B-18).

8.6.3 Electronic Proposal Format and Searchability

All electronic proposals must be submitted as [detailed below](#):

- [Volume I – Response to Administrative and Bidder Requirements](#)
 - o [Searchable PDFs with bookmarks for each delineating each Volume section and each Table of Contents \(TOC\) item. "Image-only" PDFs will not be accepted.](#)
 - o [MS Word file](#)
- [Volume II – Completed Contract](#)
 - o [Searchable PDF with bookmarks delineating each section and each TOC item. "Image-only" PDFs will not be accepted.](#)
 - o [MS Word file](#)
- [Volume III – Cost Data](#)
 - o [Searchable PDF with bookmarks delineating each section and each TOC item. "Image-only" PDFs will not be accepted.](#)
 - o [MS Word file of the Section 2 – Additional Cost Data](#)

- o ~~“Image-only” PDFs will not be accepted.~~ MS Excel file of the complete Appendix D, Cost Workbook

8.6.4 Master Copy

The bidder must provide one (1) printed master hardcopy of each of its volumes, clearly labeled “Master”.

The Master must include original signatures on any included cover letters and forms.

The bidder must ensure that no cost information of any type is included in Volume I and II. The inclusion of cost in any fashion or format in any place other than Volume III, Cost Data, may result in the proposal being deemed nonresponsive.

In the event that there are any discrepancies between the “Master” or any “Copy” of the same document or between a printed copy and the electronic copy, the printed “Master” will be used as the authoritative version to resolve such discrepancies.

8.6.5 Confidential or Proprietary Information

Per RFP Section 2.3.3, CONFIDENTIALITY, the bidder’s proposal must not include information marked as confidential or proprietary in order to assure it is not excluded from consideration.

Any documentation or other artifacts provided in its proposal shall be subject to the California Public Records Act (Government Code § 7920, et seq.).

8.6.6 Packaging and Labeling

All documents for a proposal must be submitted at the same time: the hard copy must be submitted as one package and the electronic copy must be submitted as one email or a series of emails (see RFP Section 2.3.4.6, DELIVERY OF PROPOSALS EMAIL SUBMISSIONS for further information)

Bidders must provide their proposal documents within the same package (box or boxes).

The overall package shall be sealed, labeled, and properly identified as follows:

- Office of Technology & Solutions Integration (OTSI) Procurement Official Name
- OTSI Address
- The bidder’s company name and address
- The RFP number “OTSI CalHEERS SDMO RFP # 73040873”
- Box “# of #”, if the submission includes more than one (1) box.

Each copy of the proposal binder must be plainly marked with:

- The bidder’s company name
- The RFP number “OTSI CalHEERS RFP # 73040873”
- The Volume number and title as appropriate:
 - o Volume I – Response to Administrative and Bidder Requirements
 - o Volume II – Completed Contract
 - o Volume III – Cost Data
- Identification of the “Master” copy

8.6.7 Date, Time and Address of Submittals

The bidders must mail or deliver proposals to the Procurement Official listed in RFP Section 1.5, PROCUREMENT OFFICIAL AND CONTACT INFORMATION.

If bidders choose to mail their Proposals, it is suggested that bidders use certified or registered mail and request a return receipt, as delivery via mail is at the bidder's risk of untimely delivery or lost mail and is burdened by the bidder.

Proposals, both electronic and physical, must be postmarked or received no later than the date and time specified in RFP Section 1.4, KEY ACTION DATES AND TIMES, regardless of submission method.

A Proposal not received by the date and time specified in RFP Section 1.4, KEY ACTION DATES AND TIMES shall be rejected.

9.2 QUALIFICATION STEP (PASS / FAIL)

All of the following elements in the Qualification Step are pass/fail.

9.2.1 Administrative Compliance

9.2.1.1 Receipt of Proposals

All proposals received by the date and time specified in RFP Section 1.4, KEY ACTION DATES AND TIMES, will be acknowledged as having been received on time. Each proposal will be date and time marked as it is received and verified that it was submitted under an appropriate cover, sealed, properly identified, and is in conformance with the submittal requirements of RFP Section 8.6.6, PACKAGING AND LABELING. Any unsealed proposals will be rejected, causing the bidder to be disqualified.

9.2.1.2 Compliance Check

The State will check each proposal to determine its compliance to the RFP Section 8, PROPOSAL FORMAT, and RFP Section 2, RULES GOVERNING COMPETITION. If a proposal fails to meet a RFP requirement, the State will determine if the deviation is material as defined in RFP Section 2, RULES GOVERNING COMPETITION. A material deviation may be cause for rejection of the proposal, and disqualification of the bidder. A deviation deemed immaterial will be examined to determine if the deviation will be accepted. If accepted, the proposal will be processed as if no deviation had occurred.

9.2.1.3 Evaluation of Bidder Responses to Administrative Requirements

The State will evaluate all proposals against the administrative requirements, to ensure that the bidders responded to all the administrative requirements specified in RFP Section 5, ADMINISTRATIVE REQUIREMENTS. Please note that any points related to preferences or incentives will be applied in Section 9.5, APPLICATION OF PREFERENCES & INCENTIVES AND FINAL SCORE DETERMINATION. The requirements that are reviewed within the administrative evaluation are categorized as follows:

- Mandatory (M) – The bidder must indicate its willingness and ability to satisfy the mandatory requirement, or the proposal will be deemed nonresponsive, and the bidder disqualified. These requirements are Pass / Fail and will not be scored.
- Optional (O) – The bidder may optionally respond (if applicable) to any administrative requirements that are labeled Optional (O) in RFP Section 5, ADMINISTRATIVE REQUIREMENTS.

The State will review bidder responses to Appendix B-6, RESPONSE TO ADMINISTRATIVE REQUIREMENTS FORM. The bidder must indicate its willingness and ability to satisfy all of the administrative requirements A1 through A52, as specified in RFP Section 5, ADMINISTRATIVE REQUIREMENTS, by responding with “Yes” in the “Yes/No” column of the form.

- Indicating “Yes” the bidder affirms its understanding of the requirement and agree to comply with it.
- Indicating “No” to any of the mandatory administrative requirements in the bidder’s proposal may result in the proposal being deemed nonresponsive and lead to the disqualification of the bidder.

The State will designate each administrative requirement with either a Pass or a Fail.

9.2.2 Evaluation of Bidder Responses to Bidder (Company) Qualification Requirements

The Evaluation Team will review the Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM, submitted with the bidder's proposal, and determine if the bidder has specified the experience necessary to meet each Company Mandatory Qualification (MQ) Requirements as specified within RFP Section 6.2.1, BIDDER (COMPANY) QUALIFICATION REQUIREMENTS.

The State will designate each Company MQ Requirement with either a Pass or a Fail. If the bidder is designated a Fail for any of the Company MQ Requirements, the proposal will be deemed to have failed the Qualification Step and the bidder will be disqualified.

9.2.3 Evaluation of Bidder (Company) Reference Forms

The Evaluation Team will review all of the Appendix B-20, BIDDER (COMPANY) REFERENCE FORMs, submitted within the bidder's proposal, as well as conduct references checks in order to determine if the information submitted on the bidder's Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM, is accurate, as well as identify if the bidder performed poorly on any of the referenced projects.

The State may contact references listed on the Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM, to verify the information provided by the bidder. The Procurement Official will make two (2) attempts via e-mail to validate the experience using the information provided in the submitted forms. If no response is received after the second attempt, the Procurement Official may contact the bidder and request the bidder to assist in having the reference respond. If the bidder is not able to provide a reference response, the State will determine if the deviation is material. If a deviation is determined to be material, the proposal will be considered nonresponsive, and the bidder will be disqualified.

Appendix B-20, BIDDER (COMPANY) REFERENCE FORMs will be evaluated using the ratings provided from the references. The evaluation criteria is shown below:

Table 9-1: Bidder (Company) Reference Evaluation Criteria

Bidder Reference Response	Description	Evaluation Criteria
Excellent	The company's performance was above average during this engagement.	Pass
Good	The company's performance was average during this engagement.	Pass
Poor	The company's performance was below average during this engagement.	Fail
No Value	The company's performance was unsatisfactory during this engagement.	Fail

Using the above criteria, the State will designate each bidder (company) reference with either a Pass or a Fail. A bidder who does not return all required reference forms, is found to have conflicting information in Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM, or obtained a reference score of Poor or No Value, will have its proposal deemed to Fail the Qualification Step and will be disqualified.

9.2.4 Evaluation of Bidder Key Staff Requirements

The Evaluation Team will review the submitted Appendix B-22, KEY STAFF QUALIFICATIONS FORM to ensure that all proposed Key Staff received, at a minimum, a "meets" designation related to each of the Key Staff Mandatory Qualification requirements identified within RFP Section 6.3.1,

BIDDER KEY STAFF QUALIFICATION REQUIREMENTS.

The State will designate each Key Staff Mandatory Qualification requirement with either a Pass or a Fail. If the bidder is designated a Fail for any of the Key Staff Mandatory Qualification requirements, the proposal will be deemed to have failed the Qualification Step and the bidder will be disqualified.

9.2.5 Evaluation of Bidder Key Staff Reference Requirement

The Evaluation Team will review all of the Appendix B-23, STAFF REFERENCE FORMs, submitted within the bidder's proposal, as well as conduct references checks in order to determine if the information submitted on the bidder's Appendix B-22, KEY STAFF QUALIFICATIONS FORM, is accurate. The Evaluation Team will also look to identify if bidder Key Staff performed poorly on any of the referenced projects.

The State may contact references listed on the Appendix B-22, KEY STAFF QUALIFICATIONS FORM, to verify the information provided by the bidder. The Procurement Official will make two (2) attempts via e-mail to validate the experience using the information provided in the submitted forms. If no response is received after the second attempt, the Procurement Official may contact the bidder and request the bidder's assistance in having the reference respond. If the bidder is not able to provide or prompt a reference response, the State will determine if the deviation is material. If a deviation is determined to be material, the proposal will be considered nonresponsive, and the bidder will be disqualified.

The Appendix B-23, STAFF REFERENCE FORMs will be evaluated using the ratings provided from the references. The evaluation criterion is shown below:

Table 9-2: Key Staff Reference Evaluation Criteria

Reference Responses	Description	Evaluation Criteria
Excellent	The performance and abilities of the Staff was above average during this engagement.	Pass
Good	The performance and abilities of the Staff was average during this engagement.	Pass
Poor	The performance and abilities of the Staff was below average during this engagement.	Fail
No Value	The performance and abilities of the Staff was unsatisfactory during this engagement.	Fail

Using the above criterion, the State will designate each Key Staff reference with either a Pass or a Fail. A bidder who does not return all required reference forms, is found to have conflicting information in Appendix B-19, BIDDER (COMPANY) QUALIFICATIONS INSTRUCTIONS & FORM, or obtained a reference score of Poor, or No Value, will have its proposal deemed to Fail the Qualification Step and will be disqualified.

9.3 TECHNICAL EVALUATION & SCORING (6,500 POINTS)

The requirements herein are categorized as Mandatory Scorable and must provide a response to each requirement in accordance with RFP Section 6.1.2, TECHNICAL REQUIREMENTS, and as shown in the figure below.

Figure 9-2: Bidder Requirements Traceability – Technical Evaluation (Scored)

The Evaluation Team will review the responses to the requirements and apply points. Not providing a response to any of the Mandatory Scorable requirements within the bidder's proposal will result in the proposal being deemed nonresponsive, and lead to the bidder being disqualified based on the criteria identified within this Section 9.3, TECHNICAL EVALUATION & SCORING (6,500 POINTS).

The table below identifies the breakout of the potential Six Thousand Five Hundred (6,500) points that will be awarded via the evaluation criteria described in the following paragraphs.

Table 9-3: Technical Evaluation Areas

RFP Reference	Technical Evaluation Area	Maximum Points
Key Staff Qualifications and References (1,000 points)		
Section 6.3.1	Bidder Key Staff Qualifications	800 points
Section 6.3.2	Bidder Key Staff References	200 points
Understanding and Approach Evaluation Scoring Criteria (5,500 points)		
Understanding and Approach to Project Management Requirements Scoring Criteria (825 points)		
Section 6.4.1.1	Approach to Strategic Planning	175 points
Section 6.4.1.2	Approach to Policy and Legislative Impact Analysis and Change Support	175 points
Section 6.4.1.3	Total Cost of Ownership (TCO) Methodology	250 points
Section 6.4.1.4	Approach to Management of Hardware, Software, and Cloud Hosting Services	225 points
Understanding and Approach to System Change & Enhancements Requirements Scoring Criteria (1,100 points)		
Section 6.4.2.1	Approach to Timely System Changes/Enhancements	1,100 points
Understanding and Approach to Program Support Requirements Scoring Criteria (1,375 points)		
Section 6.4.3.1	Approach to Program Support Planning	100 points
Section 6.4.3.2	Approach to Operationalizing Annual Processes	100 points
Section 6.4.3.3	Approach to General Innovations	100 points
Section 6.4.3.4	Approach to Consumer Journey & Experience Innovations	400 points
Section 6.4.3.5	Approach to Outcome Realization	450 points
Section 6.4.3.6	Approach to Organizational Innovations	225 points
Understanding and Approach to Operations Requirements Scoring Criteria (1,100 points)		
Section 6.4.4.1	Approach to Improving Service Center Services	375 points
Section 6.4.4.2	Approach to Data & Analytics Services	375 points
Section 6.4.4.3	Approach to Operations Reporting, Data & Analytics	350 points
Understanding and Approach to Transition-In Scoring Criteria (825 points)		
Section 6.4.5.1	Approach to the Transition-In Master Plan (TIMP)	325 points
Section 6.4.5.2	Approach to the Transition-In Schedule	300 points
Section 6.4.5.3	Approach to Minimizing Transition-In Risks	200 points
Understanding and Approach to Mandatory/Optional Requirements (275 points)		
Section 6.5.1	Effort Driven Schedule Management	150 points
Section 6.5.2	Operationalized Service Enhancements	125 points
	Subtotal	6,500 points

9.3.1 Key Staff Qualification Requirements (800 Points)

The Evaluation Team will review each proposal to determine compliance the Key Staff Mandatory or Desirable Qualification requirements identified within Section 6.3.1, BIDDER KEY STAFF QUALIFICATION REQUIREMENTS, using a consensus basis to evaluate and score the requirements.

A proposal that does not contain all of the required B-22, KEY STAFF QUALIFICATIONS FORMs, will be deemed nonresponsive, causing the bidder to be disqualified.

The State will evaluate bidder responses to the Key Staff Mandatory Qualification requirements and apply points only to Key Staff who are found to exceed the Key Staff Mandatory Qualification requirements. The Evaluation Team will review each bidder submitted Appendix B-22, KEY STAFF QUALIFICATIONS FORM, and determine if the experience provided exceeds each associated Key Staff Mandatory Qualification requirement. The State will award one (1) point for each additional year of experience, if applicable, above and beyond the duration required within each Key Staff

Mandatory Qualification, up to a maximum of five (5) points per Key Staff Mandatory Qualification requirement.

The State will also evaluate bidder responses to the Key Staff Desirable Qualification requirements and apply points to Key Staff who are found to meet or exceed these requirements. The Evaluation Team will review each bidder submitted Appendix B-22, KEY STAFF QUALIFICATIONS FORM, and award fifty percent (50%) of the available points, associated with the Desirable Qualification requirement, if the bidder is determined to have met the requirement. The Evaluation Team will award the other 50% of the available points, associated with the Desirable Qualification requirement, if the bidder is determined to have an additional year of the required experience, or more, above and beyond the duration required within each Key Staff Desirable Qualification requirement.

Table 9-4, Bidder Key Staff Mandatory & Desirable Qualification Requirement Scoring, identifies the scoring point values associated with each Mandatory and Desirable Qualification requirement.

Table 9-4: Bidder Key Staff Mandatory & Desirable Qualification Requirement Scoring

#	Key Staff	MQ#1 (Max)	MQ#2 (Max)	MQ#3 (Max)	MQ#4 (Max)	DQ#1 (Max)	DQ#2 (Max)	DQ#3 (Max)	Total Score Possible (TSP)	Adj. Scoring Conversion (Score/TSP) x Max	Max Score
1	Project Manager	(0 to 5)	(0 or 5)	5	n/a	(0 to 2)	2	n/a	19	(19/19) x 20 (Max)	20
2	Deputy Project Manager	5	5	(0 or 5)	n/a	(0, 2 or 4)	n/a	n/a	19	(19/19) x 20 (Max)	20
3	Technical Manager	5	5	5	n/a	2	2	n/a	19	(19/19) x 20 (Max)	20
4	Project Management Office (PMO) Manager	5	5	(0 or 5)	n/a	4	n/a	n/a	19	(19/19) x 20 (Max)	20
5	Schedule Management Lead	5	5	(0 or 5)	n/a	4	n/a	n/a	19	(19/19) x 20 (Max)	20
6	Operations Manager	5	5	5	n/a	2	2	2	21	(21/21) x 20 (Max)	20
7	Applications Maintenance Manager	5	5	5	n/a	2	2	2	21	(21/21) x 20 (Max)	20
8	Enterprise Architect	5	5	5	n/a	4	n/a	n/a	19	(19/19) x 20 (Max)	20
9	Release Manager	5	5	5	n/a	4	n/a	n/a	19	(19/19) x 20 (Max)	20
10	Transition Manager	5	5	5	n/a	4	n/a	n/a	19	(19/19) x 20 (Max)	20
11	Quality Assurance Manager	5	5	5	n/a	2	2	n/a	19	(19/19) x 20 (Max)	20
12	Agile Manager	5	5	n/a ⁵	n/a	4	n/a	n/a	~~19~~ 14	~~(19/19)~~ (14/14) x 20 (Max)	20
13	Data Scientist	5	5	5	5	4	n/a	n/a	24	(24/24) x 20 (Max)	20
14	Data Analytics Expert	5	5	5	n/a	2	2	n/a	19	(19/19) x 20 (Max)	20
15	Security Officer	5	5	(0 or 5)	n/a	4	n/a	n/a	19	(19/19) x 20 (Max)	20
16	Organizational Change Manager (OCM)	5	5	5	n/a	2	2	n/a	19	(19/19) x 20 (Max)	20
17	Consumer Experience Lead	5	5	5	n/a	4	n/a	n/a	19	(19/19) x 20 (Max)	20
Max Total:											340

Next, the Evaluation Team will sum the points across all Mandatory and Desirable Qualification requirements earned by the bidder's Key Staff, dividing the bidder's Key Staff score by the Key Staff score of the highest scoring bidder. The result will be a percentage, which is then multiplied by the total evaluation points associated with this area of the proposal, eight hundred (800) points, to obtain the number of evaluation points awarded to the bidder.

An example of the scoring methodology used within this area is provided within Table 9-5, Example of Bidder Key Staff Qualifications Scoring. Once the Evaluation Team has identified the scores of each of Bidder #3's proposed Key Staff, the team will sum up all of Bidder #3's proposed Key Staff score, which equals (319.94). The Evaluation team will then divide Bidder #3's score by the score of the highest scoring bidder, which in the example below is Bidder #2 (340 pts), which results in zero (.941). The result is then multiplied by the evaluation point value associated with this Section 9.3.1 of the RFP (800 pts) to obtain Bidder #3's awarded evaluation points (752.8 pts). As seen in the table below, Bidder #2 obtained (800 pts), the maximum number of points possible.

Table 9-5: Example Bidder Key Staff Qualifications Scoring

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	Total Score	D
Company Name	Project Manager	Deputy Project Director	Technical Manager	Project Management Office Manager	Schedule Management Lead	Operations Manager	Applications Maintenance Manager	Enterprise Architect	Release Manager	Transition Manager	Quality Assurance Manager	Agile Manager	Data Scientist	Data Analytics Expert	Security Officer	Organizational Change Manager	Consumer Experience Lead		Total Score – All Proposed Key Staff Up to 800 Points (Sum bidder Key Staff #1 - #17 scores) = Bidder score (Bidder score)/(Highest bidder score) x 800 = Column D
Bidder #1	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	[(0)/(340)] x 800 = 0 pts
Bidder #2	20	20	20	20	20	20	20	20	20	20	20	20	20	20	20	20	20	340	[(340)/(340)] x 800 = 800 pts
Bidder #3	15.79	17.89	20	15.79	16.19	16.19	18.09	20	20	20	20	20	20	20	20	20	20	319.94	[(319.94)/(340)] x 800 = 752.8 pts

9.3.2 Bidder Key Staff References (200 Points)

The evaluation team will use the submitted Appendix B-23, STAFF REFERENCE FORMs, to evaluate and score bidder Key Staff references.

The bidder must submit a separate Appendix B-23, STAFF REFERENCE FORM for each project cited to meet the Mandatory Qualification requirement or Desirable Qualification requirement on the associated Key Staff's Appendix B-22, KEY STAFF QUALIFICATIONS FORM. Each staff reference form must be signed by a client reference contact that performed either a managerial or supervisory role on the referenced project. If the client reference is not allowed either legally or by company policy to sign the reference form, the client reference must type in its full name with a brief statement on the form outlining the reason they are not permitted to sign the State's reference form.

Bidders who do not return an Appendix B-23, STAFF REFERENCE FORM, for each project cited to meet the Key Staff Mandatory Qualification requirements, will result in the proposal being deemed nonresponsive, causing the bidder to be disqualified. Additionally, if bidders do not return an Appendix B-23, STAFF REFERENCE FORM, associated with a Desirable Qualification requirement, for which the bidder submitted an Appendix B-22, KEY STAFF QUALIFICATIONS FORM, the State will not be able to evaluate and score the associated Desirable Qualification requirement.

The Procurement Official may contact the Key Staff References listed on the reference forms to verify the information submitted on the Appendix B-22, KEY STAFF QUALIFICATIONS FORM, as well as the ratings the Key Staff received from the Key Staff Reference. The Procurement Official will make two (2) attempts via e-mail to validate the experience using the information provided in the submitted forms. If no response is received after the second attempt, the Procurement Official will contact the bidder and request the bidder to assist in having the reference respond. If the bidder is not able to solicit a reference response, the State will determine if the deviation is material. If determined to be material, the proposal will be deemed nonresponsive, causing the bidder to be disqualified.

Any information found to be in conflict with the information provided by the Key Staff Reference and contains material deviations will result in the proposal being deemed nonresponsive and will lead to bidder disqualification.

Table 9-6: Key Staff Reference Evaluation Criteria

Evaluation Criteria	Description
Excellent = 2 points	The performance and abilities of the bidder's Staff were above average during this engagement.
Good = 1 point	The performance and abilities of the bidder's Staff were average during this engagement.
Poor , N/A or No Value = 0 points	The performance and abilities of the bidder's Staff were unsatisfactory during this engagement.

A proposal submitted with an Appendix B-23, STAFF REFERENCE FORM, associated with a Mandatory Qualification requirement, that received a Poor, No value, or N/A response to any of the reference questions may be deemed nonresponsive, causing the bidder to be disqualified.

Once the Evaluation Team reviews all of a bidder's submitted Appendix B-23, STAFF REFERENCE FORMs, and completed reference checks, the Evaluation Team will calculate the bidder's average score by totaling together the points from each bidder Staff reference form and dividing the total number of points by the number of Staff reference forms submitted by the bidder. Next, the bidder's average score will be divided by the average score of the highest scoring bidder. The resulting value will then be multiplied by the total available points for the area, two hundred (200) points, to determine the number of points each bidder will be awarded as a score.

For example, if three (3) Staff references are submitted by Bidder #1, each with a score of five (5), those numbers would be summed together to equal fifteen (15). That sum would then be divided by the number of references submitted, three (3), to get the bidder's average score of five (5). The result will then be divided by the highest average score, which for the example below would be ten ($10+10+10/3 = 10$), acquired by Bidder #2, resulting in 0.5 or a percentage of 50%. Finally, the Evaluation Team will take the result of 0.5 and multiply it by the two-hundred (200) maximum available points for the area to determine Bidder #1's score, ($0.5 \times 200 = 100$ points).

Table 9-7: Example of Key Staff Reference Evaluation

Company Name	A	B	C	D
	Key Staff Ref. # 1	Key Staff Ref. # 2	Key Staff Ref. # 3	Total Score - All Key Staff References (1-3) Up to 200 Points (Bidder average score)/(Highest average score) x 200 = Column D
Bidder # 1	5	5	5	$[(5+5+5/3 = 5)/(10+10+10/3 = 10)] \times 200 = 100$ pts
Bidder # 2	10	10	10	$[(10+10+10/3 = 10)/(10+10+10/3 = 10)] \times 200 = 200$ pts

9.3.3 Understanding and Approach Evaluation Scoring Criteria (5,500 points)

The following table provides the evaluation criteria that the State will use in its evaluation of bidder's responses to the Understanding and Approach Requirements, as identified within RFP Section 6.4, UNDERSTANDING AND APPROACH REQUIREMENTS, and RFP Section 6.5, MANDATORY/OPTIONAL REQUIREMENTS. The evaluation scoring criteria for each requirement are provided here, giving insight into how the bidders should develop its responses on the areas that are of the most interest to the State.

The bidder must provide a narrative response to the Understanding and Approach requirements.

The Evaluation Team will use a consensus basis to evaluate the bidder's response to the understanding and approach requirements.

Table 9-8: Understanding and Approach Criteria

Scoring Criteria	Points
All considerations of the component are addressed with the highest degree of confidence in the bidder's response.	100% of Max Points
The response addresses most of the component, with an above average degree of confidence.	75% of Max Points
The response somewhat addresses the component, with an average or nominal degree of confidence.	50% of Max Points
The response minimally addresses the component, with a below average or nominal degree of confidence.	25% of Max Points
The response fails to address the component, with a minimal degree of confidence.	No Points

9.4 COST EVALUATION & SCORING (3,500 POINTS)

This section covers the evaluation and scoring of the Cost Requirements that are defined in RFP Section 7, COST, and the Appendix D, COST WORKBOOK. The figure below identifies the traceability and scoring methodology applied to the cost requirements of this solicitation.

Figure 9-3: Cost Evaluation Approach

The table below identifies the allocation of potential points for each different cost component of the CalHEERS SDMO Services Contract, as specified within RFP Appendix D, COST WORKBOOK.

Table 9-9: Cost Evaluation

Evaluation Area	RFP Reference	Points
Bid Amount A		
SDMO Hardware Costs	Appendix D-2	100
SDMO Software Costs	Appendix D-3	400
Cloud Hosting Costs	Appendix D-4	500
SDMO Fixed Price Costs	Appendix D-5, D-5.4	1,000
Bid Amount B		
Transaction-Based Costs	Appendix D-6	300
Bid Amount C		
System Changes Costs	Appendix D-7, D-7.2	1,000
Bid Amount D		
Transition-In (TIP1 & TIP2) Costs	Appendix D-8	100
Transition-Out Costs	Appendix D-8.2	100
Cost Total		3,500

9.4.1 Cost Assessment

The State will review the bidder's response to RFP Section 7, COST, and the Appendix D, COST WORKBOOK, for mathematical accuracy. Errors and inconsistencies will be dealt with according to procedures contained in RFP Section 2.3.6.2, ERRORS IN THE PROPOSAL. Adjustments may be made for the purpose of evaluation in accordance with procedures described in RFP Section 2.3.6.2, ERRORS IN THE PROPOSAL.

After the Evaluation Team identifies the proposals that successfully pass the Qualification Step evaluation phase, the State will open the cost component of the bidder's proposal. The State will open each of the bidder's costs and validate that the cost worksheets were properly completed and are free of mathematical errors. If appropriate, the State may correct errors in accordance with RFP Section 2.3.6.2, ERRORS IN THE PROPOSAL.

The Evaluation Team will then evaluate the bidder's Cost Scores for each of the cost evaluation items identified within RFP Appendix D, Tab D-1, TOTAL COST SUMMARY, utilizing one of the evaluation approaches identified in the below examples.

The Evaluation Team will use the SDMO Hardware Cost Evaluation example approach (below) to calculate the bidder's Cost Scores for each of the following cost evaluation items:

- Appendix D-2, SDMO HARDWARE COSTS*
- Appendix D-3, SDMO SOFTWARE COSTS*
- Appendix D-4, CLOUD HOSTING DATA CENTER SERVICES COSTS
- Appendix D-7, SYSTEM CHANGE COSTS

*Note – For Hardware and Software Cost Evaluation, points will only be awarded within those categories if bidder's proposed total hardware or total software costs fall under the respective State Projected Budget values.

Table 9-10: SDMO Hardware Cost Evaluation Example

Bidder Name	Bid Amount A	D
	SDMO Hardware	Score – SDMO Hardware Up to 100 Points (Lowest Bidder Cost)/(Bidder #n Cost) x 100 = Column D
Bidder # 1	\$220	$[(\$205)/(\$220)] \times 100 = 93.18 \text{ pts}$
Bidder # 2 (Lowest Cost)	\$205	$[(\$205)/(\$205)] \times 100 = 100 \text{ pts}$
State Projected Hardware Budget	\$225	
Bidder # 3	\$230	No points awarded

The Evaluation Team will use the Fixed Price Costs & Transaction Based Costs Evaluation example approach (below) to calculate the bidder's Cost Scores for the cost evaluation items listed below. Please note that for evaluation purposes, the State will only be considering the costs between Year 2 and Year 10 for each of these cost evaluation items:

- Appendix D-5, SDMO FIXED PRICE COSTS
- Appendix D-6, TRANSACTION-BASED COSTS

Table 9-11: SDMO Fixed Price Costs & Transaction Based Costs Evaluation Example

Bidder Name	Bid Amount A	D
	SDMO Fixed-Price Costs (Year 2 – Year 10)	Score – SDMO Fixed Price Costs Up to 1,000 Points (Lowest Bidder Cost)/(Bidder #n Cost) x 1,000 = Column D
Bidder # 1	\$220	$[(\$205)/(\$220)] \times 1,000 = 932 \text{ pts}$
Bidder # 2 (Lowest Cost)	\$205	$[(\$205)/(\$205)] \times 1,000 = 1,000 \text{ pts}$

The Evaluation Team will use the Transition-In Cost Evaluation Example approach (below) to calculate the bidder's Cost Scores for each of the following cost evaluation items:

- Appendix D-8, TRANSITION-IN COSTS
- Appendix D-8.2, TRANSITION-OUT COSTS

Table 9-12: Transition-In Cost Evaluation Example

Bidder Name	Bid Amount D	A
	Transition-In	Score – Bid Amount D, Transition-In Up to 100 Points (2nd Lowest Bidder Cost)/(Bidder #n Cost) x 100 = Column A
Bidder # 1	\$300	$[(\$200)/(\$300)] \times 100 = 67 \text{ pts}$
Bidder # 2 (2 nd Lowest Bidder Cost)	\$200	$[(\$200)/(\$200)] \times 100 = 100 \text{ pts}$
Bidder # 3	\$500	$[(\$200)/(\$500)] \times 100 = 40 \text{ pts}$
Bidder # 4	\$400	$[(\$200)/(\$400)] \times 100 = 50 \text{ pts}$
Bidder # 5	\$10	$[(\$200)/(\$10)] \times 100 = 100 \text{ pts (maximum available points)}$

Once the Evaluation Team has calculated the scores associated with each cost evaluation item within Bid Amounts A through D for each bidder, the team will sum up each bidder's total cost score.

9.5 APPLICATION OF PREFERENCES & INCENTIVES AND FINAL SCORE DETERMINATION

The Technical Score and Cost Score will be calculated and added together for each proposal, then the State will calculate and apply the preference and incentive points for Small Business (SB) and DVBE preferences and incentives.

The Evaluation Team will evaluate to determine whether the bidder qualifies for the Mandatory or Optional preference or incentive points. If the Evaluation Team determines that the submitted information is insufficient, or that required documents do not otherwise validate the eligibility for the preference or incentive, the State will not calculate or apply the related points.

If the Evaluation Team is able to validate the bidder's claim for the preference or incentive, the related points will be applied to the bidder's final overall proposal score.

9.5.1 Small Business (SB)

In accordance with California Government Code Section 14835 et seq., a five percent (5%) preference will be given to bidders who qualify as a small business or non-small business claiming at least twenty-five percent (25%) California-certified small business Subcontractor participation. The State shall use the following approach in applying this preference.

Table 9-13: Small Business Preference Point Application Example

Bidder	Points Subtotal	SB Preference	SB Point Calculation	Proposal Score (Points Total)
A	9,200	0%	$9,200 \times 0 = 0$	9,200
B	9,100	5%	$9,100 \times .05 = 455$	9,555

9.5.2 Disabled Veterans Business Enterprise

In accordance with Section 999.5(a) of the Military and Veterans Code, an incentive will be given to bidders who provide DVBE documentation. For Contract award evaluation purposes only, the State shall apply an incentive to proposals that include California certified DVBE participation. The maximum incentive for this procurement is three percent (3%) of the total available points. Incentive points will be awarded based on the amount of DVBE participation obtained, as identified in the following DVBE Incentive Point Calculation Example.

The following incentive points shall apply to this solicitation:

Table 9-14: DVBE Incentive Point Calculation Example

Confirmed DVBE Participation	Preference	Maximum Incentive Points
5% or more	3%	10,000 points x .03 = 300
4% - 4.99%	2%	10,000 points x .02 = 200
3% - 3.99%	1%	10,000 points x .01 = 100
Less than 3%	0%	0 points

The DVBE Incentive percentage is applied to total points available to the bidders. Table 9-15, DVBE Incentive Point Application Example, illustrates the incentive points available based on the total score.

Table 9-15: DVBE Incentive Point Application Example

Bidder	Points Subtotal:	DVBE Participation	DVBE Points	Proposal Score (Points Total)
A	9,200	4%	10,000 x .02 = 200	9,400
B	8,800	5%	10,000 x .03 = 300	9,100

9.6 NEGOTIATIONS

The State of California reserves the right to negotiate. The State will conduct negotiations under Government Code 100505 and the Negotiation Process.

The State will conduct Negotiations with up to the top three (3) bidders that score the highest number of points.

The purpose of the Negotiation Process is to maximize the State's ability to obtain best value, based on the requirements and the evaluation factors set forth in the RFP. Negotiations allow the State and bidder an opportunity to discuss items that could, in the State's opinion enhance the bidder's proposal and potential for award.

Negotiations are not intended to allow a bidder to completely rewrite its proposal.

The negotiations are exchanges between the State and the bidder, which are undertaken with the intent of allowing the bidder to revise its proposal only in areas determined by the State during the Negotiation Process.

The Negotiation Process will be conducted either orally and/or in writing, and may include bargaining, such as persuasion, alteration of assumptions and positions, and give and take.

The State may discuss any aspect of the bidder's proposal that could, in the opinion of the State, be altered or explained to materially enhance the proposal's potential for award. However, the State is not required to discuss every area where the bidder's proposal could be improved. The scope and extent of negotiation exchanges are the matter of the State's judgment.

All aspects of the bidder's proposal are confidential until after the issuance of the Notification of Award.

9.6.1 Proceeding with Negotiations

At the discretion of the State, the State will invite bidders to participate in the Negotiation Process. The State will invite and proceed with concurrent negotiations with up to the three (3) highest scoring compliant bidders. This bidder Negotiation Process will continue until the State completes negotiations and awards a Contract.

9.6.2 Negotiation Invitation

At the discretion of the State, the bidders will be notified in writing that the State is initiating

negotiations; and be provided with: (1) the general purpose and scope of the negotiations; (2) the anticipated schedule for the negotiations; and (3) the procedures to be followed for negotiations.

Confirmation of Attendance: bidder(s) who have been invited to participate in negotiations must confirm attendance, in accordance with the invitation instructions, within two (2) State business days of invitation.

9.6.3 Key Staff Interviews and Oral Presentations

Key Staff identified within RFP Section 6.3, BIDDER KEY STAFF QUALIFICATIONS & REFERENCES, may be required to participate in interviews during the negotiation process. The interview, if conducted, will cover relevant background, experience and situational business questions, pointed at validating that the Key Staff are qualified for its proposed roles. Oral presentations may be conducted in conjunction with the Key Staff interviews. The oral presentations will focus on a standard set of questions that will be provided to all invited bidders.

9.6.4 Best And Final Offer (BAFO) Submission & Evaluation

At the conclusion of negotiations, the State may request that bidders develop and submit a Best And Final Offer (BAFO). The intent of the BAFO is to clarify and document understandings reached during negotiations. The State will establish a date and time for receipt of BAFOs based on when bidder negotiations occur. A bidder's BAFO is an irrevocable offer for 180 calendar days following the scheduled date for BAFO submission. A bidder may extend the offer in the event of a delay in Contract award.

If the State requests BAFOs, the supplemental proposal must be submitted to the location identified in RFP Section 1.5, PROCUREMENT OFFICIAL AND CONTACT INFORMATION, by the specific date and time that will be communicated to each bidder individually in writing.

The BAFO submission must address the following:

- A supplemental proposal containing every negotiated/revised section(s) of the bidder's original proposal, any other revised area specifically required by the State to be included in the BAFO, and revisions made necessary in accordance therewith.
- The supplemental proposal must include all changes made to negotiated section(s) of the bidder's original proposal in tracked changes. Changes to the bidder's original proposal that are not tracked in the BAFO or otherwise identified, may result in the bidder's BAFO submission being rejected, and the bidder disqualified.
- An Executive Summary must accompany the supplemental proposal, identifying a list of all changes (other than non-substantive changes to formatting, punctuation and grammar) that have been made to the bidder's original proposal. The bidder must include and attest to the following statement within the Executive Summary:

"This Best and Final Offer (BAFO) is in response to RFP # 73040873 and the changes identified in this Executive Summary identifies all changes made to [bidder's name] original proposal, previously submitted to the State. Any substantive change not included in this list is nonoperative, nonbinding and will not be considered a part of the [bidder's name] supplemental proposal."

9.6.5 Evaluation of BAFO Submission

The State will evaluate BAFO submissions, based on topics negotiated. The State will document the evaluation process in accordance with the evaluation selection criteria outlined in the negotiation Invitation Letter.

9.6.6 Selection

Upon completing the evaluation of the BAFOs, final selection will be determined on the responsive

and responsible bidder submitting the highest scoring (after preferences and incentives are considered) supplemental proposal. The State reserves the right at any time to reject any or all proposals.

9.6.7 Calculating the Winning Bidder

The Evaluation Team will determine which bidder's BAFO has the highest score by calculating the sum of the bidder's scores for all evaluation areas plus the awarded incentives and preferences.

9.6.8 Selecting the Proposed Awardee

The State will award the Contract, based on the best value to the State of California, to a responsible bidder whose proposal complies with all of the requirements of the solicitation and any addenda thereto, except for such immaterial defects as may be accepted by the State, and whose proposal achieves the highest number of total points for qualifications, references, requirements, cost, and any preferences and/or incentives applied. The State reserves the right at any time to reject any or all supplemental proposals.

In the event of a tie score among the highest scoring responsive bidders, the State will award the Contract to the bidder with the highest total Key Staff reference score. In the event the highest scoring responsive bidders tie for highest total Key Staff reference score, the State will award the Contract to the responsive bidder with the highest score for Section 6.4.5, UNDERSTANDING AND APPROACH TO TRANSITION-IN REQUIREMENTS. In the event of a further tie at this point, the State will award the Contract via coin toss.

9.7 NOTIFICATION OF AWARD

Upon selection of proposed awardee, the State will send a Notification of Award.

Appendix A - STD 213 Standard Agreement

INTRODUCTION

This appendix contains the STD 213, Special Provisions, and Statement of Work (SOW) for CalHEERS RFP # 73040873.

APPENDIX A: STD 213 STANDARD AGREEMENT

The STD 213 must be signed, post-negotiations, by a party authorized to bind the firm contractually.

The Bidder shall only complete the CONTRACTOR NAME in block 1, and all of the information required for the "CONTRACTOR" block in the lower part of the form. DO NOT INCLUDE ANY DOLLAR FIGURES.

All forms are available in the Bidder's Library for download.

APPENDIX A-1 GENERAL PROVISIONS INFORMATION TECHNOLOGY

GENERAL PROVISIONS – INFORMATION TECHNOLOGY

1. **DEFINITIONS:** Unless otherwise specified in the Statement of Work, the following terms shall be given the meaning shown, unless context requires otherwise.

- a) **"Acceptance Tests"** means those tests performed during the Performance Period which are intended to determine compliance of Cloud Services, Equipment, and Software with the specifications and all other Attachments incorporated herein by reference and to determine the reliability of the Cloud Services, Equipment, or Software.
- b) **"Attachment"** means a mechanical, electrical, or electronic interconnection to the Contractor supplied Machine or System of Equipment, manufactured by other than the original Equipment manufacturer that is not connected by the Contractor.
- c) **"Business Entity"** means any individual, business, partnership, joint venture, corporation, S-corporation, limited liability company, sole proprietorship, joint stock company, consortium, or other private legal entity recognized by statute.
- d) **"Buyer"** means the State's authorized contracting official.
- e) **"Cloud Services"** means services provided in a cloud environment, including: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and any other vendor-managed or hosted services, provided to the State pursuant to the Contract.
- f) **"Commercial Hardware"** means Hardware developed or regularly used that: (i) has been sold, leased, or licensed to the general public; (ii) has been offered for sale, lease, or license to the general public; (iii) has not been offered, sold, leased, or licensed to the public but will be available for commercial sale, lease, or license in time to satisfy the delivery requirements of this Contract; or (iv) satisfies a criterion expressed in (i), (ii), or (iii) above and would require only minor modifications to meet the requirements of this Contract.
- g) **"Contract"** means this Contract or agreement (including but not limited to purchase orders or change requests), by whatever name known or in whatever format used.
- h) **"Custom Software"** means Software developed (including without limitation Interfaces) or produced by the Contractor or Subcontractors for CalHEERS under the Contract including any Software that is developed under an executed Change Request by the Contractor for CalHEERS but excluding Third Party Software, Contractor Technology, and Contractor proprietary information.
- i) **"Contractor"** means the Business Entity with whom the State enters into this Contract. Contractor shall be synonymous with "supplier", "vendor" or other similar term.
- j) **"Deliverables"** means Goods, Software, Cloud Services, Information Technology, telecommunications technology, Hardware, and other items (e.g. reports, documentation) to be delivered pursuant to this Contract, including any such items furnished incident to the provision of services.
- k) **"Documentation"** means all documents identified as Deliverables, Work Products provided by the Contractor to explain the use of the System, e.g., supplemental documents for the System designs and the online knowledge base tool and all commercially available, operations, technical and other manuals used in conjunction with the System, in whole and in part, including without limitation manuals provided by licensors of Third-

Party Software and by Equipment manufacturers.

- l) **"Equipment"** is an all-inclusive term which refers to physical assets related to computer or information technology, including peripheral components, communication devices, and related items.
- m) **"Facility Readiness Date"** means the date specified in the Statement of Work by which the State must have the site prepared and available for Equipment delivery and installation.
- n) **"Goods"** means all types of tangible personal property, including but not limited to materials, supplies, and Equipment (including computer and telecommunications Equipment).
- o) **"Hardware"** usually refers to computer Equipment and is contrasted with Software. See also Equipment.
- p) **"Information Technology"** includes, but is not limited to, all electronic technology systems and services, automated information handling, System design and analysis, conversion of data, computer programming, information storage and retrieval, telecommunications which include voice, video, and data communications, requisite System controls, simulation, electronic commerce, and all related interactions between people and Machines.
- q) **"Machine"** means an individual unit, physical or virtual, of a System or Cloud Services, separately identified by a type and/or model number, comprised of but not limited to mechanical, electro-mechanical, and electronic parts, microcode, and special features installed thereon and including any necessary Software, e.g., central processing unit, memory module, tape unit, card reader, etc.
- r) **"Manufacturing Materials"** means parts, tools, dies, jigs, fixtures, plans, drawings, and information produced or acquired, or rights acquired, specifically to fulfill obligations set forth herein.
- s) **"Mean Time to Repair (MTTR)"** means the average expected or observed time required to repair a System or component and return it to normal operation.
- t) **"Open Source Software"** means software that can be used freely, changed, and shared (in modified or unmodified form) by anyone. Open Source Software is distributed under Open Source Initiative-approved licenses that comply with an open source framework that allows for free redistribution, provision of the source code, allowance for modifications and derived works, free and open distribution of licenses without restrictions and licenses that are technology-neutral.
- u) **"Operating Software"** means those routines, whether or not identified as separate products or proprietary to the Contractor, that reside in the Equipment and Cloud Services and are required for the Equipment or Cloud Services to perform their intended function(s), and which interface the operator, other Contractor-supplied programs, and user programs to the Equipment and Cloud Services.
- v) **"Sensitive Information"** means information that has a degree of confidentiality such that its loss, misuse, unauthorized access, or modification could compromise the element of confidentiality and thereby adversely affect CalHEERS users, the conduct of the CalHEERS Program and/or the privacy of individuals entitled under the Privacy Act of 1974 or the Health Insurance Portability and Accountability Act of 1996 (HIPAA) or System security. Examples of sensitive information include but are not limited to: Personally Identifiable Information (PII), Protected Health Information (PHI), Personally Identifiable Financial Information (PIFI), CalHEERS Production data, and System login or access and internet protocol (IP) addresses.
- w) **"Software"** The software for the System, as described in the Contract; including Custom Software, the configuration, all Enhancements thereto,

Third-Party Software. Software includes all prior, current, and future versions of the Software and all Deficiency corrections.

- x) **"Software Failure"** means a malfunction in the Contractor-supplied Software, other than Operating Software, which prevents the accomplishment of work, even though the Equipment or Cloud Services (including its Operating Software) may still be capable of operating properly.
- y) **"State"** means the government of the State of California, its employees and authorized representatives, including without limitation any department, agency, or other unit of the government of the State of California.
- z) **"System"** means the complete collection of Hardware, Software, and Services, including all associated Cloud Services as described in this Contract.
- aa) **"Third-Party Software"** means Software which is: (a) developed by third parties, including without limitation Subcontractors; (b) generally distributed or available for commercial or government use; (c) not specifically designed or developed for CalHEERS/Covered California but often requiring customizations, including without limitation operating system software, tools, utilities, open source software, and commercial-off-the-shelf software; and (d) supplied by Contractor for use with the System and Cloud Services pursuant to this Contract.
- bb) **"U.S. Intellectual Property Rights"** means intellectual property rights enforceable in the United States of America, including without limitation rights in trade secrets, copyrights, and U.S. patents.

2. **CONTRACT FORMATION:**

- a) If this Contract results from a sealed bid offered in response to a solicitation conducted pursuant to Chapters 2 (commencing with Section 10290), 3 (commencing with Section 12100), and 3.6 (commencing with Section 12125) of Part 2 of Division 2 of the Public Contract

Code (PCC), then Contractor's bid is a firm offer to the State which is accepted by the issuance of this Contract and no further action is required by either party.

- b) If this Contract results from a solicitation other than described in paragraph a), above, the Contractor's quotation or proposal is deemed a firm offer and this Contract document is the State's acceptance of that offer.
 - c) If this Contract resulted from a joint bid, it shall be deemed one indivisible Contract. Each such joint Contractor will be jointly and severally liable for the performance of the entire Contract. The State assumes no responsibility or obligation for the division of orders or purchases among joint Contractors.
- 3. **COMPLETE INTEGRATION:** This Contract, including any documents incorporated herein by express reference, is intended to be a complete integration and there are no prior or contemporaneous different or additional agreements pertaining to the subject matter of the Contract.
 - 4. **SEVERABILITY:** The Contractor and the State agree that if any provision of this Contract is found to be illegal or unenforceable, such term or provision shall be deemed stricken, without the need for a formal amendment and the remainder of the Contract shall remain in full force and effect. Either party having knowledge of such term or provision shall promptly inform the other of the presumed non-applicability of such provision.
 - 5. **INDEPENDENT CONTRACTOR:** Contractor and the agents and employees of the Contractor, in the performance of this Contract, shall act in an independent capacity and not as officers or employees or agents of the State.
 - 6. **APPLICABLE LAW:** This Contract shall be governed by and shall be interpreted in accordance with the laws of the State of California; venue of any action brought with regard to this Contract shall be in Sacramento County, Sacramento, California. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Contract.

7. COMPLIANCE WITH STATUTES AND REGULATIONS:

- a) The State and the Contractor warrants and certifies that in the performance of this Contract, it will comply with all applicable laws, statutes, rules, regulations and orders of the United States and the State of California. The Contractor agrees to indemnify the State against any loss, cost, damage or liability by reason of the Contractor's violation of this provision.
- b) The State will notify the Contractor of any such claim in writing and tender the defense thereof within a reasonable time; and
- c) The Contractor will have sole control of the defense of any action on such claim and all negotiations for its settlement or compromise; provided that (i) when substantial principles of government or public law are involved, when litigation might create precedent affecting future State operations or liability, or when involvement of the State is otherwise mandated by law, the State may participate in such action at its own expense with respect to attorneys' fees and costs (but not liability); (ii) where a settlement would impose liability on the State, affect principles of California government or public law, or impact the authority of the State, the State will have the right to approve or disapprove any settlement or compromise, which approval will not unreasonably be withheld or delayed; and (iii) the State will reasonably cooperate in the defense and in any related settlement negotiations.
- d) If this Contract is in excess of \$554,000, it is subject to the requirements of the World Trade Organization (WTO) Government Procurement Agreement (GPA).
- e) To the extent that this Contract falls within the scope of Government Code Section 11135, the Contractor hereby agrees to respond to and resolve any complaint brought to its attention,

regarding accessibility of its products or services.

8. CONTRACTOR'S POWER AND

AUTHORITY: The Contractor warrants that it has full power and authority to grant the rights herein granted and will hold the State harmless from and against any loss, cost, liability, and expense (including reasonable attorney fees) arising out of any breach of this warranty. Further, the Contractor avers that it will not enter into any arrangement with any third party which might abridge any rights of the State under this Contract.

- a) The State will notify the Contractor of any such claim in writing and tender the defense thereof within a reasonable time; and
- b) The Contractor will have sole control of the defense of any action on such claim and all negotiations for its settlement or compromise; provided that (i) when substantial principles of government or public law are involved, when litigation might create precedent affecting future State operations or liability, or when involvement of the State is otherwise mandated by law, the State may participate in such action at its own expense with respect to attorneys' fees and costs (but not liability); (ii) where a settlement would impose liability on the State, affect principles of California government or public law, or impact the authority of the State, the State will have the right to approve or disapprove any settlement or compromise, which approval will not unreasonably be withheld or delayed; and (iii) the State will reasonably cooperate in the defense and in any related settlement negotiations.
- c) To the extent Contractor is a reseller, Contractor warrants that (a) the service provider has reviewed the Contract; (b) in Contractor's agreement with the service provider, the service provider has agreed to accept the responsibilities, obligations, and liabilities (such as license grant, inspection, Acceptance, rejection, warranties, confidentiality,

indemnification, data protection provisions) under this Contract that naturally reside with the service provider with respect to the provision of Deliverables; and (c) Contractor can provide the Deliverables in accordance with the Contract.

- d) Nothing contained in the Contract, or otherwise, shall create any contractual relation between the State and any Subcontractors, and no subcontract shall relieve Contractor of Contractor's responsibilities and obligations hereunder. Contractor agrees to be as fully responsible to the State for the acts and omissions of its Subcontractors and of persons either directly or indirectly employed by any of them as it is for the acts and omissions of persons directly employed by Contractor. Contractor's obligation to pay its Subcontractors is an independent obligation from the State's obligation to make payments to Contractor. As a result, the State shall have no obligation to pay any moneys to any Subcontractor.

9. **ASSIGNMENT:** This Contract shall not be assignable by the Contractor in whole or in part without the written consent of the State. The State's consent shall not be unreasonably withheld or delayed. For the purpose of this paragraph, the State will not unreasonably prohibit the Contractor from freely assigning its right to payment, provided that the Contractor remains responsible for its obligations hereunder.

10. **WAIVER OF RIGHTS:** Any action or inaction by the State or the failure of the State on any occasion, to enforce any right or provision of the Contract, shall not be construed to be a waiver by the State of its rights hereunder and shall not prevent the State from enforcing such provision or right on any future occasion. The rights and remedies of the State herein are cumulative and are in addition to any other rights or remedies that the State may have at law or in equity.

11. **ORDER OF PRECEDENCE:** In the event of any inconsistency between the articles, attachments, specifications or provisions

which constitute this Contract, the following order of precedence shall apply:

- a) These General Provisions – Information Technology (In the instances provided herein where the paragraph begins: "Unless otherwise specified in the Statement of Work" provisions specified in the Statement of Work replacing these paragraphs shall take precedence over the paragraph referenced in these General Provisions);
- b) Contract form, i.e., Purchase Order STD 65, Standard Agreement STD 213, etc., and any amendments thereto;
- c) Other Special Provisions;
- d) Statement of Work, including any specifications incorporated by reference herein;
- e) Cost worksheets; and
- f) All other attachments incorporated in the Contract by reference.

12. **PACKING AND SHIPMENT:**

- a) All Goods are to be packed in suitable containers for protection in shipment and storage, and in accordance with applicable specifications. Each container of a multiple container shipment shall be identified to:
 - (i) show the number of the container and the total number of containers in the shipment; and
 - (ii) the number of the container in which the packing sheet has been enclosed.
- b) All shipments by the Contractor or its Subcontractors must include packing sheets identifying: the State's Contract number; item number; quantity and unit of measure; part number and description of the Goods shipped; and appropriate evidence of inspection, if required. Goods for different Contracts shall be listed on separate packing sheets.
- c) Shipments must be made as specified in this Contract, as it may be amended, or otherwise directed in writing by the State's Transportation Management Unit within the State.

13. **TRANSPORTATION COSTS AND OTHER FEES OR EXPENSES:** No charge for delivery, drayage, express, parcel post, packing, cartage, insurance, license fees,

permits, cost of bonds, or for any other purpose will be paid by the State unless expressly included and itemized in the Contract.

- a) The Contractor must strictly follow Contract requirements regarding Free on Board (F.O.B.), freight terms and routing instructions. The State may permit use of an alternate carrier at no additional cost to the State with advance written authorization of the Buyer.
- b) If "prepay and add" is selected, supporting freight bills are required when over \$50, unless an exact freight charge is approved by the Transportation Management Unit within the State and a waiver is granted.
- c) On "F.O.B. Shipping Point" transactions, should any shipments under the Contract be received by the State in a damaged condition and any related freight loss and damage claims filed against the carrier or carriers be wholly or partially declined by the carrier or carriers with the inference that damage was the result of the act of the shipper such as inadequate packaging or loading or some inherent defect in the Equipment and/or material, the Contractor, on request of the State, shall at Contractor's own expense assist the State in establishing carrier liability by supplying evidence that the Equipment and/or material was properly constructed, manufactured, packaged, and secured to withstand normal transportation conditions.

14. **DELIVERY:** The Contractor shall strictly adhere to the delivery and completion schedules specified in this Contract. Time, if stated as a number of days, shall mean calendar days unless otherwise specified. The quantities specified herein are the only quantities required. If the Contractor delivers in excess of the quantities specified herein, the State shall not be required to make any payment for the excess Deliverables, and may return them to Contractor at the Contractor's expense or utilize any other rights available to the State at law or in equity.

15. **SUBSTITUTIONS:** Substitution of Deliverables may not be tendered without advance written consent of the Buyer. The Contractor shall not use any specification in lieu of those contained in the Contract without written consent of the Buyer.

16. **INSPECTION, ACCEPTANCE AND REJECTION:** Unless otherwise specified in the Statement of Work:

- a) When acquiring Cloud Services, Commercial Hardware, or Third-Party Software, the State shall rely on Contractor's existing quality assurance system as a substitute for State inspection and testing. For all other acquisitions, Contractor and its Subcontractors will provide and maintain a quality assurance system acceptable to the State covering Deliverables and all Services under this Contract and will tender to the State only those Deliverables and Services that have been inspected and found to conform to this Contract's requirements. The Contractor will keep records evidencing inspections and their result, and will make these records available to the State during Contract performance and for three years after final payment. The Contractor shall permit the State to review procedures, practices, processes, and related documents to determine the acceptability of the Contractor's quality assurance system or other similar business practices related to performance of the Contract.
- b) All Deliverables may be subject to inspection and test by the State or its authorized representatives.
- c) The Contractor and its Subcontractors shall provide all reasonable facilities for the safety and convenience of auditors at no additional cost to the State. The Contractor shall furnish to auditors all information and data as may be reasonably required to perform their inspection.
- d) Subject to subsection 16 (a) above, all Deliverables may be subject to final inspection, test and acceptance by the

State at destination, notwithstanding any payment or inspection at source.

- e) In the event any Deliverables or Services should fail to conform to Contractual requirements, or to the sample submitted by Contractor (if applicable), the State may reject the same, and Contractor shall reclaim and remove the item promptly or correct the performance of the Deliverables or Services or other purchases, without expense to the State, and immediately replace all such rejected items with items conforming to the Contract. The State shall give written Notice of rejection of Deliverables delivered or Services performed hereunder within a reasonable time after receipt of such Deliverables or performance of such Services. Such Notice of rejection will state the respects in which the Deliverables do not substantially conform to their specifications. If the State does not provide such Notice of rejection within thirty (30) Days of delivery or within such time provided in the Contract for inspection, Acceptance, and rejection if longer than thirty (30) Days, for purchases of Cloud Services, Commercial Hardware, or Third-Party Software or all other purchases, such Deliverables and Services will be deemed to have been accepted. Acceptance by the State will be final and irreversible, except as it relates to latent defects, fraud, and gross mistakes amounting to fraud. Acceptance shall not be construed to waive any warranty rights that the State might have at law or by express reservation in this Contract with respect to any nonconformity.
- f) Unless otherwise specified in the Statement of Work, title to Equipment shall remain with the Contractor and assignees, if any, until such time as successful Acceptance testing has been achieved. Title to a special feature installed on a Machine and for which only a single installation charge was paid shall pass to the State at no additional charge,

together with title to the Machine on which it was installed.

17. SAMPLES:

- a) Samples of items may be required by the State for inspection and specification testing and must be furnished free of expense to the State. The samples furnished must be identical in all respects to the products bid and/or specified in the Contract.
- b) Samples, if not destroyed by tests, may, upon request made at the time the sample is furnished, be returned at the Contractor's expense.

18. WARRANTY:

- a) Unless otherwise specified in the Statement of Work, the warranties in this subsection begin upon delivery of the goods or services in question. The Contractor warrants that Deliverables and Services furnished hereunder will substantially conform to the requirements of this Contract (including without limitation all descriptions, specifications, and drawings identified in the Statement of Work. Where the parties have agreed to design specifications (such as a Detailed Design Document) and incorporated the same or equivalent in the Statement of Work directly or by reference, the Contractor will warrant that its Deliverables provide all material functionality required thereby. In addition to the other warranties set forth herein, where the Contract calls for delivery of Deliverable or Services, the Contractor warrants that such Deliverables or Services will perform in accordance with its license and accompanying Documentation. The State's approval of designs or specifications furnished by Contractor shall not relieve the Contractor of its obligations under this warranty.
- b) The Contractor warrants that Deliverables furnished hereunder (i) will be free, at the time of delivery, of harmful code (i.e. computer viruses, worms, trap doors, time bombs, disabling code, or any similar malicious mechanism designed to interfere with the intended

operation of, or cause damage to, computers, data, Cloud Services, or Software); (ii) will not infringe or violate any U.S. Intellectual Property Right. Without limiting the generality of the foregoing, if the State believes that harmful code may be present in any Cloud Services or Software delivered hereunder, the Contractor will, upon the State's request, provide a new or clean implementation of the Cloud Services or Software; and (iii) have been tested in accordance with industry standards.

- c) Unless otherwise specified in the Statement of Work:
- (i) The Contractor does not warrant that any Software provided hereunder is error-free or that it will run without immaterial interruption.
 - (ii) The Contractor does not warrant and will have no responsibility for a claim to the extent that it arises directly from (A) a modification made by the State, unless such modification is approved or directed by the Contractor, (B) use of Software in combination with or on products other than as specified by the Contractor, or (C) misuse by the State.
 - (iii) Where the Contractor resells Cloud Services, Commercial Hardware, or Third-Party Software it purchased from a third party, Contractor, to the extent it is legally able to do so, will pass through any such third party warranties to the State and will reasonably cooperate in enforcing them. Such warranty pass-through will not relieve the Contractor from Contractor's warranty obligations set forth above with respect to the Deliverables and Services.
- d) Notwithstanding subsection f), the Contractor represents and warrants that Contractor has the appropriate license and legal authority to provide the license, as defined in section 38, in the Custom Software to the State and U.S. Federal Government. In the event of a breach of this warranty, Contractor, at its own

expense, will promptly take the following actions: (i) secure for the State and/or U.S. Federal Government the right to continue using the Custom Software; (ii) replace or modify the Custom Software to make it noninfringing, provided such modification or replacement will not materially degrade any functionality, as determined by the State; or (iii) refund one hundred percent (100%) of the fee paid for the license for every month remaining in the license term following the date after which the State or U.S. Federal Government is required to cease operation of the Custom Software. The preceding remedies in this section are not exclusive of any other remedies that the State and/or the U.S. Federal Government may have.

- e) All warranties, including special warranties specified elsewhere herein, shall inure to the State, its successors, assigns, customer agencies, and governmental users of the Deliverables or Services.
- f) Except as may be specifically provided in the Statement of Work or elsewhere in this Contract, for any breach of the warranties provided in this Section, the State's exclusive Remedy and the Contractor's sole obligation will be limited to:
- (i) re-performance, repair, or replacement of the nonconforming Deliverable (including without limitation an infringing Deliverable) or Service; or
 - (ii) should the State in its sole discretion consent, refund of all amounts paid by the State for the nonconforming Deliverable or Service and payment to the State of any additional amounts necessary to equal the State's Cost to Cover. "Cost to Cover" means the cost, properly mitigated, of procuring Deliverables or Services of equivalent capability, function, and performance. The payment obligation in subsection (e)(ii) above will not exceed the limits on the Contractor's liability set

forth in the Section entitled
"Limitation of Liability."

- g) EXCEPT FOR THE EXPRESS WARRANTIES SPECIFIED IN THIS SECTION, THE CONTRACTOR MAKES NO WARRANTIES EITHER EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

- h) Unless otherwise specified in the Statement of Work, Contractor warrants Cloud Services and all support for Cloud Services will be performed in a skilled, professional manner by competent personnel and in accordance with the Contract. Contractor shall ensure that the service provider applies anti-malware controls to the Cloud Services to help avoid malicious software gaining unauthorized access to State Data, including malicious software originating from public networks. Such controls shall at all times equal or exceed the controls consistent with the industry standards for such data.

19. SAFETY AND ACCIDENT PREVENTION:

In performing work under this Contract on State premises, the Contractor shall conform to any specific safety requirements contained in the Contract or as required by law or regulation. The Contractor shall take any additional precautions as the State may reasonably require for safety and accident prevention purposes. Any violation of such rules and requirements, unless promptly corrected, shall be grounds for termination of this Contract in accordance with the default provisions hereof.

20. **INSURANCE:** The Contractor shall maintain all commercial general liability insurance, workers' compensation insurance and any other insurance required under the Contract. The Contractor shall furnish insurance certificate(s) evidencing required insurance coverage acceptable to the State, including endorsements showing the State as an "additional insured" if required under the Contract. Any required endorsements requested by the State must be separately

provided; merely referring to such coverage on the certificate(s) is insufficient for this purpose. When performing work on state owned or controlled property, Contractor shall provide a waiver of subrogation in favor of the State for its workers' compensation policy.

21. TERMINATION FOR NON-APPROPRIATION OF FUNDS:

- a) If the term of this Contract extends into fiscal years subsequent to that in which it is approved, such continuation of the Contract is contingent on the appropriation of funds for such purpose by the Legislature. If funds to effect such continued payment are not appropriated, the Contractor agrees to take back any affected Deliverables furnished under this Contract, terminate any Services supplied to the State under this Contract, and relieve the State of any further obligation therefor.
- b) The State agrees that if it appears likely that subsection a) above will be invoked, the State and Contractor shall agree to take all reasonable steps to prioritize work and Deliverables and minimize the incurrence of costs prior to the expiration of funding for this Contract.
- c) THE STATE AGREES THAT IF PARAGRAPH (a) ABOVE IS INVOKED, COMMERCIAL HARDWARE AND SOFTWARE THAT HAS NOT BEEN PAID FOR SHALL BE RETURNED TO THE CONTRACTOR IN SUBSTANTIALLY THE SAME CONDITION IN WHICH DELIVERED TO THE STATE, SUBJECT TO NORMAL WEAR AND TEAR. THE STATE FURTHER AGREES TO PAY FOR PACKING, CRATING, TRANSPORTATION TO THE CONTRACTOR'S NEAREST FACILITY AND FOR REIMBURSEMENT TO THE CONTRACTOR FOR EXPENSES INCURRED FOR THEIR ASSISTANCE IN SUCH PACKING AND CRATING.

22. TERMINATION FOR THE CONVENIENCE OF THE STATE:

- a) The State may terminate performance of work under this Contract for its

- convenience in whole or, from time to time, in part, if the State or its designee, determines that a termination is in the State's interest. The State or its designee, shall terminate by delivering to the Contractor a Notice of Termination specifying the extent of termination and the effective date thereof.
- b) After receipt of a Notice of Termination, and except as directed by the State, the Contractor shall immediately proceed with the following obligations, as applicable, regardless of any delay in determining or adjusting any amounts due under this clause. The Contractor shall:
- (i) Stop work as specified in the Notice of Termination.
 - (ii) Place no further subcontracts for materials, Services, or facilities, except as necessary to complete the continuing portion of the Contract.
 - (iii) Terminate all subcontracts to the extent they relate to the work terminated.
 - (iv) Settle all outstanding liabilities and termination settlement proposals arising from the termination of subcontracts;
- c) After termination, the Contractor shall submit a final termination settlement proposal to the State in the form and with the information prescribed by the State. The Contractor shall submit the proposal promptly, but no later than 90 days after the effective date of termination, unless a different time is provided in the Statement of Work or in the Notice of Termination.
- d) The Contractor and the State may agree upon the whole or any part of the amount to be paid as requested under subsection (c) above.
- e) Unless otherwise set forth in the Statement of Work, if the Contractor and the State fail to agree on the amount to be paid because of the termination for convenience, the State will pay the Contractor the following amounts; provided that in no event will total payments exceed the amount payable to the Contractor if the Contract had been fully performed:
- (i) The Contract price for Deliverables or Services accepted or retained by the State and not previously paid for, adjusted for any savings on freight and other charges; and
 - (ii) The total of:
 - A) The reasonable costs incurred in the performance of the work terminated, including initial costs and preparatory expenses allocable thereto but excluding any cost attributable to Deliverables or Services paid or to be paid;
 - B) The reasonable cost of settling and paying termination settlement proposals under terminated subcontracts that are properly chargeable to the terminated portion of the Contract; and
 - C) Reasonable storage, transportation, demobilization, unamortized overhead and capital costs, and other costs reasonably incurred by the Contractor in winding down and terminating its work.
- f) The Contractor will use generally accepted accounting principles, or accounting principles otherwise agreed to in writing by the parties, and sound business practices in determining all costs claimed, agreed to, or determined under this clause.
- 23. TERMINATION FOR DEFAULT:**
- a) The State may, subject to the clause titled "Force Majeure" and to sub-section d) below, by written Notice of default to the Contractor, terminate this Contract in whole or in part if the Contractor fails to:
 - (i) Deliver the Deliverables or perform the Services within the time specified in the Contract or any amendment thereto;
 - (ii) Make progress, so that the lack of progress endangers performance of this Contract; or
 - (iii) Perform any of the other provisions of this Contract.

- b) The State's right to terminate this Contract under sub-section a) above, may be exercised only if the failure constitutes a material breach of this Contract and if the Contractor does not cure such failure within the time frame stated in the State's cure notice, which in no event will be less than fifteen (15) days, unless the Statement of Work calls for a different period.
- c) If the State terminates this Contract in whole or in part pursuant to this Section, it may acquire, under terms and in the manner the Buyer considers appropriate, Deliverables or Services similar to those terminated, and the Contractor will be liable to the State for any excess costs for those Deliverables and Services, including without limitation costs third party vendors charge for Manufacturing Materials (but subject to the clause entitled "Limitation of Liability"). However, the Contractor shall continue the work not terminated.
- d) If the Contract is terminated for default, the State may require the Contractor to transfer title, or in the case of licensed Software, license, and deliver to the State, as directed by the Buyer, any:
- (i) completed Deliverables,
 - (ii) partially completed Deliverables, and,
 - (iii) subject to provisions of sub-section (e) below, Manufacturing Materials related to the terminated portion of this Contract. Nothing in this sub-section d) will be construed to grant the State rights to Deliverables that it would not have received had this Contract been fully performed. Upon direction of the Buyer, the Contractor shall also protect and preserve property in its possession in which the State has an interest.
- e) The State shall pay Contract price for completed Deliverables delivered and accepted and items the State requires the Contractor to transfer under section (d) above. Unless the Statement of Work calls for different procedures or requires no-charge delivery of materials, the Contractor and Buyer shall attempt to agree on the amount of payment for Manufacturing Materials and other materials delivered and accepted by the State for the protection and preservation of the property; provided that where the Contractor has billed the State for any such materials, no additional charge will apply. Failure to agree will constitute a dispute under the Disputes clause. The State may withhold from these amounts any sum it determines to be necessary to protect the State against loss because of outstanding liens or claims of former lien holders.
- f) If, after termination, it is determined by a final decision that the Contractor was not in default, the rights and obligations of the parties shall be the same as if the termination had been issued for the convenience of the State.
- g) Both parties, State and Contractor, upon any termination for default, have a duty to mitigate the damages suffered by it.
- h) The rights and remedies of the State in this clause are in addition to any other rights and remedies provided by law or under this Contract, and are subject to the clause titled "Limitation of Liability."
24. **FORCE MAJEURE:** Except for or defaults of Subcontractors at any tier, the Contractor shall not be liable for any excess costs if the failure to perform the Contract arises from causes beyond the control and without the fault or negligence of the Contractor. Examples of such causes include, but are not limited to:
- a) Acts of God or of the public enemy, and
 - b) Acts of the federal or State government in either its sovereign or contractual capacity.
- If the failure to perform is caused by the default of a Subcontractor at any tier, and if the cause of the default is beyond the control of both the Contractor and Subcontractor, and without the fault or negligence of either, the Contractor shall not be liable for any excess costs for failure to perform.
25. **RIGHTS AND REMEDIES OF STATE FOR DEFAULT:**
- a) In the event any Deliverables furnished or Services provided by the Contractor in

the performance of the Contract should fail to conform to the requirements herein, or to the sample submitted by the Contractor, the State may reject the same, and it shall become the duty of the Contractor to reclaim and remove the item promptly or to correct the performance of Services, without expense to the State, and immediately replace all such rejected items with others conforming to the Contract.

- b) In addition to any other rights and remedies the State may have, the State may require the Contractor, at Contractor's expense, to ship Deliverables via air freight or expedited routing to avoid or minimize actual or potential delay if the delay is the fault of the Contractor.
- c) In the event of the termination of the Contract, either in whole or in part, by reason of default or breach by the Contractor, any loss or damage sustained by the State in procuring any items which the Contractor agreed to supply shall be borne and paid for by the Contractor (but subject to the clause entitled "Limitation of Liability").
- d) The State reserves the right to offset the reasonable cost of all damages caused to the State against any outstanding invoices or amounts owed to the Contractor or to make a claim against the Contractor therefore.

26. LIMITATION OF LIABILITY:

- a) Except as may be otherwise approved by the State or its designee, Contractor's liability for damages to the State for any cause whatsoever, and regardless of the form of action, whether in Contract or in tort, shall be limited to the Purchase Price. For purposes of this sub-section (a), "Purchase Price" will mean the aggregate Contract price; except that, with respect to a Contract under which multiple purchase orders will be issued (e.g., a Master Agreement or Multiple Award Schedule contract), "Purchase Price" will mean the total price of the purchase order for the Deliverable(s) or Service(s) that gave rise to the loss, such

that the Contractor will have a separate limitation of liability for each purchase order.

- b) Unless otherwise specified in the General or Special Provisions, the foregoing limitation of liability shall not apply to the following: (i) any liability under Section 28 of the General Provisions entitled "Indemnification"; (ii) any liability under Section 7 of the General Provisions entitled "Compliance with Statutes and Regulations"; (iii) any liability under Section 8 of the General Provisions entitled "Contractor's Power and Authority"; (iv) any liability under Section 43 of the General Provisions entitled "Patent, Copyright, and Trade Secret Indemnity"; (v) claims arising under provisions herein calling for indemnification for third party claims against the State for death, bodily injury to persons, or damage to real or tangible personal property caused by Contractor's negligence or misconduct; or (vi) costs or attorneys' fees that the State becomes entitled to recover as a prevailing party in any action.
- c) The State's liability for damages for any cause whatsoever, and regardless of the form of action, whether in Contract or in tort, shall be limited to the Purchase Price, as that term is defined in subsection (a) above. Nothing herein shall be construed to waive or limit the State's sovereign immunity or any other immunity from suit provided by law.
- d) In no event will either the Contractor or the State be liable for consequential, incidental, indirect, special, or punitive damages, even if notification has been given as to the possibility of such damages, except (i) to the extent that the Contractor's liability for such damages is specifically set forth in the Statement of Work or (ii) to the extent that the Contractor's liability for such damages arises out of subsection (b)(i), (b)(ii), or (b)(iv) above.
- e) Notwithstanding any provision of this Contract to the contrary, the parties expressly agree that the limitation of

liability provisions specified within subsection (a) of this Section of the General Provisions, shall be inapplicable to any damages incurred by the State arising directly or indirectly from a Breach caused by the failure of the Contractor to comply with the security requirements set forth within Appendix A-2 Special Provisions, Section 15.3.

- f) Liability caused directly or indirectly by Contractor's failure to comply with the security requirements set forth within Appendix A-2 Special Provisions, Section 15.3, shall be limited to no more than 200% of the Purchase Price.

27. CONTRACTOR'S LIABILITY FOR INJURY TO PERSONS OR DAMAGE TO PROPERTY:

- a) The Contractor shall be liable for damages arising out of injury to the person and/or damage to the property of the State, employees of the State, persons designated by the State for training, or any other person(s) other than agents or employees of the Contractor, designated by the State for any purpose, prior to, during, or subsequent to delivery, installation, acceptance, and use of the Deliverables either at the Contractor's site or at the State's place of business, provided that the injury or damage was caused by the fault or negligence of the Contractor.
- b) The Contractor shall not be liable for damages arising out of or caused by an alteration or an Attachment not made or installed by the Contractor, or for damage to alterations or Attachments that may result from the normal operation and maintenance of the Deliverables provided by the Contractor during the Contract.

28. INDEMNIFICATION:

- a) The Contractor agrees to indemnify, defend and save harmless the State, its officers, agents and employees from any and all claims, losses, costs, liabilities, damages or deficiencies, including interest, penalties and attorneys' fees, which arise from third party claims which:

- (i) Arise out of or are due to, or are alleged to arise out of or be due to, a breach by Contractor of any of its representations, warranties, covenants or other obligations, contained in Section 7(a), Compliance with Statutes and Regulations, or Section 8, Contractor's Power and Authority, of the Contract, with the details of such indemnification obligations stated in such sections, or
- (ii) Are caused by or result from, or are alleged to arise out of or result from, Contractor's acts or omissions constituting bad faith, willful misfeasance, negligence or reckless disregard of its duties under this Contract, or
- (iii) Accrue or result, or are alleged to accrue or result, to any and all contractors, Subcontractors, suppliers, laborers, and any other person, firm, or corporation furnishing or supplying to Contractor work, Services, materials, or supplies in connection with the performance of this Contract, and from any and all claims and losses accruing or resulting to any person, firm or corporation who may be injured or damaged by Contractor in the performance of this Contract, or
- (iv) Arise out of or are due to, or are alleged to arise out of or be due to, any claim or allegation of infringement, misappropriation or violation of any patent, copyright, trademark, trade secret, domain name or other intellectual property right comprising or involving any of the subject inventions, prior inventions or other inventions provided in any way by the Contractor and used, reproduced or otherwise exploited by the State in connection with any of the Contract programs or any turnover thereof, which indemnification shall be pursuant to Section 43 of these General Provisions, or

- (v) Arise out of or are due to, or are alleged to arise out of or be due to, any violation of applicable security or privacy laws, by the Contractor or any Subcontractor or agent under the Contractor's control.
- (vi) With regard to (a)(ii) above, where claims arise from Contractor's acts or omissions constituting negligence, the Contractor's liability for claims, losses, costs, liabilities, damages or deficiencies, including interest, penalties and attorneys' fees, shall be limited to \$50 million.
- b) If and to the extent that the Contractor has knowledge of a claim that it believes may develop into an action that would be subject to this Contract, the Contractor must promptly notify the State of the claim.
- c) **Right to Tender or Undertake Defense.** If the State is named a party in any judicial, administrative, or other proceeding arising out of or in connection a matter for which the Contractor is obligated to indemnify the State under this Provision of this Contract, then the State will have the option at any time to either (a) tender its defense to Contractor, in which case the Contractor will provide qualified attorneys, consultants, and other appropriate professionals to represent the State's interests at Contractor's expense, or (b) undertake its own defense, choosing the attorneys, consultants, and other appropriate professionals to represent its interests, in which case the Contractor will be responsible for and shall pay reasonable fees and expenses of such attorneys, consultants, and appropriate professionals. If the State elects option (b) above, the Contractor shall be afforded a reasonable opportunity to participate in the defense and attend the legal proceedings at its own expense. However the State shall have sole control of the defense.
- d) **Right to Control Resolution:** Notwithstanding that the State may have tendered its defense to the Contractor, neither party shall settle, compromise or resolve any claims, causes of action, liabilities or damages against the State

without the consent of the other party, which consent shall not be unreasonably withheld. Any such resolution will not relieve the Contractor of its obligation to indemnify the State.

- 29. **INVOICES:** Unless otherwise specified, invoices shall be sent to the address set forth herein. Invoices shall be submitted in triplicate and shall include the Contract number; release order number (if applicable); item number; unit price, extended item price and invoice total amount. State sales tax and/or use tax shall be itemized separately and added to each invoice as applicable.
- 30. **REQUIRED PAYMENT DATE:** Payment will be made in accordance with the provisions of the California Prompt Payment Act, Government Code Section 927 et. seq. Unless expressly exempted by statute, the Act requires State agencies to pay properly submitted, undisputed invoices not more than 45 days after (i) the date of acceptance of Deliverables or performance of Services; or (ii) receipt of an undisputed invoice, whichever is later.
- 31. **TAXES:** Unless otherwise required by law, the State of California is exempt from Federal excise taxes. The State will only pay for any State or local sales or use taxes on the Services rendered or Goods supplied to the State pursuant to this Contract.
- 32. **NEWLY MANUFACTURED GOODS:** All Goods furnished under this Contract shall be newly manufactured Goods or certified as new and warranted as new by the manufacturer; used or reconditioned Goods are prohibited, unless otherwise specified.
- 33. **CONTRACT MODIFICATION:** No amendment or variation of the terms of this Contract shall be valid unless made in writing, signed by the parties and approved as required. Notwithstanding the foregoing, service agreements may be modified by service provider from time to time without the necessity of amending the Contract so long as any such modification does not degrade the functionality or security features of the Cloud Services, pose unacceptable level of risk to the State, or amend or modify any clauses of this Contract. Service agreements shall be subject to Order of Precedence. In

the event of the conflict between the terms of the Contract and any subsequently modified online terms, the Contract shall take precedence pursuant to Order of Precedence. No oral understanding or agreement not incorporated in the Contract is binding on any of the parties.

34. **CONFIDENTIALITY OF DATA:** All financial, statistical, personal, technical and other data and information relating to the State's operation which are designated confidential by the State and made available to the Contractor in order to carry out this Contract, or which become available to the Contractor in carrying out this Contract, shall be protected by the Contractor from unauthorized use and disclosure through the observance of the same or more effective procedural requirements as are applicable to the State. The identification of all such confidential data and information as well as the State's procedural requirements for protection of such data and information from unauthorized use and disclosure shall be provided by the State in writing to the Contractor. Contractor shall comply, and ensure compliance by the service provider, with the security and data protection provisions set forth in this Contract. Contractor shall have appropriate agreements in place to ensure confidentiality and security of State Data required pursuant to the Contract. Contractor shall ensure that all Contractor and service provider personnel with access to State Data shall comply with security and confidentiality obligations set forth in the Contract. If the methods and procedures employed by the Contractor for the protection of the Contractor's data and information are deemed by the State to be adequate for the protection of the State's ~~confidential~~ Confidential information Information, such methods and procedures may be used, with the written consent of the State, to carry out the intent of this paragraph. The Contractor shall not be required under the provisions of this paragraph to keep confidential any data or information which is or becomes publicly available, is already rightfully in the Contractor's possession without obligation of

confidentiality, is independently developed by the Contractor outside the scope of this Contract, or is rightfully obtained from third parties. All rights, including all intellectual property rights, in and to State Data, shall remain the exclusive property of the State. Contractor has a limited, non-exclusive license to access and use State Data solely for performing its obligations under the Contract. Nothing herein shall be construed to confer any license or right to State Data, including User tracking and exception data within the System, by implication, estoppel, or otherwise, under U.S. Intellectual Property Rights, to any third-party. Unauthorized use of State Data by Contractor or third parties is prohibited. For the purposes of this requirement, the phrase "unauthorized use" includes data mining, machine learning from data, or processing of data, stored or transmitted by the System, for any purpose that is not authorized by the Contract or Statement of Work. Contractor shall not collect, use, disclose, retain, or maintain (collectively, "use") State Data except as necessary and proportionate to perform Contractor's obligations under the Contract. Contractor shall not: (a) transfer, share, rent, barter, trade, sell, loan, lease, or otherwise distribute or make available to any third party any State Data except as expressly permitted by the Contract; (b) copy, modify, destroy, or delete State Data during the Contract term; and (c) shall not sell or share State Data or Personal Information collected in the service of the Contract with the State. For the purposes of this, "collect" and "collected" have the meaning provided in Civil Code section 1798.140, subdivision (f); and (b) "sell" has the meaning provided in Civil Code section 1798.140, subdivision (ad)(1).

35. **NEWS RELEASES:** Unless otherwise exempted, news releases, endorsements, advertising, and social media content pertaining to this Contract shall not be made without prior written approval of the State.
36. **DOCUMENTATION:**
- a) The Contractor agrees to provide to the State, at no charge, all Documentation as described within the Statement of Work,

and updated versions thereof, which are necessary or useful to the State in its use of the System provided hereunder. The Contractor agrees to provide additional Documentation at prices not in excess of charges made by the Contractor to its other customers for similar Documentation.

- b) If the Contractor is unable to perform maintenance or the State desires to perform its own maintenance on the System or other project Deliverables or Services implemented or purchased under this Contract then upon written Notice by the State the Contractor will provide at Contractor's then current rates and fees adequate and reasonable assistance including relevant Documentation to allow the State to maintain the System or other project Deliverables or Services based on the Contractor's methodology. The Contractor agrees that the State may reproduce such Documentation for its own use in maintaining the System or other project Deliverables or Services. If the Contractor is unable to perform maintenance, the Contractor agrees to license any other Contractor that the State may have hired to maintain the Equipment to use the above noted Documentation. The State agrees to include the Contractor's copyright notice on any such Documentation reproduced, in accordance with copyright instructions to be provided by the Contractor.

37. RIGHTS IN WORK PRODUCT:

- a) All inventions, discoveries, intellectual property, technical communications and records originated or prepared by the Contractor pursuant to this Contract including papers, reports, charts, computer programs, and other Documentation or improvements thereto, and including the Contractor's administrative communications and records relating to this Contract (collectively, the "Work Product"), shall be the State's exclusive property. The State shall retain all ownership rights in any Software or modifications thereof

and associated documentation designed, developed or installed with Federal financial participation as required by subdivision (a) of 45 CFR 95.617. The U.S. Department of Health and Human Services reserves a royalty-free, non-exclusive and irrevocable license to reproduce, publish and otherwise use and to authorize others to use for Federal Government purposes such Software, modifications and documentation as required by subdivision (b) of 45 CFR 95.617. Proprietary operating/vendor Software packages which are provided at established catalog or market prices and sold or leased to the general public shall not be subject to the ownership provisions in required by subdivisions (a) and (b) of 45 CFR 95.617. The provisions of this sub-section a) may be revised in a Statement of Work.

- b) Software, Cloud Services, and other materials developed or otherwise obtained by or for the Contractor or its affiliates independently of this Contract or applicable purchase order ("Pre-Existing Materials") do not constitute Work Product. If the Contractor creates derivative works of Pre-Existing Materials, the elements of such derivative works created pursuant to this Contract constitute Work Product, but other elements do not. Nothing in this Section 37 will be construed to interfere with the Contractor's or its affiliates' ownership of Pre-Existing Materials.
- c) The ideas, concepts, know-how, or techniques relating to data processing, developed during the course of this Contract by the Contractor or jointly by the Contractor and the State may be used by either party without obligation of notice or accounting.
- d) This Contract shall not preclude the Contractor from developing materials outside this Contract that are competitive, irrespective of their similarity to materials which might be delivered to the State pursuant to this Contract.
- 38. SOFTWARE LICENSE:** Unless otherwise specified in the Statement of Work and

subject to the Federal Government purposes provisions in Provision 37 sub-section (a), the Contractor hereby grants to the State and the State accepts from the Contractor, subject to the terms and conditions of this Contract, a perpetual, irrevocable, royalty-free, nonexclusive, license to use Custom Software, Cloud Services, and any Documentation or Work Product in this Contract.

- a) Upon written request of the State, the Contractor shall execute a written agreement naming the State and the U.S. Federal Government as licensees, memorializing the terms of the license in a form acceptable to the State.
- b) Acceptance of Third-Party Software and Custom Software will be governed by the terms and conditions of this Contract.

39. PROTECTION OF PROPRIETARY SOFTWARE AND OTHER PROPRIETARY DATA:

- a) The State agrees that all material appropriately marked or identified in writing as proprietary, and furnished hereunder are provided for the State's exclusive use for the purposes of this Contract only. All such proprietary data shall remain the property of the Contractor. The State agrees to take all reasonable steps to insure that such proprietary data are not disclosed to others, without prior written consent of the Contractor, subject to the California Public Records Act.
- b) The State will insure, prior to disposing of any media, that any licensed materials contained thereon have been erased or otherwise destroyed.
- c) The State agrees that it will take appropriate action by instruction, agreement or otherwise with its employees or other persons permitted access to licensed software and other proprietary data to satisfy its obligations in this Contract with respect to use, copying, modification, protection and security of proprietary software and other proprietary data.

40. RIGHT TO COPY OR MODIFY:

- a) Any Software provided by the Contractor in machine-readable form may be copied, in whole or in part, in printed or machine-readable form for use by the State with the Cloud Services or Machine, to perform one-time benchmark tests, for archival or emergency restart purposes, to replace a worn copy, to understand the contents of such machine-readable material, or to modify the Software as provided below; provided, however, that no more than the number of printed copies and machine-readable copies as specified in the Statement of Work will be in existence under this Contract at any time without prior written consent of the Contractor. Such consent shall not be unreasonably withheld by the Contractor. The original, and any copies of the Software, in whole or in part, which are made hereunder shall be the property of the Contractor.
- b) The State may modify any non-personal computer Software, in machine-readable form, for its own use and merge it into other program material. Any portion of the Software included in any merged program material shall be used only on the Cloud Services or Machines and shall be subject to the terms and conditions of the Contract.

- 41. FUTURE RELEASES:** Unless otherwise specifically provided in this Contract, or the Statement of Work, if improved versions, e.g., patches, bug fixes, updates or releases, of any Software or Cloud Services are developed by the Contractor, and are made available to other licensees, they will be made available to the State at no additional cost only if such are made available to other licensees at no additional cost. If the Contractor offers new versions or upgrades to the Software or Cloud Services, they shall be made available to the State at the State's option at a price no greater than the Contract price plus a price increase proportionate to the increase from the list price of the original version to that of the new version, if any. If the Software or Cloud Services has no list price, such price increase will be proportionate to the increase in average

price from the original to the new version, if any, as estimated by the Contractor in good faith.

42. ENCRYPTION/CPU ID AUTHORIZATION CODES:

- a) When Encryption/CPU Identification (ID) authorization codes are required to operate the Cloud Services or Software, the Contractor will provide all codes to the State with delivery of the Cloud Services or Software.
- b) In case of an inoperative Cloud Service or Machine, the Contractor will provide a temporary encryption/CPU ID authorization code to the State for use on a temporarily authorized CPU until the Cloud Services or Machine is returned to operation.
- c) When changes in the Cloud Services or Machines occur, the State will notify the Contractor via telephone and/or e-mail of such change. Upon receipt of such notice, the Contractor will issue via telephone and/or e-mail to the State within 24 hours, a temporary encryption ID authorization code for use on the Cloud Services or Machine until such time as permanent code is assigned.

43. PATENT, COPYRIGHT AND TRADE SECRET INDEMNITY:

- a) Contractor will indemnify, defend, and save harmless the State, Federal Government, their officers, agents, and employees, from any and all third party claims, costs (including without limitation reasonable attorneys' fees), and losses for infringement or violation of any U.S. Intellectual Property Right by any product or service provided hereunder. With respect to claims arising from computer Hardware or Software manufactured by a third party and sold by Contractor as a reseller, Contractor will pass through to the State and Federal Government such indemnity rights as it receives from such third party ("Third Party Obligation") and will cooperate in enforcing them; provided that if the third party manufacturer fails to honor the Third Party Obligation, Contractor will provide the State and

Federal Government with indemnity protection equal to that called for by the Third Party Obligation, but in no event greater than that called for in the first sentence of this Section). The provisions of the preceding sentence apply only to third party Cloud Services, Hardware or Software sold as a distinct unit and accepted by the State.

Unless a Third Party Obligation provides otherwise, the defense and payment obligations set forth in this Section will be conditional upon the following:

- (i) The State will notify the Contractor of any such claim in writing and tender the defense thereof within a reasonable time; and
 - (ii) The Contractor will have sole control of the defense of any action on such claim and all negotiations for its settlement or compromise; provided that (a) when substantial principles of government or public law are involved, when litigation might create precedent affecting future State operations or liability, or when involvement of the State is otherwise mandated by law, the State may participate in such action at its own expense with respect to attorneys' fees and costs (but not liability); (b) where a settlement would impose liability on the State, affect principles of California government or public law, or impact the authority of the State, the State will have the right to approve or disapprove any settlement or compromise, which approval will not unreasonably be withheld or delayed; and (c) the State will reasonably cooperate in the defense and in any related settlement negotiations.
- b) Should the Deliverables, or the operation thereof, become, or in the Contractor's opinion are likely to become, the subject of a claim of infringement or violation of a U.S. Intellectual Property Right, the State shall permit the Contractor, at its option and expense, either to procure for the

State the right to continue using the Deliverables, or to replace or modify the same so that they become non-infringing. If none of these options can reasonably be taken, or if the use of such Deliverables by the State shall be prevented by injunction, the Contractor agrees to take back such Deliverables and make every reasonable effort to assist the State in procuring substitute Deliverables. If, in the sole opinion of the State, the return of such infringing Deliverables makes the retention of other Deliverables acquired from the Contractor under this Contract impractical, the State shall then have the option of terminating such Contracts, or applicable portions thereof, without penalty or termination charge. The Contractor agrees to take back such Deliverables and refund any sums the State has paid the Contractor less any reasonable amount for use or damage.

- c) The Contractor shall have no liability to the State under any provision of this clause with respect to any claim of patent, copyright or trade secret infringement which is based upon:
- (i) The combination or utilization of Deliverables furnished hereunder with Equipment, Software or devices not made or furnished by the Contractor; or,
 - (ii) The operation of Equipment furnished by the Contractor under the control of any Operating Software other than, or in addition to, the current version of Contractor-supplied Operating Software; or
 - (iii) The modification initiated by the State, or a third party at the State's direction, of any Deliverable furnished hereunder; or
 - (iv) The combination or utilization of Software furnished hereunder with non-Contractor supplied Software.
- d) The Contractor certifies that it has appropriate systems and controls in place to ensure that State funds will not be used in the performance of this

Contract for the acquisition, operation or maintenance of computer Software in violation of copyright laws.

44. DISPUTES:

- a) The parties shall deal in good faith and attempt to resolve potential disputes informally. If the dispute persists, the Contractor shall submit to the contracting Department Procurement Chief a written demand for a final decision regarding the disposition of any dispute between the parties arising under, related to or involving this Contract. Contractor's written demand shall be fully supported by factual information, and if such demand involves a cost adjustment to the Contract, the Contractor shall include with the demand a written statement signed by an authorized person indicating that the demand is made in good faith, that the supporting data are accurate and complete and that the amount requested accurately reflects the Contract adjustment for which Contractor believes the State is liable. The contracting Department Procurement Chief shall have 30 days after receipt of Contractor's written demand invoking this Section "Disputes" to render a written decision. If a written decision is not rendered within 30 days after receipt of the Contractor's demand, it shall be deemed a decision adverse to the Contractor's contention. If the Contractor is not satisfied with the decision of the contracting Department Procurement Chief, the Contractor may appeal the decision, in writing, within 15 days of its issuance (or the expiration of the 30 day period in the event no decision is rendered by the contracting department), to the Department Executive Steering Committee, State, who shall have 45 days to render a final decision. If the Contractor does not appeal the decision of the Department Procurement Chief, the decision shall be conclusive and binding regarding the dispute and the Contractor shall be barred from commencing an action in court, or with the Victims Compensation Government

Claims Board, for failure to exhaust Contractor's administrative remedies.

- b) Pending the final resolution of any dispute arising under, related to or involving this Contract, Contractor agrees to diligently proceed with the performance of this Contract, including the delivery of Goods or providing of Services in accordance with the State's instructions regarding this Contract. Contractor's failure to diligently proceed in accordance with the State's instructions regarding this Contract shall be considered a material breach of this Contract.
- c) Any final decision of the State shall be expressly identified as such, shall be in writing, and shall be signed by the Department Director or designee if an appeal was made. If the Department Director or designee fails to render a final decision within 45 days after receipt of the Contractor's appeal for a final decision, it shall be deemed a final decision adverse to the Contractor's contentions. The State's final decision shall be conclusive and binding regarding the dispute unless the Contractor commences an action in a court of competent jurisdiction to contest such decision within 90 days following the date of the final decision or one (1) year following the accrual of the cause of action, whichever is later.
- d) For disputes involving purchases made by the State, the Contractor shall submit to the Department Procurement Chief a written demand for a final decision, which shall be fully supported in the manner described in subsection (a) above. The Department Procurement Chief shall have 30 days to render a final decision. If a final decision is not rendered within 30 days after receipt of the Contractor's demand, it shall be deemed a final decision adverse to the Contractor's contention. The final decision shall be conclusive and binding regarding the dispute unless the Contractor commences an action in a court of competent jurisdiction to contest such

decision within 90 days following the date of the final decision or one (1) year following the accrual of the cause of action, whichever is later.

- e) The dates of decision and appeal in this Section may be modified by mutual consent as applicable, except for the time to commence an action in a court of competent jurisdiction.

45. STOP WORK:

- a) The State may, at any time, by written Stop Work Order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this Contract for a period up to 45 days after the Stop Work Order is delivered to the Contractor, and for any further period to which the parties may agree. The Stop Work Order shall be specifically identified as such and shall indicate it is issued under this clause. Upon receipt of the Stop Work Order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the Stop Work Order during the period of work stoppage. Within a period of 45 days after a Stop Work Order is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the State shall either:
 - (i) Cancel the Stop Work Order; or
 - (ii) Terminate the work covered by the Stop Work Order as provided for in the termination for default or the termination for convenience clause of this Contract.
- b) If a Stop Work Order issued under this clause is canceled or the period of the Stop Work Order or any extension thereof expires, the Contractor shall resume work. The State shall make an equitable adjustment in the delivery schedule, the Contract price or both, and the Contract shall be modified, in writing, accordingly, if:
 - (i) The Stop Work Order results in an increase in the time required for, or in the Contractor's cost properly

allocable to the performance of any part of this Contract; and
(ii) The Contractor asserts its right to an equitable adjustment within 60 days after the end of the period of work stoppage; provided, that if the State decides the facts justify the action, the State may receive and act upon a proposal submitted at any time before final payment under this Contract.

- c) If a Stop Work Order is not canceled and the work covered by the Stop Work Order is terminated in accordance with the provision entitled Termination for the Convenience of the State, the State shall allow reasonable costs resulting from the Stop Work Order in arriving at the termination settlement.
- d) The State shall not be liable to the Contractor for loss of profits because of a Stop Work Order issued under this clause.

46. EXAMINATION AND AUDIT: The Contractor agrees that the State or its designated representative shall have the right to review and copy any records and supporting documentation directly pertaining to performance of this Contract. The Contractor agrees to maintain such records for possible audit for a minimum of ten (10) years after final payment under this Contract, unless a longer period of records retention is stipulated. The Contractor agrees to allow the auditor(s) access to such records during normal business hours and in such a manner so as to not interfere unreasonably with normal business activities and to allow interviews of any employees or others who might reasonably have information related to such records. Further, the Contractor agrees to include a similar right of the State to audit records and interview staff in any subcontract related to performance of this Contract. The State shall provide reasonable advance written Notice of such audit(s) to the Contractor. Regarding Data Center and Cloud Services: Unless otherwise provided in the Statement of Work, for all Contracts requiring NIST SP 800- 53 MODERATE or

higher-level Security and Privacy Controls for Systems and Organizations, Contractor shall undergo an annual Statement on Standards for Attestation Engagements (SSAE) No. 18 Service Organization Control (SOC) 2 Type II audit (or successor), at its own expense, of: (1) its data centers, and (2) Cloud Services that in any way interact with the State's System or Non-Public Data. Contractor shall provide a redacted version of audit reports and Contractor's plan to correct any negative findings upon request. Contractor may remove its proprietary information from the redacted version.

47. FOLLOW ON CONTRACTS:

If the Contractor or its affiliates provides Technical Consulting and Direction (as defined below), the Contractor and its affiliates:

- (i) will not be awarded a subsequent contract to supply the service or system, or any significant component thereof, that is used for or in connection with any subject of such Technical Consulting and Direction; and
- (ii) will not act as consultant to any person or entity that does receive a contract described in sub-section (i). This prohibition will continue for one (1) year after termination of this Contract or completion of the Technical Consulting and Direction, whichever comes later.
 - a) "Technical Consulting and Direction" means Services for which the Contractor received compensation from the State and includes:
 - (i) development of or assistance in the development of work statements, specifications, solicitations, or feasibility studies;
 - (ii) development or design of test requirements;
 - (iii) evaluation of test data;
 - (iv) direction of or evaluation of another Contractor;
 - (v) provision of formal recommendations regarding the acquisition of Information

Technology products or Services;
or

- (vi) provisions of formal recommendations regarding any of the above. For purposes of this Section, “affiliates” are employees, directors, partners, joint venture participants, parent corporations, subsidiaries, or any other entity controlled by, controlling, or under common control with the Contractor. Control exists when an entity owns or directs more than fifty percent (50%) of the outstanding shares or securities representing the right to vote for the election of directors or other managing authority.
- b) To the extent permissible by law, the State, or its designee, may waive the restrictions set forth in this Section by written Notice to the Contractor if the Director determines their application would not be in the State’s best interest. Except as prohibited by law, the restrictions of this Section will not apply:
 - (i) to follow-on advice given by vendors of commercial off-the-shelf products, including Cloud Services, Software, and Hardware, on the operation, integration, repair, or maintenance of such products after sale; or
 - (ii) where the State has entered into a master agreement for Software or services and the scope of work at the time of Contract execution expressly calls for future recommendations among the Contractor’s own products.
- c) The restrictions set forth in this Section are in addition to conflict of interest restrictions imposed on public Contractors by California law (“Conflict Laws”). In the event

of any inconsistency, such Conflict Laws override the provisions of this Section, even if enacted after execution of this Contract.

48. PRIORITY HIRING CONSIDERATIONS: If this Contract includes services in excess of \$200,000, the Contractor shall give priority consideration in filling vacancies in positions funded by the Contract to qualified recipients of aid under Welfare and Institutions Code Section 11200 in accordance with PCC Section 10353.

49. COVENANT AGAINST GRATUITIES: The Contractor warrants that no gratuities (in the form of entertainment, gifts, or otherwise) were offered or given by the Contractor, or any agent or representative of the Contractor, to any officer or employee of the State with a view toward securing the Contract or securing favorable treatment with respect to any determinations concerning the performance of the Contract. For breach or violation of this warranty, the State shall have the right to terminate the Contract, either in whole or in part, and any loss or damage sustained by the State in procuring on the open market any items which the Contractor agreed to supply shall be borne and paid for by the Contractor. The rights and remedies of the State provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or in equity.

50. NONDISCRIMINATION CLAUSE:

- a) During the performance of this Contract, the Contractor and its Subcontractors shall not unlawfully discriminate, harass or allow harassment, against any employee or applicant for employment because of sex, sexual orientation, race, color, ancestry, religious creed, national origin, disability (including HIV and AIDS), medical condition (cancer), age, marital status, and denial of family care leave. The Contractor and Subcontractors shall insure that the evaluation and treatment of their employees and applicants for employment are free from such discrimination and harassment. The

Contractor and Subcontractors shall comply with the provisions of the Fair Employment and Housing Act (Government Code, Section 12990 et seq.) and the applicable regulations promulgated thereunder (California Code of Regulations, Title 2, and Section 7285.0 et seq.). The applicable regulations of the Fair Employment and Housing Commission implementing Government Code Section 12990 (a-f), set forth in Chapter 5 of Division 4 of Title 2 of the California Code of Regulations are incorporated into this Contract by reference and made a part hereof as if set forth in full. The Contractor and its Subcontractors shall give written Notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

- b) The Contractor shall include the nondiscrimination and compliance provisions of this clause in all subcontracts to perform work under the Contract.

51. NATIONAL LABOR RELATIONS BOARD

CERTIFICATION: The Contractor swears under penalty of perjury that no more than one final, unappealable finding of contempt of court by a federal court has been issued against the Contractor within the immediately preceding two-year period because of the Contractor's failure to comply with an order of the National Labor Relations Board. This provision is required by, and shall be construed in accordance with, PCC Section 10296.

52. ASSIGNMENT OF ANTITRUST ACTIONS:

Pursuant to Government Code Sections 4552, 4553, and 4554, the following provisions are incorporated herein:

- a) In submitting a bid to the State, the supplier offers and agrees that if the bid is accepted, it will assign to the State all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 U.S.C. 15) or under the Cartwright Act (Chapter 2, commencing with Section 16700, of Part 2 of Division 7 of the Business and

Professions Code), arising from purchases of Goods, material or other items, or services by the supplier for sale to the State pursuant to the solicitation. Such assignment shall be made and become effective at the time the State tenders final payment to the supplier.

- b) If the State receives, either through judgment or settlement, a monetary recovery for a cause of action assigned under this chapter, the assignor shall be entitled to receive reimbursement for actual legal costs incurred and may, upon demand, recover from the State any portion of the recovery, including treble damages, attributable to overcharges that were paid by the assignor but were not paid by the State as part of the bid price, less the expenses incurred in obtaining that portion of the recovery.
- c) Upon demand in writing by the assignor, the assignee shall, within one year from such demand, reassign the cause of action assigned under this part if the assignor has been or may have been injured by the violation of law for which the cause of action arose and
 - (i) the assignee has not been injured thereby, or
 - (ii) the assignee declines to file a court action for the cause of action.

53. DRUG FREE WORKPLACE

CERTIFICATION: The Contractor certifies under penalty of perjury under the laws of the State of California that the Contractor will comply with the requirements of the Drug-Free Workplace Act of 1990 (Government Code Section 8350 et seq.) and will provide a drug-free workplace by taking the following actions:

- a) Publish a statement notifying employees that unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited and specifying actions to be taken against employees for violations, as required by Government Code Section 8355(a).

- b) Establish a Drug-Free Awareness Program as required by Government Code Section 8355(b) to inform employees about all of the following:
 - (i) the dangers of drug abuse in the workplace;
 - (ii) the person's or organization's policy of maintaining a drug-free workplace;
 - (iii) any available counseling, rehabilitation and employee assistance programs; and,
 - (iv) penalties that may be imposed upon employees for drug abuse violations.
- c) Provide, as required by Government Code Section 8355(c), that every employee who works on the proposed or resulting Contract:
 - (i) will receive a copy of the company's drug-free policy statement; and,
 - (ii) will agree to abide by the terms of the company's statement as a condition of employment on the Contract.

54. FOUR-DIGIT DATE COMPLIANCE:

Contractor warrants that it will provide only Four-Digit Date Compliant (as defined below) Deliverables and/or Services to the State. "Four Digit Date Compliant" Deliverables and Services can accurately process, calculate, compare, and sequence date data, including without limitation date data arising out of or relating to leap years and changes in centuries. This warranty and representation is subject to the warranty terms and conditions of this Contract and does not limit the generality of warranty obligations set forth elsewhere herein.

55. SWEATFREE CODE OF CONDUCT:

- a) Contractor declares under penalty of perjury that no equipment, materials, or supplies furnished to the State pursuant to the Contract have been produced in whole or in part by sweatshop labor, forced labor, convict labor, indentured labor under penal sanction, abusive forms of child labor or exploitation of children in sweatshop labor, or with the benefit of sweatshop labor, forced labor, convict labor, indentured

labor under penal sanction, abusive forms of child labor or exploitation of children in sweatshop labor. The Contractor further declares under penalty of perjury that they adhere to the Sweatfree Code of Conduct as set forth on the California Department of Industrial Relations website located at www.dir.ca.gov, and Public Contract Code Section 6108.

- b) The Contractor agrees to cooperate fully in providing reasonable access to its records, documents, agents or employees, or premises if reasonably required by authorized officials of the State, the Department of Industrial Relations, or the Department of Justice to determine the Contractor's compliance with the requirements under paragraph (a).

56. RECYCLED CONTENT REQUIREMENTS:

The Contractor shall certify in writing under penalty of perjury, the minimum, if not exact, percentage of post-consumer material (as defined in the Public Contract Code (PCC) Section 12200-12209), in products, materials, goods, or supplies offered or sold to the State that fall under any of the statutory categories regardless of whether the product meets the requirements of Section 12209. The certification shall be provided by the contractor, even if the product or good contains no postconsumer recycled material, and even if the postconsumer content is unknown. With respect to printer or duplication cartridges that comply with the requirements of Section 12156(e), the certification required by this subdivision shall specify that the cartridges so comply (PCC 12205 (b)(2)). A state agency contracting officer may waive the certification requirements if the percentage of postconsumer material in the products, materials, goods, or supplies can be verified in a written advertisement, including, but not limited to, a product label, a catalog, or a manufacturer or vendor Internet web site. Contractors are to use, to the maximum extent economically feasible in the performance of the contract work, recycled content products (PCC 12203(d)).

57. CHILD SUPPORT COMPLIANCE ACT:

For any Contract in excess of \$100,000, the Contractor acknowledges in accordance with PCC Section 7110, that:

- a) The Contractor recognizes the importance of child and family support obligations and shall fully comply with all applicable State and federal laws relating to child and family support enforcement, including, but not limited to, disclosure of information and compliance with earnings assignment orders, as provided in Chapter 8 (commencing with Section 5200) of Part 5 of Division 9 of the Family Code; and
- b) The Contractor, to the best of its knowledge is fully complying with the earnings assignment orders of all employees and is providing the names of all new employees to the New Hire Registry maintained by the California Employment Development Department.

58. AMERICANS WITH DISABILITIES ACT:

The Contractor assures the State that the Contractor complies with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.).

59. ELECTRONIC WASTE RECYCLING ACT OF 2003:

The Contractor certifies that it complies with the applicable requirements of the Electronic Waste Recycling Act of 2003, Chapter 8.5, Part 3 of Division 30, commencing with Section 42460 of the Public Resources Code. The Contractor shall maintain documentation and provide reasonable access to its records and documents that evidence compliance.

60. USE TAX COLLECTION: In accordance with PCC Section 10295.1, the Contractor certifies that it complies with the requirements of Section 7101 of the Revenue and Taxation Code. Contractor further certifies that it will immediately advise the State of any change in its retailer's seller's permit or certification of registration or applicable affiliate's seller's permit or certificate of registration as described in subdivision (a) of PCC Section 10295.1.

61. EXPATRIATE CORPORATIONS: Contractor hereby declares that it is not an expatriate corporation or subsidiary of an expatriate corporation within the meaning of PCC

Sections 10286 and 10286.1, and is eligible to contract with the State.

62. DOMESTIC PARTNERS: For contracts over \$100,000 executed or amended after January 2007, the Contractor certifies that the Contractor is in compliance with Public Contract Code Section 10295.3.

63. SMALL BUSINESS PARTICIPATION AND DVBE PARTICIPATION REPORTING REQUIREMENTS:

- a) If for this Contract the Contractor made a commitment to achieve small business participation, then the Contractor must within 60 days of receiving final payment under this Contract (or within such other time period as may be specified elsewhere in this Contract) report to the awarding department the actual percentage of small business participation that was achieved. (Govt. Code § 14841.)
- b) If for this Contract the Contractor made a commitment to achieve disabled veteran business enterprise (DVBE) participation, then Contractor must within 60 days of receiving final payment under this Contract (or within such other time period as may be specified elsewhere in this Contract) certify in a report to the awarding department: (1) the total amount the prime Contractor received under the Contract; (2) the name and address of the DVBE(s) that participated in the performance of the Contract; (3) the amount each DVBE received from the prime Contractor; (4) that all payments under the Contract have been made to the DVBE; and (5) the actual percentage of DVBE participation that was achieved. A person or entity that knowingly provides false information shall be subject to a civil penalty for each violation. (Mil. & Vets. Code § 999.5(d); Govt. Code § 14841.)

64. LOSS LEADER: It is unlawful for any person engaged in business within this state to sell or use any article or product as a "loss leader" as defined in Section 17030 of the Business and Professions Code. (PCC 12104.5(b).).

**65. COMPLIANCE WITH DATA
PROTECTION LAWS, POLICIES &
REGULATIONS:**

Subject to Section 66 below but notwithstanding anything to the contrary in the Contract, Contractor shall comply with the data protection laws, regulations, and policies relating to the collection, maintenance, transmission, use, receipt, storage, disclosure, retention, destruction, unavailability, security, or other use or processing of State Data in connection with Contractor's provision of Deliverables under the Contract, including but not limited to, and to the extent applicable:

- a) the California Information Practices Act (Civil Code § 1798 et seq.),
- b) Federal Privacy Act of 1974,
- c) Health Insurance Portability and Accountability Act of 1996,
- d) IRS 1075 regulations,
- e) Health Information Technology for Economic and Clinical (HITECH) Act,
- f) Criminal Justice Information Services (CJIS) Security Policy,
- g) Social Security Administration (SSA) Electronic Information Exchange Security Requirements,
- h) Payment Card Industry (PCI) Data Security Standard (DSS),
- i) NIST Special Publications,
- j) California State Administrative Manual (SAM) (Chapters 4983, 5100, 5300), and
- k) California Statewide Information Management Manual (SIMM) Sections 5305A, 5310A and B, 5315-B, 5325A and B, 5340 A and C, and 5360B.

Contractor shall not take, or fail to take, any action that would put the State in violation of such data protection laws, policies, and regulations.

**66. DATA CLASSIFICATION STANDARDS
& SECURITY CONTROLS:**

- a) Unless otherwise specified in the Special Provisions or Statement of Work, security requirements designated in these provisions are assuming a National Institute of Standards and Technology (NIST) MODERATE classification. For a

higher or lower data classification standard, State shall:

- (i) Classify their data pursuant to the State Administrative Manual (SAM) 5305.5; and
 - (ii) Obtain approval from the State Chief Information Security Officer (CISO) or State Project Director or Designee prior to modifying this Section through the Statement of Work to meet the needs of the Contract.
- b) Contractor shall comply with the current version of the NIST Special Publication (SP) 800-53 Security and Privacy Controls for Systems and Organizations. Controls shall be applied at the MODERATE level. Subject to the prior written approval of the State CISO or designee, Contractor may submit a current ISO 27001 certification in satisfaction of the foregoing requirements of this subsection. Responsibility to obtain CISO approval lies with the State. Contractor shall comply with NIST 800-171, if applicable, and shall implement and maintain a System Security Plan with respect to any System that are part of the System or the Contractor has assisted the State to implement and any of Contractor's systems that in any way interact with the State's System or State Data. Contractor shall ensure such plan is reviewed annually.

Contractor shall implement and maintain all appropriate administrative, physical, technical, and procedural safeguards in accordance with applicable laws, policies, and regulations at all times during the Contract term, to secure State Data from Data Breach, and protect State Data and Systems, Services, Cloud Services and components thereof, from unauthorized or unlawful use, access, modification, disclosure or destruction, introduction of viruses, disabling devices, malware and other forms of

malicious or inadvertent acts that can disrupt the State's access.

End-to-end encryption shall be implemented for all Personal Information and Non-Public Data that is transmitted, stored, or accessed both inside and outside the secure internal network, including Contractor's servers. The Statement of Work or Service Level Agreement will specify which Party is responsible for encryption and access control of the State Data under the Contract. If the Statement of Work or Service Level Agreement are silent, then the State is responsible for encryption and access control. All Non-Public or Personal Information must be encrypted at rest and in transit with validated cryptography standards as referenced in FIPS 140-3 (or higher).

The Parties acknowledge that information transmitted by the State to Contractor or service provider may inadvertently contain Federal Tax Information (FTI). The State will use all reasonable efforts to prevent the transmittal of FTI to Contractor or service provider under the Contract. The State further acknowledges that Contractor or service provider does not require any "access" to, or "receipt" or "storage" of FTI to perform the Cloud Services under the Contract. Contractor or service provider further acknowledge that Contractor or service provider shall not knowingly access or permit access to such FTI, unless directed by the State. Access to FTI is out-of-scope of the Cloud Services. To the extent that Contractor's or service provider's access to FTI is "incidental" to Contractor's provision of Cloud Services, it is the Parties' view that such incidental exposure should not legally subject Contractor or service provider to the Internal Revenue Service (IRS) requirements set forth in IRS Publication 1075, Section 11.2. However, if the IRS ultimately takes a contrary position, and determines that Contractor, service provider or the State should have nevertheless complied with the requirements of IRS Publication 1075, the

Parties will immediately evaluate the feasibility of continued performance under the Contract.

Patch Management: Unless otherwise provided in the Statement of Work, all of Contractor's workstations, laptops, and other systems that process or store State Data must have operating system and application security patches applied, with system reboot if necessary. Contractor shall maintain a documented patch management process which determines installation timeframe based on risk assessment. At a minimum, emergency (vulnerability and active exploit) patches must be applied immediately, while critical (vulnerability and no exploit known) patches must be applied within 30 Days of release. All other applicable patches must be installed within 90 Days of release.

Endpoint Protection Standard: All Contractor workstations, laptops, and other systems used to process or store State Data must install and actively use a comprehensive endpoint protection solution that will at minimum comply with SIMM 5335-A.

67. **CLOUD SERVICE AVAILABILITY:** The minimum standards for Cloud Services availability shall be as set forth herein. Nothing herein precludes the State from specifying a higher standard for Cloud Services availability in the Special Provisions or Statement of Work. Requests for a lower Cloud Services availability standard shall require the written approval of the State CISO or State Project Director or Designee prior to Contract execution. Responsibility to obtain this approval lies with the State.
- The Cloud Services shall be available 24 hours per Day, 365 Days per year, excluding agreed-upon maintenance downtime (Cloud Service availability).
 - If the monthly Cloud Service availability averages less than 99.9% (excluding agreed-upon maintenance downtime), the State shall be entitled to recover damages, apply credits, or use other contractual remedies as set forth in the Contract.

- c) If the monthly Cloud Service availability averages less than 99.9% (excluding agreed-upon maintenance downtime) for 3 or more months in a rolling 12- month period, the State may terminate the Contract for material breach in accordance with Section 23 (Termination for Default).
- d) Contractor shall provide advance written Notice to the State in the manner set forth in the Contract of any major upgrades or changes that will affect Cloud Service availability.

68. **DATA AVAILABILITY:** The minimum standards for State Data availability shall be as set forth herein. Nothing herein prevents the State from specifying a higher standard for Data availability in the Special Provisions or Statement of Work. Requests for a lower Data availability standard shall require the written approval of the State CISO or State Project Director or Designee prior to Contract execution. Responsibility to obtain approval lies with the State.

- a) State Data shall be available 24 hours per Day, 365 Days per year, excluding agreed- upon maintenance downtime (Data availability).
- b) If the monthly Data availability averages less than 99.9% (excluding agreed-upon maintenance downtime), the State shall be entitled to recover damages, apply credits, or use other contractual remedies as set forth in the Special Provisions or Statement of Work if the State is unable to access the State Data as a result of: (i.) Acts or omissions of Contractor; (ii.) Acts or omissions of third parties working on behalf of Contractor; (iii.) Network compromise, network intrusion, hacks, introduction of viruses, disabling devices, malware and other forms of attack that can disrupt access to Contractor's server, to the extent such attack would have been prevented by Contractor taking reasonable industry standard precautions; or (iv.) Power outages or

other telecommunications or Internet failures, to the extent such outages were within Contractor's direct or express control.

- c) If the monthly Data Availability averages less than 99.9% (excluding agreed-upon maintenance downtime) for 3 or more months in a rolling 12- month period, the State may terminate the Contract for material breach in accordance with Section 23 (Termination for Default).

69. **ARTIFICIAL INTELLIGENCE:**

Disclosure Obligations:

- a) Contractor must immediately notify the State in writing if it: (1) intends to provide AI as a Deliverable to the State; or (2) intends to utilize AI, including AI from third parties, to complete all or a portion of any Deliverable that materially impacts: (i) functionality of the System, (ii) risk to the State, or (iii) Contract performance.
- b) Such notification shall be provided to the State designee identified in this Contract.
- c) At the direction of the State, Contractor shall discontinue the provision to the State of any previously unreported AI that results in a material impact to the functionality of the System, risk to the State, or Contract performance, as determined by the State.
- d) If the use of previously undisclosed AI is approved by the State, then Contractor will update the Deliverable description, and the Parties will amend the Contract accordingly, which may include incorporating the AI Special Provisions into the Contract, at no additional cost to the State.

Failure to Disclose or Discontinue AI Use: The State, at its sole discretion, may consider Contractor's failure to disclose or discontinue the provision or use of AI as described above, to constitute a material breach of Contract when such failure results in a material

impact to functionality of the System, risk to the State, or Contract performance. The State is entitled to seek any and all remedies available to it under law as a result of such breach, including but not limited to termination of the Contract, for default pursuant to Section 23.

Contractor's Obligations For Responsible Use: Contractor shall ensure that it has obtained all necessary consents, permissions, and licenses from data subjects and third parties to use the AI for this Contract. Subject to Section 28, Contractor represents and warrants, it has the appropriate U.S. Intellectual Property Rights associated with any AI used in the Deliverables provided under the Contract.

Contractor shall ensure that the AI included, or made available as part of the Deliverables is equitable, non-discriminatory, and reasonably well-designed to avoid harmful, offensive, dangerous, and unlawful impact.

(Government Code 11549.63. Contractor shall be liable for any Hallucination produced by the AI that has an adverse impact on Generated Data or a Deliverable.

Contractor shall comply with all applicable laws and regulations, including as set forth in Section 7 above and these General Provisions in relation to the provision or use of any AI in the Deliverables.

AI Training Data Ownership: Except as otherwise agreed to by the Parties, Contractor shall retain all ownership and intellectual property rights in the AI Training Data it provides.

Rights To State Generated Data: In addition to government purpose rights set forth in Section 37, the Parties agree that Generated Data created from a State provided Prompt is not a derivative work of the AI Training Data.

Notwithstanding the preceding sentence, in the event a court of competent jurisdiction determines that Generated Data created from a State-provided Prompt constitutes a derivative work of

the AI Training Data, Contractor agrees to grant the State an unlimited, irrevocable, worldwide, perpetual, royalty-free, non-exclusive right, and license to use, modify, reproduce, perform, release, display, create derivative works from, and disclose the Generated Data for any State Government Purpose Rights.

Contractor's Use Of State Data: Contractor shall not incorporate any Non-Public State Data into AI Training Data and shall not otherwise utilize Non-Public State Data to train, tune, maintain, improve, or develop AI, except with the express written authorization from the State specifying the Non-Public State Data that may be used along with the acceptable scope of such usage.

APPENDIX A-2 - SPECIAL PROVISIONS

1 DEFINITIONS

Definitions for terms in these Special Provisions shall be as stated in the Appendix C, GLOSSARY or the General Provisions – Information Technology, as provided throughout the document.

2 CONTRACT AND SPECIAL PROVISIONS

As used in these Special Provisions and unless otherwise stated the phrase “this Contract,” “the Contract”, or “Contract” shall refer to the Contract as defined in the General Provisions, in effect at any given time.

3 SCOPE OF WORK

The Contractor shall provide a System Development, Maintenance and Operations (SDMO) solution for the California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS) more specifically provided in the Statement of Work (SOW), to the Office of Technology & Solutions Integration (OTSI) for the benefit of Covered California and the California Department of Health Care Service (DHCS).

4 TERM

The term of the Contract shall be as provided in the Appendix A-4, STATEMENT OF WORK (SOW) Section 1.1, TERM.

5 FINANCIAL MATTERS

5.1 PAYMENT

Payment shall be made in accordance with Paragraph 30 of the General Provisions and shall not be due until receipt of an undisputed invoice following the Acceptance of an applicable Deliverable or Service. An invoice received prior to State Acceptance of a Deliverable shall not be due until after the Acceptance of the Deliverable. For Services received, payment shall be made in arrears following the month in which the Service was provided to the State.

The Contractor shall be paid in accordance with the requirements described in Appendix D, COST WORKBOOK. The Contractor shall not increase the amounts due from the State for Services and Deliverables under this Contract. In no case shall the maximum number of hours allowed, or the Contract budget amount exceed that provided in Appendix D, COST WORKBOOK. The amount in the Cost Workbook is the maximum budget for this Contract. Actual amounts paid by the State to the Contractor are based on the Services performed and accepted Deliverables and work product or milestone.

[The Contractor commits to review the required costs for each year and provide appropriate credit to the State for any Deliverables or Services that are no longer used by the State.](#)

5.2 INVOICES

Invoices shall be submitted the month following the month in which the State accepted the Deliverable or Services were performed. The Contractor shall provide sufficient documentation

supporting its invoices submitted to the State for payment and upon request by the State. The Contractor shall not submit invoices more frequently than monthly.

In no event shall the Contractor submit invoices more than 6 months following the date on which the Deliverable or the Services were accepted by the State. The Contractor shall not, without State approval, invoice for increased costs based on audit findings or other corrections which increase costs outside the State Fiscal Year in which the Deliverable or the Services were invoiced.

The Contractor shall submit electronic invoices and backup documentation monthly, in arrears, in a State-approved format, which shall specify the dollar amount due and in which the Contractor has certified that Services or Deliverables required under the Contract conform to the requirements set forth in this Contract. Invoices payable by the State shall be submitted to the following e-mail address: AccountsPayable@otsi.ca.gov

Electronic invoices must be submitted individually (OTSI shall not accept multiple invoices in a single e-mail). The invoice shall be in PDF format and include all supporting documentation. Additional formats may also be required. The subject line must contain the following:

- Company Name
- Contract Number
- Invoice Number

All invoices submitted must be approved by the State Project Director or designee prior to payment.

Subject to receipt of an undisputed invoice, the Contractor's performance of its obligations in accordance with the terms of the Contract, and to the State's exercise of its rights and remedies, the State shall pay the Contractor the charges for each payment milestone, Deliverable, Service, or other cost following its Acceptance and as described on such invoices which are issued in accordance with the terms of this Contract, within 45 Days of receipt of such invoices.

5.2.1 Inclusion of Contract Number

All invoices, bills of lading, shipping memos, packages, and any other form of correspondence shall refer to the Contract by number plus any unique identifier generated by the State on a Change Request (CR).

5.2.2 Information Required

Invoices shall account for each billable item, description, cost (including Subcontractor costs), and include summary total levels.

Invoices for Equipment, (for example, including physical and virtual hardware, Software and Services, or other items invoiced to the State) shall account for each item by model number, serial number, and physical location with applicable costs broken down by item price and applicable sales tax. The State and the Contractor may mutually agree upon additional or other invoice elements as may be required to accurately describe Deliverables and Services. Subject to Paragraph 31 of the General Provisions, any future increases or decreases in State sales or use tax shall be separately itemized in any applicable invoice.

For approved Change Requests, Contractor may submit an invoice for the approved amount upon State approval of the corresponding payment milestone: (1) at Design Acceptance; (2) at Change Request System Test Acceptance; and (3) at Change Request Implementation

Acceptance. The parties may mutually agree to alternative payment milestones to be described and documented in the executed Change Request.

Additional invoice descriptions, details, and backup documentation, including those for Software, may be mutually agreed upon by the State and the Contractor as required.

5.2.3 Incorrect Invoices

The Contractor shall make every effort to reconcile incorrect invoices in a timely manner, not to exceed 30 Days from Notice by the State of a discrepancy. The State shall withhold payments for disputed invoices, or if divisible, disputed portions of an invoice until the discrepancies have been resolved.

5.3 AVAILABILITY OF FUNDS

Payment pursuant to this Contract, whether in whole or in part, is subject to and contingent upon the continuing availability of federal and State funds for the purposes hereof. If such funds, or any part thereof, become unavailable as reasonably determined by the State, or if the funds the State relied upon to establish or continue this Contract are withdrawn, not appropriated, reduced, or limited in any way, or if additional or modified conditions are placed on such funding, the State in addition to its other remedies may proceed with any of the following alone or in conjunction: (i) issue a Stop Work Order for this Contract or the portion affected thereby; (ii) issue a Change Request to the extent the State determines is necessary; or (iii) five (5) Business Days after providing Notice, immediately terminate this Contract, in whole or in part, and make payment to the Contractor as provided in Paragraph 21 of the General Provisions as a termination for non-appropriation of funds.

5.4 BUDGET CONTINGENCY

Notwithstanding any other provision of this Contract, if the Annual State Budget Act of the current fiscal year or any subsequent fiscal years is not approved by the constitutional or statutory deadlines for enacting a budget and as a result the State's spending authority for this Contract temporarily lapses, upon the request of the State based upon a reasonable good-faith understanding that CalHEERS shall continue to operate and be funded when the Annual State Budget Act is passed by the Legislature and signed by the Governor, the Contractor shall continue to provide the Services contracted for pursuant to this Contract and the State shall pay the Contractor, absent any late fees and/or penalties, in accordance with the California Prompt Payment Act, for such Services upon subsequent passage of the Annual Governor's Budget Act continuing CalHEERS.

5.5 CONTRACTOR EXPENSES

The consideration to be paid to the Contractor, as provided herein, shall be in compensation for all of the Contractor's expenses incurred in the performance hereof, including without limitation travel and per diem, unless otherwise expressly agreed to in writing by the State Project Director or designee prior to the expenditure of such funds.

5.6 OVERPAYMENTS TO CONTRACTOR

The Contractor shall promptly refund to the State the full amount of any erroneous payments, incorrect payments, or overpayments upon determination by the Contractor or upon receipt of Notice from the State Project Director or designee provided that such Notice sets forth in reasonable detail the basis for the State's determination of an erroneous payment, incorrect payment, or overpayment.

5.7 CREDITS AND RIGHT TO WITHHOLD

Amounts due to the State by the Contractor, including but not limited to liquidated or other damages, whether disputed or not, may be deducted, credited or withheld by the State from any money payable to the Contractor pursuant to this Contract. Any such amounts due to the State under this Contract may be applied against the Contractor's invoices with appropriate information attached, upon giving of 30 Days prior Notice by the State Project Director or designee to the Contractor.

5.8 ADVANCE PAYMENTS PROHIBITED

No payments in advance of or in anticipation of Services, or Deliverables to be provided under this Contract shall be provided by the State.

5.9 TRUE COST WITH FIXED BUDGET~~EQUITABLE ADJUSTMENT~~

The Contractor shall provide the Deliverables and Services required as part of the fixed price set upon Contract execution. For the purchase of Hardware, Cloud Services, Software, and any other agreed upon elements, the Contractor shall work within a set Fixed Budget Amount and provide these Deliverables and Services at the True Cost. The State reserves the right to an equitable adjustment of any Deliverables or Services costs. If during any state fiscal year, the market pricing is lower, in excess of 10%, compared to Contractor proposed costs for that year, the Contractor agrees to adjust its billing accordingly. The Contractor commits to review the required costs for each year and provide appropriate credit to the State for any Deliverables or Services that is no longer used by the State.

6 PROJECT MANAGEMENT AND SCOPE

6.1 OVERALL RESPONSIBILITIES OF CONTRACTOR

The Contractor shall have responsibility for providing all Deliverables and Services in accordance with the requirements of the Contract.

6.2 SUPPLEMENTAL CONTRACTS

The State may undertake or award supplemental contracts for work related to this Contract or any portion thereof in the State's best interest. The Contractor shall make commercially reasonable efforts to contract and/or cooperate with such other contractors and the State in all such cases to attain optimal System performance. To the extent that such cooperation requires additional work on the Contractor's part that is beyond the scope of work outlined herein, the parties shall follow the Contract Amendment process. When the addition of new or modification of existing System components or functionality is within the general scope of the Contract, the parties shall follow the Change Request process.

6.3 LIMITATION OF AUTHORITY

6.3.1 Waivers

Only the State Project Director or designee shall have the authority to waive any clause or condition of this Contract on behalf of the State, to the extent permitted by this Contract and applicable law. Any waiver of any clause or condition of this Contract is not effective or binding until made in writing and signed by the State Project Director or designee thereof and approved by the State.

6.3.2 Changes

The State Project Director or designee is the only individual that may authorize changes in scope to this Contract in accordance with Section 12.1 of these Special Provisions, or through a Contract Amendment. The State Project Director or designee shall delegate in writing, authority to authorize changes prior to any changes. All such changes shall be made in writing and approved by the State. Any change proposed by any other State employee, or an employee of any County shall be of no effect.

6.3.3 Continuous Improvement

The Contractor shall on an ongoing basis, as part of its total quality management process, identify, report to the State prior to implementing, and implement ways to improve performance of the Services and the System and identify and apply techniques and tools from other Contractor installations that would benefit the State either operationally or financially.

Additionally, the State may request new or updated tools or techniques to improve Services or System performance. The Contractor shall make every effort to review, recommend additional efficiencies of the tool or technique, and implement the request as directed by the State in agreed upon timeframes (Refer also to SOW Section 6.6 TECHNOLOGY REFRESH).

7 DELIVERABLES AND SERVICES

7.1 GENERAL

The Contractor shall provide the State with the Deliverables and Services listed in the Statement of Work and, if applicable, as further described in the Deliverable Expectation Document (DED) for each Deliverable found in SOW Section 8, DELIVERABLES. The Contractor shall use the Contractor's expert knowledge and this Contract as the basis for the development of the Deliverables. The parties acknowledge that additional Deliverables and Services may be added in the future and agree to work together to identify the contents of and Acceptance Criteria for any additional Deliverables as a Change Request. The Contractor shall retain backup copies on electronic media of all Deliverables until 180 Days after termination or expiration of this Contract and shall provide the State on its request with a copy thereof until that time.

The Deliverables and Services being provided by the Contractor and its Subcontractors, if any, pursuant to this Contract shall be available at no additional cost for inspection and review at any reasonable time by representatives of State or federal government, upon reasonable notice, and if at the Contractor's facility, subject to the Contractor's facility security policies.

Unless otherwise noted in SOW sections (such as the True Cost requirements associated with Hardware, Cloud Services, and Software), the Contractor shall takeover (or develop), analyze, update, and maintain the Deliverable(s), as well as execute all activities, processes and provide all Services identified within each SOW section or the associated Deliverable(s) under the Fixed Price Services of the Contract.

7.2 ACCEPTANCE PROCESS

7.2.1 Delivery and Review of Deliverables

The Contractor shall deliver all Deliverables pursuant to this Contract to the State Project Director or designee for purposes of determining whether the State shall give its Acceptance for such Deliverables in accordance with the Contract requirements.

The State's review of the subset of Deliverables found in SOW Section 8, DELIVERABLES shall be in accordance with the timeframes set forth in the project schedule. The State's review period shall vary with the complexity and volume of the Deliverable. The State shall have at least ten (10) Business Days for such review, unless otherwise agreed to in writing, with the first day starting on the next Business Day after delivery.

7.2.2 Effect of Acceptance

By submitting a Deliverable or performing a Service, the Contractor represents that the Deliverable or Service meets the requirements of this Contract. The parties acknowledge and agree that the State's Acceptance of a Deliverable or Service indicates only that it has reviewed the Deliverable or Service and detected no Deficiencies at that time. The parties agree that the Contract requirements shall be modified only through a Change Request or amendment to this Contract.

7.2.3 Acceptance

The State will provide Acceptance for the Deliverable or Service if it meets the Acceptance Criteria for each Deliverable or Service as spelled out in the Contract, Change Request, and applicable processes, including but not limited to the scope and level of detail prescribed in an applicable Deliverable Expectation Document (DED), within a reasonable amount of time.

7.2.4 Effect of Rejection

If, following the State's review, the Contractor's Deliverable or Service does not meet the Acceptance Criteria, the State shall give Notice of rejection in accordance with Paragraph 16(e) of the General Provisions, with such Notice delineating the reasons for rejection.

7.3 CORRECTIONS OF DEFICIENCIES

The Contractor shall implement corrections to Deliverables or Services depending on the nature of the Deficiency identified. The following corrections shall be applied for the following conditions and shall follow the State-approved timelines as defined within Contract or associated Deliverables:

7.3.1 Corrections for Contractor Requirement Deficiencies

Where the Contractor is non-compliant with a "Contractor shall" requirement, the Contractor shall identify and implement correction in accordance with SOW Section 3.11.4 CORRECTIVE ACTION PLAN (CAP).

7.3.2 Corrections for System Requirement Deficiencies

Where a "System shall" requirement is non-compliant (e.g. Software defect), the Contractor shall identify and implement corrections according to the criteria defined in SOW 4.9.1 Section DEFECT MANAGEMENT PLAN Deliverable.

7.3.3 Corrections for System Security & Performance Deficiencies

Where a Security or Performance issue is raised, the Contractor shall identify and implement corrections in accordance with SOW Sections 6.7.1 SYSTEM SECURITY PLAN, 6.7.2 SYSTEM SECURITY EXECUTION Requirements, and/or 6.13 SYSTEM PERFORMANCE activities.

7.3.4 Corrections for Deliverable Efforts

Where a SOW Section 8 Deliverable (also known as a DEL) is non-compliant with stated requirements, the Contractor shall identify and implement correction in accordance with SOW Section 8.5.2 REVISED FORMAL DELIVERABLES.

7.3.5 Correction to Service Level Agreement (SLA) Deficiencies

Where an SLA is deemed non-compliant, the Contractor shall identify and implement corrections in accordance with the specific guidance provided for each of the SLAs defined in this Contract.

7.4 SERVICES

Except as provided herein, Contractor shall perform the Services in conformance with professional standards for performing services of a similar kind and shall meet or exceed the performance standards stated in the Contract Requirements in performing the Services or providing the Deliverables, including but not limited to Institute of Electrical and Electronics Engineers (IEEE), Project Management Body of Knowledge (PMBOK) or Information Technology Information Library (ITIL), as appropriate. Contractor may adopt alternate or equivalent standards or processes, provided the Contractor obtains prior written approval from the State Project Director or designee.

7.5 RESOLUTION BETWEEN DOCUMENTS

Except as provided in Paragraph 11 of the General Provisions, in the event of a contradiction, conflict, ambiguity, or inconsistency in or between Deliverables, any such contradiction, conflict, ambiguity or inconsistency shall be resolved in favor of the latest State Accepted Deliverable except in the case where a previous documented requirement is inadvertently omitted or not addressed directly in a subsequent Deliverable.

7.6 PROJECT SCHEDULE

The Contractor shall comply with the project schedule management requirements set forth in Appendix A-4, SOW Section 3.2, SCHEDULE MANAGEMENT.

7.6.1 Changes for Deficiency Correction

The project schedule shall not change as a result of additional time required by the Contractor to correct Deficiencies, unless otherwise agreed beforehand in writing by the State Project Director or designee.

7.6.2 Schedule Updates

The Contractor shall regularly provide proposed updates to the Project schedule as described in the SOW and as otherwise necessary throughout the Project to accurately reflect the status of activities, tasks, events, Deliverables, or Services. Any such update shall be deemed a Deliverable and the State Project Director or designee must provide Acceptance prior to its incorporation into the project schedule. Upon Acceptance, the updated project schedule shall replace the then-current project schedule. However, an update to the project schedule shall not relieve the Contractor of liability for Liquidated Damages (LDs) and other damages arising from failure to perform its obligations.

7.7 UPDATES TO STANDARDS, REGULATIONS, AND CODES

Throughout the Statement of Work (SOW) there are compliance requirements that are established by external entities (e.g., IEEE, PMI, ARC-AMPE) which impact how the Contractor produces Deliverables and Services. There are hundreds of such requirements throughout the SOW.

When such a standard, regulation, or code is revised (by these external groups) and made known to the State or the Contractor, the Contractor shall provide the State with an analysis that compares the current standard against the updated standard. The State will then review the analysis and decide via the Change Control Process if they wish for the updated standard to be adopted. If the State wishes the updated standard to be incorporated into the Contract, the State Project Director or designee will notify the Contractor to incorporate the change. Otherwise, the State reserves the right to keep that standard as currently stated.

The initial implementation, update or replacement of any and all standards, regulations, or codes on the project, including all Deliverables and Services, shall be done under the SDMO Fixed Price.

Refer to SOW Section 3.10.8 STANDARDS, REGULATIONS, AND CODES TRACKING AND UPDATES for specific requirements.

8 EQUIPMENT, CLOUD SERVICES, AND SOFTWARE

8.1 SYSTEM COMPONENTS

8.1.1 Placement of CalHEERS Main System Processing Platform Components

Equipment and Cloud Services specified for the main processing for the CalHEERS System (Production and operations Equipment and Cloud Services) shall be installed and shall operate according to the SOW [Section 6](#), CD - 6.17.1 HOSTING SERVICES PLAN Deliverable, unless otherwise agreed to by the State Project Director or designee.

8.1.2 Purchase of Equipment, Cloud Services, and Software

The Contractor shall purchase, in the name of the State, unless otherwise approved by the State, CalHEERS Equipment, Cloud Services, and Software identified in Appendix D COST WORKBOOK and other Equipment, Cloud Services, and Software necessary for SDMO activities as approved by the State.

The Contractor shall purchase, install, and maintain any office Equipment and Software to be used by the Contractor and State staff as outlined in SOW Section 6.18 PROJECT SUPPORT SERVICES, and Appendix D, COST WORKBOOK, including but not limited to workstations, laptops, printers, e-mail servers, copiers, etc.

8.1.3 Title to Equipment, Cloud Services, and Software

The Contractor shall transfer all rights, interests, title and ownership of the Equipment, Cloud Services, and Software required for SDMO activities to the State, unless otherwise directed by the State. Title to all Equipment, licenses to Software, and Cloud Services shall pass to the State. The Contractor shall provide all such Third-Party Software license agreements to the State for pre-approval before securing licenses. The State shall assign to the Contractor the rights necessary under each license agreement for purposes of the Contractor's performance of this Contract.

8.1.4 Third-Party Equipment, Cloud Services, and Software

The Contractor shall procure and maintain any Cloud Services or third-party equipment and associated operating Software, and Third-Party Software identified in the Contractor's proposal or used by the Contractor in operating or providing Services in support of CalHEERS SDMO Services. The State hereby appoints the Contractor as its agent with respect to Cloud Services or Third-Party Equipment and Software for which the license is held by the State. With respect to any such Cloud Services or Third-Party Equipment, and Software, the Contractor's responsibility, as the agent of the State, is to implement all reasonable efforts to repair or provide a work around or suitable replacement product such that any Service or Deliverable provided by the Contractor meets the Contractor's warranty as specified in Paragraph 18 of the General Provisions.

The State shall have the option to purchase any Cloud Services or Equipment identified in the Contractor's proposal directly from a third-party independent vendor, and not from the Contractor. The Contractor shall provide the State with 30 Business Days prior written Notice before purchasing the Cloud Services or Equipment. The Contractor shall be responsible for the maintenance of any such Cloud Services or Equipment and/or associated Operating Software purchased by the State. The Contractor shall keep in effect and current all maintenance agreements, warranty service and support contracts, and licensing agreements for all Cloud Services or Equipment and associated Operating Software for the Contract terms, including any optional extensions.

8.1.5 State Office Installation and Certification

Installation by the Contractor of any Hardware and Software at State Offices or other sites approved by the State, shall be performed by appropriately certified and licensed the Contractor or Subcontractor personnel and in conformity with the manufacturer's and the Contractor's specifications, and State and other Site Requirements. Upon completion of any Installation, the Contractor shall certify in writing to the State Project Director or designee, for each State and other applicable Site location, that all required Site modifications have been satisfactorily completed, that the Hardware has been Installed pursuant to and in conformity with all requirements, and that the Equipment Installation is complete and ready to operate pursuant to the Contractor's specifications. Installation at State Offices is subject to Acceptance by the State. Any installation at other applicable sites is subject to Acceptance by the respective organization.

Any alterations or modifications to any State Office or other applicable Site after the initial procurement and installation that are directly attributable to incomplete or erroneous Specifications provided by the manufacturer or the Contractor and that involve additional expense shall be made at the cost and expense of the Contractor, to the extent that such cost and expense would not have been incurred had complete or correct Specifications been initially provided by the Contractor.

8.1.6 Approvals

The Contractor shall obtain written approval from the State prior to purchasing, providing, and/or using any Equipment, Cloud Services, and Software Products in connection with this Contract, including but not limited to incorporating the Software Products into the System.

8.1.7 Compatibility

The Contractor shall ensure that the Equipment, Cloud Services, and Licenses for all Software Products provided to the State pursuant to this Contract are compatible and may be used

together along with Custom Software developed pursuant to the Contract. The Contractor shall provide a copy of each and every license to the State for all Software Products provided to the State.

8.2 MAINTENANCE

The Contractor shall keep in effect and current for the term of the Contract all Equipment, Cloud Services, and Software maintenance agreements, warranty service and support contracts and licensing agreements for all Equipment, Cloud Services, and Software defined in Appendix D, COST WORKBOOK and required for the ongoing growth and evolution of the project and System.

The Contractor shall maintain and manage for the term of the Contract, System Software including, but not limited to, Commercial Off-the-Shelf (COTS), modified off-the-shelf (MOTS) and Custom Software as part of the base level of Service.

The Contractor shall maintain for the term of the Contract, unless otherwise approved by the State Project Director or designee, all tools and all related data used for the System development and documentation.

The Contractor shall maintain for the term of the Contract, unless otherwise approved by the State Project Director or designee, all tools and related data used for managing and maintaining supporting processes related to the Contract. Tools and related data for supporting processes include, but are not limited to, those used to create documentation, project plans, and reports.

The Contractor shall perform directly or coordinate and ensure performance of all maintenance tasks and activities referenced in this Section 8.2, including, but not limited to, identifying Software warranty and maintenance periods and renewals, and maintaining all licensing agreements, warranty service and support contracts for the term of this Contract.

As the agent of the State, the Contractor shall coordinate the services of Third Parties related to Equipment, Cloud Services, and Software to correct Deficiencies, including but not limited to troubleshooting, repairing, and replacing unless otherwise directed by the State and shall, if necessary, develop temporary solutions or workarounds for or emergency bypass of such Deficiencies.

8.3 DELIVERY

The Contractor shall strictly adhere to the delivery date and Installation Schedules for Equipment specified in the Master Work Plan. Delivery may be restricted by the State to nonpeak commute hours at specific State, county, and public authority sites. If the Contractor delivers in excess of the quantities specified herein, the State shall not be required to make any payment for the excess Goods and may require the Contractor to remove the excess Goods at the Contractor's expense or utilize any other rights available to the State in law or in equity.

8.4 ACCESS

8.4.1 CalHEERS System Component Access

As deemed necessary by the State Project Director or designee, the Contractor shall provide access (read only access, at a minimum, when acceptable to the State), for designated State staff, to any of the CalHEERS components and resources, including but not limited to Data, Cloud Services, Hardware, Software, System jobs, maintenance Schedules, submission and processing statistics, and System monitoring tools (e.g., Splunk, Qualys, and AWS Console access).

8.4.2 Documentation Access

The Contractor shall maintain and provide State staff access to all Deliverables, work products, user guides, processes, procedures, and all other forms of documentation used in support of the CalHEERS Project and System.

8.4.3 Enterprise Tools Access

The Contractor shall maintain and provide State staff access to all enterprise tools used in support of the CalHEERS Project and System.

8.5 CODES

The Contractor shall comply with all applicable federal, State, county, and local codes, inspection standards, and ordinances related to installing the Equipment or Cloud Services which are in effect on the date of Installation. In the event that any Installation Services performed by the Contractor are subsequently found to be in violation of codes in effect on the date of Installation, the Contractor shall bring the Installation Services into compliance at no additional cost.

8.6 STATE OBLIGATION TO PROCURE

The State is not obligated to procure any specific quantity of Equipment, Cloud Services, or Software.

9 OFFSHORE ACTIVITIES

The Contractor is permitted to conduct certain project related activities offshore subject to the limitations provided in this Contract. The Contractor shall not conduct any Services offshore without the prior written consent of the State Project Director or designee, which may be withheld in the State's sole discretion.

9.1 OFFSHORE ACCESS TO PROTECTED INFORMATION

The terms of Attachment A-2.2, OFFSHORE SECURITY, ACCESS AND TECHNOLOGY REQUIREMENTS, shall only apply to the Contractor offshore Staff who are accessing Sensitive Information.

The Contractor offshore Staff accessing Sensitive Information shall be located in a bay segregated from the Contractor Staff without access to Sensitive Information. The following controls shall apply to offshore Staff, regardless of their access to PII or PHI:

1. Security guards shall be posted at all entrances of each facility; and
2. All computers shall be locked down to not allow the use of any external ports and devices including, but not limited to, USB ports, serial ports, and CD or DVD drives, except when required to deliver the Services (e.g., monitor, keyboard, mouse, network connectivity).
3. No offshore access shall be granted to Federal Tax Information (FTI).

9.2 WHOLLY OWNED SUBSIDIARY

The Contractor's offshore Project Staff shall be employees of the Contractor or the Contractor's wholly owned subsidiary. The Contractor's offshore facilities shall comply with all the security protocols set forth in this Contract, including but not limited to Appendix A-4, SOW Section 6.7,

SYSTEM SECURITY, SOW Section 6.17, HOSTING SERVICES, California State Administrative Manual (SAM) 5365, Physical Security, and the HIPAA found at <http://www.hhs.gov/hipaa/>. Additionally, Key Staff, service desk staff, and all others who shall have access to Federal Tax Information (FTI) shall be located in the United States unless otherwise approved by the State Project Director or designee. The Contractor's information security unit shall enforce and monitor the compliance of the System Security Plan and report upon its compliance with the controls to the project team.

10 WARRANTIES

In addition to the warranties expressed in Paragraph 18 of the General Provisions, the Contractor provides the warranties described in this section to the State.

10.1 SYSTEM WARRANTY

The Contractor warrants that the CalHEERS, in whole and in part, including but not limited to any Custom Software, Source Code, database management system, and data design shall function, operate, and perform in all facilities in substantial conformity with the requirements of this Contract and/or any applicable Acceptance Criteria, and Specifications.

10.1.1 Warranty

For purposes of Paragraph 18(a) of the General Provisions and Section 10.1 above, warranties shall begin upon delivery of the Deliverables and activation of Services implemented into Production and end at the end of the Contract. Additionally, for new Services, System components or functionality, the warranties shall commence upon implementation and "activation" of such new Services, System components or functionality by the Contractor or the State. ~~Activation of Services excludes code that has been deployed into Production but has been "switched off" until a later date. In this case, activation of such Software, "switching it on," marks the beginning of the warranty period.~~

10.1.2 Not Under Warranty (NUW)

Not Under Warranty is a term that does not apply to the CalHEERS. At the point of transition completion for any part of CalHEERS, the Contractor shall warranty the activated Deliverables and Services for the entirety of the Contract period.

10.2 LITIGATION WARRANTY

The Contractor warrants that there is no actual or threatened suit by any such third party based on an alleged violation of the rights granted or licensed by the Contractor to the State and the Federal Centers for Medicare and Medicaid Services (CMS) hereunder.

10.3 RE-PERFORMANCE, REPAIR, AND REPLACEMENT

The provisions in this section are intended to clarify the re-performance, repair and replacement obligations of the Contractor pursuant to Paragraph 18(f) of the General Provisions. The Contractor shall promptly, and in all cases within the time periods described in this Contract, and at the Contractor's sole expense, re-perform any Services, correct all Deficiencies, including but not limited to the System, and coordinate the services of third parties for their repair or replacing of any Cloud Services, Hardware, Software, or Equipment not in compliance with all applicable warranties contained in this Contract. If the System fails to meet any Performance Standards established in this Contract, the Contractor shall coordinate the

services of such third parties to modify, reconfigure, upgrade or replace Cloud Services, Hardware, Software, or Equipment at no cost to the State in order to ensure that the System complies with the Performance Standards set forth in the Contract, and shall, if necessary, develop temporary solutions to, workarounds for, or emergency bypasses of such Cloud Services, Hardware, Software, or Equipment giving rise to the noncompliance.

10.4 SERVICES

Except as provided herein, the Contractor shall meet or exceed the performance standards stated in the Contract requirements in performing the Services or providing the Deliverables, including but not limited to Institute of Electrical and Electronics Engineers (IEEE), Project Management Book of Knowledge (PMBOK), Information Technology Infrastructure Library (ITIL), or all other applicable industry standards as appropriate. The Contractor may adopt alternate or equivalent standards or processes, provided the Contractor obtains prior written approval from the State Project Director or designee.

10.5 VERSIONS

The Contractor shall, during the term of the Contract, maintain any and all Third-Party Software and Custom Software provided by the Contractor, at its most current version, or at the State's request, a previous supported version. Extended support for any Software Products must be approved in advance by the State Project Director or designee.

11 ADDITIONAL RIGHTS AND REMEDIES

11.1 SERVICE LEVEL AGREEMENTS AND LIQUIDATED DAMAGES – GENERAL

The State has defined a set of parameters and measurements that define the minimum level of performance for System and Services performance. The definitions, expectations and associated amount of assessment for not meeting these standards are found in Attachment A-2.3, SERVICE LEVEL AGREEMENTS AND LIQUIDATED DAMAGES.

The purpose of the Liquidated Damages provision is to ensure adherence to the requirements of the Contract and to set an amount in advance of a Breach to compensate the State for damages that are impractical or extremely difficult to estimate but which would be sustained by the State in the event the Contractor fails to perform Services as agreed. Liquidated Damages are intended to be a reasonable estimate of the damages and costs the State would sustain as a result of a Breach. They are not intended to be punitive. The State and the Contractor, therefore, presume that in the event the Contractor fails to meet SLAs, the State shall assess the Contractor to pay such amounts as Liquidated Damages, and not as a penalty. The total amount of the Liquidated Damages, either for project delays or for service level delays, shall not exceed 10% of the total value of the Contract, unless otherwise noted, at the time the Liquidated Damages are imposed. The State shall calculate Liquidated Damages owed to the State and shall subtract Liquidated Damages from the payments made by the State to the Contractor. Project SLAs and the amount of Liquidated Damages are found in Attachment A-2.3, SERVICE LEVEL AGREEMENTS AND LIQUIDATED DAMAGES.

11.1.1 Acknowledgement of Harm

The parties agree that any delay or failure by the Contractor to timely perform its obligations by the dates in the Master Work Plan and in accordance with the Acceptance Criteria, Specifications, Performance Standards and other requirements in this Contract shall interfere with the proper and timely delivery of the Deliverables and Services, to the loss and damage of

the State. Further, State may incur costs to maintain the functions that would have otherwise been performed by the Contractor. The Liquidated Damages that may be assessed by the State as a result of the Contractor's delay or failure to perform its obligations in accordance with the terms of this Contract are as described Attachment A-2.3, SERVICE LEVEL AGREEMENTS AND LIQUIDATED DAMAGES. Liquidated Damages shall not be assessed if, as determined by the State, the Contractor's delay or failure to perform its obligations was caused by factors beyond the control of the Contractor, including acts of the State, and without any material error or negligence of the Contractor. The assessment of Liquidated Damages are subject to the dispute resolution process as provided in Paragraph 44 of the General Provisions.

11.1.2 Other Remedies

Nothing in the Liquidated Damages Section 11.1, Service Level Agreements and Liquidated Damages – General, of this Contract shall be construed as relieving the Contractor from performing any other Contract duty or being subject to any other provisions of this Contract not listed in these Liquidated Damages sections, nor is the State's right to enforce any other Contract duty herein or right to seek other remedies for failure to perform any other section of this Contract diminished.

11.2 LIQUIDATED DAMAGES – SPECIFIC AMOUNTS

See Attachment A-2.3, SERVICE LEVEL AGREEMENTS AND LIQUIDATED DAMAGES, for Specific Liquidated Damages.

11.3 WITHHOLDS

11.3.1 Withholding Payments

The State shall have the right to withhold or delay payments to the Contractor for the applicable Services or Deliverables, in whole or in part, if the Contractor fails to perform its obligations set forth in this Contract as respects the same. The State shall provide Notice to the Contractor when withholding payment and Contractor shall have 10 Days to cure such failure. The State may withhold such payments due hereunder to the Contractor, without penalty or work stoppage by the Contractor, until such failure to perform is cured.

11.3.2 Reductions in Payments Due

In addition to the remedies provided in Paragraph 25 of the General Provisions, amounts due the State by the Contractor as Liquidated Damages disputed or not, may be credited, deducted or withheld by the State from any money payable to the Contractor pursuant to this Contract.

11.3.3 Release of Payment Withholds

The State shall withhold such payments described above or a portion thereof, without penalty or work stoppage by the Contractor, until such failure to perform is cured. Acceptance shall not be unreasonably withheld or delayed. For each month that a payment or a portion thereof is withheld, the State shall continue to withhold said amount until the Deliverable or Service is provided and meets Acceptance Criteria for which the payment withhold is associated.

11.4 PERFORMANCE BOND

The Contractor shall within 21 Days of Contract Award furnish a performance bond. Per section 12112 of the California Public Contract Code (PCC), the State requires a performance bond for the following Services being remunerated with the use of progress payments:

Contract: The awarded Contractor shall supply a performance bond in the amount of thirty percent (30%) of the Bidder's proposed base Contract price. The bond shall be on a form from an admitted surety insurer and must guarantee Contractor's compliance with the terms of this Contract.

Transition-In: The awarded Contractor shall supply a performance bond in the amount of fifty percent (50%) of the Transition-In Contract execution amount to ensure the Contractor's performance in all respects of, and subject to, the terms and conditions and provisions of the Contract, for this phase of the Contract. For example, a bond amount of \$1 million shall be procured for a Transition-In phase valued at US \$2 million.

12 CHANGE REQUESTS

12.1 GENERAL

The State Project Director or designee may, at any time, by Change Request (CR), make changes within the general scope of this Contract. Each Change Request is a contract, i.e. the parties will identify requirements, negotiate terms and costs, etc.

12.1.1 Change Costs for Efforts Requiring Multiple CRs

For changes that, by process or otherwise, utilize multiple CRs in the system of record, the Contractor shall report to the State the total solution cost. The reporting shall include all costs that add to the overall cost of the change so that a total running cost (all associated known, planned, or potential future CRs adding to the solution total, including but not limited to: all implementation, testing, Software, M&O, Hosting Services, and related efforts at the discretion of the State). The Contractor shall also associate all related CRs in the system of record so when viewing any CR associated to the change, all other associated CRs can easily be viewed. The Contractor shall not charge the State for efforts related to change cost reporting.

12.2 CHANGE REQUEST APPROVAL PROCESS

12.2.1 Change Request Required

For each change in requirements, a Change Request shall be prepared. Either party may initiate a proposal for a Change Request.

12.2.2 Content of Change Request

The Contractor shall respond in a manner agreed to by the parties (typically in the system of record) to a Change Request issued by the State Project Director or designee as defined in the Change Request Process.

12.2.3 Change Request Cost

The Contractor shall estimate costs consistent with the requirements described in sections of the Statement of Work, including, but not limited to, Section 4.2, CHANGE MANAGEMENT AND CONFIGURATION MANAGEMENT (SYSTEM), for estimating base prices for each Change Request based on the number of staff hours required multiplied by the rate for each labor category, plus any other reasonable costs to be incurred to effect the change at a fair and reasonable price. In addition, the Contractor shall break out costs for each Change Request, at a minimum, as identified:

1. By month the Service is performed or the Cloud Services, Equipment, Hardware, Software is received.
2. Identified as one-time or recurring costs. Recurring costs must be identified as monthly, annual, etc.
3. Total costs for a Change Request must be summarized by State fiscal year, including any future fiscal year costs the State shall incur to maintain the Change Request.
4. Costs for future fiscal years must be identified at the same level of detail as current fiscal year (e.g., labor, maintenance, license, Cloud Services, etc.)

The Contractor shall be paid for work under a Change Request based upon the fixed cost shown in the Change Request at the time of approval by the State Project Director or designee. The Contractor shall not charge the State for preparing a Change Request, including but not limited to document preparation, [internal](#) meetings, proof of concept, research, vendor or other external consultations, or ad hoc reporting efforts.

12.2.4 Inclusion in Contract

The parties shall follow the Contract amendment process to account for any significant increases or decreases in the Contract value or material changes to the Statement of Work or rights or duties of the parties in this Contract as a result of an approved and executed Change Request.

12.2.5 Good Faith

The Contractor and the State shall negotiate in good faith and in a timely manner with regard to all Change Requests.

12.2.6 Stop Work

The State has the right to require the Contractor to stop work on any Change Request in accordance with Paragraph 45 of the General Provisions.

12.3 [CHANGE REQUEST](#) DISAGREEMENT, CLAIMS AND TERMINATION

12.3.1 Disagreement

If the parties are unable to reach an agreement in writing within 15 Days of the Contractor's response to a Change Request, the State Project Director or designee may make a determination of the fair and reasonable price and schedule for the Change Request and shall provide a written explanation of such determination. The Contractor shall proceed with the work according to that price and schedule which shall be included in the resulting Change Request, subject to the Contractor's right to appeal the State Project Director's or designee's determination of the price and/or schedule using the dispute resolution process under Paragraph 44 of the General Provisions.

If the dispute between the parties regarding the price and/or schedule persists, the State shall pay for such work up to the price determined by the State Project Director or designee until all amounts in such price are expended, after which the Contractor shall continue performing such work until completion of the dispute resolution process related to the Change Request. If there is a mutually acceptable completion of the dispute resolution process, the State shall pay the Contractor in accordance with the resolution. Nothing in this Section shall in any manner excuse the Contractor from proceeding diligently with the Contract as changed by the Change Request.

12.3.2 Claims

If the Contractor wishes to assert a claim under Paragraph 44 of the General Provisions, the Contractor must do so within 30 Days after receipt of a signed -Change Request, unless the period is extended by the State Project Director or designee in writing. No claim by the Contractor for such an adjustment hereunder shall be allowed if Notice of such claim is not given prior to final payment under this Contract.

12.3.3 Termination

If the Contractor fails or refuses to perform a Change Request issued by the State, a Change Request required because of emergency, or a Change Request determined to be appropriate at the conclusion of the dispute process under Paragraph 44 of the General Provisions and does not cure such failure or refusal by commencing such performance within five (5) Business Days of receiving a cure Notice with respect to such Change Request, the Contractor shall be in material breach of this Contract, and the State shall have the right to immediately terminate this Contract for default; or if the Contractor fails to correct a material default within 30 Days of receiving a cure Notice with respect to a Change Request, the State shall have the right to secure cover pursuant to this Contract.

13 INSURANCE

During the term of the Contract, and including any optional extensions, the Contractor shall maintain in full force and effect, the insurance coverage and comply with all insurance requirements described in this Appendix A-4, SOW Section 2.5.5, INSURANCE COVERAGE REQUIREMENTS, with an insurance carrier approved to do business in the California.

14 STATE PROPERTY

14.1 OWNERSHIP

The State shall retain title to all property provided by the State to the Contractor for use in the Project.

14.2 USE OF PROPERTY

Any property provided to the Contractor shall, unless otherwise provided herein, or approved in writing by the State Project Director or designee, be used only for the performance of and subject to the terms of this Contract. The Contractor's use of the property shall be subject to the State's security, administrative and other requirements provided in writing to the Contractor.

14.3 DAMAGE TO PERSONS OR PROPERTY

The Contractor shall protect and be responsible for any loss, destruction, or damage to State Property which results from or is caused by the Contractor's negligent acts or omissions. At no cost to the State, the Contractor shall repair or replace any State Property that is damaged, destroyed, or lost at the Facility or Sites caused by the Contractor's negligent acts or omissions. The Contractor shall be responsible for any personal injury at the Facility(s) or Site(s) that may be caused by the Contractor's negligent acts or omissions.

14.4 NOTICE OF DAMAGE

Upon the loss of, destruction of, or damage to any of the property, the Contractor shall notify the State Project Director or designee thereof and shall take reasonable steps to protect that property from further damage.

14.5 SURRENDER OF PROPERTY

The Contractor shall ensure that the property shall be returned to the State in like condition to that in which it was furnished to the Contractor, reasonable wear and tear excepted. The Contractor shall surrender to the State all property upon the earlier of it no longer being required or termination of this Contract. Upon failure to return the property within 45 Days of this Contract expiration or termination, the Contractor shall be charged with reasonable costs of recovery, including without limitation transportation and attorney's fees.

15 CONFIDENTIAL INFORMATION

15.1 ACCESS AND NONDISCLOSURE OBLIGATION

During the term of this Contract, the Contractor and the State shall have access to and become acquainted with Confidential Information (CI) of the other party. The State and the Contractor, and each of their officers, employees and agents, shall hold all Confidential Information of the other party in confidence, in accordance with the terms of this Contract, and shall not at any time use, publish, reproduce or disclose any Confidential Information, except to authorized employees, contractors, or agents requiring such information, as authorized in writing by the other party, to perform its obligations as authorized hereunder, or unless otherwise required by law.

15.2 PROTECTIVE MEASURES

Both parties shall take steps to safeguard the other party's Confidential Information against unauthorized disclosure, reproduction, publication, or use. The Contractor shall have written policies governing access to, duplication, and dissemination of all such Confidential Information the Contractor shall take appropriate action, as reasonably determined by the State, with any persons permitted access to the State's Confidential Information so as to enable the Contractor to safeguard the Confidential Information and otherwise to satisfy the Contractor's obligations under this Contract. The use or disclosure by either party of any Confidential Information concerning the other party for any purpose not directly connected with the administration of the disclosing parties' responsibilities with respect to Service(s) provided under this Contract is prohibited except by prior written consent of the other party, unless otherwise required by law. The Contractor shall safeguard all information about the recipients as required by Title 42 Code of Federal Regulations (CFR) 431, subpart F.

15.3 SECURITY REQUIREMENTS

The Contractor, its officers, employees, and Subcontractors shall at all times comply with Attachment A-2.1, Privacy & Security Requirements, all security standards, practices, and procedures which are equal to or exceed those of the State, including without limitation the OTSI Acceptable Use Security Policy and the OTSI Confidentiality and Nondisclosure Agreement Certification and, in the event that there are changes to the above security requirements after the execution date of this Contract, such changes will be treated as a change request or amendment, with respect to information and materials which come into the Contractor's possession and to which the Contractor gains access under this Contract. Such information and materials include, without limitation, all Confidential Information.

15.4 UNAUTHORIZED DISCLOSURE OF CONFIDENTIAL INFORMATION

Each party shall immediately report to the other party any and all unauthorized disclosures or uses of the other party's Confidential Information of which it or its staff is aware or has knowledge. Each party acknowledges that any publication or disclosure of the other party's Confidential Information to others may cause immediate and irreparable harm to the other party, and if either party should publish or disclose such Confidential Information to others without authorization, the other party shall immediately be entitled to seek injunctive relief to prevent further harm.

15.5 PUBLIC RECORDS REQUEST

15.5.1 Public Records

Notwithstanding anything to the contrary herein, the Contractor acknowledges that this Contract shall be a public record under State law. Any specific information that is claimed by the Contractor to be Confidential Information must be clearly identified as such by the Contractor. Information identified as confidential does not preclude the State from disclosing the information.

15.5.2 Request for Disclosure

The State shall notify the Contractor as soon as reasonably practicable of any and all public records requests for the Contractor's Confidential Information in accordance with and subject to applicable State laws regarding disclosure of the Contractor's Confidential Information. If the Contractor disagrees with the State's disclosure of the Contractor's Confidential Information, the Contractor shall have the right to contest its disclosure in accordance with State law. If the Contractor fails to obtain a court order enjoining disclosure, the State shall release the identified requested information on the date specified in the order.

15.6 EXCEPTIONS

The following information shall not be considered Confidential Information for the purposes of this Contract:

1. Information, which was already known to the receiving party, other than under an obligation of confidentiality, at the time of disclosure by the disclosing party; information which was generally available to the public or otherwise part of the public domain at the time of its disclosure to the receiving party;

2. Information which now is or hereafter becomes publicly known by other than a Breach hereof; information which is developed by one party independently of any disclosures made by the other party of such information.
3. Information which was received by the receiving party after disclosure to it from a third party who had a lawful right to disclose such information to it; or
4. Information which is disclosed by a party pursuant to subpoena or other legal process and which as a result becomes lawfully obtainable by the public. The party who receives such a subpoena shall promptly notify the other party.

15.7 WRITTEN STAFF AGREEMENTS

The Contractor agrees to require staff to which the Contractor makes available the State's Confidential Information to agree in writing to observe and perform all provisions of this Section. The Contractor must submit to the State Project Director or designee written documentation of the Contractor's current internal process for ensuring that the protection of Confidential Information substantially meets the requirements of this section in its entirety.

15.8 SURVIVAL

The provisions of this entire section (Section 15 Confidential Information) shall remain in effect following the termination or expiration of this Contract.

16 INDEMNIFICATIONS

16.1 INDEMNIFICATION

For purposes of Paragraph 28 of the General Provisions, third-party claims, costs (including without limitation reasonable attorneys' fees) and losses shall include:

Liability, damages, penalties, costs, fees, including, without limitation, reasonable attorney's fees, or expenses, including without limitation, interest expenses, caused by or arising from the negligent or intentionally tortious acts or omissions of the Contractor, its officers, employees, agents, or Subcontractors, giving rise to third party claims for:

1. Fraud on the part of the Contractor or its representatives or Subcontractors.
2. Payment of applicable worker's compensation premiums or any claim for worker's compensation benefits by the Contractor's agents, employees, representatives or Subcontractors.
3. The Contractor's failure to protect the State's Confidential Information pursuant to this Contract.
4. Claims, taxes, premiums or assessments grounded in an allegation that Contractors' employees, agents or Subcontractors are employees of the State.
5. A Security Incident or any other failure of the Contractor to prohibit unauthorized individuals from gaining unauthorized access to the CalHEERS System or data as required by this Contract, including but not limited to, costs to the State of providing Breach notifications required pursuant to California Civil Code Section 1798.29.
6. The Contractor's offshore activities and/or a Breach of the Contractor's obligations under Section 9 of the Special Provisions resulting in a misuse or improper disclosure of PHI, PII, or CI (See ATTACHMENT A-2.2, OFFSHORE SECURITY, ACCESS AND

TECHNOLOGY REQUIREMENTS); such costs or damages may include, without limitation:

- a. Awarded damages resulting from any third-party action under applicable (i) HIPAA requirements, (ii) Requirements relating to protecting PHI, PII, or CI in this Contract; or (iii) California state law, and
- b. The out of pocket and reasonable costs of State for actions taken to: (i) notify the affected individual(s) and to respond to any resulting Breach; (ii) mitigate harm to the affected individual(s) arising from a Breach; and (iii) respond to questions or requests for information about the Breach.

16.2 OTHER CLAIMANTS

The Contractor's obligations to indemnify, defend, and hold harmless include any claim by the Contractor's agents, employees, or representatives, or any Subcontractor or its employees.

16.3 CERTIFICATION OF INTELLECTUAL PROPERTY

In addition to Paragraph 43, Patent, Copyright and Trade Secret Indemnity, of the General Provisions, the Contractor certifies that it has appropriate systems and controls in place to ensure that State funds shall not be used in the performance of this Contract for the acquisition, operation or maintenance of computer Software in violation of copyright laws.

17 ADDITIONAL RIGHTS OF TERMINATION

In addition to the rights of termination expressed in Paragraphs 21, 22 and 23 of the General Provisions, the State has the following additional rights of termination.

17.1 GRATUITIES

The State may, in addition to its other rights, immediately terminate this Contract for default if any gratuities in the form of entertainment, gifts or otherwise, were offered or given by the Contractor to an employee of the State, with a view towards securing this Contract or securing favorable treatment with respect to the awarding or amending or the making of any determinations with respect to this Contract.

17.2 INABILITY TO CORRECT DEFICIENCIES DURING CURE PERIOD

If the Contractor is unable to: (a) correct all Priority 1 through Priority 2 Deficiencies; (b) correct all Deficiencies in the System as required by this Contract; or (c) correct all Deficiencies arising during the User Acceptance Testing and to otherwise complete Transition in accordance with the requirements of this Contract, and the failure to correct the Deficiencies amounts to a material breach of the Contract, the State may, at its option: (i) terminate this Contract, in whole or in part, for default pursuant to Paragraph 23 of the General Provisions; (ii) require the Contractor to provide a replacement Deliverable or Service associated with the Deficiencies within a specified time period, pursuant to Paragraph 18 of the General Provisions and/or Section 11 of the Special Provisions. The Contractor shall continue working, without additional compensation, until the Deficiencies are corrected or eliminated. If the State terminates the Contract, in whole or in part, the State shall have the right to return a Deliverable with Deficiencies that the Contractor has not corrected, and other Deliverables impacted or affected by such uncorrected Deliverable. If the State returns any Deliverables to the Contractor under this Section, the Contractor shall immediately return to the State all payments made to the

Contractor for the returned Deliverables, if any. Title to, and all other rights in, Deliverables returned by the State shall return to the Contractor upon refund of any amounts paid.

17.2.1 Substitute

If in the reasonable judgment of the State, a Default-default by the Contractor is not so substantial as to require termination, reasonable efforts to induce the Contractor to cure the Default-default are futile, and the Default-default is capable of being cured by the State or by another resource without unduly interfering with continued performance by the Contractor, the State may provide or procure the Deliverables or Services reasonably necessary to cure the Default-default, in which event the Contractor shall reimburse the State for the reasonable cost of the Deliverables or Services.

17.3 CONTRACTOR INELIGIBILITY TO BID

If the State is required to re-procure or acquire from another vendor or vendors any Deliverable or Service covered by this Contract due to a termination for default of the Contractor, the Contractor shall be ineligible to bid on the re-procurement(s), in whole or in part.

17.4 INACCURATE TERMINATION FOR DEFAULT

If, after Notice of Termination for default, it is determined by the State or a court of competent jurisdiction that the Contractor was not in default or that the Contractor's failure to perform was due to causes beyond its control and without any material error or negligence of the Contractor or any of its Subcontractors or suppliers, the Notice of termination may be deemed by the State to have been issued as a termination for the convenience of the State, and the rights and obligations of the parties shall be governed accordingly.

17.5 TERMINATION AND EXPIRATION PROCEDURE

1. Available Rights and Remedies: The rights and remedies of the State provided in Section 18 of these Special Provisions shall apply in the event of expiration or earlier termination of this Contract for default or convenience, shall not be exclusive, and are in addition to any other rights and remedies by law or equity or under this Contract.
2. Disposition of Property: In the event of expiration or termination, the Contractor shall deliver or convey title to the State or to another entity named by the State any property specifically produced under this Contract, including without limitation, the Deliverables, work in process, partially completed plans, drawings, and information as designated by the State. The Contractor shall not be required to deliver any Pre-Existing Materials.
3. Contractor Compensation: In the event of termination, the State shall pay the Contractor the Charges stated in this Contract for the Deliverables and Services for which the State has given its Acceptance, subject to the State's rights and remedies herein. If the termination is for convenience, the State shall, in its discretion, also pay reasonable Charges the Contractor can demonstrate to the satisfaction of the State have resulted from the termination. In determining the reasonable charges, the Contractor shall use generally accepted accounting principles, or accounting principles otherwise agreed to in writing by the parties, and sound business practices. If the termination is for convenience, the State shall pay the Contractor's charges approved by the State upon termination, pursuant to Paragraph 22 of the General Provisions.

17.6 DETERMINATION OF AMOUNT DUE

In arriving at the amount due to the Contractor, the following shall be deducted from the total due:

1. All payments to the Contractor under the terminated portion of this Contract, and
2. Any claim(s) which the State has against the Contractor under this Contract

17.7 TERMINATION CLAIMS

If the termination is for convenience and the parties are not able to agree on such amounts, the Contractor shall submit a termination claim specifying the amounts claimed due because of the termination for convenience together with cost or pricing data supporting the claim. If the Contractor fails to file a termination claim within 90 Days from the effective date of termination, the State may determine, on the basis of information available, the amount, if any, due the Contractor because of the termination and shall pay to the Contractor the amount determined.

17.8 ASSISTANCE DURING TERMINATION

Upon and following termination or expiration of this Contract, each party shall assist the other party in the orderly termination of this Contract and the transfer of all assets, tangible and intangible, and of all Services, as may facilitate the orderly, non-disrupted continuation of the Project. Upon expiration of the Contract, the Contractor shall assist the State at the State's request in transitioning the Services to another contractor in accordance with the Transition-Out Plan. At the request of the State and subject to the Change Request process, after the expiration date of this Contract, the Contractor shall continue to perform the duties and responsibilities for any Change Request in process for a period not to exceed 180 Days.

17.9 CONTRACTOR'S ACTIONS AFTER NOTICE OF TERMINATION

After the Contractor receives a written Notice of termination, and except as otherwise directed by the State Project Director or designee, the Contractor shall, regardless of any delay in determining or adjusting any amounts due under this Contract:

1. Stop work on the date and to the extent specified in a Notice of termination.
2. Place no further orders and cease to enter into subcontracts for materials, Services, or facilities, except as necessary to complete the portion of the work not terminated.
3. Terminate all subcontracts to the extent they relate to the work terminated.
4. Settle all outstanding liabilities and provide termination settlement proposals arising from the termination of subcontracts, the approval or ratification of which by the State shall be final for purposes of this Contract.
5. Complete performance of the work not terminated.
6. Take any action that may be necessary or as the State may direct for the protection and preservation of the property related to this Contract that is in the possession of the Contractor and in which the State has or may acquire an interest and to mitigate any potential damages or requests for adjustment or termination settlement to the maximum practical extent the Contractor upon refund of any amounts paid.

18 ADDITIONAL CALHEERS SDMO GENERAL PROVISIONS

18.1 AUTHORITY

The Contractor shall have no authority to bind, obligate, or commit the State by any representation or promise.

18.2 AUTHORIZATION

The Contractor warrants that it has full power and authority to enter into and perform this Contract, and the person signing this Contract on behalf of the Contractor has been properly authorized and empowered to enter into this Contract and to bind the Contractor to each and every one of the terms, conditions, and obligations set forth herein.

18.3 BINDING EFFECT

Each party agrees that this Contract binds it and each of its officers, and those employees, agents, independent contractors, and representatives working on or otherwise associated with this Contract.

18.4 CONFLICT OF INTEREST

18.4.1 Appearance of Conflict

The Contractor acknowledges that, in governmental contracting, even the appearance of a conflict of interest is harmful to the interest of the State. Thus, the Contractor agrees to refrain from any practices, activities or relationships that could reasonably be considered to be in conflict with the Contractor's fully performing his/her obligations to the State under the terms of this Contract. The Contractor shall inquire and require disclosure by its staff and Subcontractors of all activities that may create an appearance of conflict. In the event that the Contractor is uncertain whether the appearance of a conflict of interest may reasonably exist, the Contractor shall submit to the State Project Director or designee a full disclosure statement setting forth the relevant details of any activity which the Contractor reasonably believes may have the appearance of a conflict of interest for the State's consideration and direction. Failure to promptly submit a disclosure statement setting forth the relevant details for the State consideration and direction shall be grounds for Termination of this Contract. The Contractor shall ensure that all the Contractor staff engaged to work on the Project comply with the State Ethics Training provided by the State and Statement of Economic Interests (Form 700) reporting requirements set forth in the Appendix A-4, SOW Section 2.5.3, FORM 700.

18.4.2 Current or Former State Employees

The Contractor acknowledges it is aware of and shall take no action which causes State employees or officers to violate the following provisions regarding current or former State employees. If the Contractor has any questions on the status of any person rendering Services or involved with this Contract, the Contractor shall contact the State Project Director or designee immediately for clarification:

1. Current State Employees (California Public Contract Code (PCC) 10410)
 - a. No State Officer or employee shall engage in any employment, activity, or enterprise from which the officer or employee receives compensation or has a financial interest, and which is sponsored or funded by any State agency unless the employment, activity, or enterprise is required as a condition of regular State employment.

- b. No officer or employee shall contract on that person's own behalf as an independent contractor with any State agency to provide Goods or Services.
- 2. Former State Employees (California Public Contract Code (PCC) 10411)
 - a. For the two (2) year period from the date of leaving State employment, no former State officer or employee may enter into a Contract in which that person was engaged in any of the negotiations, transactions, planning, arrangements, or any part of the decision-making-process relevant to this Contract while employed in any capacity by any State agency.
 - b. For the 12-month period from the date of leaving State employment, no former State officer or employee may enter into an agreement with any State agency if that person was employed by that State agency in a policy-making position in the same general subject area as the proposed agreement within the 12-month period prior to that person leaving State service.

18.5 ENTIRE CONTRACT

The State and the Contractor acknowledge and agree that they have read this Contract, understand it, and agree to be bound by its terms and conditions.

18.6 HEADINGS

The headings throughout this Contract are for reference purposes only, and the words contained therein shall in no way be held to explain, modify, amplify or aid in the interpretation, construction or meaning of the provisions of this Contract.

18.7 TIME IS OF THE ESSENCE

Time is of the essence in connection with the Parties fulfilling their obligations under the Contract.

18.8 GOOD STANDING

The Contractor warrants it is currently in good standing with the Secretary of State's office and qualified to do business in California.

18.9 NOTICE OF LITIGATION

The Contractor shall promptly notify the OTSI Chief Counsel in the event that the Contractor learns of any potential or actual litigation in which it is a party or a defendant in a case which involves Services provided under this Contract. The Contractor shall promptly, after being served with a summons, complaint, or other pleading which has been filed in any federal or state court or administrative agency, deliver copies of such document(s) if publicly available to the OTSI Chief Counsel. The term "litigation" includes but is not limited to an assignment for the benefit of creditors and filings in bankruptcy, reorganization, or foreclosure.

Notice Address for Litigation: State of California
Office of Technology & Solutions Integration
Office of the Chief Counsel
2870 Gateway Oaks Drive, Suite 150
Sacramento, CA 95833

18.10 MAINTENANCE AND AUDIT OF RECORDS

18.10.1 Maintenance of Records

The Contractor and its Subcontractors shall maintain a complete file of all records, documents, communications, and other materials which directly pertain to the Project or the delivery of Services under this Contract. These records shall be maintained according to generally accepted accounting principles and shall be readily separable from other the Contractor records. The Contractor shall maintain for a period of ten (10) years after final payment under this Contract the above-described records and records that are sufficient to:

1. Document the performance of all acts required by this Contract.
2. Substantiate by commercially acceptable methods, the Contractor's statement of its organization's structure, tax status, capabilities, and performance.
3. Verify the accuracy of invoiced charges pursuant to this Contract.
4. Ascertain that personnel policies, procedures and practices were in compliance with this Contract and applicable State and Federal law.
5. Ascertain that all taxes and insurance required by State and Federal law by the terms of this Contract were paid by the Contractor; and
6. Ensure sufficient documentation needed to fulfill any auditing or oversight functions by applicable oversight agencies.

18.10.2 Right to Audit

The Contractor shall always abide by the conditions of any applicable federal or California State regulations, incorporated by reference herein, regarding the retention and access requirements related to financial and programmatic records, supporting documents, statistical records and other records created or covered by this Contract.

The Contractor agrees that State and federal agencies with appropriate jurisdiction and authority may, from time to time, enter the Contractor's facilities, premises or other locations where the Contractor is fulfilling its obligations under this Contract to inspect, monitor or otherwise evaluate the Contractor's performance or compliance with the terms of this Contract. The Contractor shall provide reasonable access to any such facilities, premises or other locations upon request by the State or its designee.

The Contractor and any Subcontractors retained by the Contractor shall likewise cooperate in good faith with the State or its designee to make CalHEERS available to any such oversight agency determined by the State to have appropriate oversight authority and, upon reasonable request, shall provide copies of any electronic or paper-based documents, records, reports or supporting documentation needed to fulfill any federal or California State auditing or oversight obligations pertaining to CalHEERS, within seven (7) Business Days of the request unless otherwise approved by the State.

The Contractor shall retain any and all documents and records, including but not limited to financial records, records pertaining to eligibility verifications and determinations, enrollment transactions, appeals and plan variation certifications for a period of ten (10) years and shall provide any such information to Covered California, Office of Technology & Solutions Integration (OTSI), the Department of Health Care Services (DHCS) or their designee upon request.

The Contractor agrees to allow any such person(s) to access to such records during normal business hours and to allow interviews of any employees or others who might reasonably have information related to such records, without undue interruption to their normal duties.

The Contractor shall undergo an annual Statement on Standards for Attestation Engagements, Reporting on Controls at a Service Organization (SSAE No. 16) or successor audits throughout the term of this Contract. The Contractor shall work collaboratively with any such auditors and provide complete and accurate information and documentation in a timely manner at no cost to the State for any such participation, assistance and work. Should the auditor determine the existence of any exceptions, the Contractor shall correct any such exceptions in a timely manner. The State shall pay the cost associated with the retention and hiring of any such auditors needed to conduct the aforementioned SSAE No. 16.

18.10.3 Notice of Review

Whenever reasonably possible, the State shall give the Contractor advance written Notice of any monitoring, auditing, observation, or visits by authorized persons to the Contractor's place(s) of business. Such audit may include an audit of the books and records of the Contractor, or any of its Subcontractors or prospective Subcontractors, which are related to the Contract cost or pricing data and to the Contractor's performance of its obligations pursuant to the Contract, to the extent required by Federal or State laws or regulations and this Contract or any subcontracts. Upon notification, except in exceptional circumstances, by the State to the Contractor during any Business Day between the hours of 8:00 a.m. - 5:00 p.m., PT all documentation, including accounting records, related to this Contract shall be available for and subject to review, inspection, copying (at the State's expense), and audit by the State or Federal Governments, or other personnel duly authorized by the State.

18.10.4 Data and Materials Property of the State

All Data, records, documents, communications, and other materials developed and used in the performance of this Contract shall be the Property of the State unless otherwise specified herein and shall be maintained by the Contractor and made, to the extent reasonably feasible, accessible within the State of California on behalf of the State, for a period of ten (10) years from the date of final payment under this Contract, or for such further period as may be necessary to resolve any matters which may be pending, or until an audit has been completed with the following qualification: If an audit by or on behalf of the federal or State government has begun but is not completed at the end of the ten (10) year period, or if audit findings have not been resolved after a ten (10) year period, the materials shall be retained until the resolution of the audit findings.

18.10.5 Subcontracts

The records retention, review, inspection, audit, interview, copying, and other requirements of this section shall be incorporated by the Contractor in all of its subcontracts.

18.11 NOTICE OF DELAY

When the Contractor has knowledge that any actual or potential situation is delaying or threatens to delay the timely performance of this Contract, the Contractor shall, within five (5) Business Days, give written Notice thereof, including all relevant information with respect thereto, to the State.

18.12 NOTICES

Notice shall deem to be given by the parties under this Contract if delivered to the State immediately in writing with confirmation of receipt from the State. Each party shall provide Notice to the other of changes to such addresses.

Notice Address for the Contractor: (Company Name of SI)
CalHEERS Project Manager
[Street Address]
Sacramento, CA [ZIP]

Notice Address for the State: State of California
Office of Technology & Solutions Integration
CalHEERS Contract and Procurement Chief
2329 Gateway Oaks Drive, Suite 250
Sacramento, CA 95833

18.13 PUBLICITY

The Contractor shall not refer to the State of California, any office, agency, or officer thereof, or any State employee, including the head of the State, the State procurement officer, or to the Services or Deliverables, or both, provided under this Contract, in any of the Contractor's brochures, advertisements or other publicity of the Contractor without the prior written consent of the State Project Director or designee. The Contractor agrees to submit to the State Project Director all advertising, sales promotions, news releases, and other publicity matters relating to this Contract or any Deliverable or Service furnished by the Contractor wherein the State's name is mentioned, or language used from which the connection of the State's name therewith may, in State's judgment, be inferred or implied. All media contacts with the Contractor about the subject matter of this Contract shall be referred to the State Project Director or designee.

18.14 CRIMINAL BACKGROUND CHECKS

All staff, including employees, Contract or subcontract personnel, vendors or volunteers, prior to implementing Services under this Contract, must comply with the criminal background check requirements set forth in California Government Code section 1043, and its implementing regulations set forth in California Code of Regulations, Title 10, section 6456. Clearance to initiate Services must be received from Covered California Office of Legal Services, prior to providing any access to any CI, PII, PHI, FTI, or financial information contained in the information systems and devices of CalHEERS, or any other information as required by federal and State law or guidance. The Contractor shall bear all costs associated with obtaining clearance for each said employee.

18.15 REMEDIES

Except as provided herein, no remedy conferred by any of the specific provisions of this Contract is intended to be exclusive of any other remedy, and each and every remedy shall be cumulative and shall be in addition to every other remedy given hereunder, now or hereafter existing at law or in equity or by statute or otherwise. The election of any one or more remedies, excluding Liquidated Damages, by either party shall not constitute a waiver of the right to pursue other available remedies.

18.16 SUBCONTRACTORS

18.16.1 Process

The Contractor may, with prior written permission from the State Project Director or designee, enter into subcontracts with third parties for the performance of any part of the Contractor's duties and obligations. Any such permission may be rescinded. Subcontractors identified in the Contractor's Proposal shall be deemed to have prior written permission.

During the Contract term, the State reserves the right to approve or disapprove proposed Subcontractors and require replacement (termination for convenience) of current Subcontractors.

The Contractor shall provide the State Project Director, or designee, written Notice requesting approval to roll-on or roll-off a subcontractor 60 Days in advance (at a minimum). The written Notice for the roll-on of a proposed Subcontractor shall include confirmation that the vendor is experienced and proven at providing the goods or services assigned for the project, and that no conflict of interest exists. If the proposed Subcontractor will serve as an interface partner (e.g., a print vendor) the roll-on is subject to technical, security, and other State reviews and must follow existing Standard Operating Procedures for the roll on of a new interface partner. Costs associated with Subcontractor roll-on and roll-off efforts, including but not limited to implementing interface connections and/or infrastructure, are considered part of the Contract's fixed price costs. Tracking for Subcontractors should be maintained in a Subcontractor list provided to the State Contract Management Team and updated as changes occur, similar to the Contractor staff roll-on and roll-off tracking, and shall include, but not be limited to, actual approval, roll-on, and roll-off dates.

Upon request of the State, the Contractor shall provide the required documentation (e.g., Subcontractor's qualifications, insurance documentation, etc.) for any proposed replacement Subcontractor to the State Project Director, or designee, for review and approval prior to the commencing of any Contract work.

All subcontracts shall be in writing and available upon request by the State; provided however that the Contractor shall have the right to redact pricing and other sensitive and proprietary information prior to making the subcontract available to the State. Any subcontracts must be referenced in the Contract. In addition, the Contractor is responsible and liable for the proper performance of, and the quality of any work performed by any and all Subcontractors. In addition, the Contractor's use of any Subcontractor shall not cause the loss of any warranty from the Contractor or any Software manufacturer or provider. The State reserves the right to reject or refuse any of the Contractor or Subcontractor personnel whose workmanship, in the reasonable judgment of the State, is deemed to be substandard. In no event shall the existence of a subcontract operate to release or reduce the liability of the Contractor to the State for any breach in the performance of the Contractor's duties. Any permitted Subcontractor must submit to the State a tax clearance certificate from the California Franchise Tax Board (FTB) showing that any and all delinquent taxes have been paid. Subcontracts permitted by the State shall be subject to the applicable requirements of this Contract.

18.16.2 Subcontracts

The Contractor agrees that any subcontract(s) resulting from its performance under the applicable terms and conditions of this Contract shall include a provision that the Subcontractor shall abide by the applicable terms and conditions hereof, as well as all other applicable federal and State laws, and rules and regulations pertinent hereto that have been or may hereafter be established. Also, the Contractor agrees that all subcontracts shall include a provision that the

Subcontractor shall indemnify and hold harmless the State to the extent described in Section 16.1, INDEMNIFICATION. No subcontract shall terminate the legal responsibilities of the Contractor for overall performance under the Contract. Any contract between the Contractor and its Subcontractors shall require the Subcontractors to adhere to the same Performance Standards and other standards required of the Contractor as applicable to Subcontractor's Services. Subcontractors must be qualified, as demonstrated by receiving professional certification(s) and license(s), to work on any Deliverables and ~~Services~~for Services for which their Services are obtained.

18.17 SURVIVAL

The terms, conditions, and warranties contained in this Contract that by their sense and content are intended to survive the performance hereof by the parties hereunder shall so survive the completion of the performance, cancellation or termination of this Contract. In addition, the terms of Paragraphs 21, 22, 23, 26, 28, 34, 37 and 38 of the General Provisions, and Sections 16 and 18 of these Special Provisions shall survive the termination of this Contract.

18.18 THIRD PARTY BENEFICIARIES

It is expressly understood and agreed that the enforcement of the terms and conditions of this Contract and all rights of action relating to such enforcement, shall be strictly reserved to the State and the Contractor. Nothing contained in this Contract shall give to or allow any claim or right of action whatsoever by any third person. It is the express intention of the State and the Contractor that any person or entity, other than the State or the Contractor, receiving Services or benefits shall be deemed an incidental beneficiary only, except as provided in General Provisions Paragraph 37.

18.19 WATER OR AIR POLLUTION VIOLATION

The Contractor shall not: (1) violate any order or resolution not subject to review promulgated by the California State Air Resources Board or an air pollution control district; (2) be subject to a cease and desist order not subject to review issued pursuant to Water Code Section 13301 for violation of waste discharge requirements or discharge prohibitions; or (3) finally be determined to be in violation of federal law relating to air or water pollution.

18.20 WAIVER OF RIGHTS BY CONTRACTOR

Any action or inaction by the Contractor or the failure of the Contractor on any occasion, to enforce any right or provisions of the Contract, shall not be construed to be a waiver by the Contractor of its rights hereunder and shall not prevent the Contractor from enforcing such provision or right on any future occasion.

18.21 POSTAGE

1. Postage is a pass-through cost. Postage fulfilment shall be provided by third-party shipping agents or U.S. Postal Service (USPS).
2. The Contractor shall act in the capacity of an agent role for postage fulfilment and is not liable for non-delivery except because of mislabeling of material by the Contractor.
3. The Contractor shall be paid for its Services, including postage, for any non-delivery by third-parties or the U.S. Postal Service.
4. The Contractor shall be paid for any re-shipments, or second mailings required due to mis-delivery by third parties.

5. The Contractor shall invoice postage as a separate line item on monthly invoices.
6. If non-delivery was a result of mis-labeling of material by the Contractor, the Contractor shall re-ship or provide second and subsequent mailings at no cost to the State for its Services or postage.

18.22 ARTIFICIAL INTELLIGENCE (AI) REQUIREMENTS

During the term of the Contract, Contractor must notify the State in writing if their Services or any work under this Contract includes, or makes available, any previously unreported AI technology, including AI from third parties or Subcontractors. Contractor shall immediately complete and submit the CalHEERS Artificial Intelligence Risk Assessment form, notifying the State of any new or previously unreported AI technology.

At the direction of the State, the Contractor shall discontinue the use of any new or previously undisclosed AI technology that materially impacts functionality, risk or Contract performance, until use of such AI technology has been approved by the State.

Failure to disclose AI use to the State and submit the CalHEERS Artificial Intelligence Risk Assessment form may be considered a breach of the Contract, and the State may consider such failure to disclose AI and/or failure to submit the CalHEERS Artificial Intelligence Risk Assessment form as grounds for the immediate termination of the Contract. The State is entitled to seek any and all relief it may be entitled to as a result of such non-disclosure.

The State reserves the right to amend the Contract, without additional cost, to incorporate AI Special Provisions into the Contract at its sole discretion and/or terminate any contract that presents an unacceptable level of risk to the State.

1. The State of California seeks to realize the potential benefits of AI, through the development and deployment of AI tools, while balancing the risks of these new technologies. The Bidder/Offeror/Contractor must notify the State in writing if their solution or Service includes, or makes available, any AI including, AI from third parties or Subcontractors.
2. The State has developed the CalHEERS Artificial Intelligence Risk Assessment form to be completed by the Bidder/Offeror/Contractor. Failure to submit the CalHEERS Artificial Intelligence Risk Assessment form will result in disqualification of the Bidder/Offeror/Contractor.
3. Failure to report AI to the State may void any resulting contract. The State reserves its right to seek any and all relief to which it may be entitled to as a result of such non-disclosure.
4. Upon receipt of a Bidder/Offeror/Contractor CalHEERS Artificial Intelligence Risk Assessment form, the State reserves the right to incorporate ~~AI~~ Specialadditionaladditional Provisions-provisions into the final Contract or reject bids/offers that present an unacceptable level of risk to the State.

ATTACHMENT A-2.1 PRIVACY & SECURITY REQUIREMENTS

A. PURPOSE OF ATTACHMENT

1. This ATTACHMENT A-2.1 sets forth the privacy and security requirements that apply to all Personally Identifiable Information (PII) that Contractor obtains, maintains, transmits, uses or discloses from the State pursuant to this Contract.
2. The parties agree to all terms and conditions of this Attachment in order to ensure the integrity, security, and confidentiality of the information exchanged pursuant to this Contract, and to allow disclosure and use of such information only as permitted by law and only to the extent necessary to perform functions and activities pursuant to this Contract.
3. This Attachment establishes requirements in accordance with applicable federal and state privacy and security laws including, but not limited to, the Information Practices Act (California Civil Code section 1798 et seq.), the Federal Patient Protection and Affordable Care Act (Public Law (PL) 111-148), as amended by the Federal Health Care and Education Reconciliation Act of 2010 (PL 111-152) (herein, the "Affordable Care Act"), and its implementing regulations at Title 45 CFR Sections 155.260 and 155.270 (the "State Privacy and Security Rules") and, where applicable, the Health Insurance Portability and Accountability Act (42 United States Code (USC) section 1320d-d8) and the Health Information Technology for Economic and Clinical Health (HITECH) Act and their implementing regulations at Title 45 CFR Parts 160 and 164 (collectively, "HIPAA") , as well as applicable privacy and security control protocols defined in the most current version of CMS privacy and security framework, as required.

B. DEFINITIONS

Unless otherwise specified, the capitalized terms referenced herein shall at all times have the same meaning as set forth within Appendix C, ~~("Glossary")~~ of this Contract. In the event of a conflict between a specifically-defined term specified within this Addendum and the Glossary, the definition set forth within this Addendum shall prevail.

C. APPLICABLE LAWS

The Contractor shall comply with any and all federal and state privacy and security laws, as well as applicable rules and regulations pertaining to the State including, but not limited to, those arising under the Federal Patient Protection and Affordable Care Act (ACA) and its implementing regulations. To the extent a conflict arises between any laws or other requirements, the Contractor agrees to comply with the applicable requirements imposing the more stringent privacy and security standards.

a) State Privacy and Security Rules (Title 45 CFR section 155.260)

1. In accessing, collecting, using or disclosing PII in performing functions for the State as authorized by this Contract, the Contractor shall only use or disclose PII to the minimum extent such information is necessary to perform such functions.
2. The Contractor shall establish and implement privacy and security standards that are consistent with the principles of Title 45 CFR section 155.260(a)(3) as set forth below in subsections (i) through (viii):

- a. Individual access: Individuals shall be provided with a simple and timely means to access and obtain their PII in a readable form and format;
- b. Correction: Individuals shall be provided with a timely means to dispute the accuracy or integrity of their PII and to have erroneous information corrected or to have a dispute documented if their requests are denied;
- c. Openness and transparency: Contractor shall be open and transparent regarding its policies, procedures, and technologies that directly affect individuals and/or their PII;
- d. Individual choice: Individuals shall be provided a reasonable opportunity and capability to make informed decisions about the collection, use, and disclosure of their PII;
- e. Collection, use and disclosure limitations: PII shall be created, collected, used, and/or disclosed only to the extent necessary to accomplish a specified purpose(s) and never to discriminate inappropriately;
- f. Data quality and integrity: Contractor shall take reasonable steps to ensure that PII is complete, accurate, and up-to-date to the extent necessary for Contractor's intended purposes and has not been altered or destroyed in an unauthorized manner;
- g. Safeguards: PII shall be protected with reasonable operational, administrative, technical, and physical safeguards to ensure its confidentiality, integrity, and availability and to prevent unauthorized or inappropriate access, use, or disclosure; and,
- h. Accountability: The Contractor shall use appropriate monitoring and other means and methods to assure accountability with these principles and to report and mitigate nonadherence and Breaches.

b) California Information Practices Act

The Contractor shall comply with the applicable privacy and security provisions of the Information Practices Act of 1977, California Civil Code section 1798 et seq., as updated in 2017, and shall provide assistance to the State as may be reasonably necessary for the State to comply with these provisions (California Civil Code section 1798 et seq.).

1. Health Insurance Portability and Accountability Act ("HIPAA")

- a. The Contractor expressly acknowledges and agrees that the State is not a health care provider, a health care plan, or a health care clearinghouse. Accordingly, the parties mutually acknowledge and agree that, for purposes of this Contract, the State is not a Covered Entity as specifically defined in HIPAA.
- b. The Contractor expressly acknowledges and agrees that where the State performs a function required under applicable law pursuant to Title 45 Code of Federal Regulations (CFR) section 155.200, it is not acting as a Business Associate of any other Covered Entity and the Contractor is not acting as the State's Business Associate, as such terms are specifically defined in HIPAA.
- c. DHCS, which implements Medi-Cal program and other DHCS programs, is a Covered Entity as defined by HIPAA. Therefore, to the extent that the Contractor is performing functions pursuant to this Contract and accesses or uses PII that was provided to the State by DHCS or for the purposes of the Medi-Cal program or any other DHCS programs, the Contractor shall comply with the applicable terms and conditions of HIPAA.

c) Internal Revenue Service (IRS) Code section 6103 and *Publication 1075*

Per the State Privacy and Security Rules (Title 45 CFR 155.260 (a)(4)(iii), return information shall be kept confidential under Title 26 U.S. Code section 6103. As described by IRS Publication 1075, conforming to the guidelines set forth in that publication meets the safeguard requirements of Title 26 U.S. Code section 6103(p)(4) for FTI.

2. Fingerprinting and Background Checks (California Government Code Section 1043)
 - a. Before any individual who provides Services related to this Contract may access PII, including but not limited to any employee, Subcontractor or other person, Contractor must ensure that any such individual shall agree to a criminal background check, in accordance with California Government Code Section 1043, and its implementing regulations set forth in California Code of Regulations, Title 10, Section § 6456. The Contractor shall bear all costs associated with obtaining clearance for each said employee.
 - b. Background check records shall be maintained by Covered California for so long as any such individual is employed with Contractor or, if applicable, the Contractor's Subcontractor plus a period of no less than five (5) years thereafter. The Contractor shall provide Covered California with a list of any such individuals subject to this requirement and shall provide, update and notify Covered California of any personnel changes involving any such individuals via e-mail at backgroundchecks@covered.ca.gov.
3. Privacy and Security Awareness Training (ARC-AMPE or current State-approved standard)
 - a. The Contractor shall ensure that any and all employees, agents, representative or Subcontractors who are provided access to PII have been provided privacy and security awareness training prior to accessing PII subject to this Contract, then annually thereafter. The Contractor shall at a minimum ensure that the content of any such training shall address the security controls and safeguards required herein, as well as HIPAA compliance for PHI subject to this Contract and requirements arising under IRS Publication 1075 and Internal Revenue Code (IRC) §6103 pertaining to the receipt, storage, handling or use of FTI.
 - b. The Contractor shall likewise ensure that any and all such employees, agents, representatives or Subcontractors certify in writing their completion of any such privacy and security awareness programs. Upon request, the Contractor shall provide the State with copies of these certifications.
 - c. The Contractor shall retain the aforementioned certifications for a period of five (5) years and shall provide the copies upon request during this time.
 - d. Upon request, the Contractor shall provide the State with copies of any training materials used to satisfy the above referenced requirements to enable the State to review such materials and confirm that the Contractor's privacy and security awareness training fulfills the subject matter requirements set forth herein. Following its review, the State may, in its sole discretion, require that the Contractor's employees, agents, representatives or Subcontractors complete privacy and security awareness training provided by the State. The Contractor shall be deemed to have complied with the above referenced requirements through the completion of any such privacy and security awareness training provided by the State.

D. CONSUMER RIGHTS

a) Accounting of Disclosures

1. The Contractor shall assist the State in responding to accounting requests by individuals that are made to the State under the Information Practices Act (Civil Code section 1798.25-29) and if PHI is involved, pursuant to HIPAA, Title 45 CFR section 164.528.
2. The obligation of the Contractor to provide an accounting of disclosures as set forth herein survives the expiration or termination of this Contract with respect to accounting requests made after such expiration or termination.

b) Copies of Records Requests

1. Regardless of whether a request is made to the State or to the Contractor, the Contractor shall respond to the request with respect to the record the Contractor and its Subcontractors maintain, if any, in a manner and time frame consistent with requirements specified in the Information Practices Act (California Civil Code sections 1798.30 - 1798.34) and if PHI is involved, with HIPAA (Title 45 CFR section 164.524).

c) Requests to Amend Records

1. The Contractor shall make any amendments to PII in a record that the State directs or agrees to, whether at the request of the State or an Individual.
2. Regardless of whether a request to amend records is made to the State or to the Contractor, the Contractor shall respond to the request with respect to the record the Contractor and its Subcontractors maintain in a manner and time frame consistent with requirements specified in the Information Practices Act (Civil Code section 1798.35) and if PHI is involved, with HIPAA (Title 45 CFR section 164.526).

d) Requests to Restrict Use and Disclosure of PII

1. The Contractor shall reasonably comply with any requests to restrict the use and disclosure of PII.
2. If PHI is involved, the Contractor shall respond to the request in a manner and time frame consistent with requirements specified in HIPAA (Title 45 CFR section 164.522).

e) Confidential Communications Request

1. In responding to any requests from individuals, the Contractor shall follow any and all procedures and protocols implemented by Covered California pertaining to the authentication of individuals making the request.
2. Upon receipt of written Notice, the Contractor shall reasonably comply with any requests to utilize an alternate address, e-mail, or telephone number when communicating with the individual.
3. If the request is denied, a written response shall be sent to the individual stating the reasons for denying the request.
4. If PHI is involved, regardless of whether a request is made to the State or to the Contractor, the Contractor shall respond to the request in a manner and time frame consistent with requirements specified in HIPAA (Title 45 CFR section 164.522(b)(1)).

5. In the event any individual submits a confidential communications request to the Contractor, the Contractor shall forward any such requests to Covered California within 48 hours.

E. GENERAL SAFEGUARDS AND SECURITY CONTROLS

a) General Safeguards

1. The Contractor shall establish and implement operational, technical, administrative, and physical safeguards that are consistent with any applicable laws to ensure:
 - a. The confidentiality, integrity, and availability of PII created, collected, used, and/or disclosed by the State.
 - b. Personally Identifiable Information is only used by or disclosed to those authorized to receive or view it.
 - c. Return information, as such term is defined by section 6103(b)(2) of the Code, is kept confidential under section 6103 of the Code.
 - d. Personally Identifiable Information is protected against any reasonably anticipated threats or hazards to the confidentiality, integrity, and availability of such information.
 - e. Personally Identifiable Information is protected against any reasonably anticipated uses or disclosures of such information that are not permitted or required by law; and
 - f. Personally Identifiable Information is securely destroyed or disposed of in an appropriate and reasonable manner and in accordance with retention schedules.
2. The Contractor shall update these safeguards as appropriate and as requested by the State.

b) Security Controls

1. Electronic Security Controls:
 - a. Encryption: The Contractor shall encrypt all PII that is in motion or at rest, including but not limited to data on portable media devices, laptops and workstations, with FIPS 140-2 compliant encryption, including but not limited to any PII transmissions which occur via website access, file transfer or e-mail. Encryption protocols implemented by the Contractor shall at all times be consistent with the National Institute for Standards and Technology ("NIST") security controls concerning the protection of PII. The aforementioned encryption requirement shall at all times be applicable to PII transmissions both within and outside of the CalHEERS secure internal network and may be fulfilled either through network-level end-to-end encryption or the encryption of any data files containing PII.
 - b. Hardware: The Contractor shall ensure that any and all Hardware, including but not limited to personal computers, laptops, jump-drives, smart phones or other devices upon which PII is stored, is secured, password-protected and only accessible by the Contractor or the Contractor's agents, employees or Subcontractors in accordance with the terms of this Contract. The Contractor shall at all times remove and permanently delete any and all PII before any such Hardware is transferred or sold to a third-party or is otherwise subject to any change in ownership or control.
 - c. Log-In Credentials: The Contractor shall at all times ensure that each individual user of any State computer system through which PII is accessed maintains his or her own

unique user-id and password. The Contractor shall strictly refrain from sharing individual log-in credentials and shall always assume responsibility for ensuring that the log-in credentials of any former employees, Subcontractors, agents or other representatives who are no longer subject to this Contract are deactivated or otherwise changed to prevent unauthorized access by any such individuals within 24 hours.

- d. **Server Security:** Servers containing unencrypted PII must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk assessment / system security review.
- e. **Minimum Necessary:** Only the minimum necessary amount of PII required to perform necessary business functions may be copied, downloaded, or exported.
- f. **Data Destruction:** When no longer needed, all PII must be cleared, purged, or destroyed consistent with NIST Special Publication 800-88, Guidelines for Media Sanitization, such that the personal, sensitive, confidential information cannot be retrieved.
- g. **Access Controls:** The System providing access to PII must use role-based access controls for all user authentications, enforcing the principle of least privilege.

c) **Physical Controls**

- a. **Supervision of Data:** PII in paper form shall not be left unattended at any time, unless it is locked in a file cabinet, file room, desk or office. Unattended means that information is not being observed by an employee authorized to access the information. PII in paper form shall not be left unattended at any time in vehicles or planes and shall not be checked in baggage on commercial airplanes.
- b. **Escorting Visitors:** Visitors to areas where PII is contained shall be escorted and PII shall be kept out of sight while visitors are in the area.
- c. **Confidential Destruction:** PII must be disposed of through confidential means, such as crosscut shredding and pulverizing in accordance with the State's secure document destruction protocols.
- d. **Removal of Data:** PII must not be removed from the premises of the Contractor except with express written permission of the State.
- e. **Faxing:** Faxes containing PII shall not be left unattended and fax machines shall be in secure areas. Faxes shall contain a confidentiality statement notifying persons receiving faxes in error to destroy them. Fax numbers shall be verified with the intended recipient before sending the fax.
- f. **Mailing:** Mailings of PII shall be sealed and secured from damage or inappropriate viewing of PII to the extent possible. Mailings which include 500 or more individually identifiable records of PII in a single package shall be sent using a tracked mailing method which includes verification of delivery and receipt, unless the prior written permission of the State to use another method is obtained.

F. POLICIES AND PROCEDURES

- 1. The Contractor shall designate one (1) individual to serve as the single point of contact ("SPOC") in matters pertaining to the Contractor's information security and privacy program and the implementation of the requirements set forth herein. The name and

contact person of the aforementioned SPOC shall be submitted to the State information security offices via email, no later than 60 Days prior to the effective date of this Contract:

OTSI: osiinfosecurity@otsi.ca.gov

CovCA: informationsecurity@covered.ca.gov

DHCS: incidents@dhcs.ca.gov

and State Privacy Offices via email, no later than 60 Days prior to the effective date of this Contract:

OTSI: privacy@otsi.ca.gov

CovCA: privacyofficer@covered.ca.gov

DHCS: DHCSPrivacyOfficer@dhcs.ca.gov

The SPOC may, in his or her discretion, delegate project-related tasks to other individuals but shall at all times remain responsible for ensuring compliance with the security and privacy-related requirements specified within this Contract and for communicating with the State Information Security and Privacy Offices on security and privacy-related matters.

2. The Contractor shall implement and maintain written policies and procedures to ensure the privacy and security of PII stored, maintained, or accessed in compliance with this Contract and any applicable laws. Such policies shall address:
 - a. Implementation of consumer rights as required by this Attachment.
 - b. Reasonable safeguards as required by this Attachment.
 - c. Monitoring, periodically assessing, and updating security controls and related system risks to ensure the continued effectiveness of those controls.
 - d. Training employees, Contractors, and Subcontractors.
3. Upon request, the Contractor shall provide the State with any written policies and procedures adopted by the Contractor to meet its obligations under this Contract. Should the State determine any such policies and procedures to be insufficient, the Contractor agrees to cooperate in good faith to incorporate appropriate revisions required by the State to bring any such policies and procedures into compliance.
4. The Contractor agrees to apply appropriate sanctions must be applied against workforce members who fail to comply with privacy policies and procedures or any provisions of these requirements, including termination of employment where appropriate.
5. Subcontractors
 - a. The Contractor shall be bound by and be responsible for the acts and omissions of its Subcontractors, agents or vendors in the exchange of data with the State. The Contractor shall take reasonable steps to ensure compliance with the terms of this Contract by its Subcontractors, agents and vendors.
 - b. The Contractor agrees to enter into written contracts with its agents and contractors that obligate such agents or Subcontractors to abide by the same privacy and security standards and obligations that the Contractor has agreed to in this Contract.
 - c. The Contractor represents and agrees that it shall only request that the State transmit data to Subcontractors with whom it has contractually imposed such privacy and

security standards and only to the extent such information is necessary to carry out the purposes authorized by this Contract.

- d. Upon request, the Contractor shall provide the State with copies of any written agreements or contracts entered into by the Contractor and its Subcontractors to meet the obligations of the Contractor under this Contract.

G. BREACHES & SECURITY INCIDENTS

1. The Contractor shall report any actual or suspected Breaches or Security Incidents in accordance with the terms and conditions specified within the applicable Service Level Agreements (“SLA’s”) set forth within Appendix A-2.3, SERVICE LEVEL AGREEMENTS AND LIQUIDATED DAMAGES, of this Contract, to the State Privacy Offices at:

OTSI: privacy@otsi.ca.gov

CovCA: privacyofficer@covered.ca.gov

DHCS: DHCSPrivacyOfficer@dhcs.ca.gov

and State Information Security Offices at:

OTSI: osiinfosecurity@otsi.ca.gov

CovCA: informationsecurity@covered.ca.gov

DHCS: incidents@dhcs.ca.gov

2. Security Incident reports shall at all times be submitted by the Contractor via the use of standardized forms (“Incident Report Forms”), which shall be reviewed and approved by the State. Incident Report Forms shall at all times include:
 - a. A brief description of what happened including the date of the incident and the date of the discovery of the incident;
 - b. The names or identification numbers of the individuals whose PII has been, or is reasonably believed to have been accessed, acquired, used or disclosed
 - c. A description of the types of PII that were involved in the incident, as applicable;
 - d. Information regarding any information system intrusion and any systems potentially compromised;
 - e. A brief description of the Contractor’s investigation and mitigation plan; and’
 - f. Any other information reasonably necessary to enable the State to ascertain the results of any investigation or mitigation plan required by the Contractor under the SLA’s; to conduct its own investigation if, in the State’s sole discretion, it determines it to be warranted; to notify affected consumers in the event of a Breach; and to comply with any applicable privacy-related legal obligation arising from the Security Incident or Breach.
3. Upon discovery of an actual or suspected Breach or Security Incident, intrusion or unauthorized access, use or disclosure of PII, the Contractor shall take:
 - a. Prompt corrective action to mitigate any risks or damages involved with the Breach and to protect the operating environment; and
 - b. Any action pertaining to such unauthorized disclosure required by applicable Federal and State laws and regulations.

4. In addition to the incident reporting obligations specified within the SLA's, the Contractor shall at all times immediately commence an investigation in accordance with applicable law to:
 - a. Determine the scope of the incident;
 - b. Mitigate harm that may result from the incident; and
 - c. Restore the security of the system to prevent any further harm or incidents.
5. The Contractor shall cooperate with the State in investigating the actual or suspected incident and in meeting the State's obligations, if any, under applicable laws.
6. The Contractor shall mitigate to the extent practicable any harmful effect of any Breach or Security Incident that is known or reasonably discoverable to the Contractor.
7. The Contractor shall cooperate with the State in developing content for any public statements and shall not give any public statements without the express written permission of the State.
8. If a Breach requires notifications and reporting under applicable laws, and the cause of the Breach is attributable to the Contractor, its agents or Subcontractors, the Contractor shall:
 - a. Be fully responsible for providing Breach notifications and reporting as required under applicable laws;
 - b. Pay any costs of such Breach notifications as well as any costs or damages associated with the incident; and
 - c. Should the State, in its sole discretion, determine that credit monitoring is an appropriate remedy, arrange for and bear the reasonable, out-of-pocket cost of providing to each such affected individual one (1) year of credit monitoring Services from a nationally recognized supplier of such Services.
9. If the Contractor determines that a Security Incident involving PII does not require Breach notifications or reporting, it shall document its assessment and provide such documentation to the State within one week of submitting its final report. Notwithstanding the foregoing, the State reserves the right to reject the Contractor's assessment and direct the Contractor to treat the Security Incident as a Breach.

H. RISK CLASSIFICATION & ASSESSMENT

1. The State may, in its discretion, assign a tier-based risk classification to the disclosure of PII to Contractor under this agreement.
2. Determinations as to Contractor's risk-classification tier shall be made by Covered CA in its sole discretion and Contractor shall be notified of Contractor's risk-classification prior to the execution of this agreement and during this agreement if it changes. Contractor's risk-classification tier shall be provided to the SPOC appointed by Contractor within Section F above.
3. Based on the applicable risk-classification, Contractor acknowledges and agrees that the State may impose additional privacy and information security-related obligations, which may include but need not be limited to an annual attestations or annual security assessments.

4. Contractor shall at all times cooperate in good faith with the State in the provision of any information needed by the State to ascertain Contractor's risk classification or the above-referenced security-related documentation.
5. Tier-Based Risk Classification:
 - a. General
 - i. Under Section H above, the California Health Benefits Exchange (herein, "Covered CA") is entitled to impose a tier-based risk classification upon Contractor's access to PII obtained by Contractor under this agreement. ~~In the event of a conflict between Exhibit D of this agreement and the provisions of this Attachment, the provisions of this Attachment will control.~~
 - ii. Covered CA has determined that the acquisition of PII by Contractor under this agreement warrants a Tier 1 Classification.
 - iii. All Contractors classified as Tier 1 are required to comply with following terms and conditions:
 - b. Tier 1 Privacy and Security Safeguards
 - i. A Tier 1 Contractor is required to maintain an information security program that meets or exceeds the privacy and security controls adopted by Covered CA. Covered CA is required to maintain compliance with the current version of the privacy and security safeguards for health benefit exchanges, currently ARC-AMPE, mandated by the Centers for Medicare & Medicaid Services (CMS). Tier 1 Contractors may select one of the following ways to demonstrate to Covered CA the development and maintenance of a comprehensive security program based on NIST SP 800-53 Rev. 5, which must at all times govern Contractor's access and use of PII disclosed to Contractor under this agreement.
 1. FedRAMP Authorization (Moderate Level)
 2. MARS-E 2.2 or most current effective version (v2.2 as of February 2024)
 3. ARC-AMPE (Latest volume and version)
 4. HITRUST v11.x or later (Moderate or High Risk Level)
 5. NIST CSF 2.0 or later
 6. ISO 27001
 7. SOC 2 Type 2
 - c. Assessment
 - i. Covered CA reserves the right to perform, or a contracted delegate to perform, a security risk assessment once per calendar year, to assess the Contractor's security program. Should Covered CA choose to conduct any such assessment, Contractor must respond to Covered CA within fifteen (15) Business Days.

In addition to the annual security risk assessment, Contractor must provide Covered CA with the following to *informationsecurity@covered.ca.gov*:

1. Quarterly

- a. Vulnerability scan report and remediation plan for critical and high findings on internal and external network and systems used for Covered CA contracted services.

2. Annually

- a. Outcome reports from the security program selected in Section H.2.
- b. Report on Security Risk Assessment findings and remediation plans performed by a reputable independent assessor within the last year.
- c. Report on findings and remediation plan on an internal and external network penetration test performed by a reputable independent assessor within the last year.
- d. Report from the most recent quarterly web application penetration test, if services include an internet facing website or portal.
- e. Evidence of pre-production code testing or peer reviews, if services include code development.
- f. Business Continuity Plan updated within the last year.
- g. Current PCI- DSS Attestation of Compliance, if Contractor processes credit card payments on behalf of Covered CA.
- h. List of all subcontractors.

Contractor will address critical and high-risk findings from any of the above assessments within a mutually agreed upon timeframe. Failure to meet the timeframe may be considered a breach of this agreement.

d. Location

- i. All Contractor services, workers, and data storage are required to be within the US and its territories. By written approval, workers may reside outside of the US but will be restricted to Non-Production environments and will not have access to PII.

e. Access

- i. If the Contractor will require direct access to Covered CA systems, Contractor must agree to the following:
 - a. Unless Contractor receives explicit consent, Contractor is required to use only Covered CA issued devices for services.
 - b. Covered CA devices must be connected to the internet for 24 hours at least once per week to obtain security updates.
 - c. Each Contractor worker agrees to the Covered CA Acceptable Use Policy prior to gaining access to Covered CA systems.

- d. Notify Covered CA immediately of any confirmed or suspected security incident identified while delivering services.
 - e. Notify Covered CA within one (1) hour of Contractor workers no longer requiring access to Covered CA systems.
 - f. Agree to return all Covered CA equipment in working condition at the termination of the contract.
- f. Subcontracting
 - i. Contractor must not disclose or store Covered CA PII with any third party without prior written approval from Covered CA. If approved, the Contractor's third party must be contractually required to meet the same security requirements as in this agreement. Contractor is responsible for the actions of their third parties.

I. RIGHT TO INSPECT

The State may inspect the facilities, systems, books, and records of the Contractor to monitor compliance with this Attachment at any time. The Contractor shall promptly remedy any violation reported to it by the State and shall certify the same to the designated State Privacy Offices in writing. The fact that the State inspects, fails to inspect, fails to detect violations of this Attachment or detects but fails to notify the Contractor of the violation or require remediation is not a waiver of the State's rights under this Contract and this Attachment.

J. INDEMNIFICATION

In addition to any remedies found at Paragraph 28 Indemnification in the General Provisions the Contractor shall indemnify, hold harmless, and defend the State from and against any and all costs (including mailing, labor, administrative costs, vendor charges, and any other costs the State determines to be reasonable), losses, penalties, fines, and liabilities arising from or due to the Contractor's failure to comply with the requirements of this Attachment, including a Breach or other nonpermitted use or disclosure of PII by the Contractor or its Subcontractors or Agents, including without limitation. Such indemnification shall be conditioned upon the State giving notice of any claims to the Contractor after discovery thereof. If the Contractor should publish or disclose PII to others, the State shall be entitled to injunctive relief or any other remedies to which it is entitled under law or equity, without posting a bond.

K. TERMINATION OF CONTRACT

1. If the Contractor Breaches its obligations under this Attachment as determined by the State, CalHEERS may, at its option:
 - a. Require the Contractor submit to a plan of monitoring and reporting that the State may deem necessary to maintain compliance with this Contract;
 - b. Provide the Contractor with an opportunity to cure the Breach; and
 - c. Notwithstanding any provision of the Contract to the contrary, terminate the Contract if Contractor has been provided an opportunity to cure and has not thus cured the Breach.

2. A failure of the State to exercise any of these options shall not constitute a waiver of its rights under this section.
3. Upon completion of this Contract, or upon termination of this Contract, at the State's direction, the Contractor shall either return all PII to the State or shall destroy all PII in a manner consistent with NIST Special Publication 800-88, Guidelines for Media Sanitization. If return or destruction of PII is not feasible, the Contractor shall explain in writing to the designated State Privacy Offices why return or destruction is not feasible. The obligations of the Contractor under this Contract to protect PII and to limit its use or disclosure shall continue and shall survive until all PII is either returned to the State or destroyed.

ATTACHMENT A-2.2 OFFSHORE SECURITY, ACCESS & TECHNOLOGY REQUIREMENTS

This Attachment A-2.2 sets forth the security, access and technology requirements for the performance of Offshore Services under the Contract. No Services under this Contract involving access to PHI or PII may be performed offshore without the prior written consent of the State (which may be withheld in the State's sole discretion). All work shall be conducted in accordance with all data privacy and security requirements included in this Contract and as further detailed in the California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS) Deliverable D-6.7.1 –SYSTEM SECURITY PLAN, and any amendments to that plan made during the term of the Contract. The security provisions included in this Attachment are in addition to those already committed to in the System Security Plan. All work shall be performed by offshore personnel located in a secured bay dedicated to the Services ("Secure Bay"). Offshore facilities shall be deemed to be "Facilities" as defined in the Contract.

A. DEFINITIONS

Terms not otherwise defined in this Attachment shall have the meanings set forth in the Contract.

a) Personally Identifiable Information ("PII")

PII is information that can be used alone or with other information to identify, contact, or locate a single person, or to identify them in context. It includes: (1) A first and last name; (2) A home or other physical address, including street name and name of a city or town; (3) An e-mail address; (4) A telephone number; (5) A social security number; and (6) any other identifier that permits the physical or online contacting of a specific individual. PII also includes information defined as Personal Information in California Civil Code section 1798.3 and section 1798.29(g)-(h).

b) Protected Health Information ("PHI")

PHI is, as defined by Title 45 CFR 160.103, information transmitted or maintained by a covered entity or its business associates in any form or medium. It includes an individual's past, present, or future physical or mental health or condition, the provision of health care to the individual, or the past, present, or future payment for the provision of health care to the individual, and that identifies the individual or for which there is a reasonable basis to believe can be used to identify the individual.

c) Confidential Information ("CI")

CI has the same meaning as depicted in Appendix C, GLOSSARY, except, for the purposes of offshore work, CI shall not include any Federal Tax Information ("FTI"), as same is defined in USC Section 6103.

B. INDEMNIFICATION FOR THIRD PARTY CLAIMS RELATED TO CONTRACTOR'S SERVICES PERFORMED OFFSHORE

1. Notwithstanding anything to the contrary in the Contract, to the maximum extent permitted by law and except to the extent caused by negligence of the Indemnitees, the Contractor shall, at its expense, indemnify, defend with counsel reasonably approved by the State, and hold harmless, and defend the State, its employees, officers, directors, contractors successors, assigns and agency, (the "Indemnitees") from and against any losses,

liabilities, damages, penalties, costs, obligations and fees awarded to a third party and reasonably incurred fees incurred by the Indemnitees including without limitation reasonably attorneys' fees, and expenses arising from the third party claim, action, suit or judgment to the extent caused by or arising from or due to a Breach of the Contractor's obligations under this Attachment resulting in a misuse or improper disclosure of PHI or PII; such costs or damages may include, without limitation:

- a. Awarded damages resulting from any third party action under applicable (i) HIPAA requirements, (ii) requirements relating to protecting PII and PHI within Attachment A-2.1; or (iii) California state law relating to PII and PHI, and
 - b. The out of pocket and reasonable costs of State actions taken to: (i) notify the affected individual(s) and other entities of and to respond to the Breach; (ii) mitigate harm to the affected individual(s); and (iii) respond to questions or requests for information about the Breach or other impermissible use or improper disclosure of PII and/or PHI.
2. In addition, except to the extent caused by the Indemnitees' negligence, the Contractor shall be responsible for and shall indemnify the indemnitees against any finally assessed fines, penalties, sanctions, or disallowances which are imposed on the State or the Contractor by a governmental agency to the extent caused by or arising from or due to a breach of the Contractor's obligations under this Attachment and which results in misuse or improper disclosure of PHI or PII.
 3. The indemnifications set forth in this Section B shall not be subject to Contractor's Limitation of Liability as set forth in Paragraph 26, Limitation of Liability, of the General Provisions. The indemnification set forth in this Section B shall be subject to the Notice process set forth in Section 18.12.

C. ADDITIONAL CONTROLS

In addition to all of the obligations applicable to the Contractor under the Contract, the Contractor shall provide the following additional controls with respect to Services performed in Contractor's offshore facility(ies).

a) Secure Bay Requirements

The Contractor shall perform all Services within a Secured Bay environment, which shall adhere to the following requirements:

1. The Secured Bay shall be a physically segregated space that is clearly demarked from other common areas by walls and doors capable of supporting both magnetic and key locks.
2. Access to the Secured Bay must be controlled and audited via electronic badge system. Individuals may not share badges.
3. Only Contractor staff required for performing Services for State, and other supporting activities (i.e., Information Technology (IT) Administrator, etc.) shall be allowed to access the Secured Bay.
4. Security guards must be posted at all entrances of each facility that houses a Secured Bay.
5. The Contractor shall not authorize copying of any data from the Windows Virtual Desktop Instances (VDIs) to a local computer via copy and paste, screen capture, camera picture, or otherwise under any circumstance.

6. All devices such as mobile phones, USB storage devices, other external storage devices, and any other media recording devices shall be prohibited. Any exceptions must be explicitly approved by a State employee to be designated by the State.
7. All computers in the Secured Bay must be locked down to not allow the use of any external ports and devices including, but not limited to, USB ports, serial ports, and CD or DVD Drives, except when required to deliver the Services (e.g., monitor, keyboard, mouse, network connectivity).
8. The use of paper, pens, pencils and printed material may be allowed in the Secured Bay; however, no State documents or printed materials may be taken out of the Secured Bay by any Contractor Staff under any circumstance. Paper must be shredded before discarding. Print capabilities shall be restricted to supervisors or other senior management.

b) Network Connectivity Requirements

1. The Contractor shall utilize encrypted virtual desktop technology (VDI) located in the Secure Bay to provide access to Production systems and data, while protecting the integrity and security of that data.
2. The Contractor shall ensure secure communication from virtualization infrastructure (VDIs) in the Secure Bay to the Production environments.
3. The VDI shall be an isolated desktop instance in which a remote view of Production systems and data can be accessed, but from which the data itself cannot be removed.
4. Only the Contractor's approved personnel shall have remote access to those VDIs from their local PC in the Secure Bay.
5. Internet access shall be restricted when there is a live connection to the VDI.
6. Access to the State's virtual environment by the Contractor personnel shall only be authorized through the Contractor's managed PC Hardware.

c) Virus Protection

1. The Contractor's workstations in the Secured Bay shall have State designated and approved virus protection, malware prevention, and encryption Software.
2. The Contractor shall update, operate, and maintain such virus protection, malware prevention, and encryption Software.

d) Workstations

1. The Contractor's personnel shall use the standard State workstation image build with access to the State's virtual desktop environment.
2. The Contractor shall limit administrative rights to workstations.
3. The workstation environment shall meet agreed-upon security requirements (e.g., desktop encryption; updated anti-virus definitions; patch management processes).
4. The Contractor shall centrally manage operating Software patching of workstations. Security patches released by Microsoft shall be pushed to workstations and monitored.

e) Security

1. The Contractor's personnel located in the Secure Bay shall (i) undergo annual information security compliance training, HIPAA awareness sessions, and State data protection training, including training in the Contractor's Privacy and Security Policies and Procedures (P&Ps), in order to protect PII, PHI and CI from unauthorized use, disclosure or access; and (ii) document attendance at, or completion of, same.
2. State supplied access such as security certificates shall be periodically reconciled and inventoried.
3. For all of the Contractor's Offshore personnel, the Contractor shall review the Department of Health and Human Service (DHHS) Office of Inspector General (OIG) List of Excluded Individuals and Entities (LEIE) list and the General Services Administrations (GSA) Excluded Parties Lists System (EPLS) prior to the placement of any such individuals to perform any of the Services and monthly thereafter, to ensure that none of these persons or entities are excluded or become excluded from participation in Federal programs.
4. The Contractor shall develop and implement effective privacy and security procedures to protect PII, PHI and CI from unauthorized use, disclosure or access (Privacy and Security P&Ps) and share updated policies and procedures promptly with the State for review and input.
5. The Contractor shall maintain a compliance program aimed at preventing, detecting and correcting privacy and security issues and/or noncompliance with this Attachment.

f) Reporting and Access

1. The Contractor's information security unit shall enforce and monitor the Secure Bay and report upon its compliance with the controls to the project team.
2. The Contractor shall provide reasonable access to its Offshore facilities, and Equipment by, and make its books and other records pertaining to the Operations available to CMS, the Department of Health and Human Services ("DHHS"), the Office of the Comptroller General, General Accounting Office, the Office of the Inspector General ("OIG") and/or their respective designees the right to access, inspect, evaluate and audit books and other records pertaining to any aspect of the Services being performed in Contractor's Offshore.
3. The Contractor shall provide the State with rights of access to materials, facilities and persons that the State may reasonably request in order to monitor on an ongoing basis the Contractor's compliance with the requirements described and referenced in this Attachment (applicable requirements), including, but not limited to, copies of all Privacy and Security P&Ps (as updated from time to time), materials documenting Contractor's education and training program and copies of any SSAE 16 assessment conducted per the terms of the Contract.

ATTACHMENT A-2.3 SERVICE LEVEL AGREEMENTS (SLA) & LIQUIDATED DAMAGES

This Attachment A-2.3 shall be interpreted in conjunction with, and consistent with, the Contract, without limitation. The assessment of Liquidated Damages shall not constitute a waiver or release of any other remedy the State may have under the Contract.

The State shall not assess Liquidated Damages if the State determines (in its reasonable discretion) that the Contractor's delay or failure to perform its obligations was caused by factors beyond the reasonable control of the Contractor, including if caused by acts of the State and without any fault or negligence of the Contractor.

The methodology for measuring Contractor's Service Level Agreements ("SLAs") and the formulas used to calculate remedies if SLAs are not met are defined in tables 1 through 20 below. tables 1 through 17 and tables 19 and 20 are subject to a monthly cap maximum of 10% of the monthly fixed cost SDMO fees. Table 18 Technology Recovery is exempt from the monthly cap. Table 18 is subject to an amount up to 80% of the monthly fixed cost SDMO fees.

The Contractor shall report on all elements for all SLAs based on parameters and format defined by the State, including but not limited to the "Performance Standard" and "Measurement Process" sections for each table and the expected and minimum levels set and any additional reporting specifics provided in each table. Reporting shall show accurate and factual data, with justifications where applicable, such as scheduled downtime.

A. SLA- SYSTEM WEB PORTAL AVAILABILITY

Table 1: System Web Portal Availability Service Level Agreement (SLA)

Title	Description
SLA Name	System Web Portal Availability
Performance Standard	The System Web Portal is available 24-hours-a-Day, 7-Days-a-week. There are three Service Level's defined within this SLA. Service Level Operational - The System Web Portal shall be available 18-hours-a-day, from 6:00 a.m. Pacific time (PT) until 12:00 a.m. PT the following day, 6-days-a-week, from Monday through Saturday during non-Open Enrollment Periods. Service Level Peak - The System Web Portal shall be available during daily peak hours, from 10:00 a.m. PT until 2:00 p.m. PT each day, 6-days-a-week, from Monday through Saturday. Service Level Critical Calendar - The System Web Portal shall be available 18-hours-a-day, from 6:00 a.m. PT until 12:00 a.m. PT, the following day, 7-days-a-week during the Open Enrollment Period.
Measurement Process	The System Web Portal Availability SLA shall be calculated as follows: • (Data Element A) / (Data Element B) • Data Element A: (Month Minutes) – (Scheduled Downtime Minutes) – (Client Directed Downtime Minutes) – (Non-Client Directed Downtime Minutes) • Data Element B: (Month Minutes) – (Scheduled Downtime Minutes) – (Client Directed Downtime Minutes) • Month Minutes: The number of minutes within the reporting period.

Title	Description
	- Scheduled Downtime Minutes: The number of minutes of scheduled State approved downtime during the reporting period. - Client Directed Downtime Minutes: The number of minutes of unscheduled State approved downtime during the reporting period. All planned maintenance Downtime and requests for System Web Portal Downtime shall be made to the State Project Director or designee 24 hours in advance and approved by the State Project Director or designee. - Non-Client Directed Downtime Minutes: The number of minutes of unscheduled, non-client directed downtime as defined by the duration of all Severity Level 1 Incidents (as defined in Special Provisions, Table 14, System Deficiency Correction SLA) that impact the System Web Portal during the reporting period.
Liquidated Damages	Each month the Contractor's performance fails to meet the Service Level Operational, the monthly fixed cost SDMO fees shall be reduced by \$5000 for every 60 aggregate minutes that requirements are not met. Each month the Contractor's performance fails to meet the Service Level Peak, the monthly fixed cost SDMO fees shall be reduced by \$7500 for every 60 aggregate minutes that requirements are not met. Each month the Contractor's performance fails to meet the Service Level Critical Calendar, the monthly fixed cost SDMO fees shall be reduced \$10000 for every 60 aggregate minutes that requirements are not met.
Expected Service Level Agreement	99.80%
Minimum Service Level Agreement	99.50%
Minimum Event Quantity	Does not apply
Measurement Period	Monthly
Validation Period	No
Escalation	If the System (Web Portal) Availability falls below 99.8% during the month, the Contractor shall conduct the following: - The Contractor's management is notified - The Contractor notifies the State Project Director or designee
Exceptions	None, except as defined in the Measurement Process.
Reporting	Any non-Client Directed Downtime shall be documented and explained in writing to the State within 48 hours. The Contractor shall report all occurrences and duration of each such Downtime within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

B. SLA- SYSTEM DAILY BATCH PRODUCTION JOBS COMPLETION

Table 2: System Daily Batch Production Jobs Completion Service Level Agreement

Title	Description
SLA Name	System Daily Batch Production Jobs Completion
Performance Standard	The System shall have 99.0% of the daily batch Production jobs completed by 6:00 a.m. PT, the next Day.
Measurement Process	The daily batch Production jobs completion percentage shall be measured as follows: • (Data Element A – Data Element B) / (Data Element A) • Data Element A: (Total Number of normal daily batch Production jobs scheduled • Data Element B: (Total Number of normal daily batch Production jobs that failed to successfully complete on time.)
Liquidated Damages	If the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$5,000 for each 24 consecutive hour period.
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	99.5%
Minimum Service Level Agreement	99.0%
Measurement Period	Daily
Exceptions	Daily Batch Production Jobs Completion shall not be measured during periods where: • External interfaces are unavailable • Scheduled Downtime • Extension approved by State Project Director or designee • External Data Anomalies
Reporting	The Contractor shall report the Daily Batch Production Jobs Completion performance within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable. At a minimum, daily reporting will be provided sufficient to determine compliance: • Total number of daily batch Production jobs • Total number of daily batch Production jobs not completed by 6 a.m. PT • List of batch programs not completed by 6 a.m. PT • Percentage of batch programs not completed by 6 a.m. PT each Day

C. SLA- ROOT CAUSE ANALYSIS SUBMISSION

Table 3: Root Cause Analysis Submission SLA

Title	Description
SLA Name	Root Cause Analysis Submission

Title	Description
Performance Standard	The Contractor shall submit to the State Project Director, or designee, as defined in CD-4.9-1 Defect Management Plan, an initial Root Cause Analysis documented in the appropriate reports for every Priority Level 1 Deficiency within 24 hours of identification and Priority Level 2 Deficiency within 48 hours of identification, as defined in Special Provisions, Section N, SLA-System Deficiency~~Table 14: Defect Management Triage SLA~~. The Contractor must report status of open RCA documents on a weekly basis in the CalHEERS Weekly Director's report. Note: Populating the RCA fields in the ALM or EWM tools does not constitute a "submission," in relation to this SLA.
Measurement Process	The Root Cause Analysis Submission SLA shall be calculated, in the event any Priority Level 1 or Priority Level 2 deficiencies are identified within the reporting period, as follows: • (Data Element A) / (Data Element B) • Data Element A: Number of Root Cause Analysis Submissions delivered within the Performance Standard within the reporting period. • Data Element B: Number of Root Cause Analysis Submissions due within the reporting period.
Liquidated Damages	For each Day and for each Root Cause Analysis document the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$1,000.
Minimum Event Quantity	Does not apply.
Expected Service Level Agreement	99.5%
Minimum Service Level Agreement	99.0%
Measurement Period	Monthly
Exceptions	None, however, an extension to a Root Cause Analysis submission date can be approved by the State Project Director or designee.
Reporting	The Contractor shall report the Root Cause Analysis Submission performance within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

D. SLA- SYSTEM WEB PORTAL TRANSACTION TIME

Table 4: System Web Portal Transaction Time SLA

Title	Description
SLA Name	System Web Portal Transaction Time

Title	Description
Performance Standard	It is planned that ~~99~~<u>100</u>% of the total number of the Top 25 mutually designated transaction types are to complete processing within two (2) seconds or less 24-hours-a-day, 7-days-a-week. However, the Performance Standard is that 99% of the total number of the Top 25 mutually designated transaction types shall complete processing within two (2) seconds or less 18-hours-a-day, from 6:00 a.m. PT until 12:00 a.m. PT the following day, 6-days-a-week, from Monday through Saturday during the non-Open Enrollment Period. The Performance Standard is that 99% of the total number of the Top 25 mutually designated transaction types shall complete processing within two (2) seconds or less 18-hours-a-day, from 6:00 a.m. PT until 12:00 a.m. PT, 7-days-a-week during the Open Enrollment Period.
Roles & Responsibilities	State Staff and the Contractor • ~~During the Transition period, t~~The State Staff and the Contractor shall agree upon and designate the Top 25 transaction types to be assessed as part of the meeting of this Service Level Agreement. State Staff • State Staff may conduct independent transaction assessments and provide results to the Contractor. ~~The State may also require the Contractor to install Third Party Software to measure and monitor transaction times.~~ Contractor • The Contractor shall deploy the resources necessary to maintain the System Web Portal Transaction Time SLA and report the System performance within the Monthly Status Report. If requested by the State, the Contractor shall install Third Party Software for the purpose of conducting independent transaction response time monitoring.
Measurement Process	The System Web Portal Transaction Time SLA shall be calculated as follows: • Data Element A: The total number of transactions completed in less than < 2 secs • Data Element B: Average Response time for the transactions within the SLA Percentile Target for the (Total number of designated Top 25 Transactions completed on time during the reporting period) – (Total number of designated Top 25 Transactions that occur during a Severity Level 1 Incident during the reporting period). • Data Element C: Data Element B/Data Element A = success rate
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per 24 consecutive hour period of non-performance.
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	99.0%
Minimum Service Level Agreement	95.0%
Measurement Period	Monthly

Title	Description
Escalation	If the System Web Portal Transaction Time falls below 96.5% during the month, the Contractor shall conduct the following: • The Contractor's management is notified. • The Contractor notifies the State Project Director or designee
Exceptions	None, except as defined in the Measurement Process.
Reporting	The Contractor shall report the System performance within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

E. SLA- SECURITY INCIDENT NOTIFICATION

Table 5: Security Incident Notification SLA

Title	Description
SLA Name	Security Incident Notification
Performance Standard	The Contractor shall notify the Covered California Privacy and Information Security Officer, DHCS Privacy and Information Security Officer, State Project Director or designees within one (1) hour following the identification of any suspected security incident related to the System.
Measurement Process	The Security Incident Notification SLA shall be calculated as follows: • (Data Element A) / (Data Element B) • Data Element A: Number of Security Incident Notifications delivered within the Performance Standard within the reporting period. • Data Element B: Number of Security Incident Notifications due within the reporting period.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement set forth below, a percentage of the monthly fixed cost SDMO fees shall be reduced by \$50,000 for every 60 consecutive minute period of non-delivery.
Minimum Event Quantity	The Minimum Event Quantity shall be 34 incidents, i.e., $1/34 = 2.94\%$. There are three (3) scenarios that can apply regarding the Minimum Event Quantity: 1. If the Minimum Event Quantity of 34 incidents is met or exceeded within a reporting period, the SLA metric shall be calculated and reported, and Liquidated Damages shall be applicable. 2. If the Minimum Event Quantity of 34 incidents has not been met within a reporting period, and there has been zero (0) or one (1) failure to meet the Performance Standard, then the SLA metric shall be calculated and reported, and Liquidated Damages shall not be applicable. However, if the one (1) failure to meet the Performance Standard is more than two (2) hours after identification, then the SLA metric shall be calculated and reported, and Liquidated Damages shall be applicable. 3. If the Minimum Event Quantity of 34 incidents has not been met within a reporting period, and there has been more than one (1) failures to meet the Performance Standard, then the SLA metric shall be calculated and reported, and Liquidated Damages shall be applicable.
Expected Service Level Agreement	99.0%
Minimum Service Level Agreement	97.0%

Title	Description
Measurement Period	Monthly
Exceptions	None
Reporting	The Contractor shall report the security incident within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

F. SLA- SECURITY INCIDENT MITIGATION PLAN

Table 6: Security Incident Mitigation Plan SLA

Title	Description
SLA Name	Security Incident Mitigation Plan
Performance Standard	The Contractor shall provide the Covered California Privacy and Information Security Officer, DHCS Privacy and Information Security Officer, State Project Director or designees with a mitigation plan with any corrective actions needed to mitigate the Security Incident within: a) two (2) hours of notifying the State of any potential or actual Major Incident; and b) eight (8) hours of notifying the State of any potential or actual Minor Incident.
Measurement Process	The Security Incident Mitigation Plan SLA shall be calculated as follows: • (Data Element A) / (Data Element B) • Data Element A: Number of Mitigation Plans delivered on time within the reporting period. • Data Element B: Number of Mitigation Plans due within the reporting period.
SLA Definitions	For purposes of this SLA, the following capitalized terms shall have the respective meanings set forth below: - Major Incident: Shall mean: i) incidents involving the unauthorized logical or physical access to the System; ii) denial of service attacks which prevent or impair the authorized use of the System; iii) successful malicious coding attacks, including but not limited to those involving the use of a virus, worm, Trojan horse or other code-based attack upon the System; iv) unblocked scans, probes or other attempts by unauthorized persons to access the System; or v) incidents involving PHI or PII as such terms are defined below. - Minor Incident: Shall mean any improper usage of the System, including but not limited to the unacceptable use of any network or violation of State computer or information security policy related to the System. - Protected Health Information (PHI): Shall mean any individually identifiable health information. Identifiable refers not only to the data that is explicitly linked to a particular individual (that's identified information). It also includes health information with data items which reasonably could be expected to allow individual identification. - Personally Identifiable Information (PII): Shall mean any information about an individual including, but not limited to, education, financial transactions, medical history, and criminal or employment history, and information which can be used to distinguish or trace an individual's identity, such as their name, social security number, date and place of birth, mother's maiden name, biometric records, etc., including any other personal information, which is linked or linkable to an individual.
Liquidated Damages	If the Contractor's performance falls below the Minimum Service Level Agreement set forth below, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per incident.

Title	Description
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	99.0%
Minimum Service Level Agreement	98.0%
Measurement Period	Monthly
Exceptions	None
Reporting	The Contractor shall report the security incident within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

G. SLA- SECURITY INCIDENT MANAGEMENT REPORT

Table 7: Security Incident Management Report SLA

Title	Description
SLA Name	Security Incident Management Report
Performance Standard	The Contractor shall provide a written report and assessment to the Covered California Privacy and Information Security Officer, DHCS Privacy and Information Security Officer, State Project Director or designees within 24 hours of any Major or Minor Incident regarding any and all actions taken concerning the Major or Minor incident, the current status, and any potential impact(s) the Major or Minor Incident may have upon the System.
Measurement Process	The Security Incident Management Report SLA shall be calculated as follows: • (Data Element A) / (Data Element B) • Data Element A: Number of Management Reports delivered on time within the reporting period. • Data Element B: Number of Management Reports due within the reporting period.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement set forth below, the monthly fixed cost SDMO fees shall be reduced by \$50,000 for each 24 consecutive hour period of non-delivery.
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	99.0%
Minimum Service Level Agreement	98.0%
Measurement Period	Monthly
Exceptions	None
Reporting	The Contractor shall report the security incident within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

H. SLA- TECHNOLOGY SIMULATION

Table 8: Technology Recovery Simulation SLA

Title	Description
SLA Name	Technology Recovery Simulation
Performance Standard	The Contractor shall perform an annual Technology Recovery simulation <u>of all levels and scenarios</u> per mutually agreed upon ~~the~~ Contractor and State objectives.
Measurement Process	The Contractor shall provide a <u>detailed</u> report of the Technology Recovery simulation <u>incremental progress through the planned process and final results</u> and the back-up site outcomes for review within 15 Days of the simulation exercise.
Liquidated Damages	If the Technology Recovery simulation is not performed and reported on within the agreed upon annual timeframe, the monthly fixed cost SDMO fees shall be reduced by \$25,000 per Day.
Minimum Event Quantity	Does not apply
Minimum Service Level Agreement	100%
Measurement Period	Annually
Reporting	The Contractor shall report on the Technology Recovery simulation within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

I. SLA- SYSTEM ONLINE EHIT TRANSACTION TIME

Table 9: System Online eHIT Transaction Time SLA

Title	Description
SLA Name	System online eHIT Transaction Time
Performance Standard	System eHIT online transactions shall complete processing within two (2) minutes or less, from 7:00 a.m. PT until 7:00 p.m. PT, 6-days-a-week, from Monday through Saturday. For the purposes of this SLA, the system eHIT online transaction is defined as that portion of transaction which is within the Contractor's responsibility and control. In the event of a companion set, measurement is effective when the full set is received.
Measurement Process	The online eHIT Transaction Time SLA shall be calculated as follows: • (Data Element A) / (Data Element B) • Data Element A: (Total Number of online eHIT Transactions processed during the online eHIT Processing Period within the Performance Standard) – (Total number of online eHIT Transactions excluded as defined in the Exceptions sub-section below) • Data Element B: (Total Number of online eHIT Transactions received during the online eHIT Processing Period) – (Total number of online eHIT Transactions excluded as defined in the Exceptions sub-section below) • Contractor's Monthly SLA report shall include Data Element A and B transaction counts broken down in to two (2) categories as follows: • Total Transaction count with exceptions • Total Transaction count without exceptions

Title	Description
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per 24 consecutive hours. In the event of such unscheduled Downtime exceeding 24 consecutive hours, it is expected the State and the Contractor shall declare a disaster and begin Technology Recovery procedures. Performance of the Technology Recovery procedures is addressed through the Technology Recovery SLA.
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	95.0%
Minimum Service Level Agreement	90.0%
Measurement Period	Monthly
Escalation	If the System eHIT transactions falls below the Expected Service Level during the month, the Contractor shall conduct the following: - The Contractor's management is notified. - The Contractor notifies the State Project Director or designee by an email correspondence.
Exceptions	Online eHIT Processing shall not be measured during periods where: - The State Project Director or designee has approved Maintenance activities and/or, - External Interface Partners required for eHIT Processing are unavailable or experiencing degraded performance and/or, - The State Project Director or designee has requested that online eHIT processing not be activated. - All online eHIT Transactions received during any rolling minute where: - The rolling five (5) minute average number of transactions received exceeds 167 transactions per consortia per minute shall be excluded until - The unprocessed queue of transactions per consortia is no more than 167 transactions and - The rolling five (5) minute average number of transactions received is no more than 167 transactions per consortia per minute. - eHIT Transactions directly related to Data Fixes and Error Transactions, or other exceptions approved by the State as defined in the Measurement Process.
Reporting	The Contractor shall report the online eHIT Transaction Time performance within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

J. SLA- SYSTEM BATCH EHIT TRANSACTION TIME

Table 10: System Batch eHIT Transaction Time SLA

Title	Description
SLA Name	System Batch eHIT Transaction Time
Performance Standard	The System shall process up to 40,000 inbound Batch eHIT Transaction requests per consortia during the Batch eHIT Processing Period. All inbound Batch eHIT Transaction requests must be fully received each Day prior to the start of the Batch eHIT Processing Period. All Batch eHIT Transactions received after the start of the Batch eHIT Processing Period or partially received shall be measured as part of the next Batch eHIT Processing Period. The Batch eHIT Processing Period is defined as: • Lasting from 5:00 p.m. PT until 7:00 a.m. PT the following day, Monday through Friday, excluding State holidays, and • Lasting from 7:00 a.m. PT Saturday until 12:00 a.m. PT Sunday.
Measurement Process	The Batch eHIT Transaction Time SLA shall be measured as follows: • (Data Element A) / (Data Element B) • Data Element A: (Total Number of Batch eHIT Transactions processed during the Batch eHIT Processing Period) – (Total number of online eHIT Transactions excluded as defined in the Exceptions sub-section) • Data Element B: (Total Number of Batch eHIT Transactions received during the Batch eHIT Processing Period) – (Total number of online eHIT Transactions excluded as defined in the Exceptions sub-section)
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per Day.
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	99.0%
Minimum Service Level Agreement	95.0%
Measurement Period	Monthly

Title	Description
Exceptions	Batch eHIT Processing shall not be measured during periods where: - The State Project Director or designee has approved Maintenance activities and/or, - External Interface Partners required for eHIT Processing are unavailable or experiencing degraded performance and/or, - The State Project Director or designee has requested that Batch eHIT processing not be activated. - Any Batch eHIT Transactions received during one of the above periods shall be processed on a best-efforts basis. If this backlog cannot be cleared prior to the next Batch eHIT processing Period, the Contractor shall prioritize the oldest Batch eHIT Transactions and be measured on the first 40,000 Batch eHIT Transactions. - All Batch eHIT Transactions received above the 40,000 Batch eHIT Transactions per consortia limit shall not be measured as part of this SLA and shall be processed on a best-efforts basis. If this backlog cannot be cleared prior to the next Batch eHIT processing Period, the Contractor shall prioritize the oldest Batch eHIT Transactions and be measured on the first 40,000 Batch eHIT Transactions.
Reporting	The Contractor shall report the Batch eHIT Transaction Time performance within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

K. SLA- PUBLICATIONS PRINT

Table 11: Publications Print SLA

Title	Description
SLA Name	Publications Print
Performance Standard	Ninety-Nine percent (99%) of the Eligibility Determination (NOD01 and NOD02) Notices shall be printed and sent (through mail Services or electronically) to the requestor within three (3) Days of the request date and as scheduled for each type of publication regardless of volume. Ninety-Nine percent (99%) of the remaining top 20 print jobs (as designated by the State in writing) shall be printed and sent (through mail Services or electronically) to the requestor within four (4) Days of the request date and as scheduled for each type of publication regardless of volume. The State may perform independent audits per the terms of the Agreement and of publication print processing times to help confirm information provided by the Contractor. Publications consist of printing of Notices, forms, letters, postcards, flyers, brochures, enrollment packages, and ad hoc mass mailings. Printed documents shall mean basic black printing on white paper to full-color glossy multi-fold brochures and presentation materials, alternate format (e.g. braille) and forms as defined in the Detailed System Design Deliverable.

Title	Description
Measurement Process	The Publications Print SLA shall be calculated as follows: • (Data Element A) / (Data Element B) • Data Element A: (Publication Print Requests mailed on time during the reporting period) – (State approved excluded Publications) • Data Element B: (Publication Print Requests requested during the reporting period) – (State approved excluded Publications)
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per Business Day.
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	99.0%
Minimum Service Level	97.5%
Measurement Period	Monthly
Exceptions	None, except as defined in the Measurement Process.
Reporting	The Contractor shall report on the Publications that were not sent within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

L. SLA- IMAGE AVAILABILITY

Table 12: Image Availability SLA

Title	Description
SLA Name	Image Availability
Performance Standard	Online images of all documents shall be made available for immediate viewing and retrieval within one (1) Day of documents being scanned and submitted to the imaging system.
Measurement Process	Online images of all incoming scanned documents shall be made available for immediate viewing and retrieval within one (1) Day of documents being scanned and submitted to the imaging System.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per Day.
Expected Service Level Agreement	95.0%
Minimum Service Level Agreement	90.0%
Measurement Period	Monthly
Escalation	If the Image Availability falls below 95.0% during the month, the Contractor shall conduct the following: • The Contractor's management is notified. • The Contractor notifies the State Project Director or designee
Exceptions	Any System Downtime that has been accepted by the State Project Director or designee.

Title	Description
Reporting	The Contractor shall report all occurrences of images unavailable within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

M. SLA- FINANCIAL MANAGEMENT – CARRIER INVOICING

Table 13: Financial Management – Carrier Invoicing SLA

Title	Description
SLA Name	Financial Management – Carrier Invoicing
Performance Standard	The System shall properly invoice carriers for per member per month (PMPM) assessment fees within a 99.9% accuracy rating, providing that billing information and data supplied by the State and external parties is accurate.
Measurement Process	The Financial Management – Invoicing SLA shall be calculated as follows: • (Data Element A) / (Data Element B) • Data Element A: (Total Number of Members Invoiced During the Reporting Period) – (Total Number of Members Invoiced Reported by the State to be Inaccurate and Verified by the Contractor During the Reporting Period) • Data Element B: (Total Number of Members Invoiced During the Reporting Period) • The Total Number of Members Invoiced Reported by the State to be Inaccurate and Verified by the Contractor shall be provided by the State to the Contractor before the end of the reporting period, as described in the Operations Manual Deliverable.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement set forth below, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per Day per Carrier.
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	99.9%
Minimum Service Level Agreement	99.0%
Measurement Period	Monthly
Exceptions	None, except as identified in the Measurement Process.
Reporting	The Contractor shall include this SLA Metric in the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

N. SLA- SYSTEM DEFICIENCY

The Contractor shall adhere to the System Deficiency standards which include Deficiency Resolution Expectations (Figure 2) as follows:

1. The Contractor shall maintain deficiencies by priority below the thresholds identified in the Minimum and Expected Service Level Agreements.
2. Priority of the defect specifies the order in which the defect should be fixed in both Production and Non-Production processes.
3. The priority of the defect is updated based on Figure 1 - Defect Priority heatmap as follows:

Figure 1: Defect Priority (Severity-by-Impact)

		IMPACT				
		1	2	3	4	5
SEVERITY	1	Priority 1	Priority 1	Priority 1	Priority 1	Priority 1
	2	Priority 2	Priority 2	Priority 2	Priority 3	Priority 3
	3	Priority 2	Priority 2	Priority 3	Priority 3	Priority 3
	4	Priority 3	Priority 4	Priority 4	Priority 4	Priority 4

Deficiency Priority is defined in accordance with the heatmap above which correlates between Severity and Impact. Severity and Impact are currently defined in SOW 4 Section 4.9 DEFECT MANAGEMENT.

The Contractor shall identify and report all System Defects according to the criteria defined in Figure 2: Deficiency Resolution Expectations as follows:

Figure 2: Deficiency Resolution Expectations

Priority	Defect Identification	Triage & RCA Submission Timeframe	RCA Expectations	Defect Correction Period
1	15 Minutes - 1 Hour	No later than 1 business day	Production Defects: As defined in SLA Table 3: Root Cause Analysis Submission SLA and processed in the CalHEERS Defect Management tool(s) Non-Production Defects: Processed in the CalHEERS Defect Management tool(s)	48 hours
2	1 Hour	No later than 2 business days	Production Defects: As defined in SLA Table 3: Root Cause Analysis Submission SLA and processed in the CalHEERS Defect Management tool(s) Non-Production Defects: Processed in the CalHEERS Defect Management tool(s)	7 calendar days
3	2 Hours	No later than 10 business days	Processed in the CalHEERS Defect Management tool(s)	Production Defects: no more than 40 calendar days Non-Production Defects: Within one-week post defect prioritization date, implies agreement on proposed FDD date • If defect is identified close to code freeze, the fix will be delivered in the earliest build possible • Exceptions could be case on case basis where-in the fix might need additional time/confirmation from a trading partner
4	2 Business Hours	Per mutual agreement between the SI and the State	Processed in the CalHEERS Defect Management tool(s)	Production Defects: no more than 65 calendar days Non-Production Defects: Within two weeks post defect prioritization date, implies agreement on proposed FDD date

The information in the following table is unique to the aspects of System Deficiency defined in Table 14: System Deficiency Correction

Table 14: System Deficiency Correction SLA

Title	Description
SLA Name	System Deficiency Correction
Performance Standard	The Contractor shall report to the State on Deficiency correction as follows: 1. The Contractor shall maintain deficiencies by priority below the thresholds identified in the Minimum and Expected Service Level Agreements. 2. Priority of the defect specifies the order in which the defect should be corrected in both Production and Non-Production processes. 3. The priority of the defect is updated based on the Figure 1 - Defect Priority heatmap and Figure 2: Deficiency Resolution Expectations Priority table in Section N, SLA-System Deficiency, above.
Measurement Process	The Contractor shall maintain the correction of Deficiencies by Priority below the thresholds identified in the Minimum and Expected Service Level Agreements. On the last Day of every month, the Contractor shall measure all Deficiencies by Priority that have not reached the Passed Test, Passed User Acceptance Testing (UAT), or Rejected state. If the deficiencies in any of the Priority categories are above the Expected threshold, the SLA as a whole shall be defined as not meeting the Expected Performance Standard. Further, if deficiencies in any Priority category is above the Minimum threshold, the SLA as a whole shall be defined as not meeting the Minimum Performance Standard.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced as identified by Priority below per Defect per Day: • Priority 1 = \$1,200 • Priority 2 = \$1,000 • Priority 3 = \$800 • Priority 4 = \$600
Minimum Event Quantity	Does not apply
Expected Service Level Agreement	Priority 1 Deficiencies: Deployed within 24 Hours Maximum number of Priority 2 Deficiencies: Deployed within five (5) Days Maximum number of Priority 3 Production Deficiencies: No more than 40 Days old Maximum number of Priority 3 Non-Production Deficiencies: No more than 5 Days post defect prioritization date Maximum number of Priority 4 Production Deficiencies: No more than 65 Days old Maximum number of Priority 4 Non-Production Deficiencies: No more than 10 Days post defect prioritization date
Minimum Service Level Agreement	Priority 1 Deficiencies: Deployed within 48 Hours Maximum number of Priority 2 Deficiencies Deployed within seven (7) Days Maximum number of Priority 3 Production Deficiencies: No more than 65 Days old Maximum number of Priority 3 Non-Production Deficiencies: No more than 7 Days post defect prioritization date Maximum number of Priority 4 Production Deficiencies: No more than 125 Days old Maximum number of Priority 4 Non-Production Deficiencies: No more than 14 Days post defect prioritization date

Title	Description
Measurement Period	Monthly
Exceptions	None, except as documented in the Measurement Process.
Reporting	The Contractor shall report, at a minimum, within the Monthly Status Report and Defect Management tool(s): • All System Deficiencies (The State may limit environments or status or type as needed.) • Number • Current Status • Priority • Impact

O. SLA- N-1 COMPLIANCE

Table 15: N-1 Compliance SLA

Title	Description
SLA Name	N-1 Compliance
Performance Standard	The Contractor shall ensure that ~~software~~ Software is maintained at current or N-1 versions as defined in the Hardware and Software Inventory Management Plan Deliverable.
Measurement Process	Measured by evaluation of content in Artifact N-1 Compliance Maintenance.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced \$25000.00 per ~~software~~ Software not in compliance.
Expected Service Level Agreement	100%
Minimum Service Level Agreement	99.9%
Measurement Period	Monthly
Exceptions	None, except as documented in the Measurement Process.
Reporting	The Contractor shall include this SLA Metric in the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

P. SLA- DATA WAREHOUSE AVAILABILITY

Table 16: Data Warehouse Availability SLA

Title	Description
SLA Name	Data Warehouse Availability

Title	Description
Performance Standard	The Contractor shall ensure that Production Subject Area Tables are updated and available by ~~6:00 a.m. Pacific time (PT)~~<u>6 AM PST</u> Monday through Friday. Subject Area Tables include at a minimum the follow and as otherwise requested by the State Project Director or designee: • Application (DM_APP_DETL) • Delegation (DM_DELGTN_DETL) • Eligibility (DM_ELIG_DETL) • Enrollee (DM_ENRLEE_DETL) • Enrollment (DM_ENRLMNT_DETL) • DM_ENROLLEE • DM_APS_ENRL
Measurement Process	(The number of Subject Area Tables scheduled for update and completed on time) / (The number of Subject Area Tables scheduled) per month
Liquidated Damages	For each month the Contractor's performance falls below the Performance Standard set forth above, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per month.
Minimum Event Quantity	(The number of Subject Area Tables) * (The number of Business Days per month)
Expected Service Level Agreement	99.0% of deficiencies resolved within Performance Standard
Minimum Service Level Agreement	96.0% of deficiencies resolved within Performance Standard
Measurement Period	Monthly
Reporting	The Contractor shall include this SLA Metric in the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

Q. SLA- DATA AVAILABILITY

Table 17: Data Availability SLA

Title	Description
SLA Name	Data Availability
Performance Standard	The Contractor shall ensure that critical data required for the continued analysis of performance and adherence to State and federal regulations be available as per the requirements of the Technology Recovery Plan Deliverable. The State and the Contractor shall jointly determine what constitutes critical operations. The agreed-upon critical data shall be documented in the Technology Recovery Plan Deliverable.
Measurement Process	The availability of data shall be measured as per the requirements of the Technology Recovery Plan Deliverable.
Liquidated Damages	For each instance that the data availability is delayed the Contractor's total monthly fixed cost SDMO fees for the month the instance occurred shall be reduced by \$50,000 per 24 hour period.
Minimum Event Quantity	Does not apply

Title	Description
Minimum Service Level Agreement	100%
Measurement Period	Per month
Reporting	The Contractor shall provide a detailed report of the Technology Recovery outcomes, as specified in the Technology Recovery Plan Deliverable, within 30 Days of the disaster event. The Contractor shall report all disaster events within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

R. SLA- TECHNOLOGY RECOVERY

Table 18: Technology Recovery SLA

Title	Description
SLA Name	Technology Recovery
Performance Standard	The Contractor shall restore critical System operations per the requirements of the Operations Manual Deliverable within four (4) hours of the declaration of the disaster and resume all remaining critical operations. Disaster declaration is a process defined in the Operations Manual Deliverable. The State and the Contractor shall jointly determine what constitutes critical operations. The agreed-upon critical operations shall be documented in the Operations Manual Deliverable.
Measurement Process	The recovery time of a disaster shall be measured from the time of the declaration of the disaster until restoration of the critical Systems per the requirements of the Operations Manual Deliverable.
Liquidated Damages	For each instance that the recovery takes: • More than four (4) hours but less than 12 hours, 10% of the Contractor's total monthly fixed cost SDMO fees for the month the instance occurred shall be reduced as damages. • More than 12 hours but less than 24 hours, 10% (for a total of 20%) of the Contractor's total monthly fixed cost SDMO fees for the month the instance occurred shall be reduced as damages. • More than 24 hours but less than 48 hours, an additional 20% (for a total of 40%) of the Contractor's total monthly fixed cost SDMO fees for the month the instance occurred shall be reduced as damages. • More than 48 hours but less than 72 hours, an additional 20% (for a total of 60%) of the Contractor's total monthly fixed cost SDMO fees for the month the instance occurred shall be reduced as damages. • More than 72 hours, an additional 20% (for a total of 80%) of the Contractor's total monthly fixed cost SDMO fees for the month the instance occurred shall be reduced as damages.
Minimum Event Quantity	Does not apply
Minimum Service Level Agreement	100%
Measurement Period	Per declared disaster

Title	Description
Reporting	The Contractor shall provide a detailed report of the Technology Recovery outcomes, as specified in the Operations Manual, within 30 Days of the disaster event. The Contractor shall report all disaster events within the Monthly Service Level Management Report, as described in the Operations Manual Deliverable.

S. SLA- SERVICE CENTER AVAILABILITY

Table 19: Service Center Availability

Title	Description
SLA Name	Service Center Availability
Performance Standard	The Contractor shall ensure that the service center is available 99.9% of the time, excluding scheduled maintenance. The Contractor shall notify the State within fifteen (15) minutes of detecting a critical outage and resolve such outages within four (4) hours. ~~If the Contractor fails to meet the 99.9% uptime, the State is entitled to service credits as specified. The Contractor shall provide real-time monitoring, monthly performance reports, and maintain a disaster recovery plan to restore services within four (4) hours in case of a major outage.~~
Measurement Process	Availability percentage will be calculated monthly based on the accumulated total of all unavailable time derived from submitted tickets. Scheduled uptime is based on 24 hours x the number of Days in the month.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per Day.
Expected Service Level Agreement	99.9%
Minimum Service Level Agreement	99.5%
Measurement Period	Monthly
Escalation	If the Service Center Availability falls below 99.5% during the month, the Contractor shall notify the Contractor's management and the State.
Exceptions	Any Service Center downtime that has been accepted by the State.
Reporting	The Contractor shall report all occurrences of service center unavailability to the State.

T. SLA- SERVICE CENTER CALL RECORDINGS

Table 20: Service Center Call Recordings

Title	Description
SLA Name	Service Center Call Recordings

Title	Description
Performance Standard	The Contractor shall ensure the capture and storage of one-hundred percent (100%) of all inbound and outbound call recordings for the Service Center. Any failure to capture a call recording shall be detected, logged, and resolved within one (1) Day. The Contractor shall provide monthly reports detailing call recording capture performance and <u>the State may</u> apply <u>Liquidated Damages credits</u> as outlined below for any non-compliance. All call recordings shall be securely stored and retained as defined in SOW Section 6.19 – SERVICE CENTER SERVICES.
Measurement Process	The failure to meet the daily recording percentage begins when the Contractor receives an alarm or fault indicator, when the State performs a manual system check revealing an outage, or when a ticket is submitted by either the Contractor or the State, whichever occurs first. Upon notification, receipt of the daily call recording percentage report, or a network alarm, the Contractor shall compile a list of affected end-user seats and service features for tracking and reporting SLA rights and remedies. Outage duration is measured per end-user seat and service feature from the first notification until confirmed restoration.
Liquidated Damages	For each month the Contractor's performance falls below the Minimum Service Level Agreement, the monthly fixed cost SDMO fees shall be reduced by \$50,000 per Business Day.
Expected Service Level Agreement	100%
Minimum Service Level Agreement	99%
Measurement Period	Monthly
Escalation	If the Service Center Systems Availability falls below 99% during the month, the Contractor shall notify the Contractor's management and the State.
Exceptions	Any Service Center call recordings unavailability that has been accepted by the State.
Reporting	The Contractor shall report all occurrences of service center call recording unavailability to the State.

APPENDIX A-3 CALHEERS ADDITIONAL FEDERAL PROVISIONS

ADDITIONAL FEDERAL PROVISIONS

The Contractor must comply with the following provisions:

1. Executive Order 11246, entitled "Equal Employment Opportunity," as amended by Executive Order 11375, and as supplemented by the Department of Labor Regulations (41 CFR Part 60): The Executive Order prohibits federal contractors and federally assisted construction contractors and subcontractors who do over \$10,000 in Government business in one year from discriminating in employment decisions on the basis of race, color, religion, sex, or national origin. The Executive Order also requires Government contractors to take affirmative action to ensure that equal opportunity is provided in all aspects of their employment.
2. The Clean Air Act, Section 306:
 - a. No Federal agency may enter into any contract with any person who is convicted of any offense under section 113(c) for the procurement of goods, materials, and services to perform such contract at any facility at which the violation which gave rise to such conviction occurred if such facility is owned, leased, or supervised by such person. The prohibition in the preceding sentence shall continue until the Administrator certifies that the condition giving rise to such a conviction has been corrected. For convictions arising under section 113(c)(2), the condition giving rise to the conviction also shall be considered to include any substantive violation of this Act associated with the violation of 113(c)(2). The Administrator may extend this prohibition to other facilities owned or operated by the convicted person.
 - b. The Administrator shall establish procedures to provide all Federal agencies with the notification necessary for the purposes of subsection (a).
 - c. In order to implement the purposes and policy of this Act to protect and enhance the quality of the Nation's air, the President shall, not more than 180 days after enactment of the Clean Air Amendments of 1970 cause to be issued an order (1) requiring each Federal agency authorized to enter into contracts and each Federal agency which is empowered to extend Federal assistance by way of grant, loan, or contract to effectuate the purpose and policy of this Act in such contracting or assistance activities, and (2) setting forth procedures, sanctions, penalties, and such other provisions, as the President determines necessary to carry out such requirement.
 - d. The President may exempt any contract, loan, or grant from all or part of the provisions of this section where he determines such exemption is necessary in the paramount interest of the United States and he shall notify the Congress of such exemption.
 - e. The President shall annually report to the Congress on measures taken toward implementing the purpose and intent of this section, including but not limited to the progress and problems associated with implementation of this section. [42 U.S.C. 7606]
3. The Clean Water Act:
 - a. No Federal agency may enter into any contract with any person who has been convicted of any offense under Section 309(c) of this Act for the procurement of goods, materials, and services if such contract is to be performed at any facility at which the violation which gave rise to such conviction occurred, and if such facility is owned, leased, or supervised by such person. The prohibition in preceding sentence shall continue until the Administrator certifies that the condition giving rise to such conviction has been corrected.

- b. The Administrator shall establish procedures to provide all Federal agencies with the notification necessary for the purposes of subsection (a) of this section.
 - c. In order to implement the purposes and policy of this Act to protect and enhance the quality of the Nation's water, the President shall, not more than 180 days after the enactment of this Act, cause to be issued an order:
 - (1) requiring each Federal agency authorized to enter into contracts and each Federal agency which is empowered to extend Federal assistance by way of grant, loan, or contract to effectuate the purpose and policy of this Act in such contracting or assistance activities, and
 - (2) setting forth procedures, sanctions, penalties, and such other provisions, as the President determines necessary to carry out such requirement.
 - d. The President may exempt any contract, loan, or grant from all or part of the provisions of this section where he determines such exemption is necessary in the paramount interest of the United States and he shall notify the Congress of such exemption.
 - e. The President shall annually report to the Congress on measures taken in compliance with the purpose and intent of this section, including, but not limited to, the progress and problems associated with such compliance.
 - f. (1) No certification by a contractor, and no contract clause, may be required in the case of a contract for the acquisition of commercial items in order to implement a prohibition or requirement of this section or a prohibition or requirement issued in the implementation of this section.
 - (2) In paragraph (1), the term "commercial item" has the meaning given such term in section 4(12) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(12)).
4. The Anti-Lobbying Act: This Act prohibits the recipients of federal contracts, grants, and loans from using appropriated funds for lobbying the Executive or Legislative Branches of the federal government in connection with a specific contract, grant, or loan. As required by Section 1352, Title 31 of the U.S. Code and implemented at 34 CFR Part 82 for persons entering into a grant or cooperative agreement over \$100,000, as defined at 34 CFR Part 82, Section 82.105 and 82.110, the applicant certifies that:
- a. No federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with the making of any federal grant, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal grant or cooperative agreement;
 - b. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with this federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form – LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;
 - c. The undersigned shall require that the language of this certification be include in the award documents for all sub-awards at all tiers (including sub-grants, contracts under grants and cooperative agreements, and subcontracts) and that all sub-recipients shall certify and disclose accordingly.

5. Americans with Disabilities Act: This Act (28 CFR Part 35, Title II, Subtitle A) prohibits discrimination on the basis of disability in all services, programs, and activities provided to the public by State and local governments, except public transportation services.
6. Executive Order N-6-22 – Russia Sanctions: On March 4, 2022, Governor Gavin Newsom issued Executive Order N-6-22 (the EO) regarding Economic Sanctions against Russia and Russian entities and individuals. “Economic Sanctions” refers to sanctions imposed by the U.S. government in response to Russia’s actions in Ukraine, as well as any sanctions imposed under state law. The EO directs state agencies to terminate contracts with, and to refrain from entering any new contracts with, individuals or entities that are determined to be a target of Economic Sanctions. Accordingly, should the State determine a Contractor is a target of Economic Sanctions or is conducting prohibited transactions with sanctioned individuals or entities, that shall be grounds for termination of this Contract. The State shall provide the Contractor advance written notice of such termination, allowing the Contractor at least 30 calendar days to provide a written response. Termination shall be at the sole discretion of the State.
7. Drug Free Workplace Statement: The Federal government implemented the Drug Free Workplace Act of 1988 in an attempt to address the problems of drug abuse on the job. It is a fact that employees who use drugs have less productivity, a lower quality of work, and a higher absenteeism, and are more likely to misappropriate funds or services. From this perspective, the drug abuser may endanger other employees, the public at large, or themselves. Damage to property, whether owned by this entity or not, could result from drug abuse on the job. All these actions might undermine public confidence in the services this entity provides. Therefore, in order to remain a responsible source for government contracts, the following guidelines have been adopted:
 - a. The unlawful manufacture, distribution, dispensation, possession or use of a controlled substance is prohibited in the workplace.
 - b. Violators may be terminated or requested to seek counseling from an approved rehabilitation service.
 - c. Employees must notify their employer of any conviction of a criminal drug statute no later than five days after such conviction.
 - d. Contractors of federal agencies are required to certify that they will provide drug-free workplaces for their employees.
8. Debarment, suspension, and other responsibility matters: As required by Executive Order 12549, Debarment and Suspension, and implemented at 34 CFR Part 85, for prospective participants in primary covered transactions, as defined at 34 CFR Part 85, Sections 85.105 and 85.110.
 - a. The applicant certifies that it and its principals:
 - (1) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any federal department or agency;
 - (2) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (federal, state, or local) transaction or contract under a public transaction; violation of federal or state antitrust statutes or

- commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
- (3) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (federal, state, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and
 - (4) Have not within a three-year period preceding this application had one or more public transactions (federal, state, or local) terminated for cause or default.
- b. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.
9. The federal government reserves a royalty-free, non-exclusive, and irrevocable license to reproduce, publish, or otherwise use, and to authorize others to use, for federal government purposes, the copyright in any work developed under a grant, sub-grant, or contract under a grant or sub-grant or any rights of copyright to which a contractor purchases ownership.

1 INTRODUCTION AND ORGANIZATION

The Statement of Work (SOW), hereinafter referred to as SOW, defines the services required to maintain and operate the California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS).

Please note that this section of the SOW references multiple sets of standards, which are subject to change over time. Please refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UDPATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

1.1 TERM

The initial term shall begin on the date the Contract is signed by both parties (effective date) and shall continue for five (5) years thereafter, unless terminated earlier or extended as provided herein. At the expiration of the five (5) year term, the State reserves the option to extend the term for five (5) additional periods of one (1) year each or any combination of years up to and including all (5) extension years, at the cost for each year as specified in the Appendix D, COST WORKBOOK, upon one hundred and eighty (180) days prior Notice to Contractor.

The Contractor shall not be authorized to deliver goods or commence performance of services described in this Contract prior to the effective date. Any delivery of goods or performance of services by the Contractor that is commenced prior to the effective date shall be considered gratuitous on the part of the Contractor.

1.2 COST

The total cost of this Contract is “Enter Dollar Value”. Budget details are located in Appendix D, COST WORKBOOK. Financial details are located in Appendix A-2, SPECIAL PROVISIONS.

1.3 POINTS OF CONTACT

The points of contact for the Contractor and State once the Contract has been executed is as follows:

Contractor – Contract Manager: (To be completed upon Contract award)

Name, Title:

Address:

Telephone Number:

E-mail address:

State – Contract Manager: (To be completed upon Contract award)

Name, Title:

Address:

Telephone Number:

E-mail address:

1.4 WORK LOCATION

The Contractor will be required to perform services under this Contract both onsite, at the CalHEERS Project Office, and at various Contractor locations to be determined at Contract execution. The State will provide space, furniture, utilities, and telephones at the CalHEERS Project Office for Contractor Staff as agreed upon by the State and the Contractor.

Table 1-1: Co-Location of Contractor Core Staff

Req #	SOW Requirement
1.4-01 (existing)	The Contractor Key Staff and designated Contractor support Staff, as agreed upon by the State and Contractor, shall be co-located with the State staff at the CalHEERS Project Office within fifteen (15) Business Days of the Contract execution, unless otherwise approved by the State Project Director or designee.

1.5 GENERAL INFORMATION

The CalHEERS is governed by Covered California, OTSI and DHCS. While the Project will have a single point of management, it will be guided by the Sponsors and its programmatic objectives. As described below, the Project Sponsors, Program Partners, Oversight Agencies, and other stakeholders have been involved throughout the CalHEERS Project.

1.6 ORGANIZATION

In addition to the Contractor (and its Subcontractors), the project organization includes the following Project Sponsors, Program Partners, and Oversight Agencies involved with the Project.

- Covered California (also known as the California Health Benefit Exchange)
- Department of Health Care Services (DHCS)
- Office of Technology & Solutions Integration (OTSI)
- CalHEERS Project Office
- Department of Managed Health Care (DMHC)
- California Department of Insurance (CDI)
- California Technology Agency (CTA)
- California Department of Social Services (CDSS)
- Centers for Medicare and Medicaid Services (CMS)
- California Health and Human Services (CalHHS) Agency
- California Department of Finance (DOF)
- County Welfare Directors Association (CWDA)
- California Statewide Automated Welfare System (CalSAWS)
- California County Welfare Departments
- Business Partners/Interface Agencies
- CalHEERS end users

The following provide a broad overview of the Project Sponsors, Program Partners, Oversight Agencies and Stakeholder engagement.

1.6.1 Contractor

The Contractor is the System Integrator (SI) for CalHEERS and is responsible for operating and maintaining the system. The Contractor coordinates and collaborates with the Project Sponsors as well as interacts with the Program Partners, State and county offices, control agencies who provide oversight, advisory/advocacy groups who represent special interests and agencies that

interface with the system.

1.6.2 Covered California

Covered California is a Project Sponsor and has the authority over all aspects of the Health Benefit Exchange development and operations, including the IT Services required to support it. Its roles include:

- Establish and implement many aspects of the Federal Affordable Care Act (ACA) regulations and policies
- Provide a high-quality experience for individuals seeking health care coverage, as well as participants in the Exchange
- Screen for and enroll individuals
- Certify qualified health plans (QHPs) and negotiating with health plans on products to be offered in the Exchange
- Coordinate with the DHCS and California counties to ensure that individuals are seamlessly enrolled and transitioned between coverage programs if their eligibility changes
- Work with small employers on the choices and collection of payments for their employees

1.6.3 California Department of Health Care Services (DHCS)

The California Department of Health Care Services (DHCS) is also an authority holding Project Sponsor. DHCS is the single State agency responsible for effective administration and operation of the California Medicaid Program, known as Medi-Cal. DHCS will actively participate in the CalHEERS Project and will continue to administer and oversee its program and ensure Medi-Cal determinations are consistent with federal and state requirements.

- Establish and implement many aspects of the Federal Affordable Care Act (ACA) regulations and policies
- Provide a high-quality experience for individuals seeking health care coverage, as well as participants in the Exchange
- Screen for and enroll individuals
- Coordinate with California counties to ensure that individuals are seamlessly enrolled and transitioned between coverage programs if their eligibility changes

1.6.4 Office of Technology & Solutions Integration (OTSI)

The Office of Technology & Solutions Integration (OTSI) provides project management, oversight, procurement, and support services for large IT Projects for the California Health and Human Services Agency.

1.6.5 CalHEERS Project Office

The CalHEERS Project Office is part of OTSI and provides project management and oversight, including status reporting, assessing and mitigating risk, facilitating communications and teamwork among stakeholders, resolving issues, and managing resources. The CalHEERS Project Office oversees activities associated with the CalHEERS System/Software Development Life Cycle (SDLC) activities, and Maintenance and Operation (M&O). The Project Management Office (PMO) verifies and validates the Contractor's processes and deliverables.

1.6.6 Department of Managed Health Care (DMHC)

The California Department of Managed Health Care (DMHC) is a Program Partner. The DMHC is a regulatory body governing managed health care in California and a consumer rights organization that helps California consumers resolve problems with their health plan and works to provide a more stable and financially solvent managed health care System.

1.6.7 California Department of Insurance

The California Department of Insurance (CDI) is a Program Partner. The CDI is a regulatory and oversight agency that is responsible for enforcing many of the State's insurance-related laws.

1.6.8 California Department of Social Services (CDSS)

The California Department of Social Services is a Program Partner. CDSS provides administration and oversight of programs that affect nearly three million of California's most vulnerable residents-foster children and youth, children and families receiving aid through the California Work Opportunities and Responsibility to Kids (CalWorks) and CalFresh programs, adults and elderly in licensed community care Facilities, and aged, blind and disabled recipients requiring In-Home Supportive Services or Supplementary Security Income/State Supplementary Payment (SSI-SSP) assistance.

1.6.9 County Welfare Directors Association

The County Welfare Directors Association (CWDA) is a nonprofit association representing the human services directors from each California County. The association's mission is to promote a human services system that encourages self-sufficiency of families and communities.

1.6.10 California Counties

California Counties are Program Partners. The California Counties are responsible for implementing and administering welfare programs in accordance with state and federal regulations.

1.6.11 Statewide Automated Welfare System (CalSAWS)

CalSAWS is the Statewide Automated Welfare System (SAWS) used by the counties to administer the welfare and Medi-Cal programs.

1.6.12 Centers for Medicare and Medicaid Services

The Centers for Medicare and Medicaid Services (CMS) is an Oversight Agency. The CMS is the federal agency responsible for overall oversight of Affordable Care Act Implementation including the Federal and State Exchanges. CMS approves Exchange Establishment Grant proposals, Project approval documents, Solicitation documents and final contracts. Within CMS, the Center for Consumer Information and Insurance Oversight (CCIIO) is charged with helping implement many provisions of the Affordable Care Act. CCIIO oversees the Implementation of the provisions related to private health insurance. The Center for Medicaid and CHIP Services within CMS is responsible for oversight of California's Medi-Cal and CHIP programs.

1.6.13 California Health and Human Services (CalHHS) Agency

The California Health and Human Services Agency (CalHHS) is an Oversight Agency. The CalHHS oversees twelve departments that provide a range of health care and social Services, including programs managed by DHCS.

1.6.14 California Department of Finance (DOF)

The California Department of Finance (DOF) is an Oversight Agency. The DOF monitors and reviews State Projects' direction and progress and ensures appropriate funding for acquisition, development, and implementation activities. The DOF has funding approval of all automated System Projects developed or contracted by state departments.

1.6.15 Business Partners/Interface Agencies

The CalHEERS System shares information and data with other agencies. Each agency has authority to set interface standards for their systems. These agencies report any changes in interface requirements to the CalHEERS Project Office.

1.6.16 CalHEERS End Users

The primary end users of the CalHEERS are the Consumers, the Certified Enrollers, the Service Center staff, and the County Eligibility Workers.

1.7 RESPONSIBILITIES OF PARTIES

1.7.1 State Responsibilities

The State Contract Manager or authorized designee, referenced in SOW Section 1.3, POINTS OF CONTACT, will receive all project communications and has the authority to act on all aspects of the services. This person will review the Contract and associated Contract documents with the Contractor authorized designee, referenced under SOW Section 1.3, POINTS OF CONTACT, to ensure understanding of the responsibilities of both parties.

The State will provide timely review and approval of the information and documentation provided in order for the Contractor to perform its obligations under this Contract.

1.7.2 Contractor Responsibilities

The Contractor is responsible for operating and maintaining the CalHEERS System. The Contractor Project Manager or authorized designee (s) will receive all project communications and has the authority to act on all aspects of the ~~services~~Services.

The Contractor will review the Contract and associated Contract documents with the State Contract Manager or authorized designee to ensure understanding of the responsibilities of both parties. The Contractor is responsible for meeting all requirements in this Contract.

In addition, the Contractor is responsible to ensure the following:

- That all State property, including security badges is returned to the State Contract Manager prior to expiration of the Contract.
- That all electronic files stored on the removable media storage device used to store State information are encrypted using a commercial third-party encryption software (If the Contractor use of removable media storage devices (e.g., Universal Serial Bus [USB] thumb drives, disk tapes, micro Secure Digital (SD), SD cards, and CD/DVD) is allowed by the State Contract Manager).
- That information/data stored on approved removable storage devices will not be copied to any unencrypted computer (e.g., desktop or laptop) not connected to the State network.
- That any ~~personally~~Personally identifiable-Identifiable information-Information (PII), ~~Protected personal health~~Health information-Information (PHI), or other ~~confidential~~

- ~~Confidential information~~ Information must be encrypted when stored on State network file shares or document repositories.
- That if allowed by the State Contract Manager, all the Contractor owned or managed laptops, ultra-books, net books, tablets, smart phones and similar devices, will be encrypted using commercial third party encryption software.
 - That encryption software meets the level of standards set by the National Institute of Standards and Technology (NIST) 800-53 Rev 5 or latest, Federal Information Processing Standards (FIPS) Publication 140-3 or later, Security Requirements for Cryptographic Modules.
 - That anti-virus, anti-malware software will be used and kept up to date along with Software patches and supported versions.
 - The Office of Technology & Solutions Integration (OTSI) Information Security Office has the right to audit the Contractor owned devices connected to State networks to ensure compliance with these responsibilities.

2 CONTRACTOR PERSONNEL REQUIREMENTS

The Contractor shall provide all necessary Staff to successfully perform all services and meet all the requirements set forth in the Statement of Work (SOW). There are 17 Key Staff identified as part of this Contract by which the State has qualifications for each assignment. There are 38 Non-Key (System Change) Staff positions/roles identified that also have associated qualifications. The Contractor shall comply with all staffing requirements identified within this Contract.

Please note that this section of the SOW references multiple sets of standards, which are subject to change over time. Please refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

2.1 KEY STAFF REQUIREMENTS

The Contractor's Key Staff are expected to function as trusted advisors to the State in their respective roles. The California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS), Covered California, DHCS or other Project Sponsors and Program Partners interact with the Contractor's Key Staff on a day-to-day basis for the term of the Contract. For these reasons, the State places a great deal of emphasis on the expertise, experience and capabilities of the Key Staff.

2.1.1 Contractor Key Staff

Table 2-1: Key Staff General Requirements

Req #	SOW Requirement																																																						
2.1.1-01 (modified)	The Contractor shall have the following Key Staff dedicated to the CalHEERS Project throughout the term of the Contract, as specified within the table below. Key Staff shall be onshore and be located “Onsite,” which means co-located with State staff; “Offsite/Local,” which means within 50 miles of downtown Sacramento, CA; or “Offsite”, which means within the United States, subject to the requirements or constraints within the Contract: <table><tr><th>Key Staff</th><th>Location</th><th>% of Time</th></tr><tr><td>Project Manager</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Deputy Project Manager</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Technical Manager</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Project Management Office Manager</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Schedule Management Lead</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Operations Manager</td><td>(Onsite or Offsite/Local)</td><td>100%</td></tr><tr><td>Applications Maintenance Manager</td><td>(Onsite or Offsite/Local)</td><td>100%</td></tr><tr><td>Enterprise Architect</td><td>(Onsite or Offsite/Local)</td><td>100%</td></tr><tr><td>Release Manager</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Transition Manager</td><td>(Onsite)</td><td>100% (Year 1, 2 & Final Year)</td></tr><tr><td>Quality Assurance Manager</td><td>(Offsite allowed)</td><td>100%</td></tr><tr><td>Agile Manager</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Data Scientist</td><td>(Onsite/Offsite)</td><td>100%</td></tr><tr><td>Data Analytics Expert</td><td>(Onsite/Offsite)</td><td>100%</td></tr><tr><td>Security Officer</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Organizational Change Manager (OCM)</td><td>(Onsite)</td><td>100%</td></tr><tr><td>Consumer Experience Lead</td><td>(Onsite)</td><td>100%</td></tr></table>	Key Staff	Location	% of Time	Project Manager	(Onsite)	100%	Deputy Project Manager	(Onsite)	100%	Technical Manager	(Onsite)	100%	Project Management Office Manager	(Onsite)	100%	Schedule Management Lead	(Onsite)	100%	Operations Manager	(Onsite or Offsite/Local)	100%	Applications Maintenance Manager	(Onsite or Offsite/Local)	100%	Enterprise Architect	(Onsite or Offsite/Local)	100%	Release Manager	(Onsite)	100%	Transition Manager	(Onsite)	100% (Year 1, 2 & Final Year)	Quality Assurance Manager	(Offsite allowed)	100%	Agile Manager	(Onsite)	100%	Data Scientist	(Onsite/Offsite)	100%	Data Analytics Expert	(Onsite/Offsite)	100%	Security Officer	(Onsite)	100%	Organizational Change Manager (OCM)	(Onsite)	100%	Consumer Experience Lead	(Onsite)	100%

Req #	SOW Requirement
2.1.1-02 (existing)	The Contractor shall not concurrently fill multiple Key Staff positions with a single Key Staff member.
2.1.1-03 (existing)	The Contractor shall obtain written approval from the State Project Director or designee prior to the start of any Key Staff on the Contract.
2.1.1-04 (new)	The Contractor shall have Key Staff work and be available within the Project's normal business hours on Pacific Standard Time.
2.1.1-05 (new)	The Contractor shall have Key Staff available during Feature and Priority Releases, and Open Enrollment barring emergency time off that is communicated to the State Project Director or designee.

2.1.1.1 Attributes of a Large and Complex Information Technology (IT) System

The Key Staff must meet all staffing requirements set forth in this SOW. If the requirement indicates that the experience must be on a Large and Complex Information Technology (IT) System or project, the Contractor must use the following attributes to meet the definition of Large and Complex IT System:

- A solution that integrates at least two applications, one of which is a Commercial-Off-the-Shelf (COTS) application.
- A solution that interfaces with at least five external systems, at least one (1) of which is real-time.
- A solution that is accessed by at least one thousand (1,000) end users at multiple locations.
- A solution that has a dollar value of at least ten million (\$10,000,000) dollars.
- A solution that includes multi-tiered processing, including a consumer or user facing front-end optimized for multiple user interface platforms.

2.1.2 Project Manager

The duties and responsibilities of the Project Manager include, but are not limited to:

- Responsible for the execution and overall management of the Contract.
- Engages with the CalHEERS stakeholder organizations and executives on a day-to-day basis to ensure the project receives stakeholder commitment and support.
- Possess signature authority to commit the Contractor to all Contracts with the State for this project.
- Provide direction to ensure that all Contractor staffing and project resources are met, as required, and maintain accountability for Staff and resource performance.
- Collaboratively manage contractual relationships to ensure that terms and conditions are met.
- Communicate and report on project matters on an ongoing basis.
- Act as a liaison with the State Project Director or designee.
- Ensure the State receives timely responses specified for applicable requirements and Service Level Agreements (SLAs) from all Contractors (and Subcontractors).
- Possess authority to make decisions and execute Change Requests (CRs).
- Prepare, and assist the State Project Director or designee in preparing, special reports and presentations related to the Project.
- Work cooperatively with the CalHEERS Project Office, the Department of Health Care Services (DHCS), and Covered California to resolve escalated CalHEERS issues including, but not limited to, contractual requirements, risk mitigation, system enhancements, and any other issue that requires executive management attention.

- Identify and bring forward options that will provide the highest values to the Covered California, DHCS, and the Office of Technology & Solutions Integration (OTSI).

Table 2-2: Project Manager Mandatory Qualifications (MQs)

Req #	Mandatory Qualification
2.1.2-01 (existing)	The Project Manager shall have a minimum of five (5) years' experience within the past ten (10) years, supervising teams of 50 people or greater on projects that involved large and complex IT systems.
2.1.2-02 (existing)	The Project Manager shall possess and maintain a valid Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.
2.1.2-03 (existing)	The Project Manager shall have a minimum of three (3) years of experience within the past ~~fifteen~~ <u>(4015)</u> years, on a project that implemented, or performed the maintenance and operations on, a health care eligibility or health care enrollment system meeting the definition of Large and Complex IT System.

2.1.3 Deputy Project Manager

The duties and responsibilities of the Deputy Project Manager include, but are not limited to:

- Monitor Project progress and performance.
- Communicate and report on project matters on an ongoing basis.
- Manage issues between Contractor and State staff.
- Ensure that all Contractor Staff/resources work cooperatively and collaboratively with the CalHEERS PMO and all other State staff.
- Manage and lead the Project and Project Team.
- Manage coordination and collaboration of the Project Sponsors, Program Partners, and stakeholders engaged in the Project work.
- Be the primary point of contact, in matters of Project Management, to the State Assistant Project Director or designee.
- Collaborate with Transition Manager on CalHEERS transition activities.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-3: Deputy Project Manager MQs

Req #	Mandatory Qualification
2.1.3-01 (existing)	The Deputy Project Manager shall have a minimum of five (5) years' experience within the past ten (10) years, in Business or Information Technology (IT) Project Management.
2.1.3-02 (existing)	The Deputy Project Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing/co-managing a project, including but not limited to, experience managing Contract requirements and deliverables on large and complex IT projects; and have experience with human services systems and programs with emphasis on healthcare.
2.1.3-03 (existing)	The Deputy Project Manager shall possess and maintain a valid Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.

2.1.4 Technical Manager

The duties and responsibilities of the Technical Manager include, but are not limited to:

- Lead the day-to-day activities of the Contractor technical Staff who are engaged in the technical management aspects of the project.
- Lead the technical disciplines of the project, unlike the Project Manager and Project Management Office Manager, who will focus on the overall project management of the project.
- Work with the State and project Staff to ensure the timely request and implementation for infrastructure (hardware/software) upgrades.
- Establish and execute technical policies, processes, and procedures.
- Partition large systems into subsystems and components that may be handled by a single individual or team.
- Manage technical resources to ensure that all technical issue resolutions are addressed.
- Assess proposed system enhancements for design alternatives based on all identified constraints, such as cost, schedule, usability, and reliability.
- Ensure that all system enhancement design, development, and testing activities comply with Contract and system requirements.
- Ensure on-schedule delivery of system enhancements and associated deliverables.
- Manage meetings or walkthroughs of CalHEERS Contractor deliverables as requested by the State.
- Resolve all system defects and report the resolution to the CalHEERS Project Office.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-4: Technical Manager MQs

Req #	Mandatory Qualification
2.1.4-01 (existing)	The Technical Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing a system development life cycle (SDLC), including business and system requirement specification, design, development, testing, and implementation, on projects involving Large and Complex IT Systems.
2.1.4-02 (existing)	The Technical Manager shall have a minimum of five (5) years' experience within the past ten (10) years, performing oversight of technical resources, resolving system defects and reporting resolutions.
2.1.4-03 (existing)	The Technical Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing the system development life cycle (SDLC) on maintenance and operations projects which involved Large and Complex IT Systems.

2.1.5 Project Management Office Manager

The duties and responsibilities of the Project Management Office (PMO) Manager include, but are not limited to:

- Provide day-to-day management and direction of Contractor resources assigned to the project throughout the life of the Contract.
- Create, manage and maintain, in conjunction with the scheduler, the Master Project Work Plan.
- Coordinate the availability of scheduled Contractor resources for the project.
- Establish and maintain regular communications with the CalHEERS Project Management Office regarding project status.

- Provide weekly written project status reports as required to the CalHEERS Project Management Office.
- Manage issue reporting, tracking, escalation, and resolution procedures.
- Work with sponsors and management staff on budget fiscal duties.
- Knowledge and experience of Asset Management tools (e.g., Flexera, EWM, Service Now [SNOW]).
- Conduct ongoing reviews with State and sponsors and ensure issue escalation procedures are followed, and issues are resolved.
- Oversee and manage change management controls and procedures in coordination with the State and as required in established project plans.
- Assist the State as needed in the preparation of State and federal approval and reporting documents.
- Manage the project System Development Maintenance and Operations Contract and associated subcontracts.
- Ensure the timely development and delivery of quality project deliverables.
- Monitor, maintain, and update the project schedules.
- Oversee preparation of all documents, correspondence, meeting agendas, and minutes.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-5: PMO Manager MQs

Req #	Mandatory Qualification
2.1.5-01 (existing)	The PMO Manager shall have a minimum of five (5) years' project management experience within the past ten (10) years, managing and supervising PMO teams on projects involving Large and Complex IT Systems.
2.1.5-02 (existing)	The PMO Manager shall have a minimum of five (5) years' experience within the past ten (10) years, managing a PMO, in accordance with industry best practices, including experience managing Contract requirements and deliverables on projects involving Large and Complex IT Systems.
2.1.5-03 (existing)	The PMO Manager shall possess and maintain a valid Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.

2.1.6 Schedule Management Lead

The duties and responsibilities of the Schedule Management Lead include, but are not limited to:

- Create, manage and maintain, in conjunction with the Project Manager, the Master Project Work Plan.
- Coordinate the availability of scheduled Contractor resources for the project.
- Work with sponsors and management staff on schedule duties.
- Facilitate the Weekly Software Release Work Plan meeting with State Staff and Sponsor representatives.
- Manage all aspects of the schedule as outlined in the contract and requested by the State.
- Advanced knowledge and experience of MS Project and Project Web Application to create, maintain, and archive the project schedule and schedule templates.
- Adhere to the Project's Release Guidelines as they apply to release schedules.
- Facilitate the incorporation of multiple work plans into one comprehensive Project Schedule.

Table 2-6: Schedule Management Lead MQs

Req #	Mandatory Qualification
2.1.6-01 (new)	The Schedule Management Lead shall have a minimum of five (5) years' experience within the past ten (10) years, <u>supervising schedule management teams on projects involving Large and Complex IT Systems, as the Schedule Management Lead on Large and Complex IT Systems.</u>
2.1.6-02 (new)	The Schedule Management Lead shall have a minimum of five (5) years' experience within the past ten (10) years, <u>managing project schedules, including an integrated master schedule (multiple schedules merged into a single master schedule), on projects involving Large and Complex IT Systems, implementing automated schedule update processes on projects involving Large and Complex IT Systems.</u>
2.1.6-03 (new)	The Schedule Management Lead shall possess and maintain a valid, <u>in good standing,</u> Project Management Institute (PMI) Project Management Professional (PMP) certification throughout the term of this Contract.
~~2.1.6-04 (new)~~	~~The Schedule Management Lead shall have a minimum of five (5) years of demonstrated experience scheduling change management and/or work authorization changes on a large and complex IT project in excess of ten (10) million dollars and integrates at least two (2) applications.~~

2.1.7 Operations Manager

The duties and responsibilities of the Operations Manager include, but are not limited to:

- Manage all Contractor Operations Staff.
- Manage all ongoing CalHEERS operations including, but not limited to, planning, certification, batch processes, transaction processing, reporting, performance monitoring, and capacity planning/sizing.
- Ensure the system operates in compliance with the Contract service level requirements.
- Work with the State and project Staff to resolve all CalHEERS issues related to ongoing systems operations including but not limited to system outages.
- Work with the State and project Staff to ensure the timely request and implementation for infrastructure (hardware/software) upgrades.
- Work with State and project Staff to ensure the continuity of computer services including the wide area network.
- Ensure the timely development and delivery of operations deliverables.
- Act as a liaison between the State, Project Sponsors, Program Partners and the Contractor in regard to System Development Maintenance and Operations (SDMO) activities and associated issue and risk management activities.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.
- Participate in the Defect Management Meetings (i.e. the Production Triage Meeting) to ensure SI attendance and support as requested by the State Project Director or designee.
- Oversees Carrier Support Activities

Table 2-7: Operations Manager MQs

Req #	Mandatory Qualification
2.1.7-01 (existing)	The Operations Manager shall have a minimum of five (5) years' experience within the past ten (10) years, supervising teams of 20 people or greater on maintenance and operations projects involving Large and Complex IT Systems.

Req #	Mandatory Qualification
2.1.7-02 (existing)	The Operations Manager shall have a minimum of five (5) years' experience within the past ten (10) years, ensuring the continuity of IT operations services, including both local and wide area networks and cloud based services on projects involving Large and Complex IT Systems.
2.1.7-03 (existing)	The Operations Manager shall have a minimum of three (3) years' experience within the past ten (10) years, <u>on maintenance and operations projects involving Large and Complex IT Systems which were hosted at in the cloud, on maintenance and operations projects involving Large and Complex IT Systems which were hosted at a Tier 3 data center or better.</u>

2.1.8 Applications Maintenance Manager

The duties and responsibilities of the Applications Maintenance Manager include, but are not limited to:

- Manage all aspects of the application development team and its Staff (including Subcontractors and resources).
- Plan, coordinate, and monitor the progress of development activities to ensure their ongoing alignment with business goals.
- Ensure on-schedule delivery of change requests including system enhancements and defect fixes.
- Ensure that design sessions and walkthroughs are planned, executed, and delivered on schedule.
- Ensure the on-schedule delivery of Change Requests (CRs) including System Development Lifecycle (SDLC) and defect fixes.
- Identify changes in the scope or work effort that could result in changes to the work plan or defect fix/release.
- Document and communicate issues related to development/defect fix activities.
- Oversee and monitor the analysis, design, development, unit testing, system testing, integration testing, migration to production, as needed, to produce fixes and enhancements.
- Oversee and monitor the Development and updating of regression test scripts.
- Ensure that documentation of defect fixes, CRs or any SDLC is reflected accurately in the appropriate deliverables' documentation. This also includes providing documentation to training staff and State support staff for each change/modification (CR) as applicable.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.
- Facilitate Defect Management Meetings (i.e. the Release and Defect Triage Meeting) to ensure SI attendance and support as requested by the State Project Director or designee.

Table 2-8: Applications Maintenance Manager MQs

Req #	Mandatory Qualification
2.1.8-01 (existing)	The Applications Maintenance Manager shall have a minimum of five (5) years' experience within the past ten (10) years, as the application manager or lead on projects involving Large and Complex IT Systems.
2.1.8-02 (existing)	The Applications Maintenance Manager shall have a minimum of four (4) years' experience within the past ten (10) years, on projects involving Large and Complex IT Systems that integrated one (1) or more COTS applications.

Req #	Mandatory Qualification
2.1.8-03 (existing)	The Applications Maintenance Manager shall have a minimum of five (5) years' experience, within the past ten (10) years, managing application maintenance resources, scope, and prioritizing applications maintenance activities within the project work plan.

2.1.9 Enterprise Architect

The duties and responsibilities of the Enterprise Architect include, but are not limited to:

- Lead the effort to maintain and update the Architectural Design Document.
- Ensure that established program and project standards and practices are met and ensure quality of end products.
- Identify, monitor, and manage risks within recognized constraints.
- Recommend architecture strategy and provide planning consultation to the core team, with a focus on innovation options, particularly to leverage Artificial Intelligence (AI).
- Alignment of IT strategy and planning with CalHEERS business goals.
- Ensure that projects do not duplicate functionality or diverge from each other or from business and IT strategies.
- Risk management of information and IT assets through appropriate standards and security policies.
- Assist with the development of policies, standards, and guidelines that directs the selection, development, implementation, and use of Information Technology within the organization.
- Work with the Technical Manager, Applications Maintenance Manager, and/or Release Manager to provide a consensus based enterprise solution that is scalable, adaptable and in synchronization with changing business needs.
- Ensure seamless integration between any and all architectures that interact and/or interface with CalHEERS.
- Actively participate in all aspects of SDLC, defect fixes, and/or CR process from requirements, design, and build through deployment.
- Translate business requirements into working foundational components for platform, thus ensuring functional and nonfunctional aspects are met.
- Work with Application Manager and/or teams to provision platform components.
- Oversee and ensure the documentation of key information such as system architectural standards are reflected and documented accurately in the appropriate deliverables documentation (formal and informal).
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-9: Enterprise Architect MQs

Req #	Mandatory Qualification
2.1.9-01 (existing)	The Enterprise Architect shall have a minimum of five (5) years' experience within the past ten (10) years as an Enterprise Architect on projects involving Large and Complex IT Systems.
2.1.9-02 (existing)	The Enterprise Architect shall have a minimum of five (5) years' experience within the past ten (10) years in architecting and building high performance internet scale distributed systems and/or in architecting and building enterprise scale distributed systems, on projects involving Large and Complex IT Systems; and have experience with human services systems and programs with emphasis on healthcare. ~~Additionally, the candidate should have experience with systems and programs related to healthcare services and/or human services.~~

Req #	Mandatory Qualification
2.1.9-03 (existing)	The Enterprise Architect shall have a minimum of five (5) years' experience within the past ten (10) years of advanced technical expertise in at least one (1) of the following core areas:~~following technologies and technical/architecture areas~~: • Service Oriented Architecture (SOA) • Data Architecture and Data Warehousing • Security/Identity Management • Cloud Computing • Infrastructure Architecture ~~• Web and Application Servers~~ ~~• Customer Relationship Management (CRM)~~ ~~• Customized Off-the-shelf Software (COTS)~~ ~~• Service Oriented Architecture (SOA)~~ ~~• Modeling skills/Unified Modeling Language (UML)~~ ~~• SharePoint, Data Architecture~~ ~~• Data Warehousing~~ ~~• Security/Identity Management~~ ~~• Cloud~~ ~~• Mobile~~ ~~• Desktop/Client Server~~ ~~• Network solutions~~

2.1.10 Release Manager

The duties and responsibilities of the Release Manager include, but are not limited to:

- Manage risks and resolve issues that affect release scope, schedule, and quality
- Communicate all key project plans, commitments, and changes including requirements, Quality Assurance (QA) plans, schedule, and scope changes across business portfolios.
- Coordinate work between different teams.
- Negotiate, plan, and manage all release activities.
- Work with release team to understand impacts of branches and code merges.
- Review and maintain the release schedule for all core services.
- Lead and coordinate the Go-Live activities including the execution of the deployment Plans.
- Research configuration management methodologies and technologies and analyzes an application to current configuration management needs.
- Oversee and monitor the Development and updating of regression test scripts.
- Oversee and conduct Release Readiness reviews, Milestone Reviews, and Business Go/No-Go reviews.
- Participate in the Release and Defect Triage Meeting.
- Coordinate release content and effort based on the service request backlog, pending service requests, third party applications and /or operating system updates.
- Oversee and ensure the documentation of key information such as build and release procedures, dependencies, defect fixes, Change Requests (CRs) or any SDLC is reflected and documented accurately in the appropriate deliverables' documentation (Formal and Informal).

- Present readiness status and issues to CalHEERS Project Management team, Executive Steering Committee, and stakeholders.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-10: Release Manager MQs

Req #	Mandatory Qualification
2.1.10-01 (existing)	The Release Manager shall have a minimum of five (5) years' experience within the past ten (10) years as the release manager or lead on projects involving Large and Complex IT Systems.
2.1.10-02 (existing)	The Release Manager shall have a minimum of five (5) years' experience within the past ten (10) years, on projects involving Large and Complex IT Systems, that manage, plan, schedule and control software build through different stages and environments; including testing and deploying software releases.
2.1.10-03 (existing)	The Release Manager shall have a minimum of five (5) years' experience within the past ten (10) years, working with project management principles and best practices in an information systems operations environment, within systems analysis or in the system development life cycle (SDLC).

2.1.11 Transition Manager

The duties and responsibilities of the Transition Manager include, but are not limited to:

Transition-In Responsibilities:

- Manage all CalHEERS Transition-In activities and provide a weekly status report on these activities.
- Develop, maintain, and deliver a CalHEERS Transition-In Master Plan (TIMP).
- Work collaboratively with the incumbent contractor to ensure a smooth transition of all components of CalHEERS.
- Ensure minimal impact to CalHEERS end users during Contractor transition.
- Assist State, Project Sponsors, and Program Partners in understanding transition-in activities.
- Identify and communicate with external stakeholders on transition activities.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Transition-Out Responsibilities:

- Manage all CalHEERS Transition-Out activities and provide a weekly status report on these activities.
- Develop, maintain, and deliver a CalHEERS Contract Closeout Plan.
- Work collaboratively with the new Contractor to ensure a smooth transition of all components of CalHEERS.
- Ensure minimal impact to CalHEERS end users during Contractor transition.
- Assist State, Project Sponsors, and Program Partners in understanding Transition-Out activities.
- Identify and communicate with external stakeholders on transition activities.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-11: Transition Manager MQs

Req #	Mandatory Qualification
2.1.11-01 (existing)	The Transition Manager shall have a minimum of three (3) years' experience within the past ten (10) years, performing operational transition and the related organization change management activities on projects involving Large and Complex IT Systems.
2.1.11-02 (existing)	The Transition Manager shall have a minimum of two (2) years' experience within the past ten (10) years, managing the successful transition of Large and Complex IT Systems from one (1) company to another on at least two (2) separate projects. The Transition Manager's experience shall have been for a minimum duration of three (3) months for each project.
2.1.11-03 (existing)	The Transition Manager shall have a minimum of five (5) years' experience within the past ten (10) years building and maintaining strong working relationships with clients, key internal and external stakeholders; Conveying relevant information to an executive-level audience, ensuring client (internal management or customer) is aware of assignment progress/service status; And building credibility and fostering business-partnering relationships.

2.1.12 Quality Assurance Manager

The duties and responsibilities of the Quality Assurance Manager include, but are not limited to:

- Develop, implement, and maintain quality assurance processes to ensure all objectives are met, milestones are achieved, and stakeholders are satisfied.
- Reports to the Contractor Project Manager and must appear on the Contractor's Organization Chart with a direct relationship to the Contractor Project Manager.
- Develop, implement, and execute a Quality Assurance Plan to verify and validate all processes and deliverables.
- Ensure the timely development and delivery of deliverables, ensure deliverables satisfy the business and technical requirements, and ensure deliverables possess no errors or defects.
- Report the Quality Assurance activities as part of the Project Status Report.
- Work collaboratively and cooperatively with the CalHEERS Project Office and State to ensure all production, quality, and customer service standards are satisfactory and customer expectations are being met and improved when needed.
- Develop and maintain a repository for all project plans, schedules, deliverables, and project working papers, and project artifacts.
- Collaborate with the State, Independent Verification & Validation (IV&V) contractor, and audit personnel on day-to-day activities.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-12: Quality Assurance Manager MQs

Req #	Mandatory Qualification
2.1.12-01 (existing)	The Quality Assurance Manager shall have a minimum of five (5) years of lead experience within the past ten (10) years, applying quality assurance principles, methods, and techniques to processes on projects involving Large and Complex IT Systems.
2.1.12-02 (existing)	The Quality Assurance Manager shall have at least five (5) years of lead experience within the past ten (10) years, applying quality assurance principles, methods, and techniques to the development of project deliverables on projects involving Large and Complex IT Systems.
2.1.12-03 (existing)	The Quality Assurance Manager shall have a minimum of five (5) years' experience within the past ten (10) years, supervising QA staff on projects that involved Large and Complex IT Systems.

2.1.13 Agile Manager

The duties and responsibilities of the Agile Manager include, but are not limited to:

- Responsible for providing direction that optimize the value of the Agile Teams, ensuring the execution of Product Owner visions and goals.
- Possesses a thorough understanding of the different Agile frameworks (e.g. SAFe, Kanban, Extreme Programming, and combined frameworks)
- Ensure the team adheres to its processes (and all that entails in terms of artifacts and meetings).
- Ensure requirements are addressed through the use of user stories and implement processes or mechanisms to validate requirements are met within the delivered working software.
- Help to identify obstacles for the Scrum Masters.
- At an enterprise level, lead and manage large, complex enterprise-level projects consisting of multiple agile teams and/or requiring integration with other activities outside the scope of the agile teams.
- At a team level, play a consultative role to help put in place the appropriate people, process, and tools and coach members of the team as needed to optimize the efficiency of the project team.
- In situations that require a hybrid Agile approach, use good judgment and skill to develop a project management approach that is suitable for planning and managing the effort to achieve the project goals within designated project constraints.
- Provide status reports.
- Ensure business stakeholder communication.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-13: Agile Manager MQs

Req #	Mandatory Qualification
2.1.13-01 (existing)	The Agile Manager shall have a minimum of five (5) years' lead experience within the past ten (10) years, applying agile principles, methods, and techniques to processes on projects involving Large and Complex IT Systems.
2.1.13-02 (existing)	The Agile Manager shall have a minimum of two (2) years' experience within the past five (5) years <u>assisting IT projects with the transition from Waterfall to Agile methodology supporting the technical implementation of agile solutions.</u>
~~2.1.13-03 (existing)~~	~~The Agile Manager shall have two (2) years' experience managing teams that wrote the back-ends of modern web applications (e.g. using frameworks such as Ruby on Rails, Django, Flask, or Express) and front-ends of modern web applications (e.g., using a modern JavaScript front-end framework such as React, Vue, Ember, or Backbone; using modern web standards-compliant CSS and HTML).~~

2.1.14 Data Scientist

The duties and responsibilities of the Data Scientist includes, but is not limited to:

- Identifies opportunities to leverage data through advanced analytics, machine learning, and emerging AI technologies, and other data science techniques to generate new insights and develop new products for CalHEERS.
- Coordinates with data teams at CalHEERS, Covered California, and DHCS to advance the use of data science, analytical experiments, and hypothesis testing to improve learnings and quantify impacts for CalHEERS customers.

- Responsible to identify new kinds, types and sources of data to drive business innovation throughout CalHEERS that could improve business processes and define processes for the effective, integrated introduction of new data.
- Devises and utilizes algorithms and models to analyze large structured and unstructured data stores; perform data and error analysis to improve models; cleans and validates data for uniformity and accuracy.
- Analyzes data for trends and patterns and interprets data with rigorous research strategies, informed by training in behavioral economics, causal inference, program evaluation, biostatistics or related disciplines.
- Defines, manages and advances enterprise information management principles, policies and programs for stewardship and custodianship of data and analytics, in concert with legal, information security, risks and audit compliance requirements.
- Acts as subject matter expert on data science, and analysis of CalHEERS data, for other CalHEERS data users.

Table 2-14: Data Scientist MQs

Req #	Mandatory Qualification
2.1.14-01 (new)	The Data Scientist must have a minimum of 5 years' experience within the past ten (10) years of leading teams of programmers that develop machine learning algorithms or design predictive modeling processes.
2.1.14-02 (new)	The Data Scientist must have a minimum of 10 years' experience within the past fifteen (15) years in sorting, analyzing, and managing large amounts of data (commonly referred to as "big data").
2.1.14-03 (new)	The Data Scientist must have a minimum of 10 years' experience within the past fifteen (15) years writing high-quality machine learning models and algorithms required to support statistics and probability. The ability to collect, interpret, organize, and present data, and an advanced degree in applied statistics, economics, epidemiology, biostatistics, or a related field, with at least a concentration in quantitative methods relevant to work described for CalHEERS.
2.1.14-04 (new)	The Data Scientist must have a minimum of 10 years' experience within the past fifteen (15) years providing services in support of data wrangling including cleaning and organizing complex data sets to make them easier to access and analyze. Manipulating the data to categorize it by patterns and trends to assist in making data-driven decisions. A solid understanding of database management, with proven experience extracting data from different sources and transforming it into a suitable format for query and analysis, and then load it into a data warehouse system is required.

2.1.15 Data Analytics Expert

The duties and responsibilities of the Data Analytics Expert includes, but is not limited to:

- Responsible for all enterprise analytics, decision making affecting analytics, directing analytics processes, and for using analytics to drive innovation and enterprise objectives.
- Lead strategy and the development of data and analytics products, including identifying opportunities to improve methods, toolsets, infrastructure, team and staffing approach, and presentation of analyses (e.g. visualizations, etc.).
- Proposes and implements alternative analytics approaches to meet business objectives (such as encouraging the use of agile development approach to analytics resources and reporting).
- Identify and standardize the use and governance of data and analytics in support of the CalHEERS strategic plan and roadmap.

- Identify new kinds, types and sources of data to drive business innovation throughout CalHEERS that could improve business processes and define processes for the effective, integrated introduction of new data.
- Implement strategies to improve storing, organizing, cleansing, and enriching data, as well as ensuring optimized performance and data integrity throughout all data analytics resources and activities.
- Define, manage and advance enterprise information management principles, policies and programs for stewardship and custodianship of data and analytics, in concert with legal, information security, risks and audit compliance requirements.
- Innovate and expand the CalHEERS' research and analytics offerings via introducing emerging analytical approaches and technologies, with an emphasis on opportunities with the highest values to Covered California, DHCS, and OTSI.
- In collaboration with the Data Scientist, ensure that any new proposed CalHEERS functionality is assessed for how CalHEERS can quantitatively evaluate and measure the change's desired impacts. This shall include creating a plan for the needed data enhancements or resources to allow desired evaluation and measurement and ensuring that the plan be considered as a part of proposed CalHEERS functional changes.
- Ensures that data analytics and reporting resources at CalHEERS are integrated with and have access to any needed CalHEERS application subject matter experts (e.g. Portal developers) to ensure that analytics reflect the latest understanding of the CalHEERS functionality.

Table 2-15: Data Analytics Expert MQs

Req #	Mandatory Qualification
2.1.15-01 (existing)	The Data Analytics Expert shall have a minimum of ten (10) years' lead experience within the past fifteen (15) years', developing, implementing, and improving data analytics strategies and solutions on projects involving Large and Complex IT Systems.
2.1.15-02 (existing)	The Data Analytics Expert shall have a minimum of five (5) years' experience within the past ten (10) years' leading a team of data architects, data scientists, report developers, or related analytics staff resources on projects involving Large and Complex IT Systems.
2.1.15-03 (existing)	The Data Analytics Expert shall have a minimum of three (3) years' experience/knowledge within the past seven (7) years in business processes including research and data analysis, application of statistical research techniques, report or application development.

2.1.16 Security Officer

The duties and responsibilities of the Security Officer include, but are not limited to:

- Serve as the focal point for security compliance related activities and responsibilities.
- Maintain, enforce and document State information and security policies and procedures that align with current industry standards.
- Provide oversight of those assigned to specific security duties, as well as administer reviews relating to the overall security program.
- Serve as a resource regarding matters of information security and reports status of ongoing information security activities to State Project Director or designee(s).
- Lead in the development/adoption and enforcement of Information Security policies, procedures and standards.
- Coordinate with the Project to develop document, implement, and maintain a Project/ State Agency-wide information security programs to protect information and information systems.

- Coordinate with Contractor/Subcontractor and State in responding to information security data calls, audit requests, and reporting.
- Collaborates with Covered California Chief Information Security Officer on material security enhancements and modifications.
- Maintain appropriate security measures and mechanisms to guard against unauthorized access to electronically stored and /or transmitted patient data and protect against reasonably anticipated threats and hazards.
- Oversee and/or assist in performing on-going security monitoring of information systems.
- Work to identify all weaknesses and vulnerabilities in all operational entities including, but not limited to Operations, Network Management, Database and Program Management.
- Test and conducts exercises on the security incidents response capabilities for CalHEERS, analyses and simulation to determine the incidents response effectiveness and document results.
- Implement and enforce policies and procedures, which include standards for incident handling (FTI, PHI, etc.).
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-16: Security Officer MQs

Req #	Mandatory Qualification
2.1.16-01 (existing)	The Security Officer shall have a minimum of ten (10) years' lead experience within the past fifteen (15) years', developing, implementing, improving and monitoring industry standard Security strategies, solutions, and processes on projects involving Large and Complex IT Systems.
2.1.16-02 (existing)	The Security Officer shall have a minimum of five (5) years' experience within the past ten (10) years' applying Information Security principles, methods, and techniques in the development of project security deliverables on projects involving Large and Complex IT Systems.
2.1.16-03 (existing)	The Security Officer shall have a (ISC) ²⁰ Certified Information Systems Security Professional (CISSP) certification, or equivalent, including experience in Healthcare, Business Administration and Information Technology.

2.1.17 Organizational Change Management (OCM) Manager

The duties and responsibilities of the OCM Manager include, but are not limited to:

- Lead and single point of contact for the OCM effort, facilitate working sessions with Change Agents from Covered California, DHCS, and California counties to finalize OCM work products or artifacts.
- Review, approve and maintain OCM Deliverables, work products, work plan, schedules and activities associated with OCM.
- Align stakeholders, increase awareness and adoption of the changes, provide opportunities for Staff involvement in the change, and provide opportunities for change leadership.
- Understand the scope of the As-Is analysis and To-Be activity required for the CalHEERS System/Application.
- Monitor transition to the To-Be environment CalHEERS Change Request (CR) releases.
- Document and assess current and future business processes and roles in order to facilitate the identification of significant differences between the current and future business processes and roles; analyze and identify significant gaps.

- Help prepare Covered California, DHCS, and California counties for the significant changes introduced by the CalHEERS application.
- Leverage existing CalHEERS communication protocols to contact the SAWS Consortia and share information to gain the required understanding of the user interfaces between the SAWS and CalHEERS systems.
- Create communication material to encourage executive sponsorship, provide internal OCM communication, and encourage Staff involvement in the coming change.
- Collaboratively work to engage the counties at an earlier stage in the project on OCM communication activities.
- Document a list of processes for the To-Be and As-Is modeling activities and validate the processes in scope for OCM with the State's CalHEERS project team.
- Understand and provide clarity on the roles of the CalHEERS users, what business processes these roles perform, and in which organizations these roles reside.
- Understanding the scope of the changes for the Exchange, DHCS, and the California counties, understand their different communication and the best way to share information and gain the required understanding of the user interfaces between the SAWS and CalHEERS System and Subsystems.
- Oversee specific actions required to implement solutions to the impacts/changes as part of the gap analysis effort.
- Identify and document the changes that need to be made to accommodate the difference between the As-Is and future To-Be business processes.
- Validate, implement and document resolutions to resolve identified business impacts to the CalHEERS Project/System/Application.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.

Table 2-17: OCM Manager MQs

Req #	Mandatory Qualification
2.1.17-01 (existing)	The OCM Manager shall have a minimum of ten (10) years' lead experience within the past fifteen (15) years', developing, implementing, and improving change management, gap analysis strategies and solution implementation on projects involving Large and Complex IT Systems.
2.1.17-02 (existing)	The OCM Manager shall have a minimum of five (5) years' experience within the past ten (10) years' leading a team of change management agents on projects involving Large and Complex IT Systems.
2.1.17-03 (existing)	The OCM Manager shall have a minimum of five (5) years' experience within the past ten (10) years' working with human services systems and programs with an emphasis on healthcare; ~~and~~ experience building and maintaining strong working relationships with clients, key internal and external stakeholders; ~~communicating~~ ~~Conveying~~ relevant information to an executive-level audience, ensuring ~~the~~ client (internal management or customer) is aware of the impact of impending changes.

2.1.18 Consumer Experience Lead

The duties and responsibilities of the Consumer Experience Lead include, but are not limited to:

- Support and engage product development teams in user and consumer research activities during problem discovery, including facilitation of Covered California-inspired activities that promote design thinking and alignment on the team.

- Work closely with product and design teams to identify research questions, build a research plan that will answer them, and communicate the insights to shape the user and consumer experiences of Covered California.
- Conduct research that maps the users' and consumers' latent needs to new strategic initiatives and opportunities for product innovation.
- Translate qualitative and quantitative data into compelling stories to build enduring empathetic connections.
- Provide rich context for both product and research backlogs that helps inform prioritization and aligns with the overall business strategy.
- Actively participate in the evolving UX strategy, discover and pilot new tools and resources that promote agile and lean methodologies.
- Continuously provide leadership in creating a highly engaged user and consumer base, including continued development of the platform that hits specific engagement KPIs.
- Oversee the product strategy and execution for a specific category and roadmap. Champion product initiatives and business cases to the executive team for prioritization.
- Provide product development support to consumer lifecycle marketing to create fantastic consumer engagement experiences.
- Coordinate with sponsors to leverage existing design systems and branding guidelines in new developments, ensuring a consistent consumer experience across all touchpoints.
- Encourage a fast-paced approach within a cross functional team / culture to create prototype, test and release products and features.
- Oversee the design and usability of a product category. Impact the UX of the product development by creating and advising on updates, releases, or modifications.
- Leverage consumer feedback and integrate into a continuously improving Covered California experience.
- Identify and proactively bring forward options that will provide the highest values to Covered California, DHCS, and OTSI.
- Comply with and integrate accessibility standards, including ADA and WCAG compliance, into the design and development of all consumer-facing products and experiences to ensure equitable access for users with disabilities.
- Partner with product owners, UX, and HCD teams across sponsor organizations to align consumer experience initiatives with product objectives and organizational priorities.

Table 2-18: Consumer Experience Lead

Req #	Mandatory Qualification
2.1.18-01 (existing)	The Consumer Experience Lead shall have a minimum of seven (7) years' experience within the past ten (10) years, in marketing analytics, customer experience/customer insights and/or customer strategy; and have experience with human services systems and programs with emphasis on healthcare.
2.1.18-02 (existing)	The Consumer Experience Lead shall have a minimum of five (5) years' experience within the past ten (10) years, gathering consumer and user business data, analyzing of the data, to quantify and inform User Experience (UX) strategies.
2.1.18-03 (existing)	The Consumer Experience Lead shall have a minimum of five (5) years' experience within the past ten (10) years, applying UX Design, implementing UX methodologies and best practices, and designing wireframes or prototypes for research validation.

2.2 NON-KEY STAFF PERSONNEL

The following are Non-Key Staff (also referred to as System Change Staff) roles that the State identifies as needed to accomplish the activities related to Change Requests, as defined in SOW Section 4, SYSTEM CHANGE & ENHANCEMENTS REQUIREMENTS. These Non-Key (System Change) Staff qualifications apply to both the Contractor's onshore and offshore Staff/resources.

2.2.1 Contractor Non-Key Staff

Table 2-19: Non-Key Staff General Requirements

Req #	Mandatory Qualification										
2.2.1-01 (new)	The Contractor shall staff the following Non-Key Staff as specified within the table below. • “Onsite” means co-located with CalHEERS State staff. • “Offsite/Local” means within 50 miles of downtown Sacramento, CA. • “Offsite” means within the United States, subject to the requirements or constraints within the Contract. • “Offshore” means outside the United States, subject to the requirements or constraints within the Contract. <table> <tr> <th>Team</th><th>Location & Time %</th></tr> <tr> <td>Development Manager</td><td>Onsite (100%)</td></tr> <tr> <td>Developer Lead</td><td>Onsite (100%)</td></tr> <tr> <td>Tools Manager</td><td>Onsite (100%)</td></tr> <tr> <td>Tools Lead</td><td>Onsite (100%)</td></tr> </table>	Team	Location & Time %	Development Manager	Onsite (100%)	Developer Lead	Onsite (100%)	Tools Manager	Onsite (100%)	Tools Lead	Onsite (100%)
Team	Location & Time %										
Development Manager	Onsite (100%)										
Developer Lead	Onsite (100%)										
Tools Manager	Onsite (100%)										
Tools Lead	Onsite (100%)										
2.2.1-02 (new)	The Contractor shall staff teams, considering both onshore/offshore mix and work schedules, to ensure adequate coverage/support during the business hours of project staff, sponsors, stakeholders and CalHEERS end-users.										
2.2.1-03 (new)	The Contractor shall not concurrently fill multiple Non-Key Staff positions with a single Non-Key Staff member.										

2.2.2 Non-Key (System Change) Staff Personnel Mandatory Qualifications (MQs)

Table 2-20: Non-Key (System Change) Staff Personnel MQs

Req #	Non-Key (System Change) Staff Personnel
2.2.2-01 (existing)	System Architect/Engineer: Five (5) years of experience aligning IT systems with organizational business processes. At least three (3) years of that experience in a lead capacity in systems analysis, design, and architecture.
2.2.2-02 (existing)	Usability Expert: Five (5) years of experience applying User-Centered Design (UCD) processes and User Experience (UX) activities (such as usability reviews, studies, and testing) on IT projects.
2.2.2-03 (existing)	Security Analyst: Five (5) years of experience applying analytical processes on IT projects. At least three (3) years of experience in systems security.
2.2.2-04 (existing)	Senior Programmer/Developer: Five (5) years of experience in electronic data processing systems study, design, and programming. At least four (4) years of that experience must have been in a lead capacity.

Req #	Non-Key (System Change) Staff Personnel
2.2.2-05 (existing)	Programmer/Developer: Five (5) years of experience in electronic data processing systems study, design, and programming. At least three (3) years of experience developing software solutions.
2.2.2-06 (existing)	Senior System Administrator: Five (5) years of experience as a Systems Administrator.
2.2.2-07 (existing)	System Administrator: Three (3) years of experience as a Systems Administrator.
2.2.2-08 (existing)	Senior Database Administrator: Five (5) years of experience as a Database Administrator.
2.2.2-09 (existing)	Database Administrator: Three (3) years of experience as a Database Administrator.
2.2.2-10 (existing)	Senior Database Analyst: Five (5) years of experience as a Database Analyst.
2.2.2-11 (existing)	Database Analyst: Three (3) years of experience as a Database Analyst.
2.2.2-12 (existing)	Senior System Tester: Five (5) years of experience conducting systems testing, which includes but not limited to validating User Stories/Scenarios and cross referencing to Business Requirements.
2.2.2-13 (existing)	System Tester: Three (3) years of experience conducting systems testing, which includes but not limited to validating User Stories/Scenarios and cross referencing to Business Requirements.
2.2.2-14 (existing)	Senior Trainer: Five (5) years of experience in developing and updating online training material and conducting user training on IT projects.
2.2.2-15 (existing)	Trainer: Three (3) years of experience in developing and updating online training material and conducting user training on IT projects.
2.2.2-16 (existing)	Senior Technical Analyst: Seven (7) years of experience applying analytical processes on IT projects. At least five (5) years of that experience must have been in system analysis and design.
2.2.2-17 (existing)	Technical Analyst: Five (5) years of experience applying analytical processes on IT projects. At least three (3) years of that experience must have been in system analysis and design.
2.2.2-18 (existing)	Senior Business Analyst: Seven (7) years of experience applying analytical processes on IT projects. At least five (5) years of that experience must have been in developing and documenting business and system requirements. A minimum of two (2) years' experience in facilitation of requirement solicitation sessions involving multiple stakeholder organizations.
2.2.2-19 (existing)	Business Analyst: Five (5) years of experience applying analytical processes on IT projects. At least three (3) years of that experience must have been in developing and documenting business and system requirements.
2.2.2-20 (existing)	Senior Technical Writer: Five (5) years of experience on IT projects. At least three (3) years of experience must have been spent developing and editing technical documentation, which includes but is not limited to, the ability to translate complex technical concepts both verbally and in writing between technical experts and nontechnical team members.
2.2.2-21 (existing)	Technical Writer: Three (3) years of experience on IT projects. At least one (1) year of experience must have been spent developing and editing technical documentation, which includes but is not limited to, the ability to translate complex technical concepts both verbally and in writing between technical experts and nontechnical team members.

Req #	Non-Key (System Change) Staff Personnel
2.2.2-22 (existing)	Reports Developer: Five (5) years of experience working with report development on IT projects. At least three (3) years of that experience must have been spent developing and editing technical documentation.
2.2.2-23 (existing)	Senior Scrum Master: Three (3) years of experience as a Senior Scrum Master on IT projects.
2.2.2-24 (existing)	Scrum Master: One (1) year experience as a Scrum Master on IT projects.
2.2.2-25 (existing)	Joint Application Development (JAD) Facilitator: Three (3) years of experience facilitating JAD sessions on IT projects. Possesses a Certified Business Analysis Professional (CBAP) Certification (desirable).
2.2.2-26 (existing)	Data Analytics Architect: Three (3) years of experience making architecture decisions, developing standards and operating models that support advanced analytics.
2.2.2-27 (existing)	Data Analytics Analyst: Three (3) years of experience accessing, manipulating and making sense of large amounts of structured and unstructured data.
2.2.2-28 (existing)	Data Analyst and Visualization Expert: Three (3) years of experience with data management, pattern recognition and visualization experience.
2.2.2-29 (new)	Senior Data Warehouse Developer: Three (3) years of experience with data modeling, ETL, data warehouse technologies, optimizing queries, and data integration tools.
2.2.2-30 (new)	Data Warehouse Developer: One (1) year of experience with data modeling, ETL, data warehouse technologies, optimizing queries, and data integration tools.
2.2.2-31 (new)	GenAI Analyst / Specialist: Two (2) years' experience in utilizing Generative AI technologies to enhance data analysis, requirement gathering, and decision-making processes.
2.2.2-32 (new)	GenAI Data Analyst: Two (2) years' experience in utilizing Generative AI technologies to enhance data analysis, requirement gathering, and decision-making processes.
2.2.2-33 (new)	GenAI User Researcher: Two (2) years' experience as a user experience (UX) researcher focused on understanding how users interact with and perceive generative AI products (e.g., chatbots, text-to-image tools, or creative writing platforms), conducting research to identify user needs, pain points, and opportunities for improvement, ultimately informing the design and development of AI-powered features and products.
2.2.2-34 (new)	GenAI Program Lead: Two (2) years' experience overseeing the planning, execution, and delivery of generative AI (GenAI) initiatives, collaborating with cross-functional teams to identify opportunities, develop strategies, and ensure successful implementation of GenAI technologies across the project.
2.2.2-35 (new)	GenAI Engineer: Two (2) years' experience leveraging deep learning and machine learning techniques to design, develop, and implement generative AI models on large data sets.
2.2.2-36 (new)	GenAI Equity Officer / Executive: Two (2) years' experience ensuring that the development and implementation of generative AI technologies was done fairly, equitably, avoiding bias, and actively monitored for potential disparities, working to mitigate them across all aspects of GenAI usage on the project.

Req #	Non-Key (System Change) Staff Personnel
2.2.2-37 (new)	GenAI Data Scientist: Two (2) years' experience utilizing generative AI (GenAI) technologies to enhance data analysis workflows, leveraging AI to automate repetitive tasks, generate synthetic data, and assist in data exploration. Focusing on complex problem-solving and results interpretation.
2.2.2-38 (new)	EDI Specialist: Five (5) years of experience on IT projects developing, implementing, managing, and supporting Electronic Data Interchange (EDI) systems.
2.2.2-39 (new)	Google Analytics & Tagging Specialist: Five (5) years of experience with Google Analytics, data analysis, and data tagging with the application of data privacy regulations pertaining to data collection and reporting.

2.3 GENERAL STAFFING REQUIREMENTS

2.3.1 Organizational Chart

The Contractor shall provide to the State, within one (1) Business Day of a State request, the current organization chart of the Contractor's Project team, including the names of all Key Staff, or maintain the current organization chart in a location (e.g., SharePoint) accessible by the State.

2.3.2 Approval of Staff

During the Contract term, the State reserves the right to approve or disapprove the Contractor's Staff, including, but not limited to, any Subcontractor Staff assigned to this Contract, or to approve or disapprove any proposed changes in Staff or staffing levels. The State may request, and the Contractor will remove from work on the Project, the Contractor employees or Subcontractors who the State identifies as being incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued employment on the Project is deemed to be contrary to the public interest or not in the best interest of the State, provided that such request will be based solely on nondiscriminatory reasons and the Contractor shall have the right to request the withdrawal of any such request upon the Contractor showing to the State that the concern is unfounded. Upon request of the State Project Director or designee, the Contractor shall provide the State with the required documentation (e.g., resume, experience that meets or exceeds the mandatory qualifications, etc.) of any member of its Staff or a Subcontractor's Staff assigned to or proposed to be assigned to any aspect of the performance of this Contract prior to commencing any Services.

2.3.3 Staff Competence and Compliance

All Staff proposed by the Contractor must have the following minimum requirements to be considered for assignment on this project.

Table 2-21: Staff Competence and Compliance

Req #	SOW Requirement
2.3.3-01 (new)	The Contractor Staff shall demonstrate technical competence with the skills necessary to perform that Staff member's project activities, including having experience equivalent to that of the person holding that position in the Contractor's Proposal, throughout the term of the Contract, inclusive of any optional extensions.
2.3.3-02 (new)	The Contractor Staff shall demonstrate the ability to engage in the activities and perform the services required under this Contract.

Req #	SOW Requirement
2.3.3-03 (new)	The Contractor Staff shall comply with all applicable licensing and operating requirements imposed or required under federal, state, or county law, and other standards of quality generally accepted in the field of the activities of such Staff.

2.4 CONTRACTOR STAFF ASSIGNMENT/REPLACEMENT

2.4.1 Key Staff Assignment

Subject to the provisions of Appendix A-2, SPECIAL PROVISIONS, the Key Staff identified in the Contractor's Proposal shall be the Key Staff assigned to this Project as of the effective date of this Contract.

2.4.2 Key Staff Replacement by Contractor

To facilitate Project progress and avoid time and effort associated with retraining Contractor Personnel, it is important to the CalHEERS Project to minimize Contractor Staff turnover to the extent possible, particularly for Key Staff.

The Contractor must assure the State that, wherever possible, Key Staff will be retained until their assignments are completed. When an unplanned, early employee or Subcontractor departure from the Project is unavoidable, the Contractor must notify the State Project Director or designee as soon as reasonably possible and develop and complete transition and training requirements for the new or reassigned replacement Key Staff.

In the event replacement of Key Staff is required the Contractor shall provide the State Project Director or designee with the proposed replacement candidate's resume, a completed KEY STAFF QUALIFICATIONS FORM, a completed STAFF REFERENCE FORM(s), and a side-by-side comparison of the Key Staff vs. proposed Key Staff experience that meets or exceeds the Mandatory Qualifications and Desirable Qualifications of the Key Staff in the role within thirty (30) calendar days of the date the State is notified that Key Staff member is going to become unavailable and allow the State Project Director or designee the opportunity to interview and approve the candidate. If the Contractor fails to submit a resume as required in this section or does not provide a suitable replacement candidate who is accepted by the State within thirty (30) calendar days after the interview, unless a longer time period is approved in writing by the State Project Director, or designee, liquidated damages as provided in Appendix A-2, SPECIAL PROVISIONS, shall be assessed by the State.

All new, reassigned, or substitute Key Staff must meet all the Contract requirements and shall be approved in writing by the State Project Director or designee prior to beginning work. Consent shall not be unreasonably withheld.

2.4.3 Reassignment of Key Staff (Stop Work)

During the term of this Contract, including any period of time for which a Stop Work Order is issued pursuant to Paragraph 45 of Appendix A-1, GENERAL PROVISIONS, the Contractor shall not make changes in the assignment of its Key Staff except in the event of death, illness, retirement, disability, termination, or leaving the Contractor's employment and not serving as a consultant or Contractor to the Contractor, or subject to mutual agreement by the parties to allow for removal. If a member of the Contractor's Key Staff is unable to perform due to factors beyond the Contractor's reasonable control (e.g., illness, resignation), the Contractor will use its best efforts in promptly providing suitable substitute personnel, subject to the State approval at its sole discretion. The Contractor shall submit a plan that addresses how a Key Staff member's responsibility will be reassigned when the Key Staff members is absent for more than five (5)

Business Days. Any such plan to reassign responsibilities shall receive prior approval from the State Project Director or designee.

2.4.4 Other Key Staff Replacement Requirements

When Key Staff is replaced by the Contractor or by the State, the State shall have the right to contact references and evaluate information provided and determine if the Key Staff substitution or replacement is acceptable. Any substitution or replacement of Key Staff shall have equal or better qualifications when compared to the Key Staff that is being replaced. The candidate, having received acceptance by the State, shall be available to start immediately unless otherwise agreed to by the State.

Table 2-22: Key Staff Changes, Termination or Replacement

Req #	SOW Requirement
2.4.4-01 (existing)	Except as provided in preceding SOW Subsections 2.4.2 through 2.4.4, the Contractor shall not substitute, reassign, or replace Key Staff during the term of this Contract without the prior written approval from the State Project Director or designee, which will be provided in writing prior to Contractor Staff beginning work.
2.4.4-02 (existing)	The Contractor shall submit to the State Project Director or designee, the proposed replacement candidate's resume, completed Appendix B-22, KEY STAFF QUALIFICATIONS FORM, associated Appendix B-23, STAFF REFERENCE FORM(s), and a side-by-side comparison of the Key Staff vs. proposed Key Staff experience that meets or exceeds the Mandatory Qualifications and Desirable Qualifications of the Key Staff in the role within 30 calendar days of the date the Key Staff member becomes unavailable. No amendment shall be required to make this change to the Contract.
2.4.4-03 (existing)	The Contractor shall notify the State within 48 hours of any unplanned departure or vacancy of Key Staff. For planned departures/vacancies and leaves of absences extending 14 calendar days or more, the Contractor shall notify the State at the time it becomes known to the Contractor.
2.4.4-04 (existing)	The Contractor shall ensure that all proposed replacement Key Staff have comparable or greater skills, as reasonably determined by the State, for performing the activities as performed by the Staff being replaced.

2.5 MISCELLANEOUS

2.5.1 Harmony Clause and Labor Contracts

Consistent with the applicable collective bargaining Contract, the Contractor shall attempt to resolve any dispute it may have with labor organizations so that any dispute will not adversely affect the Contractor's performance of this Contract. The Contractor shall employ personnel who can work in harmony with State employees as well as other contractors.

2.5.2 State Ethics Training

The Contractor Staff shall complete the State's online Ethics Training Course and submit the certificate of completion within five (5) Business Days upon Contractor start date and every two (2) years thereafter to the State Project Director or designee.

2.5.3 Form 700

All Contractor's Staff, unless otherwise approved by the State, shall complete and submit within five (5) Business Days upon Contractor start date, and annually thereafter, the State's Statement of Economic Interests (Form 700) to the State Project Director or designee. Additional information about the Form 700 can be found at the link below:

<http://www.fppc.ca.gov/Form700.html>

The Contractor understands that the Contractor's Key Staff (defined for purposes of this Section as those individuals who fall within the definition of "consultant" pursuant to 2 CCR Section 18700.3(a)) performing work under this Agreement may be designated by the State as required to file a Form 700, Statement of Economic Interest with the State. If, during the term of this agreement, any Key Staff are added to work on this Agreement, such Staff must file the Form 700 with the State.

The Contractor understands that the Contractor's Key Staff performing work under this Agreement may be required to file a Form 700 Statement of Economic Interest with the State as follows:

1. Within five (5) Business Days of commencing work on the Contract;
2. Annually thereafter while remaining a consultant as defined in the regulations cited above (usually by April 1 of each subsequent year); and
3. Within 30 days of ceasing to be such a consultant to the State.

2.5.4 Acceptable Use Security Policy

The Contractor's Staff who are authorized to use State government owned or leased equipment or facilities shall read and sign the Acceptable Use Security Policy form.

2.5.5 Insurance Coverage Requirements

Prior to commencing performance under the Contract and during the term of the Contract, and including any optional extensions, the Contractor shall maintain in full force and effect, the insurance coverage described in this Section, with an insurance carrier approved to do business in the California.

2.5.5.1 Commercial General Insurance

The Contractor shall maintain Commercial General Liability Insurance with limits of not less than \$1,000,000 per occurrence and \$2,000,000 aggregate for bodily injury property damage combined. The policy shall include coverage for liabilities arising out of premises, operations, independent contractors, products, completed operations, personal and advertising injury, and liabilities assumed under this Contract. The insurance shall apply separately for each insured against whom claim is made or suit is brought subject to the Contractor's limit of liability. This requirement may be met through the use of blanket additional insured endorsements.

2.5.5.2 Motor Vehicle Liability Insurance

The Contractor shall maintain motor vehicle liability insurance with limits of not less than \$1,000,000 per accident. Such insurance shall cover liability arising out of a motor vehicle including owned, long-term hired, and non-owned motor vehicles.

2.5.5.3 Workers' Compensation Insurance

The Contractor shall maintain Worker's Compensation coverage for all employees who will engaged in the performance of this Contract, including special coverage extensions, where applicable. The policy shall have a coverage of not less than \$1,000,000. The Contractor shall provide or purchase worker's compensation coverage for Contractor's employees, as may be required under applicable law during the term of this Contract. A certificate of such insurance policy, or a certificate of self-insurance carried or maintained by the Contractor, shall be furnished to the State upon request. Should the Contractor fail to secure such coverage or fail to pay premiums, as may be required under applicable law, the State may deduct the amount of premiums and any penalties owing from the amounts payable to Contractor under this Contract and transmit the same to the appropriate State agency providing Worker's Compensation coverage. This provision does not waive any right to collect from Contractor amounts paid by the State.

The State shall not be responsible for payment of worker's compensation premiums or for any other claim or benefit for Contractor, or any Subcontractor or employee of Contractor, which might arise under the worker's compensation laws during performance of duties and services under this Contract. If the State determines at any time that worker's compensation payments are due and owing as a result of work performed under this Contract, those payments shall be made by the Contractor.

When work is performed on State owned or controlled property, the Worker's Compensation policy shall be endorsed with a waiver of subrogation in favor of the State.

2.5.5.4 Technology Professional Liability/Errors and Omissions

The Contractor shall maintain appropriate coverage to the Contractor's profession and work hereunder, on a claims-made form covering any damages caused by a negligent error, act, or omission with a limit of not less than \$5,000,000. Coverage shall be sufficiently broad to respond to the duties and obligations as is undertaken by the Contractor in this Agreement and shall include, but not be limited to, claims involving infringement of intellectual property, copyright, trademark, invasion of privacy violations, information theft, intentional and/or unintentional release of private information, extortion, and network security. The policy shall provide coverage for breach response costs, regulatory fines and penalties, and credit monitoring expenses, with limits sufficient to respond to these obligations.

The policy shall include, or be endorsed to include property damage liability coverage for damage to, alteration of, loss of, or destruction of electronic data and/or information "property" of the State in the care, custody, or control of the Contractor. If not covered under the Contractor's professional liability policy, such "property" coverage of the Contractor may be endorsed onto the Contractor's cyber liability policy as covered property in Section 2.5.5.5 CYBER LIABILITY INSURANCE:

If policies provide claims-made coverage:

- The retroactive date must be shown and must be before the Effective Date of the Agreement.
- Insurance must be maintained, and evidence of insurance must be provided, for at least five (5) years after completion of the Agreement or as otherwise agreed to in writing by the State in its sole discretion.
- If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a retroactive date prior to the Effective Date of the Agreement, the Contractor must purchase "extended reporting" coverage for a minimum of five (5) years

after completion of the Agreement or as otherwise agreed to in writing by the State in its sole discretion.

2.5.5.5 Cyber Liability Insurance

Contractor shall maintain Cyber Liability insurance with limits of not less than \$4,000,000 for each occurrence and an annual aggregate of \$8,000,000 covering claims involving privacy violations, information theft, damage or destruction of electronic information, intentional and/or unintentional release of State and or private information, alteration of electronic information, extortion and network security. The policy must name The State of California, its officers, agents, and employees as additional insured with respect to work performed under the contract. Claims involving privacy violations, information theft, damage or destruction of electronic information, intentional and/or unintentional release of State and or private information, alteration of electronic information, extortion and network security. The policy must name The State of California, its officers, agents, and employees as additional insured with respect to work performed under the contract.

If not covered under the Contractor's professional liability policy, such "property" coverage of the Contractor may be endorsed onto the Contractor's cyber liability policy as covered property as follows:

- ~~_____~~ Cyber liability coverage on a claims-made form with a limit of not less than \$85,000,000 covering damage to, alteration of, loss of, or destruction of electronic data and/or information "property" of the State that will be in the care, custody, or control of Contractor caused by a negligent error, act, or omission.

2.5.5.6 Professional Liability Fidelity Bond

The Contractor shall maintain Professional Liability Insurance or a Fidelity Bond, of not less than \$2,000,000 per claim and in annual aggregate, covering, among other matters, errors and omissions of Contractor in performing the Service.

2.5.5.7 Addition Coverage Requirements

The Contractor is responsible for any deductible or self-insured retention contained within their insurance program. Any required insurance contained in this Contract shall be primary, and not excess or contributory to any other insurance carried by the State. Coverage needs to be in force for the complete term of the Contract. If insurance expires during the term of the Contract, a new certificate must be received by the State at least ten (10) days prior to the expiration of this insurance. Any new insurance must still comply with the original terms of the Contract. Inadequate or lack of insurance does not negate the Contractor's obligations under this Contract.

2.5.5.8 Endorsements

All policies shall be endorsed to include the State of California, its officers, agents, employees as additional insured, but only with respect to work performed under this Contract. The additional insured endorsement must be provided. The State must be named as an additional insured to all policies. Any required endorsements requested by the State must be physically attached to all requested certificates of insurance and not substituted by referring to such coverage on the certificate of insurance. Any required endorsements requested by the State must be physically attached to all requested certificates of insurance and not substituted by referring to such coverage on the certificate of insurance.

2.5.5.9 Premiums

Premiums on all insurance policies shall be paid by the Contractor or its Subcontractors. Such insurance policies provided for the State pursuant to this Section, shall expressly provide therein that the State be named as additional insured, and that it shall not be revoked by the insurer until 30 days' notice of intended revocation thereof shall have first been given to the State by such insurer. Inadequate or lack of insurance does not negate the Contractor's obligations under this Contract.

2.5.5.10 Subcontractors

The Contractor shall require any and all of its Subcontractors to obtain and maintain identical policies of compensation insurance as described in this Section or be properly certified under applicable State law as self-insured. A certificate of such insurance policy carried shall be furnished to the State upon request. If Subcontractors performing the work under this Contract do not have insurance equivalent to the above, Contractor liability shall provide such coverage for the Subcontractor, except for coverage for error, mistake omissions, or malpractice, which shall be provided by the Subcontractor if such insurance is required by the State.

2.5.5.11 Notices

The Contractor shall provide to the State within five (5) Business Days a copy of any notice of Cancellation/Termination or Nonrenewal received by the Contractor for any of the required insurances. In the event the Contractor fails to keep in effect, always, the specified insurance coverage, the State may, in addition to any other remedies it may have, terminate this Contract upon the occurrence of such event, subject to the provisions of this Contract.

2.5.5.12 Certificates

The Contractor shall furnish to the State copies of certificates of all required insurance within 30 days of the Execution Date. Coverage needs to be in force for the complete term of the Contract. If insurance expires during the term of the Contract, a new certificate must be received by the State at least ten (10) days prior to the expiration of this insurance. Any new insurance must still comply with the original terms of the Contract.

2.5.6 Hybrid Work from Home /In-Office Work Conditions

Since the COVID Public Health Emergency, policies around work from home have become more common place within the State of California. Hybrid forms of work from home will be included under this contract.

The Contractor shall work with the State as part of the onboarding planning and processing to determine which employees will be required to work at the CalHEERS office(s) or if they will be required to participate in a hybrid work from home / work at office model.

TABLE OF FIGURES

Figure 3-1: Enterprise Tools Matrix	91

3 PROJECT MANAGEMENT REQUIREMENTS

The Contractor, at the direction of the State, will provide Project Management activities to manage and maintain the CalHEERS System. The following project management requirements must be integrated into the existing project management infrastructure.

Please note that this section of the statement of work (SOW) references multiple sets of standards, which are subject to change over time. Please refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

3.1 PROJECT MANAGEMENT

Project management is an integral tool used by the State to proactively keep abreast of the fast-paced challenges during the SDMO life cycle. The framework in which the CalHEERS Project Office and the Contractor will manage the day-to-day activities are outlined in the sections below.

3.1.1 Project Management Plan

Table 3-1: Project Management Plan (CD-3.1-1)

Req #	SOW Requirement
3.1.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-3.1-1 - Project Management Plan, which includes but is not limited to: 1. 3.1.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
3.1.1-03 (existing)	The Contractor shall develop and maintain the CalHEERS Project Management Plan in compliance with the ISO/IEC/IEEE 16326:2009 - Systems and Software Engineering—Life Cycle Processes—Project Management (Section 6.1—Project planning process), ISO/IEC 12207, IEEE Std 12207-2008—Systems and Software Engineering—Software Life Cycle Processes (Section 6.3—Project Processes).
3.1.1-04 (modified)	The Contractor shall also develop and maintain the CalHEERS Project Management Plan in accordance with the State-approved version of the Project Management Institute (PMI®), A Guide to the Project Management Body of Knowledge (PMBOK® Guide), Develop Project Management Plan Section. Refer to Appendix A-2, SPECIAL PROVISIONS, 7.7, <u>UPDATES TO STANDARDS, REGULATIONS, AND CODES.</u>
3.1.1-05 (existing)	The Contractor shall provide and employ a Project Management methodology consistent with the Project Management Institute (PMI) Project Management Body of Knowledge (PMBOK®).
3.1.1-06 (existing)	The Contractor shall update and maintain the CalHEERS SDMO Project Management Plan to include descriptions of the Contractor's processes and activities for executing, monitoring, controlling, project plan maintenance, and Transition-Out/Contract Closeout Services.
3.1.1-07 (existing)	The Contractor shall develop and maintain the CalHEERS SDMO Project Management Plan to include descriptions of the methods, tools, techniques, and assumptions used to estimate the Contract costs and associated confidence levels for planned activities as well as changes to scope.
3.1.1-08 (existing)	The Contractor shall develop and maintain the CalHEERS SDMO Project Management Plan to include a plan for business processes and System migration at transition, Contract termination or at the end of the Contract.
3.1.1-09 (existing)	The Contractor shall develop and maintain the CalHEERS SDMO Project Management Plan to include a plan that ensures the successful Closeout of the Contract by the Contractor, including all hardware, software, source code, data, services, staffing, deliverables and archived project materials.
3.1.1-10 (existing)	The Contractor shall develop and maintain the CalHEERS SDMO Project Management Plan to include tasks for the preparation of a final report. The final report includes but is not limited to lessons learned and an analysis of objectives achieved.
3.1.1-11 (existing)	The Contractor shall develop and maintain the CalHEERS SDMO Project Management Plan to include activities for conducting debriefings with the State in the event of Contract termination or Contract expiration.
3.1.1-12 (modified)	The Contractor shall attach to the Project Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable)

Req #	SOW Requirement
	compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.1.2 Project Management Execution

Table 3-2: Project Management Execution

Req #	SOW Requirement
3.1.2-01 (new)	The Contractor shall staff, manage, lead and execute Project Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.1-1 – Project Management Plan.
3.1.2-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.1.2-03 (existing)	Upon Contract award, the Contractor shall conduct a review of all existing project management plans.
3.1.2-04 (modified)	The Contractor Project Management Office (PMO) shall align with the Office of Technology & Solutions Integration (OTSI) PMO structure and conforms to the OTSI best practices for the development of large-scale information technology (IT) systems.
3.1.2-05 (existing)	The Contractor PMO shall be responsible for all required CalHEERS Project Management functions, including the planning, scheduling, administering, controlling, tracking, and reporting of all Project activities during the term of the Contract in coordination with the State's PMO and State Fiscal & Administrative teams.
3.1.2-06 (existing)	The Contractor shall manage and execute the CalHEERS Project in accordance with the State approved Project Management Plans.
3.1.2-07 (existing)	The Contractor shall develop and submit a written Project Management Update and Rollout Schedule to modify and update plans before the end of the Transition-In period.

3.1.3 Contract Closeout

The State utilizes Contract Closeout to ensure that the Contractor identifies all the outstanding activities required to fully close-out Contract obligations at the end of the Contract. It is important that the Contractor and the State work collaboratively to establish the remaining activities for this final stage of the Contract. The following requirements identify the expectations for Contract Closeout.

Note: Contract Closeout is not to be confused with Transition Out, which occurs concurrently with Contract Closeout, and is discussed in SOW Section 7.3, TRANSITION-OUT.

Table 3-3: Contract Closeout Plan (CD-3.1-2)

Req #	SOW Requirement
3.1.3-01 (modified)	The Contractor shall develop, deliver, and implement a CalHEERS Contract Closeout Plan to that includes but is not limited to: 1. The overall strategy for closing out the Contract. 2. The incorporation of requirements spelled out in Section 3.2, SCHEDULE MANAGEMENT. 3. The overall strategy and approach to complete other schedule-related tasks (related to Closeout) identified in any of the other work plans developed by the Contractor under this Contract. 4. List of deficiency items (logged by both the State and Contractor) from the Deficiency & Issue tracking systems that will be updated by the Contractor as condition for completion for Contract Closeout. 5. List of outstanding action items or tasks from meeting minutes or other Management tracking systems. 6. List of any other items deemed relevant to the clarification of expectations for Contractor Closeout. 7. The overall structure of the plan shall address, but not be limited to, the following: a. Contract Closeout Planning b. SOW 3, PROJECT MANAGEMENT PROCESSES c. SOW 4, SYSTEM CHANGE & ENHANCEMENT PROCESS d. SOW 5, PROGRAM SUPPORT PROCESSES e. SOW 6, OPERATION PROCESSES f. SOW 7, TRANSITION-OUT PROCESSES
3.1.3-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.1.3-03 (modified)	The Contractor shall attach to the Contract Closeout Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver

Req #	SOW Requirement
	4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact
3.1.3-04 (new)	The State identifies and associates the following artifacts to the Contract Closeout Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Contract Closeout Work Plan
3.1.3-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

3.1.4 Contract Closeout Execution

Table 3-4: Contract Closeout Execution

Req #	SOW Requirement
3.1.4-01 (new)	The Contractor shall staff, manage, lead and execute Contract Closeout on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.1-2 – Contract Closeout Plan.
3.1.4-02 (existing)	The Contractor shall resolve all Contract Closeout expectations which includes, but is not limited to the following: 1. The resolution of all documented Contractor responsible deficiencies associated with the present and any prior deliverables as stipulated through the approved deficiency process. 2. Successful completion of all other work breakdown structure elements, tasks, and deliverables for this milestone as specified in the Contract Closeout work plan schedule. 3. The successful completion of all other contractual obligations that were identified in the Closeout Plan.
3.1.4-03 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.2 SCHEDULE MANAGEMENT

Schedule management is critical to the successful completion of a project. The State expects the Contractor to transparently develop and manage the schedule, and to consistently meet Project milestones.

Schedule management includes but is not limited to:

- Approach, processes, and procedures to manage the schedule
- Schedule Management Plan
- Development and management of detailed Contractor project work plans
- Transparent estimating methods
- Master Work Plan
- Contractor schedule processing infrastructure
- Schedule processing
- Schedule change control

3.2.1 Schedule Management Plan

The Schedule Management Plan documents the approach, processes, and procedures for schedule management activities for the Transition Phase, and the SDMO Phase of the Contract. The Schedule Management Plan aids the State and Contractor to ensure the timely execution and delivery of project activities. The following requirements identify the expectations related to the Schedule Management Plan.

Table 3-5: Schedule Management Plan (CD-3.2-1)

Req #	SOW Requirement
3.2.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Schedule Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Schedule Management Approach 3.2 Deliverable Maintenance and Revisions Approach 4. 3.2.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.2.1-03 (existing)	The Contractor shall develop the Schedule Management Plan by adding Contractor specific details into the Schedule Management Plan Template provided by the State.
3.2.1-04 (existing)	The Contractor shall develop the finalized Schedule Management Plan from the template provided by the State. The Contractor shall not add or modify in the approved Schedule Management Plan, any section numbers or content that was included in the template without pre-approval from the State Project Director or designee.
3.2.1-05 (existing)	The Contractor shall execute and maintain the Schedule Management Plan for both the Transition Phase and M&O Phase of the Contract, including Transition-Out.
3.2.1-06 (existing)	The Contractor shall update the approved Schedule Management Plan upon the direction of the State Project Director or designee, or as required to implement project work plan modifications under direction of the Change Control Board (CCB).
3.2.1-07 (existing)	The Contractor shall submit the revised Schedule Management Plan to the State Project Director or designee for review and approval in accordance with the deliverable review

Req #	SOW Requirement
	processes defined within the Document Management Plan.
3.2.1-08 (existing)	If during the course of the Contract, the Contractor identifies the need to change schedule management processes or procedures, the Contractor shall: 1. Submit to the State Project Director or designee a request to make changes to the schedule management processes or procedures, including a description of the required changes. 2. Update the Schedule Management Plan with approved schedule management process and procedure changes. 3. Submit the updated Schedule Management Plan to the State Project Director or designee for review and approval in accordance with the deliverable review processes defined within the Document Management Plan.
3.2.1-09 (New)	The State identifies and associates the following artifacts to the Schedule Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • SDMO Work Plan (~~D-3.2-3~~) • Software Release Work Plan (~~D-3.2-4~~) • Master Work Plan (~~D-3.2-7~~) • Schedule Progress Analysis Report (~~D-3.2-8~~) • Master Milestone Schedule Summary (~~D-3.2-2~~) • Schedule Change Request Form (~~D-3.2-9~~) • Master Milestone View Process Guide for Project • Master Milestone View Process Guide for Project Center • Master Work Plan in MS Project Procedure • Master Work Plan in Project Center Procedure • Master Work Plan Schedule Look Ahead Report Procedure • Resource Analysis Procedure • Other Work Plans at the request of the State
3.2.1-10 (New)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and managed in accordance with the Project Artifact process.
3.2.1-11 (New)	The Contractor shall incorporate a new subsection - Schedule Basis of Estimate (BOE) into the Schedule management Plan, addressing requirements 3.2.1-11 - 3.2.1-17 (below), which were previously part of another Deliverable (CD-4.2-2 – CR Basis of Estimate Deliverable).
3.2.1-12 (modified)	The Contractor shall develop, and incorporate as part of the Schedule Management Plan, deliver, and maintain a Schedule Basis of Estimate, which must include a description of the rational for estimating schedule, effort (onshore and offshore breakout), and cost for the activities and tasks defined within the Software Release work plans developed by the Contractor.
3.2.1-13 (modified)	The Contractor shall develop and maintain the Basis of Estimate content in accordance with the State approved version of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide), pertaining to Project Schedule Management. Refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES.
3.2.1-14 (modified)	The Contractor shall incorporate the Schedule Basis of Estimate at the Change Request (CR) level and at the Release level for each change and each release.
3.2.1-15 (modified)	The Contractor shall incorporate the Schedule Basis of Estimate into the Contractor's estimation tool(s).
3.2.1-16 (modified)	The Contractor shall provide the State with access to the Contractor's estimation tool(s), supporting schedule development, data and analytical reports.
3.2.1-17 (modified)	The Contractor shall submit the Schedule Basis of Estimate content, within the Schedule Management Plan, to the State Project Director or designee in accordance with the

Req #	SOW Requirement
	approved Transition Plan, as part of every change request and release, or as requested by the State Project Director or designee.
3.2.1-18 (modified)	The Contractor shall update the Schedule Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location

3.2.2 Schedule Management Execution

Schedule Management uses the approach, processes, and procedures in the Schedule Management Plan to plan, supervise, coordinate, and track the work of project resources in accomplishing the goals, objectives, and milestones of the project. CalHEERS Project Management uses the schedule to monitor the project status at various levels and helps to make management-level decisions regarding the priority, importance, focus, and sequencing of short- and long-term project activities.

Table 3-6: Schedule Management Execution

Req #	SOW Requirement
3.2.2-01 (new)	The Contractor shall staff, manage, lead and execute Schedule Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.2-1 – Schedule Management Plan.

Req #	SOW Requirement
3.2.2-02 (New)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.2.2-03 (existing)	The Contractor shall perform all scheduling responsibilities assigned to the Contractor's Staff in the approved Schedule Management Plan, Roles and Responsibilities section, including but not limited to: 1. Providing scheduling leadership for the CalHEERS Project Office. 2. Developing and maintaining project work plans assigned to the Contractor (Contractor Project work plans). 3. Consolidating and integrating into a weekly Master work plan, all project work plans selected by the State including, but not limited to, Contractor, incumbent Contractor and State work plans. 4. Performing weekly schedule processing from the Master work plan and all project work plans included in the Master work plan.
3.2.2-04 (existing)	The Contractor shall ensure that all scheduling products, processes and activities provided by or performed by the Contractor for CalHEERS are in accordance with the approved Schedule Management Plan.
3.2.2-05 (existing)	The Contractor shall conduct a weekly work plan review meeting with the CalHEERS team. Attendees may include but not be limited to the CalHEERS PMO, Covered California (CovCA), Department of Health Care Services (DHCS), quality assurance (QA), Independent Verification and Validation (IV&V) and Program oversight staff.
3.2.2-06 (existing)	For the life of the Contract, the Contractor shall produce and submit to the State Project Director or designee, updated versions of the Master Milestone Schedule Summary when Master Milestone Schedule milestones are completed or when project work plan baselines are added or changed.
3.2.2-07 (existing)	The Contractor shall provide the Master Work Plan and the most current versions of the project work plans included in the Master Work Plan, to the State Project Director or designee each week as described in the approved Schedule Management Plan, Schedule Maintenance Process. All work plans shall be submitted in a Microsoft Project format and in the same Microsoft Project version used by the State. The Microsoft Project files must include progress to date for all tasks, subtasks and resource assignments.
3.2.2-08 (existing)	The Contractor shall clearly convey Schedule and work plan information to a diverse group of management stakeholders as well as more detailed information to QA, IV&V and oversight consultants.
3.2.2-09 (existing)	The Contractor shall develop and maintain all Contractor project work plans using Microsoft Project® 2010 or later version, that are identified in SOW Section 3.2.1, SCHEDULE MANAGEMENT PLAN, Work Plan Structure, and in accordance with the project work plan timeframes in Create Work Plans.
3.2.2-10 (existing)	The Contractor shall develop the project work plans to be a direct representation of the entire work and product scope defined in this Appendix A-4, STATEMENT OF WORK.
3.2.2-11 (existing)	The Contractor shall develop and maintain project work plans based on the following sections of the approved Schedule Management Plan: 1. Work Plan Structure 2. Work Breakdown Structure Outline Structure 3. Logical Work Plan Structure 4. Define Project Resource Structure and Build Global Resource Pool

Req #	SOW Requirement
3.2.2-12 (modified)	The Contractor shall develop and maintain project work plans at a level of detail in accordance with the approved Schedule Management Plan, Schedule Development Process, that includes, but is not limited to the following: 1. Summary tasks, tasks, and subtasks with clear and meaningful task names 2. Tasks or subtasks for Contractor development of each Contract Deliverable 3. Tasks or subtasks for State review of each Contract Deliverable 4. Tasks or subtasks for Contractor revision of each Contract Deliverable after State review of each Contract Deliverable 5. State review of each Contract Deliverable after Contractor revision of each Contract Deliverable 6. State approval of each Contract Deliverable 7. Predecessor and successor dependencies for tasks without subtasks 8. Predecessor and successor dependencies for subtasks 9. Resource assignments for tasks without subtasks 10. Resource assignments for subtasks 11. Estimated hours and durations for tasks without subtasks 12. Estimated hours and durations for subtasks 13. Key M&O Phase milestones including Transition milestones 14. Key software release milestones 15. Custom task fields and custom resource fields as specified in the approved Schedule Management Plan.
3.2.2-13 (modified)	The Contractor shall develop the project work plans in accordance with the sequence and timeframes specified in the approved Schedule Management Plan, that includes but is not limited to: 1. The Contractor's review of requirements and specifications in the RFP, Contract, and Appendix A-4, STATEMENT OF WORK. 2. The Contractor's development of work plan templates with Work Breakdown Structure (WBS) Outline Structure level 1 summary tasks (subproject), WBS Outline Structure level 2 summary tasks (milestone) and WBS Outline Structure level 3 summary tasks (Deliverable). 3. The Contractor's submission of work plan templates to the State Project Director or designee for review and approval. 4. The Contractor's finalization of all applicable project work plans by adding the following to approved work plan templates: a. WBS Outline Structure level 4 summary tasks (activity) b. WBS Outline Structure level 5 tasks without subtasks (task) c. Optional WBS Outline Structure level 5 summary tasks with subordinate WBS Outline Structure level 6 subtasks (subtask) 5. The Contractor's submission of finalized work plans to the State Project Director or designee for review and approval. 6. The Contractor's baselining of approved project work plans developed by the Contractor.
3.2.2-14 (modified)	The Contractor shall develop the project work plans that include tasks, summary tasks and activities. In addition, the project plans must specify task start and completion dates that are consistent with high level milestones. This content includes but is not limited to, the following project plans: 1. CalHEERS Project Management Plan 2. Document Management Plan 3. Staffing Management Plan 4. Risk and Issue Management Plan 5. Schedule Management Plan 6. CAP (if executed)

Req #	SOW Requirement
	7. Operations Plan 8. Customer Service Plan 9. Program Support Plan 10. Project Maintenance Plan 11. Capacity Management Plan 12. System Security Plan 13. Technology Recovery Plan 14. Change Management Plan 15. Configuration Management Plan 16. Release Management Plan 17. Release Back-Out Plan (if executed) 18. Requirements Management Plan 19. Test and Evaluation Master Plan 20. Installation Verification Test Plan 21. Communication Management Plan 22. Quality Management Plan 23. SDLC Plan 24. Organization and Business Change Management Plan 25. Training Plan 26. Transition-Out Plan 27. Contract Closeout Plan
3.2.2-15 (existing)	The Contractor shall develop and maintain project work plans in accordance with the instructions, best practices, guidelines and standards specified in the following sections of the approved Schedule Management Plan: 1. Define Project Resource Structure and Build Global Resource Pool 2. Create and Integrate Work Plans and Generate Schedule
3.2.2-16 (existing)	The Contractor shall develop project work plans that identify deliverables, activities, and tasks, including expected durations and completion dates, which are expected to be completed by the Contractor, State, and county staff in order to meet the Project Schedule and accomplish the Project milestones.
3.2.2-17 (existing)	The Contractor shall develop project work plans that contain tasks without subtasks and/or subtasks, that have appropriate Contractor, State, county and incumbent Contractor resource assignments and estimated hours. Near term tasks without subtasks (scheduled to start within 120 calendar days) and near-term subtasks (scheduled to start within 120 calendar days) shall have actual resource names assigned. Long term tasks without subtasks (scheduled to start after 120 calendar days) and long-term subtasks (scheduled to start after 120 calendar days) may have assigned generic resource titles i.e., a role, classification or vacant position) rather than actual resource names.
3.2.2-18 (existing)	The Contractor shall ensure that durations of near-term tasks without subtasks and near-term subtasks do not exceed 20 Business Days without prior approval of the State Project Director or designee.
3.2.2-19 (existing)	The Contractor shall ensure that near term tasks without subtasks, and near-term subtasks are resource leveled with a maximum of 50 hours of assigned work per week for Contractor Staff and 35 hours per week maximum for State, county and incumbent Contractor Staff.
3.2.2-20 (existing)	The Contractor shall ensure that tasks without subtasks and subtasks, which are assigned to Contractor's Staff in the Contractor project work plans, shall be started and completed according to the scheduled start and finish dates of those tasks and subtasks.

Req #	SOW Requirement
3.2.2-21 (modified)	All project work plans developed by the Contractor shall be: 1. Maintained and updated by the Contractor during the project work plan timeframes specified in the approved Schedule Management Plan. 2. Maintained and updated in accordance with the approved Schedule Management Plan.
3.2.2-22 (existing)	On Monday and Tuesday of each week, the Contractor shall: 1. Analyze all “estimated hours to complete” items submitted by Contractor Staff in the previous week’s task lists. 2. Update the “remaining work” fields of tasks without subtasks, and subtasks according to the analysis of the “estimated hours to complete” items submitted by Contractor Staff.
3.2.2-23 (existing)	The Contractor shall perform weekly elaboration of near-term tasks without subtasks, and near term subtasks in accordance with the approved Schedule Management Plan and Schedule Elaboration Process.
3.2.2-24 (existing)	The Contractor shall use work packages to identify the scope of tasks, anticipated levels of efforts, and preliminary timelines, which upon approval by the State Project Director or designee will be reflected in the Reports Management sub-project schedule. Work will not begin until each work package is approved and no work can be billed to a change request (CR) without an approved work package. Work Package parameters include, but are not limited to: 1. Overall time, cost and scope defined. 2. Using a flow approach (as detailed work is defined, a work package will be drafted) 3. The inclusion of a schedule, Full-Time Employee (FTE) hours needed and a description of the expected results of the effort (artifact). 4. The burn rate for time and cost will be tracked as work packages are completed. 5. A standing meeting to review / approve work packages.
3.2.2-25 (existing)	The Contractor shall use a standard template to develop work packages. The template shall include the scope of work effort (e.g., easy, moderate, difficult), and priority to facilitate expediting approval processes based on the business priorities.
3.2.2-26 (existing)	The Contractor shall ensure that the work plan is inclusive of the mutual expectations of the State and Contractor for completion of the Project in accordance with requirements described in this Contract.
3.2.2-27 (existing)	The Contractor shall present the updated work plan at a time agreed to by the parties in writing, and the updated work plan will highlight changes made from the prior work plan.
3.2.2-28 (existing)	The Contractor shall allow the State adequate time, in State’s reasonable judgement, for the State to review and comment on the updates, as well as any new or modified Project Deliverables.
3.2.2-29 (existing)	The Contractor shall obtain approval in writing from the State Project Director or designee prior to the final incorporation of any updates or changes to the work plan.
3.2.2-30 (existing)	In addition to the work plan, the Contractor shall provide a separate summary of tasks requiring CalHEERS, Covered California, DHCS or other stakeholder resources. The Contractor must estimate these resources by stakeholder, and provide any assumptions regarding anticipated involvement of these resources.
3.2.2-31 (existing)	The Contractor shall develop the M&O Work Plan which identifies deliverables, activities, and tasks, including expected durations and completion dates, which are expected to be completed by Contractor, State, and county staff in order to accomplish the M&O milestones.
3.2.2-32 (existing)	The Contractor shall ensure that tasks without subtasks and subtasks, which are assigned to the Contractor’s Staff in the Maintenance & Operations Work Plan, shall be started and completed by the Contractor according to the scheduled start and finish dates of those tasks and subtasks.

Req #	SOW Requirement
3.2.2-33 (existing)	The Contractor shall maintain and update the Maintenance & Operations Work Plan for the life of the Contract in accordance with the following sections of the approved Schedule Management Plan: 1. Schedule Maintenance Process 2. Schedule Elaboration Process
3.2.2-34 (existing)	The Contractor shall submit the updated Maintenance & Operations Work Plan to the State Project Director or designee on Wednesday of each week, at or before 12:00 p.m., Pacific time (PT) for the life of the Contract.
3.2.2-35 (existing)	The Contractor shall develop a Software Release Work Plan, based on the Release Management Plan, for each software release approved by the State. The Software Release Work Plan shall be managed as described in the approved Schedule Management Plan. The Software Release Work Plan shall include, but not be limited to: 1. Software maintenance design, development, testing, installation, implementation and back out activities and tasks. 2. Change request planning (Discovery/Pre-JAD), impact assessment, design, development, testing activities, and tasks pertaining to each change request prioritized for the software release.
3.2.2-36 (existing)	The Contractor shall develop Software Release Work Plans that identify deliverables, activities, and tasks, including expected durations and completion dates, which are expected to be completed by the Contractor, State, and county staff in order to accomplish the software release milestones.
3.2.2-37 (existing)	The Contractor shall develop Software Release Work Plans that include tasks without subtasks and/or subtasks, which are assigned to the Contractor's Staff, which must be started and completed by the Contractor's Staff according to the scheduled start and finish dates of those tasks and subtasks.
3.2.2-38 (existing)	The Contractor shall maintain and update each Software Release Work Plan through completion of implementation of the software release in accordance with the following sections of the approved Schedule Management Plan: 1. Schedule Maintenance Process 2. Schedule Elaboration Process
3.2.2-39 (existing)	The Contractor shall submit each updated Software Release Work Plan to the State Project Director or designee on Wednesday of each week, at or before 12:00 p.m., PT, until implementation of the software release is completed.
3.2.2-40 (modified)	The Contractor shall develop a Contract Closeout Work Plan as described in the approved Schedule Management Plan. The Contract Closeout Work Plan must include, but not be limited to: 1. All activities and tasks for successful transition of the State and counties to a new service provider. 2. All other Closeout activities and tasks described within the Contract Closeout Plan.
3.2.2-41 (existing)	The Contractor shall develop the Contract Closeout Work Plan, which identifies deliverables, activities, and tasks, including expected durations and completion dates, which are expected to be completed by the Contractor, State, and county staff in order to accomplish the Closeout milestones.
3.2.2-42 (existing)	The Contractor shall develop a Contract Closeout Work Plan that includes tasks without subtasks and/or subtasks, which are assigned to the Contractor's Staff, and started and completed according to the scheduled start and finish dates of those tasks and subtasks.
3.2.2-43 (existing)	The Contractor shall maintain and update the Contract Closeout Work Plan through the end of the Contract in accordance with the following sections of the approved Schedule Management Plan: 1. Schedule Maintenance Process 2. Schedule Elaboration Process

Req #	SOW Requirement
3.2.2-44 (existing)	The Contractor shall submit the updated Contract Closeout Work Plan to the State Project Director or designee, in accordance with initial submission timeframe specified in the Schedule Management Plan, and on Wednesday of each week thereafter, at or before 12:00 p.m. PT, until the end of the Contract.

3.2.3 Baselining Contractor Project Work Plans

Maintaining schedule baselines is an essential part of good schedule management. The specific requirements related to schedule baseline maintenance are described below.

Table 3-7: Baselining Contractor Project Work Plans

Req #	SOW Requirement
3.2.3-01 (existing)	The Contractor shall submit each completed project work plan to the State Project Director or designee for approval. Upon approval, the Contractor shall baseline the project work plan in accordance with the approved Schedule Management Plan.
3.2.3-02 (modified)	The Contractor shall not add to, change or reset the baseline of any Contractor project work plan without prior approval from the State Project Director or designee. Contractor additions or changes to existing baselines in the Contractor's project work plans must be performed in accordance with the approved Schedule Management Plan. Contractor resetting of existing baselines in the Contractor project work plans must be performed in accordance with the approved Schedule Management Plan.
3.2.3-03 (existing)	The Contractor shall develop and maintain a baseline log for the life of the Contract in accordance with the approved Schedule Management Plan.
3.2.3-04 (existing)	In accordance with the approved Schedule Management Plan, the Contractor shall record in the baseline log an entry for: 1. The initial baselining of each project work plan, including key milestones, developed by the Contractor 2. Each subsequent addition, change or resetting of key milestone baselines within any project work plan developed by the Contractor.
3.2.3-05 (existing)	The Contractor shall consolidate and integrate into a weekly Master work plan Schedule all project work plans selected by the State, including, but not limited to, Contractor, incumbent Contractor, and State work plans, in accordance with the approved Schedule Management Plan, Integrate Work Plan, and Generate Schedule.
3.2.3-06 (modified)	The Contractor shall perform weekly processing of the Master work plan Schedule during the SDMO Phase of the Contract including Transition, in accordance with the approved Schedule Management Plan. Weekly processing of the Master work plan Schedule by the Contractor shall be used to plan, manage and report on CalHEERS subprojects, milestones, deliverables, activities, and tasks.

Req #	SOW Requirement
3.2.3-07 (existing)	Weekly processing of the Master work plan Schedule by the Contractor shall provide organizations and persons selected by the State, including, but not limited to, Contractor, incumbent Contractor, State and county staffs and stakeholders, with visibility of, but not limited to, the following: 1. Schedule and status of all key SDMO Phase milestones including Transition milestones 2. Schedule and status of all key software release milestones 3. Schedule and status of all Contract deliverables 4. Schedule and status of all key process areas, including but not limited to: a. Requirements Gathering b. System Requirements Validation c. Design d. Coding and Documentation e. System Test f. System Performance Test g. Training h. Process Assurance i. Quality Assurance j. Release Management k. Change Management l. Software Maintenance Updates m. Configuration Management n. Verification and Validation o. Contract Closeout p. Project critical path activities, tasks and subtasks q. External dependencies between tasks and subtasks in project work plans r. Estimated, actual and remaining hours and durations for subprojects, milestones, deliverables, activities, tasks, and subtasks s. Percentage complete for subprojects, milestones, deliverables, activities, tasks, and subtasks t. Gantt Charts showing planned and actual start and finish dates for milestones and deliverables, and percentages complete
3.2.3-08 (existing)	The Contractor shall use all project work plans included in the Master work plan Schedule for tracking and control of CalHEERS activities, tasks and subtasks for the life of the Contract, including but not limited to: 1. The Transition work plan for tracking and control during Transition. 2. The SDMO work plan for tracking and control of non-release specific activities, tasks and subtasks during Maintenance & Operations. 3. The Software Release work plans for tracking and control of release and change request specific activities, tasks and subtasks during planning, development, testing and implementation of software releases. 4. The Transition Out work plan for tracking and control during Closeout.
3.2.3-09 (existing)	The Contractor shall submit the updated Master work plan and all project work plans included in the Master work plan, to the State Project Director or designee each week on a day and time of the State Project Director's, or designee's choosing, for the life of the Contract.
3.2.3-10 (existing)	The Contractor shall develop the Master Milestone Schedule Summary View, within the Master Work Plan, after all project work plans included in the Master Work Plan have been baselined for review by the State Project Director or Designee.
3.2.3-11 (existing)	The Contractor shall provide the Schedule Processing Infrastructure on which all CalHEERS project schedule management activities described in this Statement of Work or in the approved Schedule Management Plan, will be performed for the life of the Contract.

Req #	SOW Requirement
3.2.3-12 (existing)	The Contractor shall provide Schedule Processing Infrastructure that includes, but is not limited to: 1. Hardware 2. Hardware Maintenance 3. Software 4. Software Licensing 5. Software Maintenance 6. Software Programming and Configuration 7. Communications Equipment 8. Communications Services 9. Report Setup
3.2.3-13 (existing)	The Contractor shall be responsible for acquiring, licensing, installing, programming, configuring, operating, and maintaining the Schedule Processing Infrastructure for the life of the Contract.
3.2.3-14 (existing)	The Contractor shall be responsible for all costs associated with the acquisition, licensing, installation, programming, configuration, operations, and maintenance of the Schedule Processing Infrastructure for the life of the Contract.
3.2.3-15 (modified)	The Contractor shall use the Schedule Processing Infrastructure to perform: 1. Weekly automated schedule updates (task list processing) for organizations and persons selected by the State, including, but not limited to, Contractor, incumbent Contractor, State and county staffs, in accordance with the approved Schedule Management Plan. 2. Weekly progress analysis processing, reporting, and automated updating of project work plans selected by the State, including, but not limited to, Contractor, incumbent Contractor and State work plans, based on weekly automated schedule updates (task list updates) collected and processed in accordance with the approved Schedule Management Plan. 3. Weekly production and distribution of schedule reports for organizations and persons selected by the State, including, but not limited to, Contractor, incumbent Contractor, State and county staffs and stakeholders, in accordance with the approved Schedule Management Plan. At the request of the State, ad hoc schedule reports may be requested by the State Project Director or designee.
3.2.3-16 (existing)	The Contractor shall ensure and support the use of the Schedule Processing Infrastructure by the State, to perform the following schedule processing activities: 1. Receive and view the current, updated and final versions of the Master Work Plan each week 2. Receive and view the current, updated and final versions of all project work plans included in the Master Work Plan each week
3.2.3-17 (modified)	The Contractor shall ensure and support the use of the Schedule Processing Infrastructure by the State and persons selected by the State, including, but not limited to, Contractor, State, county and Incumbent Contractor Staff and stakeholders, to perform the following schedule processing activities: 1. Submit the current, updated and final versions of project work plans for inclusion in the Master Work Plan each week 2. Receive, view, update and submit weekly individual resource task lists via the automated solution. 3. Receive and view progress analysis reports, draft schedule reports and final schedule reports

Req #	SOW Requirement
3.2.3-18 (modified)	The Contractor shall perform for the term of the Contract, all weekly processing of the Master work plan required to perform automated schedule updates (task list processing) for organizations and persons selected by the State, including, but not limited to, Contractor, State, county and incumbent Contractor Staff in accordance with the following sections of the approved Schedule Management Plan
3.2.3-19 (existing)	The Contractor shall provide weekly processing of the Master work plan for task list processing that includes, but is not limited to: 1. Production, distribution and collection of individual weekly State and county resource task lists that are based on: a. Percentage of work completed for individual resource assignments b. Actual start date for individual resource assignments c. Actual finish date for individual resource assignments 2. Production, distribution and collection of individual weekly resource task lists for organizations and persons selected by the State, including, but not limited to, incumbent Contractor resources, that are based on: a. Either percentage of work completed for individual resource assignments or actual hours worked, actual overtime hours worked and estimated hours to complete for individual resource assignments (as selected by the State Project Director or designee) b. Actual start date for individual resource assignments c. Actual finish date for individual resource assignments 3. Production, distribution and collection of individual weekly Contractor resource task lists that are based on: a. Actual hours worked, actual overtime hours worked and estimated hours to complete for individual resource assignments b. Actual start date for individual resources assignments c. Actual finish date for individual resource assignments
3.2.3-20 (existing)	The Contractor shall perform, for the term of the Contract, automated updating of each project work plan selected by the State. This shall include, but not limited to: 1. Contractor and State project work plans based on weekly task list updates collected and processed in accordance with the approved Schedule Management Plan 2. Collect status of work plan assignments from resources 3. Progress Updates to Project work plans.

Req #	SOW Requirement
3.2.3-21 (existing)	The Contractor shall provide Progress Updates that include, but not be limited to: - Automatic updates to State resource assignments as reported on their task lists: - Percentage of work completed - Actual start date - Actual finish date - Automatic updates to resource assignments of organizations and persons selected by the State, including, but not limited to, incumbent Contractor resources, as reported on their task lists: - Either percentage of work completed for individual resource assignments or actual hours worked, and actual overtime hours worked for individual resource assignments (as selected by the State Project Director or designee) - Actual start date - Actual finish date - Automatic updates to Contractor resource assignments as reported on their task lists: - Actual hours worked - Actual overtime hours worked - Actual start date - Actual finish date
3.2.3-22 (modified)	The Contractor shall perform, during the Transition Phase, automated updating of the incumbent Contractor project work plan based on Incumbent Contractor Staff updates to identified in their automated schedule updates (task lists)
3.2.3-23 (existing)	The Contractor shall complete this effort in accordance with the approved Schedule Management Plan, Collect Status of work plan Assignments from Resources, and Progress Updates to Project work plans, and the work plans must include, but not be limited to: - Automatic updates to incumbent Contractor resource assignments as reported on their task lists: - Percentage of work completed - Actual start date - Actual finish date (If the State Project Director or designee approved the incumbent Contractor's Staff to be tracked by percentage of work completed) - Automatic updates to incumbent Contractor resource assignments as reported on their task lists: - Actual hours worked - Actual overtime hours worked - Actual start date - Actual finish date (If the State Project Director or designee approved the incumbent Contractor's Staff to be tracked by actual hours worked)
3.2.3-24 (existing)	During the term of the Contract, the Contractor may propose to the State Project Director or designee an alternative approach for automatically updating non-Contractor project work plans with weekly non-Contractor resource task list updates.

Req #	SOW Requirement
3.2.3-25 (existing)	If the alternative approach to automatically updating non-Contractor Project Work Plans is approved by the State Project Director or designee before the Transition Phase ends, the Contractor shall provide to the State, the organizations selected by the State, and to the incumbent Contractor, all that is required to automatically update State project work plans, project work plans of organizations selected by the State and incumbent Contractor project work plans with weekly resource task list updates, including, but not limited to: 1. Hardware 2. Software 3. Programs 4. Support 5. Weekly work plan update transactions
3.2.3-26 (modified)	If approved by the State Project Director or designee, the Contractor's alternative approach for automatically updating non-Contractor project work plans shall provide the State with the ability to automatically update State project work plans based on State and county staff updates to task lists. This effort shall be in accordance with the approved Schedule Management Plan, including but not limited to: 1. Automatic updates to State and county resource assignments that were reported on their task lists: a. Percentages of work completed b. Actual start date c. Actual finish date
3.2.3-27 (modified)	If approved by the State Project Director or designee, the Contractor's alternative approach for automatically updating non-Contractor project work plans shall provide the incumbent Contractor and organizations selected by the State, with the ability to automatically update the Incumbent Contractor project work plan and project work plans of organizations selected by the State, with updates based on Staff updates to task lists. This effort shall be in accordance with the approved Schedule Management Plan, including but not limited to: Automatic updates to incumbent Contractor resource assignments and resource assignments of State selected organizations based on progress information reported on task lists: 1. Percentage of work completed 2. Actual start date 3. Actual finish date (If the State Project Director or designee approved the incumbent Contractor's Staff to be tracked by percentage of work completed.) Automatic updates to incumbent Contractor resource assignments and resource assignments of State selected organizations based on progress information reported on task lists: 1. Actual hours worked 2. Overtime hours worked 3. Actual start date 4. Actual finish date (If the State Project Director or designee approved the incumbent Contractor's Staff to be tracked by actual hours worked).

Req #	SOW Requirement
3.2.3-28 (modified)	The Contractor shall perform for the term of the Contract, weekly progress analysis processing and reporting from the Master work plan, in accordance with the approved Schedule Management Plan, including but not limited to: 1. Production and distribution of a weekly progress analysis report for each project work plan selected by the State, including, but not limited to, Contractor, incumbent Contractor and State work plans, containing: a. A row for each task without subtasks, and subtask that was scheduled for work during the previous week, scheduled for work before the previous week but not previously reported as complete, or that was updated on an individual resource task list, and b. A row for each resource assigned to the task without subtasks, and subtask if the assignment wasn't previously marked as complete in the project work plan. 2. The following information shall be included in each task/subtask row of the progress analysis report: a. Task/Subtask ID (from task list) b. Task/Subtask ID (current version of the project work plan) c. Task/Subtask Name (current version of the project work plan) d. Baseline Start Date (current version of the project work plan) e. Baseline Finish Date (current version of the project work plan) f. Total Slack (current version of the project work plan) g. Critical status (current version of the project work plan) 3. The following information shall be included in each resource assignment row of the progress analysis report: a. Resource Name (current version of the project work plan) b. Percentage of Work Completed (current version of the project work plan, unless Percentage of Work Completed was updated by the resource in a task list, in which case, Percentage of Work Completed from the task list) c. Start Date (current version of the project work plan, unless Start Date was updated by the resource in a task list, in which case, Start Date from the task list) d. Finish Date (current version of the project work plan, unless Finish Date was updated by the resource in a task list, in which case, Finish Date from the task list) e. Actual Hours Worked (from task list, if available) f. Actual Overtime Hours Worked (from task list, if available) g. Estimated Hours to Complete (from task list, if available) 4. Production of a weekly task list submissions log report, in accordance with the approved Schedule Management Plan, containing the name of each resource who received an individual task list and whether or not the task list was returned for processing. 5. Distribution of the weekly task list submissions log report to organizations and persons selected by the State, including, but not limited to, the State Project Director or designee, State Assistant Project Manager, State Project Scheduler, Contractor Project Manager, and Contractor Project Scheduler, in accordance with the approved Schedule Management Plan.
3.2.3-29 (existing)	The Contractor shall produce weekly schedule reports from the Master work plan and shall distribute the schedule reports to organizations and persons selected by the State, including, but not limited to, Contractor, State, county and incumbent Contractor Managers, staff and stakeholders in accordance with the following sections of the approved Schedule Management Plan: 1. Apply status updates to work plan Assignments 2. Producing Draft Schedule Reports 3. Producing Final Schedule Reports

Req #	SOW Requirement
3.2.3-30 (modified)	The Contractor shall participate in and perform schedule change control as described in the approved Schedule Management Plan, to include, but not limited to: 1. Schedule Change Request Initiation and Tracking 2. Change Control Board Meetings 3. Schedule Change Request Impact Analysis 4. Schedule Change Implementation and Verification
3.2.3-31 (existing)	The Contractor shall perform all SCCP responsibilities assigned to the Contractor's Staff in the approved Schedule Management Plan, SCCP roles and responsibilities, including but not limited to: 1. Serving as a member of the Change Control Board 2. Clarifying schedule change requests originating from Contractor Staff 3. Performing impact analyses of change requests 4. Performing what if scenarios 5. Participating in the decision-making process of schedule change request approval or denial 6. Sponsoring approved changes in the Contractor's organization 7. Building necessary support among Contractor organization leadership 8. Making approved changes to Contractor project work plans

3.3 COST/COST ESTIMATING MANAGEMENT

This section identifies the requirements for SI collaboration with the State to manage and oversee the costs covered for SI work performed by the SI under this contract. The SI will be working with the State to implement cost management in accordance with the updated cost management processes as defined in the following sections.

3.3.1 Cost Management Plan

The Cost Management Plan is the collection of governance, guidance, and processes that the State and SI will utilize to manage, oversee, and track the costs for work performed by the SI under this contract. There is an existing Cost Management Plan that will be improved upon in collaboration with the State.

One of the improvements the State is looking for will be the migration of Contract identified costs into a Cost Tracking Tool, and improving cost management over the term of the Contract.

The Contractor will also work with the State to accomplish all work within budgetary constraints and properly account for the funds expended. The State expects the Contractor to provide the cost reporting to the State, actively participate in the State and Federal budget processes and provide accurate cost estimates as input to budget approval documents.

The State is requiring a high degree of transparency in cost tracking and accountability, as the cost methods have changed in this contract. This section describes the expectations for the Contractor in managing, updating, tracking, and reporting on costs.

Note: Change Request (CR) Cost Estimation and Cost Basis of Estimate (BOE) is addressed in SOW Section 4, SYSTEM CHANGE & ENHANCEMENTS Requirements, 4.2.3, SYSTEM CHANGE COST ESTIMATING & CR BASIS OF ESTIMATE (BOE).

Table 3-8: Cost Management Plan (CD-3.3-1)

Req #	SOW Requirement
3.3.1-01 (modified)	The Contractor shall adopt, update, deliver, and maintain a Cost Management Plan, which includes but is not limited to:

Req #	SOW Requirement
	1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. GLOSSARY AND ACRONYMS 911.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
3.3.1-02 (new)	Upon initial approval, the Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
3.3.1-03 (new)	The Contractor shall incorporate into the Cost Management Plan and processes the following terms and definitions related to costs and cost categories: D-2 SDMO Hardware Costs – This cost category shall represent the physical hardware purchased, managed, and maintained by the SI to support CalHEERS. These costs shall be managed by a “Fixed Budget” and the SI invoices the State based on True Cost (which fall under the “Fixed Budget”). True Cost (as defined in the Appendix C - Glossary) shall not include mark-ups, kickbacks, nor labor costs under this cost category. Labor needed by the SI to support this category shall be included by the Contractor under D-5 SDMO Fixed Price and SOW Section 6.14 <u>SYSTEM HARDWARE/SOFTWARE</u>~~System Hardware/Software~~. D-3 SDMO Software Costs – This cost category shall represent the software that is purchased (or acquired free), managed, and maintained by the SI to support the CalHEERS. These costs shall be managed by a “Fixed Budget” (as defined in Appendix C – Glossary) and the SI shall invoice the State only for True Cost (that fall under the “Fixed Budget”). True Cost (as defined in the Appendix C - Glossary) shall not include mark-ups, kickbacks, nor labor costs under this cost category. Labor needed by the Contractor to support this category shall be included under D-5 SDMO Fixed Price and SOW Section 6.14 <u>SYSTEM HARDWARE/SOFTWARE</u>~~System Hardware/Software~~. D-4 Cloud Hosting Data Center Services – This cost category shall represent the costs related to purchased cloud hosting services that the Contractor procures to support and maintain the Cloud Hosting Data Center Services needs of the CalHEERS. These costs shall be managed under and must adhere to a “Fixed Budget” amount defined within the bidder’s proposal. Proposed hosting services costs must be presented and invoiced to the State as True Cost. There are some exceptions to the use of True Cost for the one-time infrastructure costs related to a migration as approved in advance by the State via the CR process). True Cost (as defined in the Appendix C - Glossary) must not include mark-ups, kickbacks, nor labor costs under this cost category. Labor needed by the Contractor to support this category shall be included under D-5 SDMO Fixed Price and SOW Section 6.17 <u>HOSTING SERVICES</u>~~Hosting Services~~. D-5 SDMO Fixed Price – This cost category shall represent the “fixed price” effort the SI will employ for services specifically outlined in SOW Sections 1-8, as defined in D-5 SDMO Fixed Price Costs. SOW section exemptions are clearly called out in the Cost Workbook. D-6 Transaction-Based Services – This cost category shall represent the costs to support the unique transaction-based activity/services costed via per unit (e.g., box, notice, page, ~~stamp~~, piece of mail, or human hour) on CalHEERS. D-7 System Changes & Enhancements – This cost category shall exclusively represent system changes and enhancements the Contractor will support for CalHEERS using both onshore and offshore staffing resources. The staffing positions and rates are pre-negotiated as part of the contract. Scope and cost shall be determined via the Change Management processes and paid for using fixed rate pricing per labor hour defined in Change Requests (CRs). D-8 Transition-In / Transition-Out – This cost category shall exclusively represent costs for the SI to both Transition-In to the new contract upon contract start, and to Transition-Out at the end of the contract. These are unique costs and shall be established at a “Fixed Price”.

Req #	SOW Requirement
3.3.1-04 (new)	The Contractor shall update the Cost Management Plan (including the addition of Appendix 4: COST TRACKING TOOL REQUIREMENTS) to replace functions of the existing Excel spreadsheet(s) to now include the use of a Commercial Off the Shelf (COTS) tool called Anaplan (or mutually agreed upon alternative product). See also Section 3.3, COST/SCOST ESTIMATING MANAGEMENT.
3.3.1-05 (new)	The Contractor shall update the Cost Management Plan to describe how it shall replace the existing tools with the new tool to satisfy the needs of Cost Management at the CalHEERS.
3.3.1-06 (new)	The Contractor shall, in collaboration with the State, develop a Deliverable Expectation Document (DED) prior to the update of the Cost Management Plan, restructuring the content of the Plan as needed to satisfy the new requirements included herein.
3.3.1-07 (new)	The Contractor shall associate the following artifacts as a subset of the Cost Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable, including, but not limited to: • Contractor Cost Reports • Cost Summary CalHEERS CR XXXXXX • CalHEERS Cost Summary Template User Guide – CONFIDENTIAL • CR True-up Education Session
3.3.1-08 (new)	The Contractor shall update the Cost Management Plan, in coordination with the State, to replace the Rough Order of Magnitude (ROM) estimation methodology with a Total Cost of Ownership (TCO) estimation methodology.
3.3.1-09 (new)	The Contractor shall update the Cost Management Plan in collaboration with the State to expand the processes for ensuring proper tracking of changes in baseline costs due to the CRs being processed.
3.3.1-10 (new)	The Contractor shall update the Cost Management Plan in collaboration with the State to identify the different Cost Methodologies approved by the State for use on the Contract.
3.3.1-11 (new)	The Contractor shall update the Cost Management Plan to identify how the Cost Tracking Tool will integrate into the cost management process on the project.
3.3.1-12 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

Req #	SOW Requirement
3.3.1-13 (modified)	The Contractor shall attach to the Cost Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.3.2 Cost Tracking Tool

The State will be utilizing a new cost tracking tool to enhance greater cost transparency for the State and to provide better reporting and tracking features that enhance the cost management of the SI contract throughout the life of the contract.

The Contractor will ~~be working collaboratively with the~~ provide the State with access to the, ~~not only to transition and optimize the use of the Contractor's~~ cost tracking tool, and the user guide ~~but also to assist various user groups the State in the creation of a User's Guide to assist various user groups~~ as defined in the requirements that follow.

Table 3-9: Cost Tracking Tool / User Guide (CD-3.3-2)

Req #	SOW Requirement
3.3.2-01 (new)	The Contractor shall ~~migrate, transition during transition, Contractor Cost Management activities from the State from the existing tool (State-developed MS Excel spreadsheets) for managing contract Contract costs~~ to a commercial off the shelf tool called Anaplan (or mutually agreed upon alternative product). ~~The new cost tracking tool shall be used to manage all the costs associated with the work performed by the Contractor SI under this contractContract.~~ <u>Note: Although the State has many contracts where the Anaplan tool will be used, the Contractor shall only be responsible for providing services specific to this SI cContract.</u>
3.3.2-02 (new)	The Contractor shall implement and configure the Cost Tracking Tool to comply with, and fully supports, the State approved Contractor Cost Management Plan.
3.3.2-03 (new)	The Contractor shall utilize the Cost Tracking Tool, Anaplan (or mutually agreed upon alternative product), for tracking all costs on the CalHEERS project in accordance with the Cost Management Plan.
3.3.2-04 (new)	The Contractor shall create a user's guide for how the Cost Tracking Tool, Anaplan (or mutually agreed upon alternative product), will be used and integrated into the CalHEERS processes to support the needs outlined in the Cost Management Plan. The Users Guide will (at a minimum) address two types of users: • End Users (those relying on the data to make decisions), and • Administrative Users (~~who are responsible to know how~~ to configure, upgrade, modify, and customize the tool per the needs of End Users).
3.3.2-05 (~~existing~~ modified)	The Cost Tracking Tool shall provide categories, and traceability between cost components and association with the executed ~~SI cContract~~ , <u>including -(but not limited to</u> RFP Appendix D, COST WORKBOOK, <u>)and any new costs included in the Contract:</u> • D-2 <u>SDMO</u> HW costs • D-3 <u>SDMO</u> SW costs • D-4 Cloud Hosting Data Center Services and Service Center Cloud Hosting Data Center Costs • D-5 <u>SDMO</u> Fixed Price Costs • D-6 ~~Transaction Based~~<u>Transaction-Based</u> Costs • D-7 System Change Costs • D-8 Transition Costs
3.3.2-06 (new)	The Cost Tracking Tool shall be capable to incorporate the input from the CalHEERS Enterprise Workload Management (EWM) tool in situations where costs are tracked and/or adjusted due to the Change Request (CR) process.
3.3.2-07 (new)	The Cost Tracking Tool shall allow users to enter, review and approve costs, and attribute them to the different cost categories (defined in the ~~contractContract~~ or by the State), permitting the State to manage the cost baseline and re-baseline needs of the CalHEERS.
3.3.2-08 (new)	The Cost Tracking Tool shall provide permission specific views to facilitate processes, financial reviews, and reporting.
3.3.2-09 (new)	The Cost Tracking Tool shall include functionality to track the Contract baseline costs, actual expenditures, updates to the baseline, and forecasting to help the State track and manage project costs and the Contractor to stay within the defined fixed budget.
3.3.2-10 (new)	The Cost Tracking Tool shall provide for the ability to manage each item at the lowest level possible, e.g., ~~hardwareHardware~~ component, ~~softwareSoftware~~ license, or service level.
3.3.2-11 (new)	The Cost Tracking Tool shall provide the ability to manage the Contract baseline costs and provide "version history" functionality down to the line-item level.

Req #	SOW Requirement
3.3.2-12 (new)	The Cost Tracking Tool shall provide the <u>Contractor with the</u> ability to ~~approve, reject,~~ and update Contract baseline costs, <u>as well as and</u> provide ad hoc budget forecasting based on baseline updates, <u>as directed by the State.</u>
3.3.2-13 (new)	The Cost Tracking Tool shall provide the ability to establish the baseline, update, maintain, and re-baseline, track Change Request estimates and actuals, and forecast updates to the baseline.
3.3.2-14 (new)	The Cost Tracking Tool shall provide the ability to inactivate items at the item level or in bulk as needed by the State, thus updating the baseline to stay within budget, or support efficiency in maintaining the State's fixed budget.
<u>3.3.2-15 (new)</u>	<u>The Cost Tracking Tool shall interface with the State's Financial Management Tool, at the level of detail defined by the State.</u>
<u>3.3.2-16 (new)</u>	<u>The Cost Tracking Tool shall provide the ability to assign and track fiscal owners and account codes as directed by the State.</u>

3.3.3 Cost Management Execution

Table 3-10: Cost Management Execution

Req #	SOW Requirement
3.3.3-01 (new)	The Contractor shall staff, manage, lead and execute Cost Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.3-1 – Cost Management Plan.
3.3.3-02 (existing)	The Contractor shall use the Cost Tracking Tool used to purchase, manage (including any re-baseline efforts) and track all costs related to work under this contract in accordance with the State approved Cost Management Plan.
3.3.3-03 (existing)	The Contractor shall utilize the Cost Tracking Tool to manage all ~~hardware~~ <u>Hardware</u> included within the cost work ~~booksheets~~ defined in Appendix D-2, SDMO HARDWARE COSTS.
3.3.3-04 (existing)	The Contractor shall utilize the Cost Tracking Tool to manage all ~~software~~ <u>Software</u> included within the cost ~~worksheets~~ <u>workbook</u> defined in Appendix D-3, SDMO SOFTWARE COSTS.
3.3.3-05 (new)	The Contractor shall utilize the Cost Tracking Tool to manage all SDMO Cloud Hosting costs within the cost work ~~booksheets~~ defined in Appendix D-4, CLOUD HOSTING <u>DATA CENTER SERVICES AND D-4.1, SERVICE CENTER CLOUD HOSTING DATA CENTER</u> COSTS.
3.3.3-06 (modified)	The Contractor shall utilize the Cost Tracking Tool to manage all the FIXED PRICE COST activities, as defined in the Appendix D-5, SDMO FIXED PRICE ONSHORE COSTS associated worksheets, unless otherwise approved by the State.
3.3.3-07 (modified)	The Contractor shall utilize Cost Tracking Tool to manage all Transaction Based Costs, as defined in Appendix D-6, TRANSACTION-BASED COSTS.
3.3.3-08 (modified)	The Contractor shall utilize the Cost Tracking Tool to manage System Changes Costs, as defined in Appendix D-7, ONSHORE SYSTEM CHANGES COSTS.
3.3.3-09 (modified)	The Contractor shall utilize the Cost Tracking Tool to manage the Transition Costs, as defined in Appendix D-8, TRANSITION-IN COSTS worksheets.

Req #	SOW Requirement
3.3.3-10 (existing)	The Contractor shall utilize the Cost Tracking Tool to monitor and control project expenditures to keep the Project within the planned Contract budget by State fiscal year. The Contractor shall conduct the following activities: 1. Identify the cost of all work within the scope of the Contract from Contract start through Contract completion including the State fiscal year in which work will be performed. 2. Integrate cost objectives into a cost plan against which accomplishments may be measured. 3. Objectively assess cost of work after it is accomplished. 4. Analyze variances in costs from the plan and forecast potential impacts. 5. Provide actual and projected cost data for management decision-making and implementation of management actions.
3.3.3-11 (~~existing~~ <u>modified</u>)	The Contractor shall assist the State in the development and creation of reports and dashboards to track and report actual costs compared to planned costs, and reasons for variances on a monthly <u>or as-needed</u> basis. This tracking and reporting must be performed at the budget line item and sub-line-item levels, as well as for each Change Request.
3.3.3-12 (existing)	The Contractor shall identify actual or planned variances that may require line-item adjustments.
3.3.3-13 (new)	The Contractor shall, at the State's request, provide the State with itemized reporting on any/all costs that support the budget, including budget expenses to date.
3.3.3-14 (modified)	The Contractor shall track procurement activities against the proposed bill of materials via the Cost Tracking Tool.
3.3.3-15 (existing)	The Contractor shall distinguish the cost between work done onshore versus offshore for all reported actual costs.
3.3.3-16 (existing)	The Contractor shall prepare and deliver various cost reports depending on the needs of the State. These reports will be expected as a means to show progress and status of costs related to the elements called out in the Appendix D, COST WORKBOOK. The reports shall be generated from the Cost Tracking Tool.
3.3.3-17 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.3.3-18 (new)	Specific to Transaction Based Costs invoices, involving "human hour" units, the Contractor shall provide reporting that includes "human hour" costs, dates the work was performed, a description of the work, and the resource that did the work. The reports shall be generated from the Cost Tracking tool.
<u>3.3.3.-19</u> (<u>new</u>)	<u>The Contractor shall work collaboratively with the State to define and implement a system for tracking cost related decision items that require a level of privacy and security.</u>
<u>3.3.3.-20</u> (<u>new</u>)	<u>The Contractor's financial team shall input cost data, at the level of detail defined by the State, into the State's Financial Management Tool.</u>
<u>3.3.3.-21</u> (<u>new</u>)	<u>The Contractor shall work collaboratively with the State to identify, define, and track any new costs included in the Contract.</u>

3.3.4 Support for Budget Planning

The State is looking for the Contractor to support the State in the preparation of budget documentation such as the of Advanced Planning Documents (~~-APD and~~ APD) budget documentation.

Table 3-11: Support for Budget Planning

Req #	SOW Requirement
3.3.4-01 (modified)	The Contractor shall support the State in planning for and preparation of the APD/ ~~APD/~~ OAPDU documents that are prepared on an annual or as-needed basis, ensuring the State has the most accurate cost estimation data for future activities (e.g., Technology Refresh).
3.3.4-02 (~~existing~~ ~~m~~ ~~odified~~)	The Contractor shall assist the State in the planning for and preparation of <u>Advanced Planning Documents</u> (~~APDs documents~~) and in any other documentation and justification required for the State and Federal budget processes. Projected costs by line item and sub-line item must be provided for the upcoming and future State fiscal years, along with justification associated with any actual and planned changes.

3.3.5 Cost Changes and Adjustment to the Cost Baseline (Re-Baseline)

Cost cChanges are a natural part of the CalHEERS culture, with a combination of enhancements and the evolving nature of technology ~~changes that make this a reality~~. The CalHEERS will work with the SI to respond to changes that result in Contractual cost adjustments and then update to the Cost Baseline (also referred to as a cost re-baseline).

This section identifies the requirements that address how cost changes and adjustments to the cost baseline will be done.

Table 3-12: Cost Changes and Adjustments to the Cost Baseline

Req #	SOW Requirement
3.3.5-01 (new)	The Contractor shall work in collaboration with the CalHEERS Change Request (CR) process and individual CRs tracked in the EWM tool to determine if there will be a need for a cost adjustment to the cost baseline.
3.3.5-02 (new)	The Contractor shall work in accordance with the Cost Management Plan guidance and CR process to determine what cost categories, what CRs, and what timing will need to be adjusted for a cost adjustment for a new cost baseline.

3.4 HUMAN RESOURCE MANAGEMENT

The Contractor must employ an approach for the management of Contractor Staff that facilitates a productive working relationship and progress towards task completion. The Contractor will be responsible for ensuring that all staff, including State staff, clearly understand their roles and responsibilities and how their specific teams and assignments relate to the overall Project work plan.

3.4.1 Staffing Matrix

The Staffing Matrix must speak to the Contractor's flexibility across functional areas, be developed in accordance with the project schedule, detail staffing, include Staff allocation tracking and reporting, and interactions with State staff, including State and county subject matter experts.

Table 3-13: Staffing Matrix (CD-3.4-1)

Req #	SOW Requirement
3.4.1-01 (modified)	The Staffing Matrix shall also include the Contractor's Staff resources necessary to meet the needs of the project as follows: 1. Total number of full-time equivalent Staff, along with their position titles 2. Position descriptions 3. First and last names 4. Expected roles 5. Responsibilities 6. Location (city, state, country), 7. Planned start dates and end dates for each position. 8. Responsibility Assignment Matrix (RAM)
3.4.1-02 (modified)	The Contractor shall update the Staffing Matrix to include a Resource Staffing Chart for all M&O Activities, which must be maintained, including updating with actuals, throughout the term of the Contract: 1. M&O Activity Resource Staffing Chart: a. Vertical axis = The following high-level M&O Activities, with all hours associated with the lower-level activities summed up: i. Project Management ii. Maintenance (via CRs) iii. Maintenance (via Program Support) iv. Operations b. Horizontal axis = Contract Years 1-10, with each Contract year broken into two columns, one populated with the estimated/actual "Onshore" hours associated with each M&O Activity, and the other populated with estimated/actual "Offshore" hours associated with each M&O Activity. c. The chart shall include both vertical and horizontal subtotal values and total values.

3.4.2 Staffing Management Plan

The Staffing Management Plan identifies the process and procedures used to manage staff throughout the CalHEERS SDMO Phase. This plan provides the details of the Contractor's organization including roles and responsibilities, planned Contractor onshore/offshore staffing ratio, and planning and managing Staff, including Staff recruitment, development, release, and turnover.

Table 3-14: Staffing Management Plan (CD-3.4-2)

Req #	SOW Requirement
3.4.2-01 (new)	The Contractor shall adopt, deliver, and maintain a CalHEERS Staffing Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Out of Scope 2.3 CalHEERS Project Team Overview 2.4 Organizational Chart 3. Req #	SOW Requirement
3.4.2-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with <u>the approval</u> of the State Project Director or designee.
3.4.2-03 (modified)	The Contractor shall incorporate into the Staffing Management Plan changes in standards to be in accordance with the State approved version of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide), pertaining to Plan Human Resource Management. Refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.4.2-04 (existing)	The Contractor shall describe within the Staffing Management Plan how the Contractor's team, including any Subcontractors, will be organized via the inclusion of an organization chart. The organization chart shall show all corporate entities, the Contractor (and Subcontractor) Staff names, positions, task assignments, relationships between Contractor Staff and Subcontractor Staff, and the proposed lines of authority and communication within the Contractor's team.
3.4.2-05 (existing)	The Contractor shall update the Staffing Management Plan to identify the Corporate Officer(s) to be contacted in the event that problems arise during the performance of the Contract.
3.4.2-06 (existing)	The Contractor shall update the Staffing Management Plan to include a matrix of major work activities and supporting processes versus organizational units to depict project roles and responsibilities.
3.4.2-07 (existing)	The Contractor shall update the Staffing Management Plan to ensure it is consistent with the Work Breakdown Structure (WBS) and the Master Work Plan.
3.4.2-08 (existing)	The Contractor shall update the Staffing Management Plan, in accordance with the project schedule, to include details of Staff, Staff allocation tracking, reporting, and interactions with State staff, including State and county subject matter experts.
3.4.2-09 (existing)	The Contractor shall update the Staffing Management Plan with any Contractor assumptions and constraints identified during effort and Staff estimating.
3.4.2-10 (existing)	The Contractor shall identify and differentiate between the CalHEERS Operations support team and the System development team within the Staffing Management Plan.
3.4.2-11 (existing)	The Contractor shall update the Staffing Management Plan with a description of how the Contractor's team will interact with State personnel, (e.g., Relationship Map, Staff locations, facilities, etc.).
3.4.2-12 (modified)	The Contractor shall update the Staffing Management Plan to include the understanding that the State maintains the option to replace project Staff at any time, for any reason.
3.4.2-13 (modified)	The Contractor shall update the Staffing Management Plan with a description of the Contractor's contingency/transition process to immediately and temporarily fill extended Staff absences due to vacations or illness.
3.4.2-14 (modified)	The Contractor shall update the Staffing Management Plan to describe the Contractor process for: 1. Onboarding staff. 2. Ensuring that all Contractor and Subcontractor Staff will comply with State guidelines pertaining to staffing, such as the completion of required Form 700 and biannual ethics training. 3. Ensuring compliance with the General Terms and Conditions and Special Provisions as it relates to staffing.
3.4.2-15 (modified)	The Contractor shall update the Staffing Management Plan to provide written desk procedures for each Staff member.
3.4.2-16 (existing)	The Contractor shall update these position descriptions periodically, but no less than quarterly, and make them readily available and accessible by all Project staff.
3.4.2-17 (existing)	The Contractor shall describe how Contractor Staff will interact with, utilize, and collaborate with State staff for all work performed by the Contractor.

Req #	SOW Requirement
3.4.2-18 (existing)	The Contractor shall identify assumptions and expectations for State staff who will be working alongside Contractor and Subcontractor Staff resources identified in the Contractor organizational chart.
3.4.2-19 (existing)	The Contractor shall document and maintain planned Staff assignments for Contractor Staff, including position/title, roll-on and roll-off dates (on-boarding / off-boarding), monthly hours, and the extent to which any work will be done offsite. This information must be readily available to and accessible by all Project staff.
3.4.2-20 (existing)	The Contractor shall be responsible for documenting, disseminating, and maintaining formal administrative processes and procedures for both State and Contractor Staff for the following areas at a minimum: 1. Roll-on and Roll-off (on-boarding / off-boarding) for all Contractor and State staff/resources, including but limited to activation / deactivation of all computer access 2. CalHEERS Project overviews and objectives 3. Contractor organization charts and roles and responsibilities 4. Project Processes, Procedures, Tools, Standards, and templates 5. Administrative items (e.g., e-mail lists, time tracking and weekly status reporting) 6. LAN, file, and web portal/SharePoint structures and key file locations 7. LAN, file, web portal/SharePoint access and remote access
3.4.2-21 (new)	The Contractor shall update DEL CD-3.4-2 Staffing Management Plan, to account for the Work from Home policy. Since COVID lockdowns, policies around work from home have become more common place within the State of California. Hybrid forms of work from home will be included under this contract. The Contractor shall update the Staffing Management Plan to identify how the Contractor will collaborate with the State as part of the onboarding planning and processing to determine which employees will be required to work at the CalHEERS office(s) or if they will be required to participate in a hybrid work from home / work at office model.
3.4.2-22 (new)	The State identifies and associates the following artifacts to the Staffing Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Contractor Organizational Charts (~~D-3.4.3~~) • Master Contact and Informational Database (~~D-3.4.4~~)
3.4.2-23 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.4.2-24 (modified)	The Contractor shall attach to the Staffing Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s)

Req #	SOW Requirement
	3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.4.3 Staffing Execution Requirements

3.4.3.1 Contractor Organizational Charts

Table 3-15: Contractor Organizational Charts

Req #	SOW Requirement
3.4.3-01 (new)	The Contractor shall staff, manage, lead and execute Staffing Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.4-2 – Staffing Management Plan.
3.4.3-02 (new)	At the State's request, the Contractor shall assist the State with the analysis and identification of State capacity and State resource constraints.
3.4.3-03 (new)	The Contractor shall consider within their approach to estimating enhancement work capacity and staffing the State's capacity and resource constraints.
3.4.3-04 (existing)	The Contractor shall have the ability to scale resources related to System development team change requests or enhancement work in order to meet the needs of CalHEERS.
3.4.3-05 (existing)	The Contractor shall document and maintain Contractor organizational charts at both summary and detailed levels (with details down to each individual).
3.4.3-06 (existing)	The Contractor shall document and maintain a Contractor organizational chart that depicts key Contractor Staff with their State staff counterparts.
3.4.3-07 (existing)	The Contractor shall make Contractor organizational charts readily available and accessible to all Project staff.
3.4.3-08 (existing)	The Contractor shall notify the State Project Director as soon as possible and promptly develop and complete transition and training plans for the new or reassigned replacement Staff when an unplanned, early Contractor employee or Subcontractor departure from the Project is unavoidable.
3.4.3-09 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.4.3.2 Contractor Personnel

There are Contractor Staff identified as part of this Contract by which the State has conditions for their assignment. The requirements for each Key Staff are provided in SOW Section 2,

CONTRACTOR PERSONNEL.

3.4.3.3 Master Contact and Informational Database

Table 3-16: Master Contact and Informational Database

Req #	SOW Requirement
3.4.3-10 (modified)	The Contactor shall develop, update, deliver, and maintain the Master Contact and Informational Database, which includes but is not limited to the following: 1. Contact Information from the incumbent Contractor's or State's Contact lists via the Contractor developed/provided spreadsheet. The spreadsheet will provide the details grouped by State Staff, Contractor Key Staff, and Contractor Onshore Staff including, but not limited to: a. First Name b. Last Name c. Email d. Project Role e. Team f. Team Lead g. Organization Alignment h. Desk # (for State Staff and Contractor Key Staff) i. Project Phone Number j. Office Location (for Contractor Onshore Staff)
3.4.3-11 (existing)	The Contractor shall define the process for the development and maintenance of a Master Contact and Informational Database of all Project stakeholders and contacts, which must be available to the State Project Office.
3.4.3-12 (existing)	The Contractor shall develop, maintain and execute the Master Contact and Informational Database, which must have functionality to facilitate the generation of email distribution lists.
3.4.3-13 (existing)	The Contractor shall develop and maintain the Master Contact and Informational Database with the functionality to categorize and group the contacts to assist in contact identification.

3.4.3.4 Participation in Off Premises Meetings

Table 3-17: Participation in Off Premises Meetings

Req #	SOW Requirement
3.4.3-14 (existing)	The Contractor shall travel to and participate in regularly scheduled and ad hoc meetings, conferences, and teleconference calls with the State, counties, interface partners and other State agencies, as requested by the State Project Director or designee.
3.4.3-15 (existing)	The Contractor shall, at the request of the State Project Director or designee, facilitate and participate in periodic presentations and meetings with internal and external CalHEERS stakeholders including but not limited to CalHEERS staff, county staff, State and Federal stakeholders and special interest groups (e.g., Public Authorities, Labor Organizations).

3.5 RISK AND ISSUE MANAGEMENT

The Risk and Issue Management Plans document the recognition, analysis, planning, monitoring, and control of events that, should they occur, may result in a negative impact to project objectives. The Risk Management section describes how risk management will be structured and performed on the project. The Issue Management section supports the Contractor's efforts to ensure that any matter to consider, solve, or answer that may impact the

project, program, processes or System is reviewed, resolved and communicated in a closed loop process. The plan describes the Contractor's methods and techniques to identify, document, resolve, track and report issues.

3.5.1 Risk and Issue Management Plan

The Risk and Issue Management Plan documents the recognition, analysis, planning, monitoring, and control of events that, should they occur, may result in a negative impact to project objectives. The Plan also supports the Contractor's efforts to ensure that any matter that is impacting the project, program processes, or System is considered, solved, or answered in a closed loop process. The Plan describes how risk and issue management will be structured and performed on the project.

Table 3-18: Risk and Issue Management Plan (CD-3.5-1)

Req #	SOW Requirement
3.5.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Risk and Issue Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Risk and Issue Management Roles and Responsibilities 7. RISK MANAGEMENT 7.1 Risk Management Processes 7.2 Risk Communication 7.2.1 Risk and Issue Management Group (RIMG) 7.3 Risk Identification 7.4 Risk Metrics and Analysis 7.4.1 Risk Probability 7.4.2 Risk Impact 7.4.3 Risk Exposure 7.4.4 Risk Assessment (High, Medium, Low) 7.4.5 Risk Triggers 7.4.6 Risk to Issue Trigger Date 7.5 Risk Analysis, Plan Implementation, Mitigation and Closure 7.5.1 Mitigation Plan 7.6 Risk Tracking and Reporting 7.6.1 Team Level Risk 7.6.2 RIMG Level Risk 7.7 Risk Control / Escalation 7.8 Conditional Approval 8. ISSUE MANAGEMENT 8.1 Issue Management Process 8.2 Issue Communication 8.3 Issue Identification

Req #	SOW Requirement
	8.4 Issue Documentation 8.5 Issue Analysis and Contingency 8.6 Issue Tracking and Reporting 8.7 Issue Resolution / Escalation 9. TOOLS 9.1 Risk and Issue Management Tools 9.2 EWM Tool 9.3 Excel and SharePoint 9.3.1 Security Risks 9.4 Tool Training 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARDS MAPPING
3.5.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.5.1-03 (modified)	The Contractor shall develop, update, and maintain the Risk and Issue Management Plan. The Risk Management portion of the plan shall be prepared in accordance with the State approved version of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide). Refer to Appendix A-2, SPECIAL PROVISIONS Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES. Key areas covered in the plan shall include, but not be limited to: 1. Methodology (Approaches, tools, data sources) 2. Roles and Responsibilities 3. Budgeting 4. Timing (Frequency of risk management activities) 5. Risk Categories 6. Risk Probability/Impact 7. Stakeholder Tolerance 8. Risk Tracking/Reporting
3.5.1-04 (modified)	The Contractor shall also update the Risk Management section in accordance with the State approved ISO/IEC 16085:2006, IEEE Std 16085-2006 – Systems and software engineering - Life Cycle Processes - Risk Management (Annex A-Risk Management Plan). Refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.5.1-05 (modified)	The Contractor shall update the Issue Management section to be compliant with ISO/IEC 14764, IEEE Std 14764-2006 - Software Engineering - Software Life Cycle Processes – Maintenance (Section 5-Maintenance, Section 7.3.3 Maintenance Plan Topics) and ISO/IEC 12207 IEEE Std 12207-2008 – Systems and software engineering – Software life cycle process (6.4.9.3.5-Operation problem resolution, 7.2.8-Software Problem Resolution Process). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.5.1-06 (existing)	The Contractor shall update the Issue Management section to include but not be limited to the following: 1. Methods and techniques to identify, document, resolve, track and report issues. 2. Methods to capture issues from the Contractor and stakeholders, including but not limited to the following users;

Req #	SOW Requirement
	a. CalHEERS Project Office staff b. Covered California staff c. DHCS staff d. Interface partners 3. Methods to define and describe roles and responsibilities for the Contractor and stakeholders in the issue management process. 4. Methods and timelines to communicate issue progress and resolution to issue initiators and CalHEERS Project Office staff. 5. Identification of support teams or groups that handle issue analysis and resolution, as well as installation of the resolution. 6. Identification of System resources and tools necessary to carry out documentation and analysis of the issues. (The Contractor will use the tools approved by and accessible by the State.) 7. Methods and techniques to detect trends in the issues reported. 8. Methods and techniques to capture and report issue related metrics. 9. Methods for integrating with the existing State Issue Management, Risk Management and Change Management Processes.
3.5.1-07 (existing)	The Contractor shall update the Issue Management section with the definitions of issue severity levels and provide guidance pertaining to the process and procedures on severity level assignment and prioritization.
3.5.1-08 (new)	The State identifies and associates the following artifacts to the Risk and Issue Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Risk and Issue Management Tool • Action/Decision Items Process Guide • Raising a Decision Item Process Guide • Risk and Issue Process Guide • Decision Paper Template
3.5.1-09 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.5.1-10 (modified)	The Contractor shall attach to the Risk and Issue Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance

Req #	SOW Requirement
	Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.5.2 Risk and Issue Execution Requirements

3.5.2.1 Risk and Issue Management Tool

Table 3-19: Risk and Issue Management Tool

Req #	SOW Requirement
3.5.2-01 (existing)	The Contractor shall take over, maintain, and execute the existing Risk and Issue management tool that, at a minimum, manages risks and issues separately, documents the description of the risks and issues, priority of the issue, dependencies and plans for resolution, team/Staff assignments, schedule impacts if appropriate, targeted and actual resolution dates, and the resolution action.
3.5.2-02 (existing)	The Contractor shall provide ongoing familiarity training on the use of the issue management tool to all CalHEERS Project staff.
3.5.2-03 (existing)	The Risk and Issue management tool must be widely and readily accessible for use by all CalHEERS Project staff.

3.5.2.2 Tracking and Resolving Issues

Table 3-20: Tracking and Resolving Issues

Req #	SOW Requirement
3.5.2-04 (new)	The Contractor shall staff, manage, lead and execute Risk and Issue Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.5-1 – Risk and Issue Management Plan.
3.5.2-05 (modified)	The Contractor's Issue Management process shall be a closed-loop process as defined in ISO/IEC 12207 IEEE Std 12207-2008 – Systems and software engineering – Software life cycle process (Section 6.4.9.3.5 - Operation problem resolution, Section 7.2.8 - Software Problem Resolution Process). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.5.2-06 (existing)	The Contractor's Key Staff associated with the issue shall participate in ad hoc, teleconference meetings upon the request of the State Project Director or designee.
3.5.2-07 (existing)	The Contractor shall track, manage, escalate and report on all project issues in compliance with the escalation process defined within the Risk and Issue Management Plan.
3.5.2-08 (existing)	The Contractor shall track and manage all project issues in the State identified or approved Issue Management Tool.

Req #	SOW Requirement
3.5.2-09 (modified)	The Contractor shall research, designate, track, and manage all issues utilizing the following priority rating scale: 1. Priority 1 Critical – Unacceptable impact to the project. 2. Priority 2 High – Major slip in major milestone or critical path impacted. 3. Priority 3 Medium – Minor slip in major milestone with no critical path impact. 4. Priority 4 Low – Minimal impact or minor project adjustment needed.
3.5.2-10 (existing)	The Contractor shall work with the CalHEERS Project Office personnel to resolve issues at the lowest level and escalate unresolved issues to the State Project Director or designee in accordance with the escalation procedures within the Risk and Issue Management Plan.
3.5.2-11 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.5.2.3 Tracking and Resolving Risks

The Contractor shall use a robust, proven approach to risk identification, assessment, prioritization, monitoring, and mitigation that proactively raises awareness of risk areas and protects the interests of the CalHEERS Project. This approach must be clearly documented, understood, and accessible by all CalHEERS Project personnel. Risk reports generated from the Contractor's tool will become a part of the Contractor's Weekly and Monthly Status Reports.

Table 3-21: Tracking and Resolving Risks

Req #	SOW Requirement
3.5.2-12 (existing)	The Contractor shall be responsible for proactively advising the State, on an ongoing basis, of the potential risks related to the complexity of proposed CalHEERS System fixes and/or enhancements.
3.5.2-13 (existing)	The Contractor shall make Risk tracking details widely and readily accessible to all CalHEERS Project team members.
3.5.2-14 (existing)	The Contractor shall identify, track and manage risks in accordance with the Risk and Issue Management Plan.
3.5.2-15 (existing)	The Contractor shall input, track, and manage CalHEERS Project risks within the State identified risk management tool, in compliance with the Risk and Issue Management Plan.
3.5.2-16 (modified)	The Contractor shall use the Software Engineering Institute "Taxonomy Based Questionnaire," or similar risk identification aid approved by the State Project Director or designee, in accordance with the California Technology Agency, Information Technology Project Oversight Framework, SIMM Section 45 (Now the California Department of Technology) when performing risk analysis. Refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES.
3.5.2-17 (existing)	The Contractor shall report changes to risks or risk related activities in the Weekly Director's Report.

3.6 COMMUNICATION MANAGEMENT

The State places a high value and strong emphasis on timely, useful, and effective communications. The State believes that effective communication and transparency to Project Sponsors, Program Sponsors, and stakeholders are key factors in achieving success. The Contractor is expected to employ an approach to communication that is open, accurate, direct, and in the best interest of the CalHEERS Project and the State.

At the direction of the State, the Contractor will provide support to assist the State in communications with stakeholders, including the public.

The Contractor must implement structured, efficient communication protocols and methods to ensure that all CalHEERS sponsors and partners are informed of Project decisions, issues, risks, and statuses and that responsibility for dependencies, instructions, and touch-points are understood by all parties.

As part of the effective and open communication approach, the Contractor is expected to provide its strategy for communicating and working collaboratively with its Subcontractors to meet the Project objectives.

3.6.1 Communication Management Plan

The Communication Management Plan defines the framework for project information exchange in the form of timely, two-way communications between all CalHEERS stakeholders, users, and interface partners. The activities defined within the plan are focused to clarify expectations, build acceptance and commitment, and obtain active, effective participation to ensure adequate input, feedback, and problem resolution. The plan defines general communication types, roles and responsibilities, formal communication requirements, which include, frequency, audience, content, and media.

Table 3-22: Communication Management Plan (CD-3.6-1)

Req #	SOW Requirement
3.6.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Communication Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Executive Summary Overview 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. 3.6.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.6.1-03 (modified)	The Contractor shall update and maintain the Communication Management Plan to also comply with the areas of the Project Communications Management section of the State approved version of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide). Refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND

Req #	SOW Requirement
	CODES. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.6.1-04 (existing)	The Contractor shall update the Communication Management Plan to define the methodology for project information exchange, both within and outside the project, to ensure comprehensive and timely two-way communication between all CalHEERS stakeholders, end users, business/interface partners, and service providers. The Plan shall include the identification of a Single Point of Contact (based on roles) plus a backup for each business area for both the State and Contractor Teams to facilitate timely communication.
3.6.1-05 (modified)	The Communication Management Plan shall show the processes that will provide two-way program, project management, and operations communications between all stakeholders, users and interface partners: 1. Covered California (also known as the California Health Benefit Exchange) 2. Department of Health Care Services (DHCS) 3. Office of Technology & Systems Integration (OTSI) 4. CalHEERS Project Office 5. Department of Managed Health Care (DMHC) 6. California Department of Insurance (CDI) 7. California Technology Agency (CTA) 8. California Department of Social Services (CDSS) 9. Centers for Medicare and Medicaid Services (CMS) 10. California Health and Human Services (CalHHS) Agency 11. California Department of Finance (DOF) 12. County Welfare Directors Association (CWDA) 13. Statewide Automated Welfare System (SAWS) Consortia 14. California County Welfare Departments 15. Business Partners/Interface Agencies 16. CalHEERS end users
3.6.1-06 (existing)	The Contractor shall update and maintain the Communication Management Plan to include but not be limited to: 1. Identification of general communication roles and responsibilities for the Contractor, Sponsors and all other key stakeholders. 2. Identification of formal communication requirements, including type of communication, frequency, audience, content, and media, including routine communications (e.g., status reports, release notes and briefings). 3. A process for the development and maintenance of a Master Contact and Informational Database of all project stakeholders and contacts.
3.6.1-07 (existing)	The Communication Management Plan shall identify the processes that will also maintain effective and transparent communication channels with the State and stakeholders to include communications associated with, but not limited to: 1. Contractor services 2. M&O services 3. Project management 4. Change management 5. Service desk services 6. Interface management 7. Collaboration with cloud hosting data center services
3.6.1-08 (modified)	The Contractor shall attach to the Communication Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist

Req #	SOW Requirement
	Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact
3.6.1-09 (new)	The State identifies and associates the following artifacts to the Communication Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • CalHEERS Director's Report • Monthly Report Summary • Operations Management Report • Operations Weekly Summary Report • Quarterly Status Report • Ad-Hoc CIT Intake Form Quick Reference Guide • CalHEERS CIT QA Process Checklist • CalHEERS Communications Process Guide • CalHEERS Connection Committee • CalHEERS County Training Coordinator Distribution List M&O Process Guide • CalHEERS Director's Report Process Guide • CalHEERS Information Transmittal (CIT) Process • CalHEERS Internal CRFI Process Guide • CalHEERS Project Agenda Template • CalHEERS Request for Information (CRFI) • CalHEERS Request for Information (CRFI) Process Flow • CIT Request Log • CIT/AP process Flow • CIT_0053-20_CalHEERS Service Desk Process Guide

Req #	SOW Requirement
	• CRFI Daily Report • CRFI Tracker List • CD-3.6.1 Communication Management Plan Project Focus Area Points of Contact • Directors Report Color Guidelines • Meeting Invite Etiquette • Meeting Management Guidelines and Expectations Process Guide • Multiple Milestones Process Flow
3.6.1-10 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

3.6.2 Communication Management Execution

The Contractor is expected to actively participate in and support the communication management processes of the project.

Table 3-23: Communication Management Execution

Req #	SOW Requirement
3.6.2-01 (new)	The Contractor shall staff, manage, lead and execute Communications Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.6-1 – Communication Management Plan.
3.6.2-02 (existing)	The Contractor shall actively participate with CalHEERS Project Management Office (PMO) to provide effective communication and coordination with the large and diverse stakeholder group, both internal and external to the project.
3.6.2-03 (existing)	The Contractor shall help prepare for and participate in periodic and ad hoc meetings and presentations to the State, County, and Federal Stakeholders, workgroups, and other committees regarding project plans, status, risks, issues and recommendations, as appropriate.
3.6.2-04 (existing)	The Contractor's Key Staff shall participate in weekly status meetings with the State Project Director, or designee, and other members of the State Project Team.
3.6.2-05 (existing)	The Contractor shall follow a preset agenda jointly prepared by Contractor Project Manager and State Project Director or designee for status meetings.
3.6.2-06 (existing)	The Contractor Project Manager shall assist the State Project Director or designee in preparing special reports and presentations related to Project Management.
3.6.2-07 (existing)	The Contractor shall maintain and update the CalHEERS Project phone lists, including global contact lists, for use by the CalHEERS Project.
3.6.2-08 (existing)	The Contractor shall maintain and update the CalHEERS Project e-mail distribution groups for use by the CalHEERS Project.
3.6.2-09 (new)	The Contractor shall create, develop, and maintain the project SharePoint site with the use of custom SharePoint pages to surface processes, statuses, and other project documentation that is agreed upon by the State Project Team. Additionally, the SharePoint site shall include a user experience that makes document, page, and list search and navigation intuitive, accessible, and responsive for project staff.

Req #	SOW Requirement
3.6.2-10 (existing)	The Contractor shall be responsible for meeting facilitation and taking meeting minutes/notes, for all meetings identified by the State Project Director or designee. Meetings shall be prepped and executed in accordance with the relevant project process guides. The minutes/notes shall include but not be limited to the following: 1. List of attendees 2. Meeting purpose 3. Summary of the topics and meeting materials reviewed 4. Identifying, documenting, and tracking of decision items, action items, risks, or issues discussed, assigned, or resolved 5. Next steps 6. Accomplishments
3.6.2-11 (new)	The Contractor shall have a dedicated location on the Project SharePoint that aligns to SOW Section 3.7, DOCUMENT MANAGEMENT. Meeting materials shall be stored in the indicated locations and available for participant use prior to scheduled meetings and updated and available after scheduled meetings.
3.6.2-12 (new)	The Contractor shall confirm with the State at the start of all meetings, that all attendees necessary, from both the Contractor and State entities, are present to adequately address all agenda topics. For meetings where the attendees are not available, the Contractor shall reschedule.
3.6.2-13 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.6.3 CalHEERS Director's Report

Table 3-24: CalHEERS Director's Report

Req #	SOW Requirement
3.6.3-01 (Modified)	The Contractor shall adopt, maintain and deliver the CalHEERS Director's Report on a weekly basis. The reports shall include the following: • Directors' Priorities • Project Calendar for the Week • Pre-JAD/JAD Calendar • Release Status by Release • Roadmap CR Status • Color Guidelines for Release Dashboards • Feature/Priority Release Status • Action Items & Decision items • User Centered Design • Agile Program Update • Pipeline • Prioritized CRs • Special Projects • Non-Release Based CR Status • Readiness • Defect Management • Warranty Defects (Priority 1 to Priority 4) • Non-Production Defects (Warranty/Warranty Triage) • Release Defect Analysis • Incident and Service Management Metrics • Environment Status • Connectivity

Req #	SOW Requirement
	• Application Operations • Production Activities • Interfaces • Renewals/Open Enrollment • APTC Recalculations • Notices • Email Generation to Consumers • Financial Management Processing • Data Warehouse • Root Cause Analysis (RCA) Submissions • Policy & Audit Requests • IV&V / QA • Contract Management • Project Training • PMO • Deliverables and Work Products • Risks and Issues • Project Communications • Staffing • Transition
3.6.3-02 (existing)	The Contractor shall provide written status reports at least 24 hours prior to the weekly meetings.
3.6.3-03 (existing)	The Contractor shall provide status reports that describe the previous week's activities, deficiencies encountered - highlighting those that may need to be addressed before proceeding to the next activities - their disposition, results of testing, and whether or not deadlines were met.
3.6.3-04 (existing)	In addition to the development and submission of CalHEERS M&O Quarterly Status Report, the following Contractor Staff, at a minimum, shall participate, in person, in weekly project status meetings with the CalHEERS Project Office, located in Sacramento, California: 1. Project Director 2. Project Management Office Manager 3. System Architect 4. Transition Manager * * Shall attend weekly meetings only during Contract Start, Transition-In and Transition-Out
3.6.3-05 (existing)	During the weekly project status meetings, the Contractor shall, at a minimum, present the following: 1. A summary of the status of active work plans including, but not limited to: a. Issue status b. Risks status c. Work Authorization d. Deficiency Status e. Lessons Learned f. Business Change Management Status g. Status of any additional activities as requested by the State Project Director or designee. h. An overview of tasks scheduled to start or be completed in the next reporting period.
3.6.3-06 (existing)	The Contractor shall present a summary of release management activities, schedule and progress, at the weekly Status meeting.

Req #	SOW Requirement
3.6.3-07 (existing)	As required by the State Project Director or designee, additional Contractor Staff shall attend weekly status meetings, in person, at the CalHEERS Project Office located in Sacramento, California, or attend via conference call.

3.6.4 Monthly Report Summary

The Monthly Report Summary will be a reporting System by which the Contractor reports on the overall health of the CalHEERS Project as well as other indicators that are beneficial to the State in managing and communicating the overall project health to stakeholders.

Table 3-25: Monthly Report Summary

Req #	SOW Requirement
3.6.4-01 (existing)	The Contractor shall produce a monthly report summary that compares actual performance of the Contractor to budgeted Charges and dates in the Schedule.
3.6.4-02 (existing)	The Contractor's monthly report shall be a Work Product provided by the Contractor in accordance with this Contract.
3.6.4-03 (existing)	The Contractor shall promptly provide summary reports to the State Project Director or designee for the following: 1. Significant or serious deficiencies 2. Risks/concerns with System hosting services 3. Concerns with the quality, design, development or implementation of changes Any other circumstances which have, or if not remedied will likely have, a significant or serious negative impact on the Project, the System, the hosting services, and the design development and implementation of changes thereof.

3.6.5 Quarterly Status Report

The Quarterly Status Report organizes and summarizes the CalHEERS performance and presents the results of analyses required by the State including, but not limited to, Contract requirements and performance measurement baselines. These reports provide status and progress information, at the level of detail required by the various stakeholders, as documented in the Communications Management Plan.

Table 3-26: Quarterly Status Report

Req #	SOW Requirement
3.6.5-01 (existing)	The Quarterly Status Report shall be prepared in accordance with ISO/IEC 14764 IEEE Std 14764-2006 – Software Engineering – Software Life Cycle Processes – Maintenance (7.3.2 - The maintenance plan, 7.3.3 - Maintenance plan topics).
3.6.5-02 (existing)	The Contractor shall prepare the Quarterly Status Report in accordance with the most current version of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide) section pertaining to Performance Reporting.

Req #	SOW Requirement
3.6.5-03 (existing)	The Contactor shall update the Quarterly Status Report to include, at a minimum, the following: 1. Identification, overview and timeline of major activities 2. Executive Status Dashboards as defined by the State, including but not limited to, (scope, schedule, cost, risk, quality, staffing, resources, percent completion) 3. Work completed during current reporting period 4. Work to be completed during the next reporting period 5. Transition status (During Transition Phase only) 6. Stakeholder Management activities as defined by the State, including but not limited to (Release Notes, Informational Notice, Training). 7. Quality Management activities as defined in the Quality Management Plan (QMP). 8. Infrastructure maintenance activities as defined by the State, including but not limited to, the amount of downtime that occurred in the previous calendar month. 9. Public outreach activities and results as defined by the State. 10. Process Improvement activities as defined by the State and the PMM/Process Improvement Progress Report. 11. Major Milestone Schedule Summary, including but not limited to: a. Release Milestones b. Release Planning (to include operational infrastructure changes) c. Release Analysis and Design d. Release Test e. Release Readiness f. Post Statewide Implementation g. Transition Out Review h. System Performance Management 12. The following metrics that are detailed in the QMP - Metrics Planning a. Staffing Management Metrics b. Issue Management Metrics c. Risk Management Metrics
3.6.5-04 (existing)	The Contractor shall include in the Quarterly Status Report the estimated and actual release effort and costs by release phase.
3.6.5-05 (existing)	The Contractor shall provide in the Quarterly Status Report, to the State Project Director or designee, with software maintenance updates.
3.6.5-06 (existing)	Upon transition completion, the Contractor shall maintain and update the Milestone Schedule Summary and include this summary within the Quarterly Status Report.
3.6.5-07 (existing)	The Contractor Senior Management and Subcontractor Senior Management shall meet on a Quarterly basis with executives of the State sponsoring departments for the Contractor Project Management to report the status of the project.

3.7 DOCUMENT MANAGEMENT

3.7.1 Document Management Plan

The Document Management Plan assists in the development, revision, maintenance, storage, and submission of CalHEERS Project documentation. The plan provides a reference to the comprehensive list of Deliverable documents detailing the proposed audience, document description and proprietary classification. The plan is a guide to developing quality CalHEERS project documentation that meets or exceeds Contract requirements and best practices.

Table 3-27: Document Management Plan (CD-3.7-1)

Req #	SOW Requirement
3.7.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Document Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 How Documents are Reviewed and Approved 3.2 How Documents are Tracked (Document Type Matrix) 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. GLOSSARY AND ACRONYMS 13.1 New Terms and Acronyms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: IEEE STANDARDS
3.7.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.7.1-03 (modified)	The Contractor shall update the Document Management Plan to be compliant with current ISO/IEC/IEEE 15289, Second Edition 2015-5-15, Systems and software engineering – Content of life-cycle information items (documentation) (10.24-Documentation Plan) pertaining to the Document Process. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.7.1-04 (existing)	The Contractor shall define within the Document Management Plan the style guidelines and templates to be utilized by the Contractor in creating the various types of project documentation.
3.7.1-05 (existing)	The Contractor shall update the Document Management Plan to detail the documentation process, including design and development, publication, tools, and maintenance.
3.7.1-06 (existing)	The Contractor shall update the Document Management Plan to include a reference to SOW Section 8, DELIVERABLES, which includes a comprehensive list of Deliverable documents detailing their SOW reference location, functional process area, and update frequency, along with other subsections describing the preparation, submission, and approval of deliverables.
3.7.1-07 (modified)	Following acceptance of gap analysis, the Contractor shall accurately make all necessary updates and establish a comprehensive electronic artifact repository utilizing Content Management best practices.
3.7.1-08 (new)	The Contractor shall include compliance with Government Code 12168.7 for document retention.
3.7.1-09 (new)	The Contractor shall create a new Section for SharePoint maturity to establish, document, facilitate, and maintain Content Management activities specifically for the Project SharePoint that utilizes existing functionality to support deliverable management, artifact and other artifact type management, and working document management for ease of use, easy search, document updates, and archive and storage.
3.7.1-10 (new)	The Contractor shall ensure that SharePoint Administrative staff have the necessary SharePoint qualifications to develop and utilize SharePoint functionality to mature the use of the Project SharePoint for document and content management.

Req #	SOW Requirement
3.7.1-11 (new)	The Contractor shall in collaboration with the State utilize Content Management to structure the Project SharePoint site to support Navigation, SharePoint Pages, and Search to make the user experience intuitive and understandable,
3.7.1-12 (new)	The Contractor shall in collaboration with the State support Document Management, Communication Management, Quality Management, and other teams to create content utilizing SharePoint functionality to support including, but not limited to: • Onboarding Page • Offboarding Page • Training Page(s) • Organization Change Management activities Page • Deliverables Overview by SOW Section Page(s) • Specific High-Visibility Processes Page(s), that are used by multiple teams • Team Overview Page(s) (i.e. PMO, Technical, Functional, etc.) • Working Documents Page(s)/Libraries/Sites
3.7.1-13 (new)	The Contractor shall develop, maintain, and update in collaboration with the State a Content Management process to support the use and structure of the Project SharePoint and allow for the request for Content Changes as new efforts, processes, activities, or updates are discovered during the life of the project.
3.7.1-14 (new)	The Contractor shall establish and maintain a Content Management audit review process and submit a report on a 6-month basis that recommends updates to the Project SharePoint structure, page and library updates, archiving, and records management.
3.7.1-15 (new)	The Contractor shall collaborate with the State on which recommendations to implement, what OCM and CPI tasks that may need to be created, modified, implemented, and communicated to CalHEERS Project staff, and the timeframes involved as part of each 6-month effort.
3.7.1-16 (new)	The State identifies and associates the following artifacts to the Document Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Content Management Audit Process • Content Management Audit Report • Annual DEL Process Guide Step Diagram • Annual Deliverable Review Process Guide • Business Process Flowchart Standards Guide • CalHEERS DED Template • CalHEERS DEL Template • CalHEERS Project Deliverables Deloitte Author - Overview • CalHEERS Project Deliverables Deloitte Author - Role & Responsibilities • CalHEERS Project Deliverables State Owner - Overview • CalHEERS Project Deliverables State Owner - Role & Responsibilities • CalHEERS Project Deliverables Training Curriculum • Corrective Action Plan Template • DEL Exception Updates Process Guide • Deliverable & Work Product Development and Review Process • Deliverable Management Process • Deliverable Prioritization Recommendation Report • Deliverable Prioritization Recommendation Report Process • Deloitte Deliverable Development-Review Process Guide • Document Types Matrix • D-X.X-X Deliverable Name_Kick-Off Meeting (Template) • SDMO Deliverables Tracker • State Annual Deliverable Development and Review Process Guide • State Deliverable Development-Review Process Guide

Req #	SOW Requirement
3.7.1-17 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.7.1-18 (modified)	The Contractor shall attach to the Document Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.7.2 Document Management Execution

Table 3-28: Document Management

Req #	SOW Requirement
3.7.2-01 (new)	The Contractor shall staff, manage, lead and execute Document Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.7-1 – Document Management Plan.
3.7.2-02 (existing)	The Contractor shall manage and maintain the documentation needs of the CalHEERS Project in accordance with the Document Management Plan.
3.7.2-03 (existing)	The Project Management Office Project Manager and Contract Manager shall participate in Deliverable status meetings in person; additional Contractor Staff shall attend the meetings upon the request of the State Project Director or designee.

Req #	SOW Requirement
3.7.2-04 (new)	Any changes to documentation associated with the statement of work, shall be covered as part of the fixed cost. Some examples are, but not limited to: • Update Documentation for any deficiency or out of sync issues with existing project processes. • Deficiencies found in System Design Documentation. • The Contractor will be responsible for the System and documentation at transition, and to correct and bring current any documentation changes. • Deficiencies found in project artifacts, including but not limited to: deliverables, work products, Standard Operating Procedures (SOP), reports, and process guides.
3.7.2-05 (new)	The Contractor shall utilize and maintain a Document Type Matrix that identifies the types of documents on the CalHEERS Project and the review process they will follow. The Matrix is a reference tool for understanding various data points related to documents that are managed within the Project SharePoint. Initial data points include, but are not limited to: • Document Category • Document Type • Repository • Standard Template? • Document/Template Update Frequency • Ownership (Contractor or the State) • Responsible Team • Review Process • Retention Policy • Purpose • Audience • Media • Content
3.7.2-06 (new)	The Contractor shall develop and execute an Annual Deliverable Prioritization process, in cooperation with the State, to maximize the use of deliverable review and approval timeframes in each calendar year. This process will be reviewed and executed annually.
3.7.2-07 (new)	The Contractor shall conduct a review of all deliverables and provide the State with a Deliverable Prioritization Recommendation Report, identifying which deliverables the Contractor believes should be reviewed annually and which deliverables should be reviewed on an alternate cadence, specifying the alternate cadence.
3.7.2-08 (new)	The Contractor shall hold the Annual Deliverable Prioritization meeting by the end of February of each year where the Contractor and the State review the Deliverable Prioritization Recommendation Report and prioritize what deliverables should be scheduled for review within the year.
3.7.2-09 (new)	The Contractor shall update the SDMO Workplan with the prioritized deliverables identified as an outcome of the Annual Deliverable Prioritization meeting within two weeks.
3.7.2-10 (new)	The Contractor shall ensure that any deliverables that were not reviewed in the previous year are included in the prioritization recommendations for the following year.
3.7.2-11 (new)	During a given year, the Contractor shall include the review of any deliverables that the State Project Director or designee deems necessary into the current year.

Req #	SOW Requirement
3.7.2-12 (new)	The Contractor shall develop and execute a Project Artifact Process, in cooperation with the State to: • Maintain the currency of artifacts as determined during the review of the artifact's parent deliverable. • Align artifacts to document management standards. • At a minimum update all artifacts every three years. The approval of a parent deliverable is not tied to the update of a child artifact. • Notify the State on which artifacts will be updated and allow the State to formally review any artifact at the State's discretion. • Maintain all artifact sources of truth. • Maintain all artifact version history and update status. • Development and maintenance of new artifacts in collaboration with the State team that owns a particular parent deliverable. • Maintain a clear and organized metadata structure of all artifacts to support ease of search, representation on SharePoint Pages, or filtering and sorting. This structure should allow for the information to be viewed in various ways, such as, but not limited to: - o Grouped by Parent deliverable. - o Grouped by SOW Section. - o Grouped by Business Process. - o Date of last update. - o Other tagged metadata as determined in collaboration with the State Team that owns a parent deliverable and associated artifacts. • Develop and maintain a process to create, maintain, and retire an artifact's source document and the document that is viewable by users.
3.7.2-13 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.7.2.1 Access to Documentation Content

As CalHEERS entered the M&O life cycle, many of the documents that support M&O activities have already been created and are maintained through the document management processes. However, for this Contract, the Contractor will be updating existing documentation based on System/software changes or process improvement initiatives. The State expects the Contractor to maintain the documentation to reflect the CalHEERS current state and grant the State full and unhindered access to this information.

NOTE: Documentation includes, but is not limited to: deliverables, work products, user guides, processes, procedures, and all other forms of documentation used in support of the CalHEERS Project and System as also identified in Section A-2 Special Provisions Section 8.4.2 DOCUMENTATION ACCESS.

Table 3-29: Access to Documentation Content and Source Data

Req #	SOW Requirement
3.7.2-14 (modified)	The Contractor shall provide access to all formal draft and final versions of all documentation on the CalHEERS Project SharePoint site for accessibility by all State Project staff, QA, IV&V and oversight consultants.
3.7.2-15 (existing)	The Contractor shall provide access to the State Project Director, or a designee, and CalHEERS staff to all Deliverable work in progress. This allows the State to comment on and support Deliverable preparation.

Req #	SOW Requirement
3.7.2-16 (existing)	The Contractor shall place and maintain all Deliverable development work and formally approved deliverables within the State designated tool.
3.7.2-17 (existing)	The Contractor shall provide access, as directed by the State Project Director or designee, to any tool required to enable the State to view Contractor deliverables or project data from State staff workstations within one (1) week of Contractor implementation of the tool. Examples include but are not limited to: deliverables, source code, test script data, issue and risk data, service desk ticket data, defects, status and operational reports, and related data.
3.7.2-18 (existing)	Upon the State's request, the Contractor shall make Staff, resources, processes, data, tools, and deliverables available for State Quality Assurance (QA) and Verification and Validation (V&V) audits and inspections at no additional cost to the State.
3.7.2-19 (existing)	The deliverables and services being provided by Contractor and its Subcontractors, if any, pursuant to this Contract, shall be available for inspection and review at any reasonable time by representatives of the State or Federal government upon 24 hours advance notice.

3.7.3 Project Artifacts

The Contractor shall develop a Project Artifact repository and inventory list to store artifacts that are developed as part of SOW 3.13, other procedures, and reports or tools, and maintain traceability of an artifact to its parent deliverable. This repository will be a frequently used location by multiple project staff and requires organization to make documents easy to find. To facilitate the ease of use for finding process guides in fewer clicks by users, the Contractor shall develop SharePoint pages that surface current versions of related processes from the Project Process Guides repository related to an overarching process, e.g., release management.

Many management plans have associated artifacts that will be delivered on a regular basis by the Contractor. These artifacts support processes that are outputs in the execution of their associated management plan. Artifact types have different purposes, audiences, due dates, and formats.

An artifact inventory will be used to maintain the list of project artifacts and linkage to where the document resides or the SharePoint pages where the process resides. There are several project team process guides that reside in team level folders.

An Artifact Appendix 3 will be included in numerous deliverables with the associated artifacts and information listed in the requirement below.

Table 3-30: Project Artifact Inventory (CD-3.7-2)

Req #	SOW Requirement
3.7.3-01 (new)	The Contractor shall create, adopt, organize, track, and maintain a Project Artifact repository. All Contractor delivered artifacts shall be associated to the existing parent deliverable in the Project SharePoint.
3.7.3-02 (new)	The Contractor shall develop and maintain Project SharePoint pages to facilitate ease of use for project staff to search for, find, and review process artifacts without visiting the Project Artifact repository (refer to SOW 3.6.2 COMMUNICATION MANAGEMENT EXECUTION).
3.7.3-03 (new)	The Contractor shall allow State developed process guides or desk reference materials to be included in the Project Artifact repository regardless of association to a deliverable.
3.7.3-04 (new)	The Contractor shall develop filterable Project Process Guide SharePoint pages to display only current versions of a process grouped by process area for context, while retaining previous versions in the Project Artifact repository.

Req #	SOW Requirement
3.7.3-05 (new)	The Contractor shall defer to the State on Artifacts that are not stored in the Project Artifact repository, but still track and support their creation, maintenance, and searchability within the Project SharePoint or other approved repository.
3.7.3-06 (new)	The Contractor shall adopt, maintain, and track submission and approvals of deliverables separately in the existing SDMO Deliverable Tracker. However, the Contractor shall maintain the deliverable artifact information in the Artifact Inventory for hierarchical traceability of artifacts to each deliverable.
3.7.3-07 (new)	The Contractor shall use the following columns to maintain the Artifact Inventory: • Artifact Type • Artifact Name • Artifact Parent Del # • Deliverable? (y/n) • Project Team • State Artifact Owner (Team – Owner Role) • State SME (Name/ Role Title) • Contractor Artifact Owner (Team – Owner Role) • Contractor SME (Name/ Role Title) • State Contracts SME • State Owned? (y/n) • Document Creation Date • Last Modified Date • File Format Type (MS Word, Excel, PPT, Visio) • Artifact Requires a Workplan? (y/n) • Submission Frequency • Review Trigger • Review Frequency • Current Location (Link) • Contractor Initial Process Disposition (Keep As-Is, Update, or Deprecate) • Time Horizon Priority (1- Near, 2- Mid, 3- Far, N/A) • Applicable to Onboarding? • Training Needed? (y/n) • Additional Comments / Materials
3.7.3-08 (new)	The Contractor shall develop <u>and maintain</u> an artifact numbering system for reporting on the Artifact Inventory.
3.7.3-09 (new)	The Contractor shall maintain multiple artifact types in collaboration with the State. The types of artifacts will include but are not limited to the following examples: • Deliverable • Desk Reference Guide • Project Process Guide • Reference Materials • Reports • Standard Operating Procedures • Work Plan • Work Product • Work Product Tool (tool)
3.7.3-10 (new)	The Contractor shall develop, maintain, and streamline a Project Artifact Process. This process should include, but not be limited to the following topics: • Tools in support of Artifact management • Artifact review and update criteria and timeframes • Artifact version control • Artifact Ownership

Req #	SOW Requirement
	• Linkage to parent Deliverables • Determination of the need for a source document and a read-only version • Artifact organization • Artifact types and numbering
3.7.3-11 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.7.3-12 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifact(s) necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.7.4 Work Products

The Contractor shall develop Work Products as needed in support of a given deliverable, process, standard, or at the direction of the State. When in support of a deliverable, the Work Product will follow an informal review by the State and associated in the Deliverables tracker. However, a Work Product will not take the place of a deliverable. Other types of Work Products will not require review unless otherwise requested by the State.

Table 3-31: Work Products

Req #	SOW Requirement
3.7.4-01 (new)	The Contractor shall develop Work Products in support of deliverables, processes, identified standards, or for other efforts as directed by the State.
3.7.4-02 (new)	The Contractor shall identify when a Work Product is in support of a deliverable in the deliverable and in the Work Product. This type of Work Product will undergo informal review by the State.
3.7.4-03 (new)	The Contractor shall organize Work Products in support of deliverables in the deliverable tracking.
3.7.4-04 (new)	The Contractor shall develop Work Products as needed and associate them with the appropriate content, but not limited to the following: • Findings • Root cause analysis • Reports • Designs
3.7.4-05 (new)	The Contractor shall, at the State's request, provide a Work Product for review regardless of its intended association.

3.7.5 Deliverable Management

Deliverable Management encompasses the process for update, review, and approval of CalHEERS Project preexisting deliverables (refer to SOW Section 8). The State has a defined deliverable review process and will work with the Contractor to mature as needed. Elements of the how project deliverables are structured is outlined in the Deliverable Hierarchy Diagram.

3.7.5.1 Deliverable Hierarchy Diagram

The CalHEERS Project uses a Deliverable Hierarchy Diagram to identify the hierarchy relationship between the deliverables of the contract.

Table 3-32: Deliverable Hierarchy Diagram (CD-3.7-3)

Req #	SOW Requirement
3.7.5-01 (new)	The Contractor shall adopt, maintain, update, and implement the management of Deliverables using the CalHEERS Deliverable Hierarchy Diagram.
3.7.5-02 (new)	The Contractor shall maintain and keep current the CalHEERS Deliverables Hierarchy Diagram on the CalHEERS SharePoint site.
3.7.5-03 (new)	The Contractor shall include each deliverable and a count of artifacts by artifact type associated with each deliverable in the CalHEERS Deliverables Hierarchy Diagram listed under the deliverable.
3.7.5-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.7.5-05 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.7.5-06 (new)	The Contractor shall indicate the deliverable owner for each deliverable in coordination with the SDMO Deliverable Tracker.

3.8 SOW REQUIREMENTS MANAGEMENT

Changes to SOW requirements represent the set of requirements that are defined in the SOW. Review of SOW requirements will occur at various times during the Project to ensure the expectations of the Contract are being met. Changes may be required to the SOW requirements, and may occur due to Federal guidance, technology, testing or implementation, revisions in Project budget, or other emerging needs.

Note: SOW Requirements Management is not to be confused with System Requirements Management which is the management of System-specific requirements that relate to the physical hardware and software that make up the CalHEERS solution. Please refer to SOW Section 4.5, SYSTEM REQUIREMENTS MANAGEMENT, for more information regarding the expectation for managing the CalHEERS System solution.

3.8.1 SOW Requirements Management Plan

Table 3-33: SOW Requirements Management Plan (CD-3.8-1)

Req #	SOW Requirement
3.8.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS SOW Requirements Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Update Frequency 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints

Req #	SOW Requirement
	4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. SOW REQUIREMENTS MANAGEMENT PLAN 7.1 SOW Requirements Management Methodology 7.1.1 Requirements Management Initiation (Methodology Step 1 of 5) 7.1.2 Tracking Requirements (Methodology Step 2 of 5) 7.1.3 Requirement Compliance Tracking (Methodology Step 3 of 5) 7.1.4 Reporting (Methodology Step 4 of 5) 7.1.5 Requirements Change Management (Methodology Step 5 of 5) 8. SOW REQUIREMENTS TRACEABILITY TRACKING SYSTEM (RTTS) 8.1 RTTS Information 8.1.1 RTTS Column Definitions 8.2 RTTS Maintenance 8.3 RTTS Access 9. SOW REQUIREMENTS TRACEABILITY REPORTING (RTR) 9.1 SOW Requirements Status Report 9.1.1 SOW Requirement Status Summary 9.1.2 SOW Compliance Tracking Status Summary 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
3.8.1-02 (new)	The Contractor shall staff, manage, lead and execute SOW Requirements Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.8-1 – SOW Requirements Management Plan.
3.8.1-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.8.1-04 (modified)	The Contractor shall address and track all SOW Requirements defined in Appendix A-4 STATEMENT OF WORK as part of the Requirements Management approach. The Contractor shall ensure that all requirement changes, including additions, modifications, and deletions shall be incorporated and formalized as amendments to the final Contract.
3.8.1-05 (modified)	The Contractor shall develop, deliver and implement a SOW Requirements Management Plan that includes the following key elements: 1. Methodology for tracking and validating the proper planning, execution, and changes of Contract requirements. 2. Assumption for the definition, tracking, and traceability of SOW requirements throughout the life cycle of the Contract. 3. Maintenance of SOW requirements. 4. Project management requirement definition, tracking, traceability, and verification 5. Forward traceability of Contract requirements to the documents and processes that are created to fulfill the Contract expectations. 6. Backward traceability of Contract work products and processes to the requirement in the Statement of Work by which the end product is intended to fulfill. 7. Provisions to ensure that all requirement changes, including additions, modifications, and deletions shall be incorporated and formalized as amendments to the final contract.
3.8.1-06 (new)	The State identifies and associates the following artifacts to the SOW Requirements Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • SOW Requirements Traceability Reporting • SOW Requirements Traceability Tracking System

Req #	SOW Requirement
	- SOW RTTS Verification Summary View QRG - SOW Requirement Status Summary - SOW Compliance Tracking Status Summary
3.8.1-07 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.8.1-08 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.8.1-09 (modified)	The Contractor shall update, or develop, and attach to the SOW Requirements Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: - SOW Requirement ID # - SOW Requirement Text - Requirement Traceability (Define traceability of the requirements to the Deliverable) - Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: - Artifact Name - Associated Parent DEL - State Approver - SI Point of Contact - Review Frequency - Submission Frequency - Artifact File Format - Artifact Location (e.g., SharePoint breadcrumb) - Link to artifact

3.8.2 SOW Requirements Traceability Tracking System

The Contractor must produce a SOW Requirements traceability tracking System to reflect and track the requirements defined in the SOW.

Table 3-34: SOW Requirements Traceability Tracking System

Req #	SOW Requirement
3.8.2-01 (existing)	The Contractor shall develop a System for tracking and managing SOW requirements throughout the SDMO life cycle.
3.8.2-02 (existing)	The Contractor shall provide a SOW Requirements Traceability Tracking System that must be fully accessible by the State and be used collaboratively with the Contractor in managing SOW requirements.

3.8.3 SOW Requirements Traceability Reporting

The Contractor will generate reports that the State and Contractor can use to track and manage progress of SOW execution.

Table 3-35 : SOW Requirements Traceability Reporting

Req #	SOW Requirement
3.8.3-01 (modified)	The Contractor shall produce and deliver reports from the SOW Requirements Traceability tracking System that can be used to provide progress of SOW execution.

3.9 PROBLEM ESCALATION

Effective problem escalation is critical to the success of the project and the timely resolution of issues that may impact scope, schedule, cost, or quality. The Contractor is expected to actively participate in the escalation process by identifying, documenting, and escalating risks, issues, decisions, and change requests in a timely and transparent manner. The State maintains and manages the CalHEERS Governance Plan, which outlines the formal escalation procedures and governance structure. The Contractor will collaborate closely with the State to ensure that all escalations are handled in accordance with the defined processes. The section below outlines the specific requirements related to problem escalation.

3.9.1 Problem Escalation

Table 3-36: Problem Escalation

Req #	SOW Requirement
3.9.1-01 (existing)	The Contractor shall adhere to following escalation processes documented in the <u>State's</u> CalHEERS Governance Plan, including but not limited to <u>such areas as</u> : 1. Change Requests 2. Risks 3. Issues 4. Decisions
<u>3.9.1-02</u> <u>(new)</u>	<u>The Contractor shall understand and operate within the four-tiered CalHEERS Governance structure (Strategic, Committee, Tactical, and Operational levels) when escalating issues, risks, decisions, and change requests.</u>
<u>3.9.1-03</u> <u>(new)</u>	<u>The Contractor shall support the principle of resolving issues at the lowest appropriate level and escalate only when resolution cannot be achieved within the current governance tier.</u>
<u>3.9.1-04</u> <u>(new)</u>	<u>The Contractor shall document and communicate escalations in accordance with the escalation paths and decision-making hierarchy defined in the CalHEERS Governance Plan.</u>
<u>3.9.1-05</u> <u>(new)</u>	<u>The Contractor shall collaborate with the State to ensure that all escalations are accompanied by sufficient background, analysis, and recommended options to support timely decision-making at the appropriate governance level.</u>

Req #	SOW Requirement
<u>3.9.1-06</u> <u>(new)</u>	<u>The Contractor shall maintain alignment with the CD-3.6-1 Communication Plan and Governance Plan to ensure consistent messaging and traceability of escalated items.</u>
<u>3.9.1-07</u> <u>(new)</u>	<u>The Contractor shall participate in governance meetings as required and provide updates on the status of escalated items, including resolution progress and outcomes.</u>

3.10 QUALITY MANAGEMENT

The Contractor must develop and implement an approach to managing the overall quality of the CalHEERS Project. The approach shall be proactive, with a focus on preventing problems rather than allowing problems to occur and then devoting valuable resources to their correction. The quality management approach should address adherence to Project standards, templates, processes and procedures. Project members must be alerted to any changes that affect general work procedures, templates or standards, and the Contractor shall implement those changes in a timely manner.

Metrics for measuring quality from both Project management and System perspectives should be defined. System defects or deficiencies should be specifically addressed. As the Contractor addresses issues and concerns, solutions are expected to be shared and process improvements instituted so that similar situations can be avoided in the future. The quality management methodology should also address user satisfaction.

Achieving Project objectives involves a cooperative working relationship between the Contractor, CalHEERS, Project Sponsors, Program Partners, QA, and IV&V. The State expects the Contractor to work collaboratively with these resources to identify trends and potential problems and to formulate recommendations and solutions, both independently and jointly. The State expects these resources to conduct a variety of assessments, some on a periodic basis and others targeting specific performance or other issues. The Contractor is expected to provide requested information and access to data to complete these assessments and include these resources in meetings and communications regarding both actual and potential issues, problems, and trends.

The Contractor will track all technical, business, federal, and California state standards and codes in a single repository as they relate to each deliverable in SOW 8. The Contractor will annually review existing and new standards, and as new versions of technical, business, federal, and California State standards and codes are available, adoption of the new standard will be considered through the Quality Management process and approved by the State Project Director or designee.

3.10.1 Quality Management Plan (QMP)

The Quality Management Plan (QMP) describes the overall approach and direction for the quality program to ensure the Contractor/State team is improving in their ability to produce quality products using quality processes.

Table 3-37: Quality Management Plan (CD-3.10-1)

Req #	SOW Requirement
3.10.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Quality Management Plan, which includes but is not limited to: 1. INTRODUCTION 6 1.1 Purpose 1.2 List of Reference Documents and Standards 1.3 Audience

Req #	SOW Requirement

3.10.1-02 (new)	The Contractor shall staff, manage, lead and execute Quality Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.10-1 – Quality Management Plan.
3.10.1-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.10.1-04 (existing)	The Contractor shall develop and maintain quality management program. This program will be described in the Quality Management Plan (QMP) and must address how Services and Deliverables, including Production Releases will: 1. Meet defined Requirements, business and performance objectives, and user expectations. 2. Be as free of errors as possible and meet all defined Acceptance criteria. 3. Meet corresponding metrics must be defined and captured to measure all aspects of quality by phase or key task.
3.10.1-05 (modified)	The Contractor shall update, deliver, maintain, and execute the QMP in accordance with IEEE Std 730-2014, and version 6 of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide) pertaining to quality management. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.10.1-06 (modified)	The Contractor shall ensure that the QMP addresses Quality Assurance planning in accordance with the following standards pertaining to the Quality Assurance Process and Software Quality Assurance Plans: 1. IEEE Standard for System and Software Verification and Validations, Revision of IEEE Std 1012-2004 2. IEEE Standard for Software Quality Assurance Processes (12.8.5-VVP Section

Req #	SOW Requirement
	7.4 Control procedures) 3. IEEE Std 730-2014 (Revision of IEEE Std 730-2002 (Annex C-Guidance for creating Software Quality Assurance Plans) As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.10.1-07 (modified)	The Contractor shall ensure that the QMP addresses Verification and Validation planning in compliance with the current IEEE Standards for Software Reviews and Audits. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee: 1. IEEE Std 1028-2008 (Revision of IEEE Std 1028-1997) (6-Inspections) IEEE Standard for System and Software Verification and Validation, Revision of IEEE Std 1012-2004 (9-Software V&V activities, 12-VVP Section 7.4 Control Procedures); Verification Process; Quality Assurance Process; Software Verification and Validation; and Inspections.
3.10.1-08 (existing)	The Contractor shall ensure that the quality program methodology and activities (defined by the QMP) are compatible, coordinated, and consistent with the strategic planning methodology, processes & procedures, and roadmap (defined in SOW Section 3.15, STRATEGIC PLANNING AND MANAGEMENT).
3.10.1-09 (modified)	The QMP shall identify the skillsets and experience the Contractor Staff for developing quality deliverables, in compliance with SOW Section 8.3, PREPARATION OF DELIVERABLES, and also execute continual process improvement efforts, as defined in SOW Section 3.10.7, PROCESS IMPROVEMENT.
3.10.1-10 (modified)	The Contractor shall outline in the QMP, the initiatives that will be established and reported to improve efficiencies of fixed price services (by 5% per year) as required by this Contract (See Appendix D, COST WORKBOOK, D-5 SDMO FIXED PRICE).
3.10.1-11 (existing)	The Contractor shall ensure that the QMP addresses Quality Assurance planning in accordance with the following standards pertaining to the Quality Assurance Process and Software Quality Assurance Plans: 1. IEEE Standard for System and Software Verification and Validations, Revision of IEEE Std 1012-2004 2. IEEE Standard for Software Quality Assurance Processes (12.8.5-VVP Section 7.4 Control procedures) 3. IEEE Std 730-2014 (Revision of IEEE Std 730-2002 (Annex C-Guidance for creating Software Quality Assurance Plans)
3.10.1-12 (existing)	The Contractor shall describe its approach, expectations, and assumptions for coordinating and working with QA, IV&V and oversight consultants as part of the overall Quality management methodology.
3.10.1-13 (existing)	The Contractor shall participate in Quarterly Balanced Scorecard Reviews and/or similar reviews to provide the CalHEERS Steering Committee with tangible evidence regarding the overall progress and health of the CalHEERS Project.
3.10.1-14 (existing)	The Contractor shall ensure that the QMP describes the materials, methods, detailed procedures and automated tools used to support the quality management process.
3.10.1-15 (existing)	The Contractor shall ensure that the QMP includes sample logs, forms, and reporting mechanisms that support the Quality Management process.
3.10.1-16 (existing)	The Contractor shall ensure that the QMP describes how the Contractor shall work cooperatively with multiple agencies and project participants including State staff, county staff, Subcontractors and others.
3.10.1-17 (existing)	The Contractor shall ensure that the QMP describes the methods used to ensure that all work performed by the Contractor is monitored and measured against the requirements of the Contract on an ongoing basis.

Req #	SOW Requirement
3.10.1-18 (existing)	The Contractor shall ensure that the QMP describes how the Contractor supports the State's Quality Assurance and Project Oversight activities.
3.10.1-19 (existing)	The Contractor shall ensure that the QMP describes the Contractor's internal Deliverable review process.
3.10.1-20 (new)	The State identifies and associates the following artifacts to the Quality Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Process Audit Reports-Operations • Process Audit Reports-System Security • Capability Maturity Model Integration Assessment • Process Assurance Audits & Reports • Metrics List • Standards and Codes Annual Report • Process Improvement Labor Hours Log • CalHEERS Continuous Process Improvement Request Form • CPI Dashboard • CPI Recommendation Presentation • Lessons Learned Sessions or Emails • Process Assurance Tracker
3.10.1-21 (new)	The Contractor shall develop a methodology to track, review, and update technical, business, federal, and California state standards and codes in a single repository that occurs on an annual basis. Refer to CD-3.10-2 Standards and Codes Tracker. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.10.1-22 (new)	The Contractor shall provide an annual report as an Artifact of Standards and Codes that are recommended for update to a new version.
3.10.1-23 (new)	The Contractor shall in collaboration review the Standards and Codes Annual Report to determine which standards will be updated and follow the project change control process.
3.10.1-24 (new)	The Contractor shall validate that new standards are updated in the associated deliverables as they are submitted for their next review during the annual review cycle as determined by the Annual Deliverable Prioritization review.
3.10.1-25 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.10.1-26 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.10.1-27 (modified)	The Contractor shall attach to the Quality Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title

Req #	SOW Requirement
	2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.10.2 Quality Assurance Planning

Quality Assurance planning consists of establishing standards, conducting reviews, monitoring progress, conducting process audits and performing project health checks. Quality reviews include documentation, deliverables and peer reviews. Process audits address quality by validating that CalHEERS processes, standards, and procedures are conforming to Contract requirements. The purpose of Quality Assurance planning is to provide a common approach for performing Quality Assurance activities.

Table 3-38 : Quality Assurance Planning

Req #	SOW Requirement
3.10.2-01 (existing)	The Contractor shall meet the Quality Assurance requirements of CalHEERS and the DHCS and Covered California Program as defined in the QMP.
3.10.2-02 (existing)	Upon the State's request, the Contractor shall make available Contractor staff, resources, processes, data, tools, and deliverables for State Quality Assurance (QA) and Independent Verification and Validation (IV&V) audits and inspections at no additional cost to the State.

3.10.3 Process Audit Reports-Operations

The Process Audit Reports—Operations shall document the results of audits of key operational processes.

Table 3-39: Process Audit Reports-Operations

Req #	SOW Requirement
3.10.3-01 (existing)	The Contractor shall take over, update, deliver, and maintain the Process Audit Reports– Operations Deliverable that, includes but is not limited to, the following content: 1. Process Owner 2. Auditor's Name 3. Start Date 4. End Date 5. Process Area (Operations) 6. Activity and Criteria (Activities from the Operations Plan) 7. Observation Description 8. Corrective Action 9. Score
3.10.3-02 (existing)	The Contractor shall update the Process Audit Reports–Operations Deliverable to ensure compliance with IEEE Standard for Software Quality Assurance Processes, IEEE Std 730-2014 (Revision of IEEE Std 730-2002) (5.5-Process assurance activities) pertaining to Process Assurance.
3.10.3-03 (existing)	The Contractor shall document within the Process Audit Reports – Operations Deliverable the results of audits of key operational processes and activities with regard to compliance with the Operations Plan. Processes to review, as defined in the Operations Plan, shall be determined by the State Project Director or designee, for example: 1. Data Archiving 2. Performance Monitoring and Management 3. System Administration Procedures for COTS Applications 4. Interface Operations Management 5. Data Distribution 6. Asset Management

3.10.4 Process Audit Reports-System Security

The Process Audit Reports - System Security artifact shall document the results of audits of the System security processes with regard to compliance with the System Security Plan.

Table 3-40: Process Audit Reports-System Security

Req #	SOW Requirement
3.10.4-01 (existing)	The Contractor shall take over, update, deliver, and maintain the Process Audit Reports–System Security artifact, which must document the results of audits of the System security processes with regard to compliance with the System Security Plan.
3.10.4-02 (existing)	The Process Audit Reports–System Security artifact shall be prepared in accordance with IEEE Standard for Software Quality Assurance Processes, IEEE Std 730-2014 (Revision of IEEE Std 730-2002) (5.5-Process assurance activities) to Process Assurance. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.10.4-03 (existing)	The Process Audit Reports–System Security artifact shall follow the guidelines developed by the National Institute for Health and the Computer Security Division of the National Institute of Standards and Technology (NIST 800-53 rev 4).

Req #	SOW Requirement
3.10.4-04 (existing)	The Contractor shall update the Process Audit Reports–System Security artifact to include, at a minimum, the following content: 1. Process Owner 2. Auditor's Name 3. Start Date 4. End Date 5. Process Area (System Security) 6. Activity and Criteria (Activities from the System Security Plan) 7. Observation Description 8. Corrective Action 9. Score

3.10.5 Capability Maturity Model Integration (CMMI)

Table 3-41: Capability Maturity Model Integration Assessment

Req #	SOW Requirement
3.10.5-01 (existing)	The Contractor shall demonstrate the Capability Maturity Model Integration (CMMI) level 3 or higher by an independent assessment and provide supporting documentation to the CalHEERS Project each year.
3.10.5-02 (existing)	The Contractor shall use the CMMI as developed by the Information Systems Audit and Control Association (ISACA) as the standard, as amended or modified, for the quality of the information System and data processing organization of the Contractor.
3.10.5-03 (existing)	The Contractor shall assess and verify from an independent third party that the Contractor is performing at CMMI Level 2 or higher within 18 months of the operations start date.
3.10.5-04 (existing)	One (1) year following the initial assessment, if at a Level 2, The Contractor shall obtain a new independent assessment that shall show at least a CMMI Level 3 and this level shall be maintained through the life of the Contract. The specific rating shall be applicable at the organizational/business unit level that shall be providing the services.

3.10.6 Verification and Validation (V&V)

Verification focuses on products that impact the specification, design, development and implementation of the CalHEERS application and is executed primarily through walkthroughs, inspections and milestone reviews. Verification is a quality process that is used to evaluate whether a product complies with the standards and business requirements. Validation is the process of establishing documented evidence that provides a high degree of assurance that a product or service satisfies its intended requirements.

Table 3-42: Verification and Validation (V&V)

Req #	SOW Requirement
3.10.6-01 (existing)	The Contractor shall ensure that the QMP addresses verification and validation planning, that include, at a minimum: 1. Contract Verification 2. Requirements Verification and Validation 3. Design Verification and Validation 4. Code Verification 5. Test Verification and Validation 6. Integration Verification 7. Implementation Verification and Validation 8. Documentation Verification

Req #	SOW Requirement
3.10.6-02 (modified)	The Contractor shall ensure that the QMP addresses Verification and Validation planning in compliance with the current IEEE Standards for Software Reviews and Audits: 1. IEEE Std 1028-2008 (Revision of IEEE Std 1028-1997) (6-Inspections) 2. IEEE Standard for System and Software Verification and Validation, Revision of IEEE Std 1012-2004 (9-Software V&V activities, 12-VVP Section 7.4 Control Procedures): Verification Process; Quality Assurance Process; Software Verification and Validation; and Inspections. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.10.6-03 (existing)	The Contractor shall verify and validate system security processes, and the adherence to those processes, as part of the execution of the Quality Assurance, Verification and Validation activities, and Process Assurance activities as defined within the QMP.
3.10.6-04 (existing)	Upon the request of the State Project Director or designee, the Contractor shall support the Independent Verification and Validation (IV&V) audit of any production release, by allowing access to processes, data, deliverables, Staff, resources and tools, to verify the as-built functionality and configuration meet Contract requirements.
3.10.6-05 (existing)	The Contractor shall prepare agendas and minutes for each review. The Contractor shall make related informal Deliverables available for review prior to each release cycle milestone in accordance with the agreed work plan.
3.10.6-06 (existing)	The Contractor shall update the QMP for Verification and Validation planning to include but not be limited to: 1. Items subject to verification and validation as defined by State Project Director or designee. 2. Verification and validation tasks to be performed. 3. Resources, responsibilities, and schedule for verification and validation. 4. Procedures for forwarding verification and validation reports to the State.
3.10.6-07 (existing)	The Contractor shall include with the QMP for Verification and Validation planning the following appendices: 1. Post Installation Verification Test Plan – Checklist 2. Traceability Guide 3. Technical Review Checklist 4. Deliverable QA Checklist
3.10.6-08 (existing)	The Contractor shall conduct semi-annual audits of the System Security processes, at no additional cost to the State, and report compliance with the System Security Plan.

3.10.7 Process Improvement

Process improvement will be used to ensure that the quality program established through the QMP will improve the practices that support the CalHEERS that produces the greatest value to the State and the people it serves.

3.10.7.1 Process Improvement Planning

Process Improvement planning is the foundation for establishing an effective process improvement methodology for improving CalHEERS management, business, and technical processes. The Contractor shall work with the OSI, DHCS, Covered California, and stakeholders to establish and facilitate collaborative improvement workshops to identify opportunities for improving the CalHEERS M&O service processes. The Process Improvement planning describes the means to evaluate the cost and effort estimating methodology used for change development and release management. The plan also defines the Contractor's

improvement methodology to include the identification, resolution and implementation of needed improvements.

Table 3-43: Process Improvement Planning

Req #	SOW Requirement
3.10.7-01 (existing)	The Contractor shall conduct process improvement activities as addressed in the QMP to analyze, identify, resolve, and implement improvements to add value to processes for program support, project management, System maintenance, change and operations.
3.10.7-02 (modified)	Process improvement shall be applied (as defined the QMP) to, and coordinated with, the following areas of the Appendix A- ~~34~~ , STATEMENT OF WORK: 1. SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS 2. SOW Section 4, SYSTEM CHANGE & ENHANCEMENTS REQUIREMENTS 3. SOW Section 5, PROGRAM SUPPORT REQUIREMENTS 4. SOW Section 6, OPERATION REQUIREMENTS 5. SOW Section 7, TRANSITION REQUIREMENTS
3.10.7-03 (existing)	The Contractor shall ensure that the planning, analysis, findings, and execution of process improvement (defined by the QMP) are compatible, coordinated, and consistent with the strategic planning methodology, processes & procedures, and roadmap (defined in SOW Section 3.15, STRATEGIC PLANNING AND MANAGEMENT).
3.10.7-04 (existing)	The planning, analysis, findings, and execution of process improvement shall be implemented through the established change control process as a “no cost” change, unless otherwise agreed to by the State.
3.10.7-05 (existing)	The Contractor shall address the lessons learned, through process improvement activities, over the term of the Contract, as defined within the QMP for Process Improvement planning.
3.10.7-06 (existing)	The Contractor shall conduct and participate in a Process Improvement Review Meeting to review planned, in-progress, and completed process improvement activities, as well as discuss collected lessons learned. These meetings shall be coordinated alongside the Project Management Maturity improvement activities.
3.10.7-07 (modified)	The Contractor shall ensure that the QMP addresses Process Improvement in accordance with ISO/IEC/IEEE Standard 16326-2009 – Systems and Software Engineering - Life Cycle Processes – Project Management (5.4.2-Process Improvement Plan) pertaining to Process Improvement, and the most current version of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide) pertaining to Quality. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.10.7-08 (modified)	The Contractor shall include procedures for conducting the Customer Satisfaction Surveys in the QMP for Process Improvement Planning. The Contractor shall, in collaboration with the State, develop surveys to be distributed to the end users annually. • Service Desk Customer Satisfaction Survey • CalHEERS Staff Satisfaction Survey • State Sponsor Satisfaction Survey
3.10.7-09 (existing)	The Contractor shall include in the QMP for Process Improvement, how any individual improvement effort can be quantified.

3.10.7.2 Implementation of Improvement Recommendations

The implementation of process improvement initiatives, Will be coordinated and implemented collaboratively with the State and the Contractor. These improvements will be directed specifically towards processes and practices that add value to the CalHEERS program while

also reducing the cost of doing business for both the State and Contractor over the life of the Contract.

Table 3-44: Implementation of Improvement Recommendations

Req #	SOW Requirement
3.10.7-10 (modified)	The Contractor shall lead in executing the improvement recommendations identified in process improvement initiatives covered by the QMP under Process Improvement.
3.10.7-11 (existing)	The Contractor shall coordinate and conduct/facilitate improvement activities and progress reporting to show how improvement activities are adding value and reducing the overall cost of doing business.
3.10.7-12 (existing)	The Contractor shall lead and assist the State in executing and updating the schedule for incremental improvements.
3.10.7-13 (existing)	The Contractor shall maintain and track progress of the schedule and provide periodic presentations on progress of the recommendations for improvement to both, State/Contractor staff, and management audiences.
3.10.7-14 (existing)	The Contractor shall organize, prepare, and facilitate periodic meetings to review the status of improvement activities identified in the Improvement Schedule.
3.10.7-15 (existing)	Improvement activities that impact the Contractor's processes and practices shall be incorporated into the Contractor's overall practices at no additional cost to the State. Contractor plans, processes and procedures (resulting from improvements) shall be updated and submitted as part of the normal documentation update cycles.
3.10.7-16 (modified)	The Contractor shall expend no less than 2,000 labor hours each year implementing the improvements identified from executing the requirements of SOW Section 3.10.7, PROCESS IMPROVEMENT. This effort is at no additional cost to the State as it is to be included under the Quality Management line item within the Appendix D-5, SDMO FIXED PRICE cost component of the Cost Workbook.

3.10.8 Standards, Regulations, and Codes Tracking and Updates

The State is interested in maintaining visibility over the large number of standards, regulations, and codes that are relied on to ensure our systems and processes are to the latest expectations. Therefore, a section under Special Provisions has been created to support this need. Refer to Section A-2 Special Provisions Section 7.7 [UPDATES TO STANDARDS, REGULATIONS, AND CODES Updates](#), for details and expectations, along with the tracking, reporting and collaboration needed between the contractor and the State.

Table 3-45: Standards and Codes Tracker (CD-3.10-2)

Req #	SOW Requirement
3.10.8-01 (new)	The Contractor shall develop and maintain a Standards, Regulations, and Codes Tracker as a SharePoint list as a tool to monitor, update, and provide traceability of all technical, business, federal, and California state standards and codes in a single repository
3.10.8-02 (new)	The Contractor shall collaborate with the State on the development and maintenance of the Standards and Codes Tracker.
3.10.8-03 (new)	The Contractor shall at a minimum include the following fields in the Tracker: • Current Standard (verbiage of current standard) • Current Version Standard • Decision Item number when the last update decision was made • Date of the update • Date of project implementation • Previous Standard (verbiage of previous standard version) • Deliverable ID (deliverable or deliverables which reference this standard)

3.10.9 Metrics

Table 3-46: Metrics

Req #	SOW Requirement
3.10.9-01 (modified)	The Contractor shall document a SOP to produce the Metrics and track and report on all existing metrics for the CalHEERS Project and include the tracking and reporting of new metrics as deemed necessary by the approved QMP.
3.10.9-02 (existing)	The Contractor shall document the definitions, methods, tools, reporting and frequency of all project metrics within the QMP.
3.10.9-03 (existing)	The Contractor shall document within the QMP the process State staff can utilize to gain access to the Contractors raw metrics data.

3.10.10 Process Assurance

3.10.10.1 Process Assurance Planning

Process Assurance planning defines the project's approach to validating compliance to established standards and processes. The purpose of process assurance is to provide an objective insight into process assurance-related activities and associated work products.

Table 3-47: Process Assurance Planning

Req #	SOW Requirement
3.10.10-01 (existing)	The Contractor shall ensure that the QMP addresses Process Assurance planning, which defines how the Contractor will meet and maintain key process areas.
3.10.10-02 (existing)	The Contractor shall ensure that the QMP addresses Process Assurance planning in accordance with 730-2014-IEEE Standard for Software Quality Assurance Processes (5.5-Process assurance activities) pertaining to Process Assurance.
3.10.10-03 (existing)	The Contractor shall conduct Process Assurance activities in accordance with the QMP.
3.10.10-04 (existing)	The Contractor shall document, in the QMP for Process Assurance planning, the project's approach to validating compliance with established standards and processes.
3.10.10-05 (existing)	The Contractor shall include in the QMP for Process Assurance planning, the following actions: 1. Objectively evaluate performed processes and work products against the applicable standards and procedures, (e.g., Capability Maturity Model, Project Management Maturity Model). 2. Identify and document noncompliance issues. 3. Provide feedback to State staff on the results of quality assurance activities. 4. Verify that noncompliance issues are addressed.

Req #	SOW Requirement
3.10.10-06 (existing)	The Contractor shall describe in the QMP for Process Assurance planning, the Contractor's detailed approach to process assurance, shall include, but not be limited to, the following information: 1. Project Planning 2. Project Monitoring and Control 3. Risk Management 4. Issue Management 5. Change Management 6. Schedule Management 7. Communication Management 8. Requirements Management 9. Technical Solution 10. Product Integration 11. Verification (Verify selected work products/deliverables meet the required specifications) 12. Validation (Demonstrate that a product fulfills its intended use) 13. Configuration Management 14. Quality Assurance 15. Causal Analysis and Resolution (Related to defects and other problems) 16. Operations Planning and Management
3.10.10-07 (existing)	The Contractor shall focus on the following criteria for each process area within the QMP for Process Assurance planning: 1. Management Commitment 2. Ability to Perform 3. Defined and Repeatable Activities 4. Measurement, Metrics and Analysis 5. Audits and Review Processes

3.10.10.2 Process Assurance Audits & Reporting

Process Assurance audits and reporting is the mechanism that ensures processes are being followed in accordance with the processes defined in the QMP. This process also includes the access by the State to Contractor work products, tools, and data so that audits can be performed by the State if desired.

Table 3-48: Process Assurance Audits & Reports

Req #	SOW Requirement
3.10.10-08 (existing)	The Contractor shall support the Project Office, by providing access to Contractor Staff, tools and data, as State staff conduct Configuration Management process audits that verify compliance with the Configuration Management Plan and ensure CIs are properly controlled.
3.10.10-09 (existing)	The Contractor shall provide access to work products, tools and data necessary for the State to conduct process audits.
3.10.10-10 (existing)	The Contractor shall support the Project Office by providing access to Contractor Staff, tools and data, as State staff conduct periodic audits of the Quality Assurance process to ensure the processes follow the QMP.
3.10.10-11 (existing)	The Contractor shall conduct semi-annual audits of the System Security processes to determine, and report on, compliance with the System Security Plan.
3.10.10-12 (existing)	The Contractor shall conduct audits and report on findings as defined by the QMP under Process Assurance.

3.11 CONTRACT MANAGEMENT

This section describes how the Contractor will collaborate with the State to track compliance and progress against contract requirements, and how changes to the contract will be identified, tracked, managed, and then implemented. This section also addresses the expectations regarding the regular oversight and interactions with the State during course of contract execution. This section is not to be confused with the management of System changes which is discussed in SOW 4.

3.11.1 Contract Management Plan

The Contract Management Plan is what describes how the Contractor, and the State will work collaboratively together to ensure the smooth execution of the signed contract and all of the mechanisms to ensure compliance and timely responses on matters specific to the contract.

Table 3-49: Contract Management Plan (CD-3.11-1)

Req #	SOW Requirement
3.11.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the Contract Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Out-of-Scope 3. APPROACH 3.1 Assumptions 3.2 Constraints 3.3 Risks 4. REQUIREMENTS 5. ROLES AND RESPONSIBILITIES 5.1 Contractor Roles and Responsibilities 5.2 State Roles and Responsibilities 6 CONTRACT CHANGE PROCESS 6.1 Phase 1: Identify Potential Contract Changes 6.2 Phase 2: Finalize Contract Changes 6.3 Phase 3: Develop Contract Amendment 6.4 Phase 4: Route the Contract Amendment for Approvals & Execution 7. INTERACTION WITH OTHER PROJECT PROCESSES 8. CONTRACT MANAGEMENT TOOLS 8.1 Tracking Contract Requirement Compliance 8.2 Tracking Contract Candidates for Changes 9. QUARTERLY SCOPE ASSESSMENT 9.1 Scope Assessment Process 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
3.11.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with <u>the approval</u> of the State Project Director or designee.
3.11.1-03 (new)	The State identifies and associates the following artifacts to the Contract Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to:

Req #	SOW Requirement
	• Scope Assessment Process • State Contract Change Candidate
3.11.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.11.1-05 (modified)	The Contractor shall attach to the Contract Management Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.11.2 Contract Management Progress Tracking

The following requirements articulate expectations for the Contractor to indicate progress over the life of the Contract.

Table 3-50: Contract Management Progress Tracking

Req #	SOW Requirement
3.11.2-01 (new)	The Contractor shall staff, manage, lead and execute Contract Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.11-1 – Contract Management Plan.
3.11.2-02 (new)	The Contractor shall provide knowledgeable resources who have a good understanding of the contract and technical knowledge to address contract issues that arise throughout the lifecycle of the contract.

Req #	SOW Requirement
3.11.2-03 (new)	The Contractor shall record contract-related Decision Items (DIs) and Action Items (AIs) at the request of the State using the State's repository for tracking DIs and AIs. The Contractor shall communicate DI and AI information to their staff and ensure contract-related items are tracked, reported, and resolved in the timeframes logged in the tool. Updates and reporting shall be done at least on a weekly basis.
3.11.2-04 (new)	For contract-related items or topics that require escalation, the Contractor shall work directly with and collaborate with the State Contracts Manager (and team) when working through the existing CalHEERS escalation and dispute resolution processes. The State requires that escalated contract-related issues not be separated by the Contractor from the State's contracts team when including State leadership on contract disputes and interpretations.
3.11.2-05 (new)	In accordance with existing CalHEERS processes, the Contractor shall not engage in contract discussions, contract interpretations or contract disputes without the inclusion of the State Contracts team.
3.11.2-06 (new)	The Contractor shall adhere to the meeting timeframes and schedules established by the Contract Management Plan, and a mutually agreed contract team meeting calendar.
3.11.2-07 (new)	When offering an interpretation of contract language, the Contractor shall provide direct contract language with references so that the State Contracts Team can properly evaluate and engage in meaningful discussion and response to Contractor requests. Furthermore, historical precedence shall not be an acceptable argument for non-compliance with Contract violation of requirements and terms of the Contract. - Undiscovered contract violations do not warrant a de facto precedence argument.
3.11.2-08 (new)	If the State Assess Impact (SAI) process warrants a temporary violation of contract terms due to Project and Client time constraints/priorities, the Contractor shall work with the State to record, track, and resolve contract violations as part of the Contracts Management process after-the-fact. The SAI process shall not be used as a means to cut contract corners or bypass contract requirements. -Rather, there will be a provision to allow resolution of allowed violations to be resolved outside the normal project process (as approved by the State).
3.11.2-09 (new)	Prior to submitting to the State any new processes developed for the project, the contractor shall collaborate with the State Contracts Team to verify that new processes comply with the Contract, and any process(es) found to be out of compliance are corrected and approved by the State.
3.11.2-10 (new)	The Contractor shall conduct and facilitate recurring meetings (as mutually agreed between the State and the Contractor) with the Contract Management Team to address concerns and progress for any issues with the Contract.
3.11.2-11 (new)	The Contractor shall conduct formal quarterly scope assessments.
3.11.2-12 (new)	The Contractor shall ensure that those attending contract team meetings have sufficient knowledge of both the contract subject matter as well as the technical subject matter expertise, or bring additional SMEs as needed.
3.11.2-13 (new)	The Contractor shall record Issues, Action Items, Decision Items, and Risks using the existing EWM tool. No offline tracking will be allowable under this contract.
3.11.2-14 (new)	The Contractor shall not escalate or discuss potential conflicts with the contract to State leadership without State Contracts Team representation. Contract requests and decisions which require escalation to State leadership shall be formally documented in EWM.
3.11.2-15 (new)	The Contractor shall work collaboratively with the State Contracts team to determine the proper cadence and mode of communication for tracking and managing contract-related topics.
3.11.2-16 (new)	The Contractor shall prepare formal Agenda and meeting minutes for weekly (or periodic) Contract Team meetings. Meetings shall include a formal record of Action items, Issues, Decision Items, and Risks, include the status of each.

Req #	SOW Requirement
3.11.2-17 (new)	The Contractor shall collaborate with the State to assess compliance to Contract Requirements using the Contract Requirements Tracking Tool already in existence on the project.
3.11.2-18 (new)	The contractor shall update and maintain the Contract Requirements Tracking tool to ensure it is accurate and correct.
3.11.2-19 (new)	The Contractor shall report on the progress of all requirements and the degree to which requirements have been satisfied.
3.11.2-20 (new)	The Contractor shall site specific Contract requirements that are relevant to the Change Request process when going through the Contractor Assessment and SAI.
3.11.2-21 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.11.3 Changes to the Contract

The section will describe how changes to the Contract will be managed.

Table 3-51: Changes to the Contract

Req #	SOW Requirement
3.11.3-01 (existing)	The Contractor shall establish and implement a formal Change Control Process to manage Project Scope. Change Control will provide a process to discuss, analyze, and document the impact of the change in scope and determine direction and next steps.
3.11.3-02 (existing)	The Contractor shall inform the State Project Director or designee of any potential deviation in scope or potential changes as soon as is reasonably possible to discuss, analyze and document the impact of the change.
3.11.3-03 (new)	The Contractor shall collaborate with the State and utilize the formal Contract Change Control Process used today by the CalHEERS Project to manage contract changes.
3.11.3-04 (new)	The Contractor shall utilize the EWM Action item or Decision Item tool as well as notifying the Contracts Team when proposing any potential deviation in scope or potential changes as soon as is reasonably possible to discuss, analyze and document the impact of the change.
3.11.3-05 (new)	The Contractor shall utilize and comply with the current Contract Change Management Process (CCMP) used by the CalHEERS Project to identify and manage candidates for contract changes are identified, tracked, reviewed, evaluated, and then either rejected or approved.
3.11.3-06 (new)	The Contractor shall utilize the CCMP to define the roles and responsibilities associated with this process, the cadence for contract change candidate review, the tool used by the CalHEERS Project team to log, track, and disposition each potential change.
3.11.3-07 (new)	The Contractor shall include as part of the CCMP the contract amendment process, cadence, and the roles and responsibilities State and Contractor team members play in the process.

3.11.4 Corrective Action Plan (CAP)

The Contractor may be required to provide and execute a Corrective Action Plan (CAP) in the very rare instance where a Contractor fails to meet a Contract requirement and ~~“Contractor Shall”~~ has not been able to be corrected through the normal communication channels and the matter has been escalated to the State Project Director or designee for intervention. ~~In this case, the State will may~~ will compel the Contractor to correct the ~~“Contractor shall”~~ Deficiency using a CAP wherein the Contractor shall articulate the specific steps that will be taken to correct the Contract Deficiency so that it does not happen again.

Note: Refer to Special Provisions, Section 7.3, CORRECTIONS OF DEFICIENCIES for the full set of correction action methods required under this Contract.

Table 3-52: Corrective Action Plan (CD-3.11-2)

Req #	SOW Requirement
3.11.4-01 (existing)	The Contractor shall document a SOP to produce the Daily Production Status Report and provide and execute a corrective action plan (CAP) for a Deliverable or service provided by the Contractor, which has been rejected by the State Project Director or designee. If the revision of a Deliverable requires longer than five (5) Business Days, or at the State's request, the Contractor shall provide a CAP within five (5) Business Days of receiving a Notice of rejection of the Deliverable or Service pursuant to Appendix A-2, SPECIAL PROVISIONS, Section 18.12, NOTICES, Section 7.3, CORRECTIONS OF DEFICIENCIES, and SOW Section 8.5.2, REVISED FORMAL DELIVERABLES.
3.11.4-02 (modified)	The Contractor shall update the CAP to be in compliance with the ISO/IEC 12207, IEEE Std 12207-2008 - Systems and software engineering – Software life cycle processes (6.2 Organizational Project-Enabling Processes). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
3.11.4-03 (modified)	The Contractor shall develop and execute the CAP, which must describe the changes necessary to bring the <u>Deficiency back to acceptable levels -contract, a process, Deliverable or Contract performance</u> to an acceptable level of compliance as determined by OTSI and the Contract.
3.11.4-04 (modified)	When requested by the State, the Contractor shall prepare a CAP to include but is not limited to the following: 1. Description of the “Contractor shall” Deficiency 2. Root cause analysis of the Contract Deficiency 3. Contractor corrective action steps, assumptions, and constraints 4. Assigned resources (including names and positions) 5. Action Plan schedule, to include planned and actual completion dates
3.11.4-05 (modified)	The Contractor shall describe in the CAP the changes necessary to prevent reoccurrence of a Contract non-compliance, or other future type occurrences.
3.11.4-06 (modified)	The Contractor shall include within the CAP a subject that identifies the Deficiency title, and when applicable, the date that the problem occurred.
3.11.4-07 (existing)	The Contractor shall only execute a CAP following receipt of written approval from the State Project Director or designee.
3.11.4-08 (existing)	The Contractor shall provide a written report of the status and progress of the CAP activities weekly to the State Project Director or designee.
3.11.4-09 (existing)	The Contractor shall notify the State Project Director or designee in writing when the activities within a CAP have been successfully executed.
3.11.4-10 (existing)	The Contractor shall consider the CAP complete based upon the State Project Director or designee's review and approval.
3.11.4-11 (existing)	The Contractor shall deliver for review, any documentation requested by the State Project Director or designee to support the State's CAP completion evaluation.

3.11.5 Subcontractor Management

The Contractor must employ an approach for management of Subcontractor Staff that facilitates a productive working relationship and progress towards task completion.

The Contractor is responsible for the overall management of all work that is delivered by its subcontractors for the CalHEERS Project. In this capacity, the Contractor will apply a comprehensive approach based on clear guiding principles, as described below, that will enable delivery of high-quality work and strengthen long term relationships between the State and the Contractor.

Table 3-53: Contractor/Subcontractor Management

Req #	SOW Requirement
3.11.5-01 (existing)	The Contractor shall be responsible for the coordination, control and performance of all Subcontractors.
3.11.5-02 (existing)	All Subcontractors shall be subject to the same requirements and standards as the Contractor.
3.11.5-03 (existing)	In the event of any performance concerns for Contractor or Subcontractor Staff, the Contractor shall notify the State Project Director or designee as soon as possible and jointly discuss the approach for resolving the concern.
3.11.5-04 (new)	The Contractor shall provide Communication and Onboarding for subcontractors to include but not be limited to: • Consistent with standard onboarding procedures as documented in the staffing management plan, notify the State in a timely manner when a new subcontractor resource joins the CalHEERS Project. • Work with subcontractors to define roles and responsibilities clearly and communicate those same expectations with the State. • Subcontractors will utilize the same channels and tools as SI resources for communications related to CalHEERS Project matters (e.g. using calheers.ca.gov for emails). • Training and providing the necessary resources to transition new subcontractor resources onto the CalHEERS Project. • Access to CalHEERS Project tools, systems, and environments will be granted to subcontractors consistent with the same processes defined for SI resources. • When subcontractors have completed the agreed upon work, they will be rolled off the project consistent with standard offboarding procedures as documented in the CD-3.4-2 Staffing Management Plan.
3.11.5-05 (new)	The Contractor shall provide Oversight of all subcontractors to include but not be limited to: • Each subcontractor resource will have a SI lead who will provide direct oversight to the work and performance of said resource. • Subcontractors will be subject to the same standards and requirements as any other SI resource. The SI lead will be responsible for communicating these requirements and expectations and assumes responsibility when the requirements and expectations are not met. • For each subcontractor, the SI is responsible for all invoices/payment related activities as they relate to work performed for the CalHEERS Project.
3.11.5-06 (new)	The Contractor shall provide full transparency in the costs for all subcontractors, providing the State with any requested cost information, and shall not apply a mark-up of more than 5% to subcontractor costs, without review/approval from the State Project Director or designee.

Req #	SOW Requirement
3.11.5-07 (new)	The Contractor shall insure the quality and performance of work for all subcontractors to include but not be limited to: • The SI lead for each subcontractor will be responsible for the review and quality check for work completed by the subcontractor resource. This includes communications, work products, and deliverables that the subcontractor completes for the CalHEERS Project. • The SI will track and manage time that subcontractor resources spend on work for the CalHEERS Project. If a performance-related issue is raised for any resource (SI or subcontractor), the SI will address the concern and confirm remediation with the State Project Director or designee, or other CalHEERS leader as appropriate. • Issues may be raised by CalHEERS State, Project Sponsors, or Project Stakeholders. Subject to the severity and frequency of the issue, the SI and CalHEERS State will work collaboratively to confirm the concern, identify a proposed resolution, and execute the recommendation to completion.
3.11.5-08 (new)	The Contractor shall utilize and comply with the current Contract Change Management Process used by CalHEERS Project to identify and manage Subcontractor candidates for contract changes are identified, tracked, reviewed, evaluated, and then either rejected or approved.
3.11.5-09 (new)	The Contractor shall include as part of the CCMP the contract amendment process, cadence, and the roles and responsibilities State and Subcontractor team members play in the process.
3.11.5-10 (new)	The Contractor shall upon request by the State Project Director or designee, provide Subcontractor details as part of the Subcontractor review, approval, and replacement process.

3.12 CALHEERS PROJECT ENTERPRISE TOOLS

3.12.1 Enterprise Tools

The State has identified the Enterprise Tools currently used to support the management and operation of the CalHEERS Project below in Figure 3-1, Enterprise Tools Matrix. The State anticipates that the Contractor may bring alternative and/or additional Enterprise Tools to CalHEERS.

Figure 3-1: Enterprise Tools Matrix

3.12.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.12.1-03 (modified)	The Contractor shall provide instruction to State and Sponsor project support staff for Contractor tools and procedures, which includes but is not limited to: 1. ~~1.~~ Explanation of each process that uses the tools 2. ~~2.~~ Explanation of functionality, navigation, operation, and outputs of the tools 3. ~~3.~~ Hands-on demonstration and practice with operating the tools 4. ~~4.~~ Hands-on demonstration and practice with online help 5. ~~5.~~ Explanation of user documentation or self-paced tutorials
3.12.1-04 (new)	Unless otherwise approved by the State Project Director or designee, the Contractor shall provide access to all Enterprise Tools in accordance with Special Provision 8.4.3. The tools currently in use by the Project are identified in Figure 3-1.

Req #	SOW Requirement
3.12.1-05 (new)	The Contractor shall provide all Enterprise Tools used to support the management and operation of the CalHEERS Project, maintaining and evolving the tools to meet the needs of CalHEERS and to match evolving project processes, including, but not limited to Data Warehouse tools.
3.12.1-06 (new)	The Contractor shall maintain all Enterprise Tools ensuring proper security encryption of PII/PHI across the Enterprise Tool set as directed by the State Project Director or designee.
3.12.1-07 (new)	The Contractor shall, in collaboration with the State, update Enterprise Tools: Descriptions and Business Use Overview as agreed to with the State, of the CD-3.12-1 – Enterprise Tools deliverable, to include a description of each enterprise tool, identify how each enterprise tool is used, and describe the outputs of each enterprise tool (reports, presentations, etc.).
3.12.1-08 (new)	The Contractor shall develop and maintain training materials for all Enterprise Tools for use by the State and Sponsors.
3.12.1-09 (new)	The Contractor shall develop additional training materials or update existing training materials at the State's request which may require additional levels of detail.
3.12.1-10 (new)	The State identifies and associates the following artifacts to the Enterprise Tools. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • All Active Campus Licenses • All Active Contracts • All Active Licenses • All Active Purchased Licenses • All Campus Server Room Assets • All Contracts Campus Related • All Contracts for Facilities • All E-Waste Assets • All Facilities Hardware Assets • All Hardware Assets in Storage • All Installed Hardware Assets • All Open-Source Licenses • CalHEERS Engineering Workflow Management (EWM) Training – Curriculum – Enterprise Tools • CalHEERS Enterprise Tools - ALM Self-Paced User Training • CalHEERS Enterprise Tools - CalHEERS ServiceNow Self-Paced User Training • CalHEERS Enterprise Tools - Jira Self-Paced User Training • CalHEERS Flexera Quick Reference Guide - Enterprise Tools • CalHEERS HP-LoadRunner Quick Reference Guide - Enterprise Tools • CalHEERS MS Teams Quick Reference Guide - Enterprise Tools • CalHEERS OneNote Quick Reference Guide - Enterprise Tools • CalHEERS Project Deliverables Training Curriculum • CalHEERS Quick Reference Guides – MS Teams, Flexera, OneNote, and HP-LoadRunner – Enterprise Tools • CalHEERS Rational Team Concert (RTC) Training – Curriculum – Enterprise Tools • Enterprise Tools - ALM Overview Training Presentation • Enterprise Tools - ALM Defects Training Presentation • Enterprise Tools - ALM Requirements Module Overview Training Presentation • Enterprise Tools - ALM Testing Training Presentation • Enterprise Tools - EWM Action Items - Decision Items Training • Enterprise Tools - EWM CR Training • Enterprise Tools - EWM Dashboards

3.12.1-11 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.12.1-12 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.12.1-13 (new)	The Contractor shall upgrade all Enterprise Tools which are identified in this deliverable (CD-3.12-1) in accordance with SOW 6.6 TECHNOLOGY REFRESH.
3.12.1-14 (new)	The Contractor shall attach to the Enterprise Tools the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: - SOW Requirement ID # - SOW Requirement Text - Requirement Traceability (Define traceability of the requirements to the Deliverable) - Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance

Req #	SOW Requirement
	Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.12.2 Enterprise Tools Activities

Table 3-55 : Enterprise Tools

Req #	SOW Requirement
3.12.2-01 (new)	The Contractor shall staff, manage, lead and execute enterprise tools management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.12-1 – Enterprise Tools.
3.12.2-02 (modified)	The Contractor shall provide training to State project and Sponsor support staff on new tools and procedures per schedule prior to implementation by the Contractor.
3.12.2-03 (existing)	Unless otherwise approved by the State Project Director or designee, the Contractor shall provide access and instruction to State staff on all tools and related procedures, including user guides, used in support of the CalHEERS Project and System. The tools support project functions including, but not limited to: 1. Risk and Issue management 2. Communication management 3. Schedule management 4. Change control 5. Configuration management 6. Release management 7. Performance monitoring 8. Service desk 9. Requirements management 10. Testing 11. Development tools (e.g., Integrated Development Environment) 12. Document Management/Library
3.12.2-04 (existing)	The Contractor shall provide quarterly Contractor tool training sessions for State project support staff identified by the State Project Director or designee.
3.12.2-05 (existing)	For ongoing State project support staff training, the Contractor shall provide for additional, tool specific sessions at the direction of the State Project Director or designee.
3.12.2-06 (new)	The Contractor shall ensure that all CalHEERS web-based tools are accessible via the list of State desired web browsers.
3.12.2-07 (existing)	The Contractor shall provide a Change Request Tracking Tool that shall log, and track submitted CRs in accordance with the State approved Change Control Plan and processes.

Req #	SOW Requirement
3.12.2-08 (existing)	Unless otherwise approved by the State Project Director or designee, the Contractor shall maintain and operate all tools used in support of the CalHEERS Project and System. The tools support project functions including, but not limited to: 1. Risk and Issue management 2. Communication management 3. Schedule management 4. Change control 5. Configuration management 6. Release management 7. Performance monitoring 8. Service desk 9. Requirements management 10. Testing 11. Development tools (e.g., Integrated Development Environment) 12. Document Management/Library
3.12.2-09 (new)	The Contractor shall streamline all tools and practices to comply with accessibility standards (i.e., WCAG 2.1 AA, Section 508) and ensure overall user experience consistency.

3.13 CALHEERS PROJECT PROCESSES

The CalHEERS Project has a number of defined processes which, properly managed, will lend themselves to improved communication and efficiency within the CalHEERS Project with the formalization of these processes into a high quality CalHEERS Project Process Guide. Through the following requirements, the Contractor will build, maintain, and train varying levels of users in the processes and tools that will increase the efficiency and effectiveness of CalHEERS Project staff.

3.13.1 CalHEERS Project Process Guide Plan

The CalHEERS Project Process Guide is used as a reference to documentation that provides support for the entire CalHEERS Project, helping project staff to perform their jobs effectively and efficiently. The CalHEERS Project Process Guide is used as a desktop reference and must be viewable online in SharePoint.

Table 3-56: CalHEERS Project Process Guide Plan (CD-3.13-1)

Req #	SOW Requirement
3.13.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the CalHEERS Project Process Guide Plan, which includes but is not limited to: 1. 3.13.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.13.1-03 (modified)	In collaboration with the State, the Contractor shall adopt existing processes, develop new processes, and maintain the CalHEERS Project Process Guide (including technical and non-technical processes).
3.13.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.13.1-05 (new)	The Contractor shall attach to the Project Process Guide Plan the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb)

Req #	SOW Requirement
	9. Link to artifact

3.13.2 CalHEERS Process Guide Execution

The Contractor shall provide services as described in this section.

Table 3-57: CalHEERS Project Process Guide Requirements

Req #	SOW Requirement
3.13.2-01 (new)	The Contractor shall staff, manage, lead and execute Process Guide Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.13-1 – CalHEERS Project Process Guide Plan.
3.13.2-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.13.2-03 (modified)	The Contractor shall develop, update and publish a desk reference guide to support the use of the CalHEERS Project Artifact repository and how Project processes and associated Project SharePoint Project Process pages are used.
3.13.2-04 (new)	The Contractor shall collaborate with the State's contract team to verify that newly developed processes are not in conflict with the contract, and to fix conflicting processes when discovered. Corrections shall be conducted (as applicable) in accordance with the CalHEERS Project change control process and Service Level Agreement standards.
3.13.2-05 (existing)	The Contractor shall actively participate in all CalHEERS Processes that include but are not limited to the following: 1. ICR Process 2. CR Process 3. CCB Process 4. CET Process 5. RIMG Process 6. Information Technology Infrastructure Library (ITIL) Process 7. Technical Change Management Process 8. SLM Process 9. Defect Management Process 10. Release Management Process 11. Deliverable Management Process
3.13.2-06 (existing)	The Contractor shall follow their roles and responsibilities as outlined within each of the CalHEERS Process Guides.

3.14 CALHEERS PROJECT TRAINING

3.14.1 CalHEERS Project Process Guide Training Plan

The Training Plan describes the training course objectives, course curriculum, training materials, training methods, staffing, equipment and schedules for all training.

Table 3-58: CalHEERS Project Process Guide Training Plan (CD-3.14-1)

Req #	SOW Requirement

Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.14.2 CalHEERS Project Process Guide Training

The Contractor shall develop and deliver training in support of the integration of the CalHEERS Project Process Guide into the CalHEERS Project.

The following requirements identify the Contractor's general training responsibilities.

Table 3-59: CalHEERS Project Process Guide Training - General

Req #	SOW Requirement
3.14.2-01 (new)	The Contractor shall staff, manage, lead and execute Process Guide Training on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.14-1 – Project Process Guide Training Plan.
3.14.2-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.14.2-03 (existing)	The Contractor shall provide an approach and services training development and delivery for all CalHEERS Project staff to include: 1. Providing training facilities (if needed) 2. Providing training equipment 3. Providing Training materials, 4. Organization, logistics, and staffing
3.14.2-04 (existing)	The Contractor shall tailor training specific to each user group within the scope of the CalHEERS Project Training.
3.14.2-05 (existing)	Under the guidance and direction of the State, the Contractor shall document when and by which method new Project Staff will: 1. Receive CalHEERS Project orientation and all appropriate training; 2. Receive and review the CalHEERS Project Process Guide; and 3. Receive training in the processes and procedures for Project communication and problem resolution.
3.14.2-06 (existing)	The Contractor shall provide training to all new CalHEERS Project staff on the curriculum based on the designated staff roles and responsibilities within the CalHEERS Project.
3.14.2-07 (existing)	The Contractor shall provide data warehouse and analytic users training and knowledge transfer on the data model, OBIEE, and Business Intelligence (BI) Publisher.

3.14.3 CalHEERS Project Process Guide Self-Paced Training

The following requirements apply to the Contractor's responsibility to provide self-paced user training.

Table 3-60: CalHEERS Project Process Guide - Self-Paced User Training

Req #	SOW Requirement
3.14.3-01 (existing)	The Contractor shall develop, maintain, and deliver to the State Project Director or designee, a Self-Paced CalHEERS Project Process Training Guide Solution that can be accessed from a CalHEERS end user's workstation.
3.14.3-02 (existing)	For the CalHEERS Project Process Training Guide self-paced training, the Contractor shall administer a Training Module Evaluation, developed by the State, to rate the instruction content and presentation, and to provide suggestions for improvement. The Training Module Evaluation must be available to anyone with access to the self-paced training.

3.14.4 CalHEERS Project Training Courses

Table 3-61: CalHEERS Project Training Courses

Req #	SOW Requirement
3.14.4-01 (existing)	The Contractor shall develop training courses in support of its overall training approach.

3.14.5 CalHEERS Project Training Materials

Table 3-62: CalHEERS Project Training Materials (CD-3.14-2)

Req #	SOW Requirement
3.14.5-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CalHEERS Project Training Materials, which includes but is not limited to: 1. 3.14.5-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.14.5-03 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

Req #	SOW Requirement
3.14.5-04 (new)	The Contractor shall attach to the Project Training Materials the following appendices: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.14.6 CalHEERS Project Training Materials Execution

Table 3-63: CalHEERS Project Training Materials Execution

Req #	SOW Requirement
3.14.6-01 (new)	The Contractor shall staff, manage, lead and execute Training Materials Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.14-2 – CalHEERS Training Materials.
3.14.6-02 (new)	The Contractor shall provide a document management methodology that makes the training documentation easy to find for all project members. At a minimum, an easy-to-find internal training site or page with categories to easily find the guide required for any given user. Training documentation must be in small, organized groups for different user types and levels (e.g., the basics of signing in would be in the first document with more complex guides available for other project team training needs, organized by each different team's needs, where applicable.

Req #	SOW Requirement
3.14.6-03 (new)	The Contractor shall provide training documentation in a uniform and consistent format so that project teams can easily jump from one training document to another and understand organization and formats, etc. A table of contents should provide links or guidance on where to jump to find common topics, including guidance on where to jump to in a video training for different topics.
3.14.6-04 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

3.15 STRATEGIC PLANNING AND MANAGEMENT

The strategic planning process optimizes resources and keeps CalHEERS relevant over the life of the Contract with comprehensive and collaborative planning for organizational changes, Technical/Architectural decision making, and system and service modifications to meet evolving DHCS and Covered California program needs and keep pace with technology innovations for functionality within the scope of the Contract.

3.15.1 Strategic Plan

The CalHEERS Strategic Plan reflects a “Future Vision” approach that encompasses a five (5) year planning window.

Table 3-64: CalHEERS Strategic Plan (CD-3.15-1)

Req #	SOW Requirement
3.15.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Strategic Plan, which includes but is not limited to: 1. INTRODUCTION AND BACKGROUND 1.1 Message from the Director 1.2 Introduction 1.3 Accomplishments 2. Assumptions, Constraints, and Risks 3. REQUIREMENTS 4. ZOOM OUT 4.1 Mission and Vision 4.2 Six Key Disruptors in the Future of Health 2.2.1 Key Disruptor 1: X 2.2.2 Key Disruptor 2: X 2.2.3 Key Disruptor 3: X 2.2.4 Key Disruptor 4: X 2.2.5 Key Disruptor 5: X 2.2.6 Key Disruptor 6: X 5. Focus Areas 6. Zoom In 6.1 Strategic Priorities 6.2 Action Plans 6.2.1 Focus Area 1: Be secured, faster, better, and cost-effective 6.2.2 Focus Area 2: Continue to operate as “one team” 6.2.3 Focus area 3: enable innovation and continuous improvement 7. Req #	SOW Requirement
	APPENDIX 4: STRATEGIC PLANNING SESSIONS APPENDIX 5: STRATEGIC PLAN ACTIVITY TIMELINE
3.15.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.15.1-03 (modified)	The Contractor shall support the CalHEERS Management Team and stakeholders in the development, enhancement and continued refinement of the CalHEERS Strategic Plan. The plan shall include, at a minimum, the following considerations for ongoing system and service modifications and improvements: 1. The Plan shall cover a period of five (5) years 2. Ensure the strategic plan aligns with the vision, goals and desired innovation of the CalHEERS Project. 3. Ensure CalHEERS continues to meet the evolving needs of Federal and State healthcare affordability programs 4. Ensure the strategic plan aligns with guiding principles for CalHEERS System changes. 5. Ensure the strategic plan aligns with the strategic plans of CalHEERS' Sponsors, as well as the California Health and Human Services IT and Data Strategic Plan.
3.15.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.15.1-05 (new)	The Contractor shall update or develop the following appendices and attach them to the Strategic Plan deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.15.2 Strategic Roadmap

The CalHEERS Strategic Planning Roadmap is graphic representation of system and service modifications for a twenty-four (24) month planning window. The roadmap is a graphic presentation of the planned modifications, supplemented by a list of planned changes by release with cost estimates for each change and subtotal estimates for each release.

Table 3-65: Strategic Roadmap (CD-3.15-2)

Req #	SOW Requirement
3.15.2-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Strategic Roadmap, which includes but is not limited to: 1 INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. Summary 2.1 Scope 3. Approach 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. 3.15.2-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with <u>the approval</u> of the State Project Director or designee.
3.15.2-03 (existing)	The Contractor shall develop, maintain and deliver to the State the following Strategic Roadmap deliverables: 1. Functional Strategic Roadmap (24-month Roadmap) 2. Technical Strategic Roadmap (24-month Roadmap)
3.15.2-04 (new)	The Contractor shall integrate both Transition-In (system takeover and baselining & transformation) planning into both the Functional and Technical Strategic 24-month Roadmap deliverables.

Req #	SOW Requirement
3.15.2-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.15.2-06 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.15.2-07 (new)	The Contractor shall update or develop the following appendices and attach them to the Strategic Roadmap deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.15.3 Strategic Planning Activities

The Contractor is responsible for developing and maintaining a strategic planning methodology for the management, execution, and reporting of associated goals and activities, as directed by the State. The CalHEERS strategic planning methodology ensures that CalHEERS major goals and objectives, for system and service modifications, are captured, planned, and communicated. As part of these activities the Contractor will take a lead role in coordinating and building system interface relationships with partners, sponsors and stakeholders to create an environment where the strategic planning methodology results in a strong sense of buy-in with all stakeholder groups.

Table 3-66: Strategic Planning Activities

Req #	SOW Requirement
3.15.3-01 (new)	The Contractor shall staff, manage, lead, and execute Strategic Planning on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.15-1 – CalHEERS Strategic Plan, as well as the Strategic Roadmap activities as defined in this Statement of Work and in accordance with the CD-3.15-2 – Strategic Roadmap.
3.15.3-02 (existing)	The Contractor shall develop, document, facilitate, and execute a CalHEERS strategic planning methodology and process that optimizes resources and keeps CalHEERS relevant over the life of the Contract with comprehensive and collaborative planning system and service modifications.
3.15.3-03 (existing)	The Contractor shall provide strategic planning in the areas of organizational change, technical/architectural decision making, and Change Management/Change Support facilitation, which includes but is not limited to: 1. Complete, accurate and current (as of the date of the build or implementation) documentation 2. Build and coordinate system interface relationships with other groups or stakeholders such as, but not limited to, federal, State, county, and insurance carrier interface partners (i.e., FedHUB, CMS, IRS, MEDS, SAWS, and Carriers) 3. Breakdown of Schedule, which at a minimum shall include the activity, Staff assigned, estimated and actual hours, and cost breakdown for each activity.
3.15.3-04 (existing)	The Contractor shall actively participate in the CalHEERS Project Strategic Planning activities, providing functional and technical expertise on behalf of the CalHEERS Application components.
3.15.3-05 (existing)	The Contractor shall participate in Strategic Roadmap activities as directed by the State Project Director or designee on behalf of CalHEERS System sponsors and stakeholders.

3.16 POLICY AND LEGISLATIVE IMPACT ANALYSIS AND CHANGE SUPPORT

State and Federal Statutory and Regulatory changes in support of the healthcare affordability options provided to consumers within the CalHEERS Application are subject to constant change. Analysis of these changes and assessment of system and project impact are a large part of ongoing project work. The Contractor's duties include working with the CalHEERS Project staff on the ongoing analysis and impact of these changes. The requirements below outline the Contractor's responsibilities as part of this process. The Contractor shall perform the legislative Impact Analysis Services described in this section.

Table 3-67: Policy and Legislative Impact Analysis and Change Support Plan (CD-3.16-1)

Req #	SOW Requirement
3.16-01 (new)	The Contractor shall staff, manage, lead and execute Policy and Legislative Impact Analysis and Change Support activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-3.16-1 – Policy and Legislative Analysis and Change Support Plan.
3.16-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
3.16-03 (new)	The Contractor shall, in partnership with the State, develop, adopt, implement and deliver CalHEERS Policy and Legislative Change Support Plan. This support, will at a minimum, define the tasks, roles, responsibility, and approach for supporting policy and legislative activities associated with maintaining CalHEERS and ensuring it is relevant including all back-office support tasks, including: • Policy Impact Analysis • Legislative Impact Analysis • Approach for monitoring/tracking Policy & Legislative Developments

Req #	SOW Requirement
3.16-04 (existing)	The Contractor shall continuously and independently determine and validate all legislative requirements necessary for the lawful operation of CalHEERS and present their analysis to the State Project Director for review.
3.16-05 (existing)	The Contractor shall assist the State in evaluating the impact and cost of implementing statutory and/or regulatory changes on behalf of the CalHEERS Project. Assessment detail must, at a minimum include but not be limited to, providing a comprehensive list of the impacted design components, known constraints, and rough order of magnitude (ROM) for cost and schedule.
3.16-06 (existing)	The Contractor shall assist the State in determining and validating impact to all CalHEERS System components due to a change in federal and/or state policy or procedure.
3.16-07 (existing)	The Contractor's Impact Assessment detail must include but not be limited to, a comprehensive list of the impacted design components, known constraints, and rough order of magnitude (ROM) for cost and schedule.
3.16-08 (existing)	The Contractor shall assist the State in evaluating the impact and cost of implementing the statutory and/or regulatory changes on behalf of the CalHEERS Project. Assessment detail must, at a minimum, provide a comprehensive list of the impacted design components, known constraints and ROM for cost and schedule.
3.16-09 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
3.16-10 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
3.16-11 (new)	The Contractor shall update or develop the following appendices and attach them to the CalHEERS Policy and Legislative Change Support Plan deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency

Req #	SOW Requirement
	6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

3.17 AUDIT EVALUATION AND FINDINGS SERVICES

The Contractor shall, in partnership with the CalHEERS Project staff and sponsors participate in the assessment of any Audit request from oversight agencies as requested by the State Project Director or designee.

3.17.1 Audit Evaluation and Findings Validation

The Contractor shall perform services as described in this section.

Table 3-68: Audit Evaluation and Findings

Req #	SOW Requirement
3.17.1-01 (modified)	The Contractor shall provide a dedicated Audit Support Team to the State in the evaluation, and response to, of all requests for audits. The Evaluation criteria must include, both functional and data evaluation components that include, but are not limited to: 1. Assessment of audit request 2. Retrieval and analysis of requested data 3. Response recommendations for consideration
3.17.1-02 (modified)	The Contractor dedicated Audit Support Team shall assist the State in the development, review, and update of formal responses to audit requests in the format prescribed by the State.
3.17.1-03 (modified)	The Contractor dedicated Audit Support Team shall actively participate and assist auditors in conducting annual audits.
3.17.1-04 (modified)	The Contractor dedicated Audit Support Team shall work collaboratively with these auditors and provide complete and accurate information and Documentation in a timely manner.
3.17.1-05 (new)	The Contractor dedicated Audit Support Team shall provide detailed walkthroughs of audit responses and supporting data at the request of the State, Sponsors and/or Auditors.
3.17.1-06 (new)	The Contractor dedicated Audit Support Team shall communicate all audit findings to the intake point of contact for the related service area(s) of the CalHEERS Contract for assessment, mitigation/solution determination and implementation.
3.17.1-07 (new)	The Contractor dedicated Audit Support Team shall analyze and communicate audit findings that may require a process change by the CalHEERS Project Team, Sponsor related CalHEERS Program(s), code changes into the CalHEERS solution, other production code changes, or other recommendations for the State to mitigate the audit finding.

3.17.2 Audit Findings Implementation

The Contractor shall perform services as described in this section.

Table 3-69: Audit Findings Implementation

Req #	SOW Requirement
3.17.2-01 (new)	The Contractor shall assess all audit findings related to any service area of the CalHEERS Contract, determine proposed short-term mitigations and/or long-term solutions, and present to the State, Sponsors and/or Auditors for approval.

Req #	SOW Requirement
3.17.2-02 (new)	The Contractor shall implement the State approved short-term mitigation and/or long-term solution related to any audit finding within all service areas of the CalHEERS Contract, via process, system, or technical change request as directed by the State Project Director or designee.
3.17.2-03 (new)	The Contractor shall work with the State when a mitigation of an audit finding requires the implementation of a system change and may request for costs to be evaluated and approved as no cost, a project cost, or a shared cost via the State Assess Impact process, as defined in the CD-4.2-1 Change Request Process deliverable.

SOW Section 4 System Change & Enhancements REQUIREMENTS

TABLE OF FIGURES

Figure 4-1 - System Enhancements Flow	5
Figure 4-2 - Technology Refresh Flow.....	6

4 SYSTEM CHANGE & ENHANCEMENTS

The purpose of System Change and Enhancements is to ensure the CalHEERS system is operating properly and is enhanced to keep the system current and relevant. The processes include the services required to perform the System/Software Development Life Cycle (SDLC) activities to update, test, implement, operate, and maintain CalHEERS and support the Affordable Healthcare Act (ACA) Programs. These processes also ensure that sufficient controls are in place to reduce system defects, minimize disruption and manage to the current Contract requirements.

As shown in Figure 4-1 System Enhancements Flow below, system enhancements are coordinated IAW the System Development Life Cycle (SDLC) Plan along with other important processes like the Change Request Process and the Release Management Process. The CalHEERS uses Change Requests (CRs) to consider and approve fixes, updates, or enhancements to the system and relies on several governing bodies like the Architectural Review Board (ARB), Change Control Board (CCB), and the Change Advisory Board (CAB) to ensure changes are appropriate and coordinated with the highest of quality. In cooperation between the established processes and governing bodies, the CalHEERS system updated via Release Packages in precisely timed release which are planned in in repeatable cycles throughout the year.

Figure 4-1 - System Enhancements Flow

System Enhancements (while the primary change mechanism) is not the only changes that are managed by the CalHEERS team. As shown in Figure 4-2 Technology Refresh Flow below, there are two other types of changes that CalHEERS team must manage and integrate with the System Enhancements process. These processes are the Technology Refresh and Technology Change Management. Both of these processes are discussed in SOW 6 Operations.

Figure 4-2 - Technology Refresh Flow

Please note that this section of the statement of work (SOW) references multiple sets of standards, which are subject to change over time. Please refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

4.1 SYSTEM/SOFTWARE DEVELOPMENT LIFECYCLE (SDLC)

The SDLC processes include the services required to perform the system/software development life cycle activities to update, test, implement, operate, and maintain the CalHEERS IT Solution supporting the Covered California and DHCS healthcare affordability programs housed within the application. These processes also ensure that sufficient controls are in place to minimize disruption to our clients, sponsors, and interface partners. Focus on quality with a significant reduction in system defects, and reduction in overall cost of change will be significant factors in assessing the viability of change.

4.1.1 SDLC Plan

The SDLC Plan identifies the system development tools, techniques, and standards and how they relate to the Contractor's development team's activities. The plan provides guidelines for the software activities and states that the Contractor shall employ software engineering best

practices to accomplish the planning, design, development, implementation, maintenance and operation of the CalHEERS Application.

Table 4-1: System/Software Development Lifecycle (SDLC) Plan (CD-4.1-1)

Req #	SOW Requirement
4.1.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS System/Software Development Lifecycle (SDLC) Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.1.1 Scope for Waterfall Model 2.1.2 Scope for Agile Model 2.1.3 Scope for Hybrid/Waterfall Model 2.2 Update Frequency 2.3 SDLC Release Types 2.4 SDLC For Non-Release Based CRs 3. GLOSSARY AND ACRONYMS 9.1 New Acronyms and Terms

Req #	SOW Requirement
	APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: ISO STANDARDS MAPPING
4.1.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.1.1-03 (modified)	The Contractor shall document and deliver for review and acceptance by the State, the Systems Development Lifecycle Methodology to be used in support of changes, including but not limited to: 1. A traditional waterfall process 2. An Agile process 3. A hybrid waterfall/agile process Note: If Human Centered Design (HCD) is utilized within any of the above SDLC types, it will be done under the fixed price per SOW Section 5.2, CONSUMER EXPERIENCE SERVICES.
4.1.1-04 (modified)	The Contractor shall clarify each required Centers for Medicare and Medicaid Services Exchange Life Cycle Model (CMS ELC) artifacts as part of the Requirements, Analysis and Design phase for any Change Request (CR) and include reference and supporting deliverables as required in all project management plans and schedules as required to remain in federal compliance.
4.1.1-05 (modified)	The Contractor shall maintain the SDLC Plan in accordance with ISO/IEC/IEEE 12207-2008 Software Life Cycle Processes (Section 5.2.2.2 – Software Specific Processes, Section 6 – System Life Cycle Processes, Section 7 – Software Specific Processes) pertaining to the Development Process and the standard for IT – Software Life Cycle Processes – Life Cycle Data, Development Process Plan. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.1.1-06 (modified)	The Contractor shall specify and maintain within the SDLC Plan the development process model, technical methods, development tools, techniques and standards used by the Contractor to develop the various work products and plans for maintaining the Contractor's infrastructure for change request development and testing. Additionally, the Contractor will identify how these methods, tools, and standards related to the Contractor's development team's activities.
4.1.1-07 (new)	The Contractor shall include the following SDLC Plan process costs as part of Maintenance & Operations (M&O) services: • Annual Prioritization • Monthly Prioritization • Ad-Hoc Prioritization
4.1.1-08 (new)	The Contractor shall, in collaboration with the State, update the SDLC Plan to define the Architectural Review Board (ARB), describe the ARB process, and identify how the ARB process fits within the SDLC on CalHEERS.
4.1.1-09 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.1.1-10 (new)	The Contractor shall update or develop the following appendices and attach them to the System/Software Development Lifecycle (SDLC) Plan: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID #

Req #	SOW Requirement
	- SOW Requirement Text - Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) - Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: - Artifact Name - Associated Parent DEL - State Approver - SI Point of Contact - Review Frequency - Submission Frequency - Artifact File Format - Artifact Location (e.g., SharePoint breadcrumb) - Link to artifact

4.1.2 System/Software Development Lifecycle Execution

Table 4-2: System/Software Development Lifecycle Execution

Req #	SOW Requirement
4.1.2-01 (new)	The Contractor shall staff, manage, lead and execute the System/Software Development Lifecycle on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.1-1 – SDLC Plan.
4.1.2-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
4.1.2-03 (existing)	The Contractor shall adhere to the technical processes outlined in the SDLC Plan to plan, develop, and implement State authorized enhancements.

4.1.3 System Technical Design Documents

Table 4-3: System Technical Design Documents (CD-4.1-2)

Req #	SOW Requirement
4.1.3-01 (modified)	The Contractor shall adopt, enhance and maintain the System Technical Design Documents, which is comprised of the following design documents by system component, including but not limited to: - Portal - Eligibility - Interfaces

Req #	SOW Requirement
	4. Enrollment 5. Notices 6. Security 7. Reporting 8. FPACT
4.1.3-02 (modified)	Per the deliverable management and CR Process, the Contractor shall adopt, enhance and maintain all system batch descriptions within the System Technical Design Documents Deliverable.
4.1.3-03 (modified)	The Contractor shall update in the System Technical Design Documents deliverable, interface design details which include but not limited to: 1. COTS Based Approach to Interfaces a. Supporting Documents: 2. Interface Communications Classifications by Interface 3. Partner or between program components 4. CalHEERS Interface List 5. Interface Process Narrative 6. Interface Identification and Diagrams a. External Interfaces: i. Real-Time ii. Batch iii. External Interfaces Listing 7. Updates resulting from Technology Refresh
4.1.3-04 (modified)	The Contractor shall identify the interface design for each external interface in the System Technical Design Documents including the interface partner, interface method, connectivity, data elements, frequency, format, and media.
4.1.3-05 (modified)	The Contractor shall provide information in the System Technical Design Documents that supports the identification, creation and utilization of all incoming and outgoing interface files and Application Program Interface calls.
4.1.3-06 (modified)	The Contractor shall provide in the System Technical Design Documents the detailed documentation for all external interfaces to include the utilization for component integration, external or internal communication, and associated data exchange requirements and dependencies.
4.1.3-07 (modified)	The Contractor shall provide an interface design in the System Technical Design Documents for external interfaces, that includes but is not limited to: 1. Documenting the CalHEERS fulfillment of each interface's requirements. 2. Description of the CalHEERS System components for implementing and maintaining an interface design that is traceable to system, data, and application requirements. 3. Consistent, unambiguous design description, including API, WSDL, Schema, XSD, file layouts, and associated communication protocols.
4.1.3-08 (modified)	The Contractor shall maintain the System Technical Design Documents in accordance with ISO/IEC/IEEE 12207 – 2008 Systems and Software Engineering – Software Life Cycle Process (Section 7-Software Specific Processes) and ISO/IEC/IEEE 16326-2009 Systems and Software Engineering – Life Cycle Processes – Project Management (Section 5.8.5.1 – Documentation). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.1.3-09 (modified)	The Contractor shall maintain the Interface Control Document (ICD), all Interface Design Documents (IDD), and all Business Services Definitions (BSD) as required per the CR Process.
4.1.3-10 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.1.3-11 (new)	The Contractor shall update or develop the following appendices and attach them to the System Technical Design deliverable:

Req #	SOW Requirement
	Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.1.4 System Technical Design Execution

Table 4-4: System Technical Design Execution

Req #	SOW Requirement
4.1.4-01 (new)	The Contractor shall staff, manage, lead and execute the System Technical Design on CalHEERS as defined in this Statement of Work and in accordance with the System Technical Design Documents.
4.1.4-02 (existing)	The Contractor shall ensure that all data and data formats provided through interfaces meets the standards established by the interface organization.
4.1.4-03 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.1.5 System Functional Design Documents

Table 4-5: System Functional Design Documents (CD-4.1-3)

Req #	SOW Requirement
4.1.5-01 (modified)	The Contractor shall maintain the System Functional Design Documents Deliverable, which is comprised of the following design documents by system component, including but not limited to: 1. Portal 2. Eligibility 3. Interfaces 4. Enrollment 5. Notices 6. Security 7. Reporting 8. FPACT
4.1.5-02 (modified)	The Contractor shall adopt, enhance and maintain all system business rule designs required to support the eligibility determination functionality of the CalHEERS application within the System Functional Design Documents Deliverables.
4.1.5-03 (new)	The State identifies and associates the following artifacts to the Schedule Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Joint Application Design Guidelines
4.1.5-04 (new)	The Contractor shall update or develop the following appendices and attach them to the System Functional Design deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb)

Req #	SOW Requirement
	9. Link to artifact

4.1.6 System Functional Design Execution

Table 4-6: System Functional Design Execution

Req #	SOW Requirement
4.1.6-01 (new)	The Contractor shall staff, manage, lead and execute the System Functional Design on CalHEERS as defined in this Statement of Work and in accordance with the System Functional Design Documents.
4.1.6-02 (existing)	The Contractor shall ensure that all data and data formats provided through interfaces meets the standards established by the interface organization.
4.1.6-03 (new)	The contractor shall maintain and enhance the CalHEERS system to support translations required by DHCS and CCA, or as directed by the State Project Director or Designee.
4.1.6-04 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.2 CHANGE MANAGEMENT AND CONFIGURATION MANAGEMENT (SYSTEM)

This section pertains to managing changes to the CalHEERS system (not to be confused with the management of Contract Changes), see SOW 3.11, CONTRACT MANAGEMENT.

4.2.1 Change Request Process

The Change Request Process identifies the approved methodology to enhance the CalHEERS System. The Change Request Process incorporates the various processes used to manage change on the CalHEERS Project.

Table 4-7: Change Request Process (CD-4.2-1)

Req #	SOW Requirement
4.2.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CalHEERS Change Request Process deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Out-Of-Scope 2.3 Update Frequency 3. COST ESTIMATION FOR THE CR PROCESS 11.1 Overview 11.2 CR Cost BOE and CR Cost Reconciliation 12. GLOSSARY AND ACRONYMS 12.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARDS MAPPING
4.2.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.2.1-03 (modified)	The Contractor shall update the CR Process DEL to identify how the Change Request Process will remain compliant with ISO/IEC/IEEE 29148-2011 Systems and Software Engineering – Life Cycle Processes – Requirements Engineering, First Edition 2011-12-01 (Section 8.4. – Software Requirements Specification Document). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee (see also guidance in Special Provisions)
4.2.1-04 (modified)	The Contractor shall update the CR Process DEL to incorporate the term "Outcome Realization". Outcome realization shall be the mechanisms added to the existing CR process to aid the State in assess the business or technical value of a desired/executed change for the cost incurred to achieve the outcome. The Outcome Realization process shall originate with the creation of a CR, or approved requirement(s) within a CR (prior to implementation), and extend through design, implementation and rollout- with tracking and reporting to validate and quantifiably determine exactly if and how a change resulted in a benefit(s) for the actual cost incurred to achieve the benefit. Outcome Realization reporting (using costs and benefits) shall be collected and tracked for a period of at least 5 years following production release of a change.
4.2.1-05 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, to include instructions for the use of EWM for workflow tracking and streamlining of the CR Intake and Prioritization.
4.2.1-06 (new)	The Contractor shall update the CR Process DEL, in coordination with the State to add and/or expand on the following specific types of CRs in addition to delineating how costs are identified and paid out to increase cost transparency, reduce the chance of double-dipping, and clarify how billing and overhead costs are accounted for. Some of the additions include but are not limited to: • Time and Material (T&M) CRs • Fixed Cost CRs • Special Large-scale Project CRs (e.g., PCAP, FPACT, IDP & Drools)
4.2.1-07 (new)	The Contractor shall update the CR Process DEL, to strengthen and include additional guardrails, entry/exit criteria, and conditions to monitor expenditures that reduce lack of State cost transparency, accountability of specific work performed for the work being paid.
4.2.1-08 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, to define working at risk, identifying within the SDLC process where there may be a need to work at risk, and if a request for stop work, any work completed at risk will not be paid unless specifically approved by the State Project Director or designee.
4.2.1-09 (new)	The Contractor shall update the CR Process DEL, integrating with updates being incorporated into the DEL CD-3.3-1 Cost Management Plan. Updates shall be done in coordination with the State to add a new section(s) which identify how CR costs are tracked from beginning to end, and the method used to improve cost estimations for system changes, and to establish a means to reconcile costs at the end of the CR

Req #	SOW Requirement
	lifecycle. Refer to the DEL CD-4.2-2 CR Basis of Estimate (BOE) Deliverable that will be moved into this new section to include topics such as but not limited to: • CR Basis of Estimate (BOE) • T-shirt size • Total Cost of Ownership (TCO) (replacing the Rough Order of Magnitude (ROM)) • Cost Summary • Workplan PDF • Level of Effort (LOE) • True-Up Process • True-Up Report • CR Level Summary • Release Level Summary • Outcome Realization (as applicable) • Integration with the Cost Tracking Tool (See SOW Section 3.3)
4.2.1-10 (new)	The Contractor shall collaborate with the State to update the True-Up Process outlined in the CR Process DEL CD-4.2-1 to ensure the following conditions are satisfied, including but not limited to: • Memorializing not-to-exceed/condition in a measurable fashion that is documented and communicated to all relevant parties. • Transparency conditions for review of CR estimates versus actuals so that “true up” calculations are accurate. • Identification of the formula, calculated at the CR level, that defines when the State is owed a credit (e.g., If a CR’s actuals are less than 90% of the approved estimate).
4.2.1-11 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, to include an outline of all test phases and test sub-phases (e.g., code drop, testing (within system test), full end-to-end system test, regression test, and automation testing), as well as identify the testing coverage within each sub-phase.
4.2.1-12 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, to include greater granularity in cost breakouts for effort such as but not limited to the following examples: • In the Cost Summary (provided per CR) on the CR Summary tab, multiple efforts are being grouped together under a single category, e.g., “Development,” including coding, testing, etc., and therefore being billed at incorrect rates. • Provide true traceability from hours charged on a given rate card to the individual Contractor staff member working on the item. • Consider, the identification and use of percentages (standardized pricing) in the Cost Summary template. • Clear definition and tracking of effort (planned and actual) for Pre-Joint Application Design (Pre-JAD) meetings, ~~State involved meetings, and any SI only meetings.~~ • The process for reducing the M&O Monthly payment associated to processes where the State pays the SI to automate, which reduces the overall process costs.
4.2.1-13 (new)	The Contractor shall create a new section within the CR Process DEL, in coordination with the State, of this DEL, for the Discovery Phase; identify the process for estimating all Discovery efforts (internal to the Contractor or with State participation), obtaining State approval prior to commencing those efforts, an amended process (if needed), tracking actuals throughout the Discovery process, and reporting the total actual labor and cost in the CR Cost Summary.
4.2.1-14 (new)	The Contractor shall collaborate with CalHEERS Project staff and its Sponsors to review/refine the exit criteria for closing out the Discovery Phase of a CR, and update the CR Process DEL, in coordination with the State, of the Change Request Process deliverable to reflect the State approved updates.
4.2.1-15 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, of this DEL to identify the process used by the Contractor for estimating all Pre-JAD efforts

Req #	SOW Requirement
	(internal to the contractor or with State participation), populating them in the Pre-JAD & JAD Tracker, obtaining State approval prior to commencing those efforts, an amended process (if needed), tracking actuals throughout the Pre-JAD process (via the tracker), and reporting the total actual labor and cost in the CR Cost Summary.
4.2.1-16 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, adding a subsection that lists and defines the State approved activities that are permitted to be included in an Application Maintenance CR.
4.2.1-17 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, adding a subsection that defines Service Center CRs, with no infrastructure impacts, as exceptions to the CR process and describes the process they will follow to implementation.
4.2.1-18 (new)	The Contractor shall update the CR Process DEL, in coordination with the State, to replace the Rough Order of Magnitude (ROM) estimation methodology with the Total Cost of Ownership (TCO) methodology. The TCO estimates shall provide all the details around initial development plus identify 5 years of annualized maintenance and operations costs, if applicable.
4.2.1-19 (new)	The Contractor shall, in collaboration with the State, update the CR Process DEL to define, including diagrams, the interaction the Architectural Review Board (ARB) has with the CalHEERS change request processes.
4.2.1-20 (new)	The Contractor shall, in collaboration with the State, update the CR Process DEL to convey, including diagrams, how Technical Change Requests (TCRs), as defined in the Technical Change Management Plan, interact with the change request process.
4.2.1-21 (new)	The State identifies and associates the following artifacts to the Change Request Process. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Amending a CR Guide • Amendment Process Flow • CalHEERS CR Intake Form - Roles and Responsibilities • CalHEERS CR Intake Form.pdf • CalHEERS Impact Assessment Process and Checklist • Change Control Board (CCB) Process • Change Evaluation (CET) Process • Change Request (CR) Process • CR Budget Process Flow • CR Milestone-Schedule Escalation Approach • CR Process and RTC Guide • CR Process Flow • CR XXXXX - Implementation Complete Checklist • CR XXXXX - Supporting Document - Requirement Detail • CR XXXXX - Supporting Document - User Stories • CR_Intake_Flow • DCR Process Flow • EWM Data Dictionary • Implementation Complete Checklist • Initiate Change Request (ICR) Process • Joint Application Design Guidelines • Master CR Processes Visios • Ongoing Prioritization Process Guide • Outcome Realization Process Guide • PowerPoint_CalHEERS CR Intake • Process Guide for changing RTC Status to CET Review • SOP - CR Actuals • Stop Work Order Process • Text Update Process Flow (TURF Request)

Req #	SOW Requirement
4.2.1-22 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.2.1-23 (new)	The Contractor shall update or develop the following appendices and attach them to the Change Request Process deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) 5. Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 6. Deliverable Section Number and Title 7. Deliverable Requirement Statement(s) 8. Requirement Completion (How the Contractor has comply with or will comply with the requirement statements within the Deliverable) 9. Validation Method (The method the Contractor used to validate Deliverable compliance) 10. The Contractor's QA Manager sign-off on compliance Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.2.2 Change Request Process Execution

Table 4-8: Change Request Process Execution

Req #	SOW Requirement
4.2.2-01 (new)	The Contractor shall staff, manage, lead, and execute the change request process on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.2-1 – Change Request Process.
4.2.2-02 (existing)	The Contractor shall implement and control modifications to the system's design, hardware, firmware, and software using change management and configuration management processes.
4.2.2-03 (existing)	The Contractor shall be responsible for the structure, planning, development, and implementation of all Change Requests.
4.2.2-04 (existing)	The Contractor shall provide, for all Change Requests, information that includes but is not limited to the following: 1. List and description of State approved business requirements 2. A feasible solution to fulfill the approved requirements 3. Description of how solution satisfies the State's approved business requirements 4. Description of training approach and impacts 5. Description of implementation approach and impacts 6. System components that are traceable to the system requirements 7. A consistent, unambiguous technical design description 8. Demonstrate that the CalHEERS System shall result in efficient and cost-effective operations and maintenance, as determined by the State Project Director or designee 9. Optimize software releases to bundle CRs to minimize costs to the State
4.2.2-05 (existing)	The Contractor shall provide a version of all CR documents prior to implementation that include complete information regarding the change. Additional information includes, but is not limited to, the creation of new requirements and Configuration Item (CI) numbers and changes uncovered in the development and testing phase. The Contractor shall provide this CR version in support of a complete audit trail of design decisions and modifications.
4.2.2-06 (new)	The Contractor shall submit the following documentation at the entrance into State Assess Impact (SAI): 1. Cost Summary, identifying the Total Discovery/Pre-JAD Actuals, including a breakout of hours by role. 2. Workplan, in both a Microsoft Project (.mpp) and PDF format.
4.2.2-07 (new)	The Contractor shall, upon request of the State Project Director or designee, provide a dedicated project manager for special large scale CR-related projects (typically where size, scope, and/or complexity dictates the need), e.g., Tech Refresh, PCAP, FPACT.
4.2.2-08 (new)	The Contractor shall, upon request of the State Project Director or designee, provide outcome realization support and reporting as defined by the State Project Director or designee.
4.2.2-09 (new)	The Contractor shall record all required outcomes as defined by the State and partners and assist State in clearly defining key performance indicators and related milestones and payments tied to them. All related outcome realization activities, including reporting and support, are to be tracked and included in reported CR hours for transparency of efforts, but are not to be included in the total cost of the CR as they are part of fixed price cost.
4.2.2-10 (new)	The Contractor shall provide a Pre-JAD, JAD, & Discovery Tracker that documents all Pre-JAD & JAD meetings and effort (both planned/historical) for State analysis and review.
4.2.2-11 (new)	At the time of any CR submission to the State, the Contractor shall: 1. Identify whether there are proposed modifications to existing M&O services that the State will be expected to fund on an ongoing basis. 2. When modifications to existing M&O services become necessary, the Contractor shall identify how those M&O services will be provided and submit a cost workbook that details the increase to M&O scope and effort (e.g., labor hours). 3. Provide, at a minimum, baseline data to support and justify the increases.

Req #	SOW Requirement
4.2.2-12 (new)	The Contractor shall execute the Discovery support process as detailed in Waterfall Methodology, and as documented in the CR Process DEL.
4.2.2-13 (new)	The Contractor shall execute the Pre-JAD process as detailed in Waterfall Methodology, and as documented in the CR Process DEL.
4.2.2-14 (new)	The Contractor shall work in collaboration with the State to monitor and track differences between estimated and actual labor/costs (for Discovery and Pre-JAD support) in order to improve the processes that diminishes the likelihood of excessive hours/costs and large planned/actual variances.
4.2.2-15 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
4.2.2-16 (new)	The Contractor shall, following the implementation of a CR, provide the CR costs to both Contractor and State Cost Management Teams, for incorporation into the Cost Tracking Tool and in accordance with the Cost Management processes defined by the Cost management Plan DEL. This information will be used for consideration in budget re-baselining.

4.2.3 System Change Cost Estimating & CR Basis of Estimate (BOE)

The CR Basis of Estimate (BOE) describes the Contractor's Change Request estimating methods used to develop fair and reasonable effort estimates for a release's scope of change, as outlined in each CR approved by the State. The process for developing and implementing these requirements will be described in the CR Basis of Estimate (BOE) Deliverable.

Table 4-9: CR Basis of Estimate (BOE) Deliverable (CD-4.2-2)

Req #	SOW Requirement
4.2.3-01 (existing)	The Contractor shall develop and use a detailed, specific, and transparent cost estimation methodology to develop costs/services billed to the State by the Contractor or the Contractor's Subcontractors to be included as part of the COST MANAGEMENT PLAN in SOW 3, Section 3.3.1.
4.2.3-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.2.3-03 (existing)	The Contractor shall include and use two or more estimation approaches (e.g., top down, bottom up, parametric) in their methodology to refine estimates.
4.2.3-04 (modified)	The Contractor shall describe the following within their estimate for each Change Request: 1. Estimated Key Staff effort, which is at no cost. Key Staff effort is paid under the SDMO Fixed Price Cost. The names of the Key Staff must be provided. 2. Estimated Applicable support staff effort, which is at no cost. Support staff effort is paid under the SDMO Fixed Price Cost. The names of the support staff must be provided. 3. Estimated Non-Key (System Change) Staff effort, which will reflect the hourly maximum rate as outlined under System Changes Costs. The names of the Non-Key (System Change) Staff must be provided with the cross-referenced role identified in the CD-3.4-1 Staff Matrix. 4. Estimated Hardware and Software costs, including all ongoing costs 5. Estimated Subcontractor support 6. Outcome Realization (Incorporating TCO) as defined with Sponsors' input The State may at its sole discretion approve Key Staff (at no additional cost) or individuals who provide support staff roles to work in a Non-Key Staff role on a change request if that individual meets the qualifications for the Non-Key Staff role.

Req #	SOW Requirement
4.2.3-05 (new)	The Contractor shall update the CR Basis of Estimate DEL, in coordination with the State, to replace the Rough Order of Magnitude (ROM) estimation methodology, with the Total Cost of Ownership (TCO) methodology. The TCO estimates shall provide all the details around initial development plus identify 5 years of annualized maintenance and operations costs.
4.2.3-06 (modified)	The Contractor shall, in accordance with the California Department of Technology Agency, Information Technology Project Oversight Framework, SIMM Section 45 (https://cdt.ca.gov/), use a formal software size estimation method where custom software development or Commercial off the Shelf (COTS) modifications are a significant component of the cost. Refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES.
4.2.3-07 (existing)	The Contractor shall provide one of more cost estimation tools/models that can account for either “Waterfall/Hybrid SDLC” or “Agile” CR implementations. The costing tool(s) or model(s) shall be fully accessible and available to the staff designated by the State for cost reporting and analysis. The models shall include / accommodate alternative Fixed Capacity and Timeline / Variable Scope type of structures that may be proposed by the Contractor for Agile SDLC approaches. Specific features of the tool shall include: • The cost estimation tool shall provide both estimations and actual costs (commensurate to planned estimations) available to the State (for third-party validation) • The Contractor shall operationalize self-help reporting capability, so the State can inquire on the actual versus planned labor usage /cost on any given CR (throughout the entire lifecycle of the CR), whenever it needs it. • The Contractor shall coordinate periodic reviews by a third-party entity to allow for the State to provide input with adjusting of the estimation model as lessons learned
4.2.3-08 (new)	The Contractor shall develop, deliver, and maintain a CR Basis of Estimate (BOE), which must include: • A description of the rational for estimating scope, effort (onshore and offshore breakout), • Cost for the activities and tasks defined within the Cost Worksheets, • Software Release work plans developed by the Contractor
4.2.3-09 (new)	The Contractor shall develop and maintain the CR Basis of Estimate in accordance with the State approved version (Refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES) of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide), Estimate Costs section.
4.2.3-10 (new)	The Contractor shall develop and maintain the CR Basis of Estimate to include a minimum of two approaches to estimation, such as those described in the State identified version of the Project Management Institute (PMI ®), <i>A Guide to the Project Management Body of Knowledge (PMBOK ® Guide)</i> . The Contractor shall use the Analogous Method as one of the methods.
4.2.3-11 (new)	The Contractor shall develop and maintain a historical project estimation database that supports the Analogous Method of estimation.
4.2.3-12 (new)	The Contractor shall provide the State with access to the Contractor’s historical project estimation database, related data and analytical reports.
4.2.3-13 (new)	The Contractor shall submit the Basis of Estimate to the State Project Director or designee in accordance with the approved Transition Plan, as part of every change request and release, or as requested by the State Project Director or designee.
4.2.3-14 (new)	The Contractor shall factor in the State’s resource capacity model during prioritization and release planning, working with the State and Sponsor to understand and operate within State resource constraints.
4.2.3-15 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

Req #	SOW Requirement
4.2.3-16 (new)	The Contractor shall update or develop the following appendices and attach them to the CR Basis of Estimate Deliverable: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has comply with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.2.4 CR Basis of Estimate (BOE) Execution

Table 4-10: CR Basis of Estimate (BOE) Execution

Req #	SOW Requirement
4.2.4-01 (new)	The Contractor shall staff, manage, lead, and execute the change request process on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.2-2 – CR Basis of Estimate Deliverable.
4.2.4-02 (existing)	The Contractor shall conduct walkthroughs of change requests that outline the scope of the change and the associated costing methodology. The cost methodology and estimate for each change shall be made available to the State for review. The State shall have access to the CR documentation and all related data during the term of the Contract.
4.2.4-03 (existing)	The Contractor shall analyze the code to fully define the design, code level of effort, and cost estimates for State approved change and enhancement requests.

Req #	SOW Requirement
4.2.4-04 (existing)	The Contractor shall provide as an option on any CR work, a “fixed price-fixed scope” estimate regardless of the SDLC methodology used to implement the change (e.g., Enterprise Agile, Waterfall, Hybrid). Note: The Contractor is not limited to exclusively using this method, rather they must offer it as another option.
4.2.4-05 (existing)	The State may, at its sole discretion, obtain the services of a third-party to review, validate, or advise the State regarding any Change Request (CR) estimate received from the Contractor. The Contractor will promptly work with the third-party to assist in understanding and reviewing the Contractor estimating model, data, and assumptions. The Contractor will work with the State and the third-party to reconcile the Contractor estimate with any estimate from the third-party and to reach an agreement with the State on an appropriate fixed scope and cost estimate for the CR.
4.2.4-06 (new)	The Contractor shall incorporate the Basis of Estimate at the Change Request (CR) level and at the Release level (sum of effort/cost for all CR's in any given release).
4.2.4-07 (new)	The Contractor shall incorporate the Basis of Estimate into the Contractor's estimation tool(s).
4.2.4-08 (new)	The Contractor shall provide the State with access to the Contractor's estimation tool(s), supporting data and analytical reports.
4.2.4-09 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.2.5 Configuration Management Plan

The Configuration Management Plan describes the methods, processes, tools and procedures to be used for identification, control, status, auditing, evaluation and release management for all configured items (CI).

Table 4-11: Configuration Management Plan (CD-4.2-3)

Req #	SOW Requirement
4.2.5-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Configuration Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.1.1 Objectives of Configuration Management 1.1.2 High Level Process Management Overview 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Approach to Configuration Management 3.2 Configuration Management Tools 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 7. CONFIGURATION MANAGEMENT PROCESSES 7.1 Configuration Item Class Processes 7.1.1 Configuration Item Class Identification 7.1.2 Modify Existing Configuration Item Class

Req #	SOW Requirement
	7.2 Configuration Item Instance Processes 7.2.1 ServiceNow Configuration Item Processes 7.2.2 ServiceNow Configuration Item Lifecycle 7.3 Configuration Item Discovery 7.3.1 Flexera Discovery 7.3.2 Manual Discovery 7.4 Configuration Management System Baseline 7.4.1 Create New Baseline 7.5 Configuration Management System Audit 7.5.1 Detailed Process 7.6 Change Review and Validation 7.7 Functional Configuration Items 8. CHANGE MANAGEMENT 8.1 Infrastructure Change Management 8.2 Application Change Management 8.3 Database Change Management 8.4 Project Documentation Change Management 9. PROCEDURAL APPENDICES 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARDS MAPPING APPENDIX 5: CI SUMMARY
4.2.5-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.2.5-03 (existing)	The Contractor shall adopt, enhance and maintain the Configuration Management Plan that addresses but is not limited to the following configuration categories: 1. CalHEERS Solution Software and Hardware - Commercial software, third party software, custom software, and hardware acquired through the SI Contract for the CalHEERS solution, as defined within the Contract, DEDs and Deliverables. 2. Project Documents - Any document formally approved and requiring any form of change management will be managed by configuration management and recorded in the software configuration management tool. This includes documents such as deliverables, work products, testing documents, design artifacts, and build artifacts. 3. Requirements - Conditions or requirements that must be met or possessed by the CalHEERS solution or system components to satisfy the Contract, standards, specifications, or other formally imposed documents. 4. Business Rule-Based Data - Rules and associated data that are defined and determined by Project Sponsor and Program Partner staff and maintained in the application. For example: Eligibility and enrollment business rules.
4.2.5-04 (existing)	The Configuration Management Plan shall include but not be limited to: 1. Configuration management approach 2. Contractor, Project Staff and State roles and responsibilities 3. Description of tools 4. Processes and procedures for configuration base lining and management of all System components including, but not limited to: a. Application code b. Server Equipment and Software c. Database Equipment and Software d. Network Equipment and Software 5. Processes and procedures for change control of equipment and software 6. Processes and procedures for build management

Req #	SOW Requirement
	7. Processes and procedures for release management for pre-production and production environments 8. Processes and procedures for audits to identify 9. Configuration management Deficiencies, refine procedures and validate that procedures are being followed 10. Processes and procedures for Configuration management audit activities and findings
4.2.5-05 (modified)	The Contractor shall take over, update, deliver, maintain and execute the Configuration Management Plan in accordance with 828-2012 – IEEE Standard for Configuration Management in Systems and Software Engineering (6.2.1 – Develop CM plan) and ISO/IEC/IEEE 16326-2009 Systems and Software Engineering – Life Cycle Processes – Project Management (Section 5.8.4 – Configuration Management) standards pertaining to: 1. Software Configuration Management Plans 2. Configuration Management Processes (ISO/IEC/IEEE 16326-2009, Systems and Software Engineering – Life Cycle Processes – Project Management (Section 5.8.4 – Configuration Management) As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.2.5-06 (existing)	The Contractor shall ensure that the Configuration Management Plan describes the methods, processes, and procedures used for: 1. Configuration Identification 2. Configuration Control 3. Status Accounting 4. Configuration Auditing 5. Evaluation 6. Release Management 7. Application and Operations Folder Structures 8. Reporting 9. Data Fix
4.2.5-07 (existing)	The Contractor shall ensure that the Configuration Management Plan identifies that a CI must be unique and assigned to each design feature in the CR. These design features shall include, but are not limited to: 1. Hardware 2. Software 3. Code/Source Code 4. Linkages 5. Interfaces 6. Batches 7. Screens 8. Business Rules 9. Error Messages 10. Tasks 11. Notifications 12. Reports 13. Forms 14. Database Tables
4.2.5-08 (existing)	The Contractor shall ensure that the Configuration Management Plan identifies and baselines all CIs including, but not limited to: 1. System Requirements Specification 2. Project Master Plan 3. User Documentation 4. Detailed System Design Specification

Req #	SOW Requirement
	5. Interface Design Description 6. CalHEERS Source Code 7. Test Specifications 8. Operation and Installation Manuals 9. CalHEERS Application including Executable Programs and Scripts 10. Database Design Documents 11. Maintenance Documents 12. Hardware Configurations 13. System Software including O/S COTS Standard Products, e.g., databases, middleware software releases
4.2.5-09 (new)	The Contractor shall update the Configuration Management Plan (CD-4.2-3) to add the following to the Configuration Management Tools, in collaboration with the State, to incorporate the following requirement: The Contractor shall provide a configuration dashboard and Ad Hoc Reports, upon request by the State Project Director or designee, from any of the tools defined in this section and further collaborate with the State to identify those that should be provided on a recurring basis. For example, a report that is submitted with upon each software production release that provides in a report form, the changes to the configurable portions of the software (on/off switches). This information is found in the Service Now Configuration Management Database (CMDB) tool.
4.2.5-10 (new)	The State identifies and associates the following artifacts to the Configuration Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • CalHEERS 20YY R2Y.M Test Scripts Baseline • CalHEERS 20YY Q2 SharePoint Baseline • CALHEERS Development Workspace Setup - Enrollment • KB0012918 • KB0012919 • KB0013224 • KB0013227 • KB0013228 • KB0013272 • KB0013427 • KB0013443 • KB0013444 • KB0013445 • KB0013464 • KB0013704 • KB0013732 • Procedural Appendix 1 - CI Model Guidelines • Procedural Appendix 12 - Template - 20XX QX Audit Report • Procedural Appendix 13 - Template - 20XX QX Audit Data • Procedural Appendix 14 - Statistics Calculator • Procedural Appendix 2 - Scheduled CM Activities • SOP - Create SharePoint Baseline
4.2.5-11 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.2.5-12 (new)	The Contractor shall update or develop the following appendices and attach them to the Configuration Management Plan:

Req #	SOW Requirement
	Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.2.6 Change Management and Configuration Management Execution

Table 4-12: Change Management and Configuration Management Execution

Req #	SOW Requirement
4.2.6-01 (new)	The Contractor shall staff, manage, lead and execute Configuration Management on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.2-3 – Configuration Management Plan.
4.2.6-02 (existing)	The Contractor shall conduct interviews and studies with CalHEERS Project Staff within its respective organization as required to ensure that the CalHEERS Application remains relevant.
4.2.6-03 (existing)	The Contractor shall be responsible for managing and controlling all CalHEERS System configuration items, maintaining build areas, and maintaining the configuration management processes and procedures.
4.2.6-04 (existing)	The Contractor shall plan, develop, and conduct Organizational Change Management training for all appropriate staff as determined by the State Project Director or designee.
4.2.6-05 (new)	The Contractor shall implement configuration changes associated to a defect Corrective Action Plans (CAP) and Plan of Action Milestones (POAM) in accordance with the Configuration Management Plan at no additional cost to the State. Refer also to Special Provisions, Section 7.3 for a full definition of corrective actions covered under this contract.

Req #	SOW Requirement
4.2.6-06 (new)	The Contractor shall perform a configuration audit quarterly and review the audit results with the State.
4.2.6-07 (new)	The Contractor shall provide configuration management audit recommendations to the State for review and implementation as part of audit process.
4.2.6-08 (new)	The Contractor shall conduct all Change Management and Configuration Management Execution activities under the Fixed Price services.
4.2.6-09 (new)	The Contractor shall provide a real-time dashboard in the CMDB tool that shall at a minimum include functionality for the State to review a list of current configurations.
4.2.6-10 (new)	The Contractor shall provide Ad Hoc Reports from the CM Tools used on the project when requested, and at no additional cost to the State. Refer to the Configuration Management Plan (CD-4.2-3), subsection 3.2 Configuration Management Tools. For example, upon each software production release provide and deliver the changes to the configurable portions of the software (on/off switches). This information is found in the Service Now CMDB tool.
4.2.6-11 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.2.7 Change Readiness Plan

This section includes the requirements for the Change Readiness Plan deliverable in support of Change Requests.

Table 4-13: Change Readiness Plan (CD-4.2-4)

Req #	SOW Requirement
4.2.7-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Change Readiness Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope of Release XX.x 3. APPROACH 3.1 CRP Approach 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. RXX.x BUSINESS CHANGE MANAGEMENT IMPACT ANALYSIS AND SUPPORT STRATEGIES 8. GLOSSARY AND ACRONYMS 8.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
4.2.7-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
4.2.7-03 (modified)	Following the methodology approved in the Organizational and Business Change Management Plan, the Contractor shall produce a Change Readiness Plan, based on the discussions and analysis conducted in collaboration with the CalHEERS Project teams that accurately details and describes the process changes affecting the way staff will perform their jobs once the CR is implemented and in production.
4.2.7-04 (modified)	Following the methodology approved in the Organizational and Business Change Management Plan, the Contractor shall provide a Change Readiness Plan that accurately documents the steps the person in the role will complete once they begin using the CalHEERS System along with the steps that the person will stop completing once the CR is implemented and in production.
4.2.7-05 (modified)	Based on the methodology approved in the Organizational and Business Change Management Plan, the Contractor shall provide the following change preparation strategies: 1. Approach to change management support 2. Contractor, State Project staff and State roles and responsibilities 3. Communication processes and procedures 4. Tools and templates in support of Change Readiness
4.2.7-06 (new)	The Change Readiness Plan shall describe: 1. Organizational impacts (as appropriate) to: - a County Offices - b DHCS, Covered California - c Interface Partners - d Other Organizations 2. Business Process Gap Analysis 3. Business Process Impacts
4.2.7-07 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.2.7-08 (new)	The Contractor shall update or develop the following appendices and attach them to the Change Readiness Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts

Req #	SOW Requirement
	Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.2.8 Change Readiness Execution

Table 4-14: Change Readiness Execution

Req #	SOW Requirement
4.2.8-01 (new)	The Contractor shall staff, manage, lead and execute Change Readiness Management on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.2-4 – Change Readiness Plan.
4.2.8-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.2.9 Change Request Cost Summary

This section includes the requirements for the Change Request Cost Summary deliverable.

Table 4-15: Change Request Cost Summary (CD-4.2-5)

Req #	SOW Requirement
4.2.9-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the Change Request (CR) Cost Summary for all CRs produced for the CalHEERS as directed by the Change Request Process deliverable (CD-4.2-1).
4.2.9-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.2.9-03 (new)	The Contractor shall collaborate with the State to incorporate several improvements to the existing CR Cost Summary to include but not be limited to the following: • More definition around what can be added and what cannot? Limit to fixed numbers/hours/percentages? • Transparency in hours specifically tied to individuals and specific activities. • Use of actuals instead of set percentages/hours based on Very High /High/ Medium/ Low/etc. • Elimination of the use of set percentages for hours/costs of estimates of actuals. • Tool considerations to tie into the historical cost database. • Incorporates TCO methodology updates (see SOW 4.2.1-CHANGE REQUEST PROCESS) • A separate cost summarization by Fiscal Cost Category (by Fiscal Year)
4.2.9-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.2.9-05 (new)	The Contractor shall update or develop the following appendices and attach them to the Change Request Cost Summary deliverable:

Req #	SOW Requirement
	Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.2.10 Change Request Cost Summary Execution

Table 4-16: Change Request Cost Summary Execution

Req #	SOW Requirement
4.2.10-01 (new)	The Contractor shall staff, manage, lead and execute Change Request Cost Summary activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.2-5 – Change Request Cost Summary.
4.2.10-02 (new)	The Contractor shall not charge for any warranty cost(s) within a Change Request.
4.2.10-03 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.3 CHANGE/REFRESH/UPGRADES

The Contractor shall design and develop changes, enhancements, and upgrades to CalHEERS based on approved Change Requests (CR) utilizing the methods described in this section.

4.3.1 System Development Outline

Table 4-17: System Development Outline (CD-4.3-1)

Req #	SOW Requirement
4.3.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS System Development Outline, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 2. CR Overview 3. Requirements 4. Summary of Changes 4.1 Placeholder for Impacted Component #1 4.1.1 As-is function. 4.1.2 To-be function. 4.2 Placeholder for Impacted Component #2 4.2.1 As-is function. 4.2.2 To-be function 5. Revision History 6. Terms and Definitions APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
4.3.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.3.1-03 (new)	For each approved CR, the Contractor shall provide a System Development Outline that includes but is not limited to: 1. Purpose of the Document 2. CR Overview 3. Requirements 4. Summary of Changes 5. Revision History 6. Terms and Definitions 7. Document References
4.3.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.3.1-05 (new)	The Contractor shall update or develop the following appendices and attach them to the System Development Outline deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s)

Req #	SOW Requirement
	3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.3.2 System Development Execution

Table 4-18: System Development Execution

Req #	SOW Requirement
4.3.2-01 (new)	The Contractor shall staff, manage, lead and execute System Development on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.3-1 – System Development Outline.
4.3.2-02 (existing)	The Contractor shall obtain written approval from the State Project Director or designee, prior to the beginning of system development activities.
4.3.2-03 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.3.3 Architectural Design Document

The Architectural Design Document details and reflects the CalHEERS architecture based on the validated requirements. The Architectural Design Document is to be maintained and kept current.

Table 4-19: Architectural Design Document (CD-4.3-2)

Req #	SOW Requirement
4.3.3-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Architectural Design Document deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Docs 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Update Frequency 3. APPROACH

Req #	SOW Requirement
	4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.1.1 Contractor Roles and Responsibilities 6.1.2 State Roles and Responsibilities 7. CALHEERS ARCHITECTURE 7.1 Overview 7.2 Executive Summary 7.3 High-Level Diagram and Description of CalHEERS Architecture 7.4 Infrastructure Architecture 7.4.1 Network Architecture 7.4.2 Platform Architecture 7.4.3 Information Architecture 7.4.4 Web Portal Architecture 7.5 Single Stream React Architecture 7.6 Data Exchange Architecture 7.7 Notice Architecture 7.8 Printer Architecture 7.9 Forms Architecture 7.10 Business Architecture 7.11 Interface Architecture 7.12 Batch Architecture 7.13 Data Warehouse Architecture 7.14 Target State Architecture (TSA) Architectural Hierarchy Diagram 7.15 Application Components and their high-level hardware / software mapping 7.16 RTM Mapping 8. GLOSSARY AND ACRONYMS 8.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARDS MAPPING
4.3.3-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.3.3-03 (modified)	The Contractor shall maintain the Architectural Design Document in accordance with ISO/IEC 12207, IEEE 12207-2008 Systems and Software Engineering - Software Life Cycle Processes (Section 6.4.3 - System Architectural Design, Section 7.1.3 - Software Architectural Design Process, Section 7.1.4 - Software Detailed Design Process, Section 7.3.1 - Domain Engineering Process). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.3.3-04 (existing)	The Contractor shall identify both hardware and software components, and a high-level description of how the system requirements are allocated among the system components in the Architectural Design Document.

Req #	SOW Requirement
4.3.3-05 (existing)	The Contractor shall produce and maintain an Architectural Design Document that includes but is not limited to: 1. Executive Summary 2. Description 3. Scope 4. Overview 5. General Roles and Responsibilities 6. High-Level Description and depiction of the CalHEERS architecture 7. Forms Architecture 8. Appendices a. Technology Infrastructure Architecture b. Information Architecture c. Business Architecture d. Data Exchange Architecture e. Web Portal Architecture f. Printer Architecture
4.3.3-06 (modified)	The Contractor shall validate, update and maintain the Architectural Design Document to always reflect the as-built system.
4.3.3-07 (existing)	The Contractor shall update and maintain the Architectural Design Document showing the relationship between the Requirements Traceability Matrix, Contract SOW and SyRS requirements.
4.3.3-08 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.3.3-09 (new)	The Contractor shall update or develop the following appendices and attach them to the Architectural Design Document deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver

Req #	SOW Requirement
	4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.3.4 Architectural Design Execution

Table 4-20: Architectural Design Execution

Req #	SOW Requirement
4.3.4-01 (new)	The Contractor shall staff, manage, lead and execute all Architecture Design activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.3-2 – Architectural Design Document.
4.3.4-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.3.5 Detailed System Design Deliverable

The Detailed System Design (DSD) documents the CalHEERS solution and provides traceability to the validated System Requirements Specification (SyRS). The DSD identifies software components and provides a detailed description of how the system requirements are allocated to those software components. The scope of the DSD is to document system functionality. The DSD is to be maintained and kept current. Refer to Appendix A-2, SPECIAL PROVISIONS, A-2.3, SERVICE LEVEL AGREEMENTS & LIQUIDATED DAMAGES, for liquidated damages associated with this requirement.

Table 4-21: Detailed System Design Deliverable (CD-4.3-3)

Req #	SOW Requirement
4.3.5-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Detailed System Design deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Update Frequency 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.1.1 Contractor Roles and Responsibilities 6.1.2 State Roles and Responsibilities 7. DETAILED SYSTEM DESIGN 7.1 Overview

Req #	SOW Requirement
	7.1.1 Portal 7.1.2 Eligibility 7.1.3 Interfaces 7.1.4 Enrollment 7.1.5 Notices 7.1.6 Security 7.1.7 Reporting 7.2 Mapping of the System Requirements Specification (SyRS) Categories to Software Components 7.3 Design document types for each Software Component and location in the Design Repository structure 7.4 Maintaining Version Control and Track Changes for Design Document updates 7.4.1 Track Changes Procedure 7.4.2 Version Control Procedure 8. DESIGN MERGE PROCESS 8.1 Purpose 8.2 Background 8.3 Design CRFI Process - Pre-requisites 8.4 Design Merge Process – Detailed Steps 8.5 Correcting Design Merge Mistakes 8.6 Removal of Design Document for Retired Functionality 8.7 Security Design Documents 8.8 Design Merge Training for Contractor Design Lead 9. TOOLS 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARDS MAPPING APPENDIX 5: INVENTORY OF DESIGN DOCUMENTS APPENDIX 6: DESIGN MERGE DISCREPANCY EMAIL TEMPLATE
4.3.5-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.3.5-03 (modified)	The Contractor shall prepare the DSD in accordance with 1016-2009 - IEEE Standard for Information Technology - Systems Design - Software Design Descriptions (3 - Conceptual model for software design description), ISO/IEC 14764, IEEE 14764-2006 Software Engineering - Software Life Cycle Processes Maintenance) and IEEE ISO/IEC 12207, IEEE 12207-2008 System and Software Engineering (Section 5 - Maintenance Processes) Software Life Cycle Processes (Section 5.1.12 - Life Cycle Models and Stages, Section 5.2.1 - Categories of Life Cycle Processes, Section 6 - System Life Cycle Processes, Section 6.2 - Organizational Project-Enabling Process, Section 6.4.3 - System Architectural Design, Section 6.4.10 - Software Maintenance Process, Section 7 - Software Specific Processes) pertaining to: 1. Recommended Practice for Software Design Descriptions 2. Standard for Software Maintenance 3. Standard for Information Technology – Software Life cycle Processes: a. Development Process b. Software Architectural Design c. Software Detailed Design As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.3.5-04 (modified)	The Contractor shall validate, update and maintain the DSD to always reflect the as-built system.

Req #	SOW Requirement
4.3.5-05 (existing)	The Contractor shall identify and map system requirements to software components.
4.3.5-06 (existing)	The Contractor shall refine software items into lower levels of software that can be coded, compiled, and tested.
4.3.5-07 (existing)	The Contractor shall allocate all of the system and software requirements into distinct functional components.
4.3.5-08 (existing)	The Contractor shall provide a DSD that includes but is not limited to: 1. Documentation of the solution that fulfills the detailed system design requirements. 2. Is traceable to the system and component software requirements. 3. Provides a consistent, unambiguous design description that shall permit coding without the need for further information.
4.3.5-09 (existing)	The Contractor shall provide a DSD that includes but is not limited to: 1. Executive Summary 2. Overview 3. General Roles and Responsibilities a. Functional Areas b. Topic Area c. Business Processes d. Code table Definitions e. Database Entities (Cross Reference with Database Design Description) f. Business Class Definitions Requirements 4. Appendices a. User/Security Role Matrix b. DSD update mapping to Change Requests c. Advantage Baseline Data Elements d. Check Eligibility Processing Order e. Notice of Action (NOA) Translations f. Error Messages g. Business Rules h. Forms and Notifications i. Tasks j. DSD Section/Appendix List
4.3.5-10 (modified)	The Contractor shall provide a DSD that results in efficient and cost-effective operations and maintenance, as determined by the State Project Director or designee.
4.3.5-11 (existing)	The Contractor shall merge all incremental DSD updates into a single master DSD deliverable, delivering the master DSD to the State per SOW Section 8, DELIVERABLES, and shall maintain the master DSD for the term of the Contract.
4.3.5-12 (new)	The State identifies and associates the following artifacts to the Detailed System Design Deliverable. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Design & Code Request (DCR) Process
4.3.5-13 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.3.5-14 (new)	The Contractor shall update or develop the following appendices and attach them to the Detailed System Design Deliverable: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID #

Req #	SOW Requirement
	- SOW Requirement Text - Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) - Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: - Artifact Name - Associated Parent DEL - State Approver - SI Point of Contact - Review Frequency - Submission Frequency - Artifact File Format - Artifact Location (e.g., SharePoint breadcrumb) - Link to artifact

4.3.6 Detailed System Design Execution

Table 4-22: Detailed System Design Execution

Req #	SOW Requirement
4.3.6-01 (new)	The Contractor shall staff, manage, lead and execute Detailed System Design on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.3-3 – Detailed System Design Deliverable.
4.3.6-02 (modified)	The Contractor shall implement and control modifications to the CalHEERS System's design, hardware, firmware, and software using change management and configuration management processes.
4.3.6-03 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.3.7 Commercial Off the Shelf Software Design Description

The Commercial Off the Shelf (COTS) Software Design Description (CSDD) provides a high-level description of the COTS components that support the CalHEERS core business functions. The CSDD identifies how the system requirements are allocated among the COTS components, and how the design minimizes the complexity and cost of incorporating future COTS upgrades into CalHEERS. The CSDD is to be maintained and kept current.

Table 4-23: COTS Software Design Description (CD-4.3-4)

Req #	SOW Requirement
4.3.7-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the COTS Software Design Description deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.1.1 Contractor Roles and Responsibilities 6.1.2 State Roles and Responsibilities 7. ACCENTURE BILLING ENGINE 7.1 Description 7.2 Approach 7.3 Component Description 7.3.1 High-Level Component Description 7.3.2 Component Features used by CalHEERS 7.3.3 ABE Component Mapping to HBX System 7.3.4 Component Features not used by CalHEERS 7.3.5 CalHEERS Version 7.3.6 Level of Customization 7.3.7 Upgrade Plan 7.3.8 Maintenance Plan 7.3.9 Software Dependency Consideration 8. GLOSSARY AND ACRONYMS

Req #	SOW Requirement
	10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARDS MAPPING
4.3.7-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.3.7-03 (modified)	The Contractor shall provide a CSDD that includes but is not limited to documenting: 1. A feasible solution for associated requirements 2. Contains system components that are traceable to the system requirements 3. Contains a consistent, unambiguous description 4. Identifies new features that can enhance CalHEERS functionality 5. Results in an efficient and cost-effective operations and maintenance, as determined by the State Project Director or designee
4.3.7-04 (modified)	The Contractor shall maintain the CSDD in accordance with ISO/IEC/IEEE 12207-2008 System and Software Engineering - Software Life Cycle Processes (Section 6 – System Life Cycle Processes) pertaining to Software Life Cycle Processes, Software Architectural Design, and System Documentation. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.3.7-05 (new)	The Contractor shall, in collaboration with the State, include a section that defines the HOSTED SERVICE CENTER TECHNOLOGY STACK.
4.3.7-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.3.7-07 (new)	The Contractor shall update the following appendices and attach them to the COTS Software Design Description deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver

Req #	SOW Requirement
	4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.3.8 Commercial Off the Shelf Software Design Execution

Table 4-24: Commercial Off the Shelf Software Design Execution

Req #	SOW Requirement
4.3.8-01 (new)	The Contractor shall staff, manage, lead and execute all COTS Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.3-4 – COTS Software Design Description deliverable.
4.3.8-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.3.9 Logical Data Model

Table 4-25: Logical Data Model (CD-4.3-5)

Req #	SOW Requirement
4.3.9-01 (existing)	The Contractor shall prepare a Logical Data Model (LDM) to include at a minimum: 1. Participants Roles and Responsibilities 2. Conceptual, Logical, And Physical Data Models: a. LDM Fields b. LDM Relationship Views c. Logical Data Model (LDM) d. Data Flows Diagrams (DFD) e. LDM Data Dictionary/CRUD Matrix
4.3.9-02 (modified)	The Contractor shall provide a CalHEERS Conceptual Data Model that is designed, built, and maintained in compliance with NIEM.
4.3.9-03 (new)	The Contractor shall staff, manage, lead and execute Logical Data Model maintenance activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.3-5 – Logical Data Model.
4.3.9-04 (modified)	The Contractor shall document a SOP to produce the Daily Production Status Report and take over, update, deliver, and maintain a detailed Database Design Description (DDD). The DDD shall include any modifications to the data dictionary, ERD(s), and physical database design.
4.3.9-05 (new)	The Contractor shall staff, manage, lead and execute Database Design activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-4.3-5 – Logical Data Model.
4.3.9-06 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.3.9-07 (modified)	The Contractor shall maintain the DDD in accordance with ISO/IEC/IEEE 16326-2009 Systems and Software Engineering - Life Cycle Processes - Project Management (Section 5.8.5.1 - Documentation) pertaining to System Documentation. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.3.9-08 (existing)	The Contractor shall maintain and update the DDD to always reflect the as-built system.

Req #	SOW Requirement
4.3.9-09 (existing)	The Contractor shall normalize all database design as appropriate, in accordance with the DDD. Any changes or exceptions to the degree of normalization shall require prior approval by the State Project Director or designee.
4.3.9-10 (existing)	The Contractor shall provide impact and mapping of updated data elements of database tables with the CR, requirement, or defect number in the DDD.
4.3.9-11 (modified)	The Contractor shall provide a DDD that includes but is not limited to: 1. Documentation of the solution that fulfills the database requirements. 2. Traces the system and component software requirements. 3. Provides a consistent, unambiguous design description that shall permit coding without the need for further information. 4. Results in an efficient and cost-effective maintenance and operations environment as determined by the State Project Director or designee. 5. Includes ERD's that graphically display Primary Key (PK) and Foreign Key (FK) relationships 6. Includes data dictionaries that provide detailed information on each data element including table name, column name, column data type, source data elements and relationships (PKs and FKs) 7. Includes ERD's and table column lists that are generated using a data modeler tool 8. Includes all ERDs associated with the CalHEERS System 9. Includes database schemas
4.3.9-12 (existing)	The Contractor shall provide a Database Design Description (DDD) that includes the Logical Data Model (LDM) and Physical Data Model (PDM) as created and maintained within the relational data modeling tool.
4.3.9-13 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.3.9-14 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.3.9-15 (new)	The State identifies and associates the following artifacts to the Logical Data Model. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • ~~D-4.4-5~~ Database Design Description • ASM_DISK_ADDITION • AWR ASH and ADDM in RAC environment • awscli command • Backup and Restore • Backup Manifest storage and generation • CalHEERS DW- Snowflake Admin SOP • Calheers User Management - DBA • Cluster Verification • Configure_Databases_in_OEM • Configure_DG_Broker • Connecting to Oracle from SQL Server • conversion_to_physical_standby_failing_from_snapshot_standby_after_adding_new_tablespace_on_Primary_database • Create SQL Profiles, Baseline, COE and EXPIMP Plans • Create_explain_plan • Create_restore_point • Creating SQL Profile • Data and Database Management • Database cloning • Database Flashback • Database_Switchover

Req #	SOW Requirement
	• Dataguard_Broker • DB monitoring (main reports and schedules) • DBCR execution process • Documents Inventory • DR_Setup • DW_ETL_Monitoring • EDW_CODE_DROP_GUIDE_2021 • FBDA_maintenance_Activity • FGA maintenance activity • Loading data using SQLLDR utility • Logical_replication • LT load test pre-checks • Monthly_FGAandAUD • New application schema creation and launchpad setup • Object comparison report • Opscopy_dry_run • Opscopy_refresh • Partitioning using DBMS_REDEFINITION • PCAP_DBCR_Process • PCR GUIDE 2021 • Performance Tuning Queries in PostgreSQL • pg_cron_setup • Point in time and TSPITR Tablespace Recovery • Postgres FDW Setup between Postgres DB to Postgres DB • PostgreSQL Important Monitoring Quieres • PostgreSQL_Installation_and_DB_Creation • PostgreSQL_RDS_upgrade_using_pglogical • PrepDDS Refresh • PROD_patching_plan • Purging SCAN listener • RDS_Backup • Reorg and purging • Restore deleted datafile • Restore_recover of Datafiles • RMAN full and incremental backup scripts • RMAN_Block_recovery • Running_database_health_checks • Schema_Refresh_Process • SOP - PCAP Database Creation with Grants • SOP - pgBadger Report Generation • SOP ABE Service Account Password Change • SOP to create PITR of Aurora Cluster • SOP_Backup_Restore_From_S3 • SOP_Backup_Restore_From_S3_v1_goldencopy • SOP_configure_postgres_server_in_version_report • SOP-Start_STOP_has • SQL SERVER BACKUP AND RECOVERY • SQL Server Data Masking • SQL SERVER PARTIONING AND ARCHIVING • SQL Server Runbook • SQL Server TDE • SQL_Server_Auditlog_generation_error

Req #	SOW Requirement
	• SQL_Server_Data_Refresh • SQL_Server_Disaster_recovery_mirroring • SQL_Server_Dynamic_Management_Views • SQL_Server_Patching_Support • SQL_Server_Performance_Monitoring • Standby_incremental_recovery • Storage_capacity_gen • Switchover • Tablespace Pre-Allocation and LOB column space Addition • TFA installation • XML comparision
4.3.9-16 (new)	The Contractor shall update or develop the following appendices and attach them to the Database Design Description deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.4 CODE DEVELOPMENT

The code development phase is used by the Contractor to incorporate changes associated with approved change request and defect corrections. Refer to Appendix A-2, SPECIAL PROVISIONS, A-2.3, SERVICE LEVEL AGREEMENTS & LIQUIDATED DAMAGES, for liquidated damages associated with the code development requirements.

4.4.1 Software Engineering Standards

The Software Engineering Standards (SES) reflect the industry's best practices in software engineering. The standards provide guidance for requirements validation, system design, coding, testing, technology specific construction standards and work products. The SES shall ensure that new system artifacts under development will be consistent with current standards.

The SES shall provide the CalHEERS Project team with sufficient guidance and control points to support production and maintenance of a cohesive, maintainable and standard system.

Table 4-26: Software Engineering Standards (CD-4.4-1)

Req #	SOW Requirement
4.4.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Software Engineering Standards, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.1.1 Contractor Roles and Responsibilities 6.1.2 State Roles and Responsibilities 7. SOFTWARE ENGINEERING PROCESSES 7.1 Change Request Process 7.1.1 Scope Management 7.1.2 Change Request Schedule 7.1.3 Functional and Technical Design Approval Process 7.2 Development Process 7.2.1 Code Review Process 7.2.2 Code Quality Assurance Process 7.2.3 Name Resolution for IP addresses 7.2.4 Coding Standards 7.2.5 Unit Test Guidelines 7.3 Defect Management 7.4 Agile Process 8. GLOSSARY AND ACRONYMS 8.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
4.4.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.4.1-03 (existing)	The Contractor shall accurately maintain Automated Code Review Results and deliver those results to the State in an Automated Code Review Results Work Product that includes but is not limited to: • Report(s) with results from development code reviews that identifies software defects and security vulnerabilities.

Req #	SOW Requirement
4.4.1-04 (modified)	The Contractor shall maintain, code and deliver the CalHEERS Application that meets the requirements specified within the Contract, and in accordance with ISO/IEC/IEEE 14764-2006 Software Engineering - Software Life Cycle Processes - Maintenance (Section 6.8.2.3 – Software Detailed Design). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.4.1-05 (existing)	The Contractor shall develop and maintain the Software Engineering Standards (SES) Deliverable, that defines the software engineering and technology specific construction standards, used in development for the CalHEERS system. The deliverable shall also describe the processes used for requirements validation, system design, coding, and testing at the software component level.
4.4.1-06 (new)	The Contractor shall ensure that code changes comply with web accessibility standards of Section 508 of the Rehabilitation Act, WCAG 2.1, and California Government Code Sections 7405, 11135, and 11546.7 to ensure the online application is accessible to all users. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.4.1-07 (new)	The contractor shall update the Software Engineering Standards DEL, to describe process, different times and different levels of code review that are conducted on CalHEERS (e.g., when are full code reviews conducted on a sample of a releases CRs).
4.4.1-08 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.4.1-09 (new)	The Contractor shall update or develop the following appendices and attach them to the Software Engineering Standards deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency

Req #	SOW Requirement
	6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.4.2 Software Engineering Standards Execution

Table 4-27: Software Engineering Standards Execution

Req #	SOW Requirement
4.4.2-01 (new)	The Contractor shall staff, manage, lead and execute all Software Engineering Standards activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.4-1 – Software Engineering Standards.
4.4.2-02 (existing)	The Contractor shall implement code changes and programs modifications with prior approval from the State and within the specified time period as per the State's guidelines.
4.4.2-03 (existing)	The Contractor shall utilize name resolution instead of hard coded IP addresses where possible.
4.4.2-04 (existing)	To ensure the CR release and defect management, prior to implementing the CR into Production, the Contractor shall have the CR validated and verified through a Code Quality Assurance process to ensure code accuracy and quality.
4.4.2-05 (modified)	The Contractor create and complete a detailed Change Request to ensure better scope management and accurate determination of what will be included in Releases to improve the front and back-end processes of artifact and design documentation management.
4.4.2-06 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.5 SYSTEM REQUIREMENTS MANAGEMENT

This section pertains to the management of system requirements and is not to be confused with the management of requirements for the Contract that is discussed in SOW 3 PROJECT MANAGEMENT REQUIREMENTS.

4.5.1 System Requirements Management Plan

The management of requirements is a discipline that the State expects the Contractor to assist the State in managing. Requirements for the CalHEERS system are at various levels of detail and must be organized and managed properly. This section covers the expectation for requirements management.

Table 4-28: System Requirements Management Plan (CD-4.5-1)

Req #	SOW Requirement
4.5.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the System Requirements Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Update Frequency 3. APPROACH

Req #	SOW Requirement
	3.1 Overview of SyRS (Hierarchy Chart) 3.2 Types of Requirements 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Contractor Roles and Responsibilities 6.2 State Roles and Responsibilities 7. REQUIREMENTS LIFE CYCLE 7.1 Requirement Initiation 7.1.1 Preparation for Pre-JAD Sessions 7.1.2 Pre-JAD Sessions 7.1.3 JAD Sessions 7.1.4 CRFI Process and Requirement Approval 7.2 Requirement Maintenance 7.2.1 System Requirements Management Tool (SRMT) 7.3 RTM Bi-Weekly Report 7.4 RTM Management 7.4.1 Prior to Implementation 7.4.2 Post Implementation 7.4.3 Business Requirements (BRs) 7.4.4 Non-Functional Requirements (NFRs) 7.5 SyRS Evaluation and Updates Report 8. USER STORY LIFE CYCLE 8.1 HCD User Story Creation 8.2 Agile User Story Initiation 8.2.1 Agile Planning Phase 8.2.2 Agile Discovery Phase 8.2.3 Agile Implementation Phase 8.3 User Story Traceability Matrix (USTM) 8.4 USTM Maintenance 8.5 USTM Bi-Weekly Reporting 9. TOOLS 9.1 EWM 9.2 ALM Requirements Module 9.3 JIRA 9.3.1 HCD use of JIRA 9.3.2 Agile use of Jira 9.4 USTM Report (Excel Spreadsheet) 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
4.5.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.5.1-03 (existing)	The Contractor shall develop, deliver, maintain, and execute the System Requirements Management Plan, which shall identify the processes and procedures the Contractor will use to manage the CalHEERS system requirements. The System Requirements Management Plan shall, at a minimum, include the following areas: 1. Tool(s) for managing system requirements and user stories 2. System Requirements Management and Traceability 3. User Story Management and Traceability

Req #	SOW Requirement
	4. Testing Traceability 5. Change Request Traceability
4.5.1-04 (new)	The State identifies and associates the following artifacts to the System Requirements Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • SyRS Evaluation and Updates • User Story Traceability Matrix
4.5.1-05 (modified)	The Contractor shall update or develop the following appendices and attach them to the System Requirements Management Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.5.2 System Requirements Validation & Execution

Table 4-29: System Requirements Validation & Execution

Req #	SOW Requirement
4.5.2-01 (new)	The Contractor shall staff, manage, lead and execute all System Requirements Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.5-1 – System Requirements Management Plan.
4.5.2-02 (existing)	The Contractor shall ensure the requirements are clear, complete, testable, and representative of the business needs.

Req #	SOW Requirement
4.5.2-03 (existing)	The Contractor shall conduct system requirements validation activities for every application release shall at a minimum include: 1. Review of current system documentation, including design documents and manuals 2. Analysis of existing code. 3. Business process analysis including focus groups and surveys. 4. Review of existing and proposed program policies.
4.5.2-04 (modified)	The Contractor shall use the set of system requirements, provided by the Incumbent Contractor and reviewed/approved by the State (towards the end of the Transition-In phase), as the initial base set of requirements to perform the system requirements validation review. Clarifications and refinements to the base set of requirements shall be expected and included in the fixed price estimates.
4.5.2-05 (existing)	The Contractor shall ensure that any new requirements identified during system requirements validation will be controlled via change management and requirements management processes. The System Requirements approved by the State Project Director or designee shall become the updated baseline system requirements against which change control is applied.
4.5.2-06 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.5.3 System Requirements Management Tool

The CalHEERS system requirements and User Stories are what defines and baselines the CalHEERS System. The State desires a common tool where both system requirements and user stories are stored and managed under strict processes. Refer also to SOW 3.13 CalHEERS Project Enterprise Tools for more information regarding tool requirements.

Table 4-30: System Requirements Management Tool

Req #	SOW Requirement
4.5.3-01 (new)	The Contractor shall consolidate, store, and maintain all CalHEERS System Requirements and User Stories in a single System Requirements Management Tool, collaborating with the State on the configuration and implementation timing.

4.5.4 SyRS Evaluation and Updates Report

The SyRS Evaluation and Updates Report summarizes the results of the system requirements validation in accordance with the Project Master Plan.

Table 4-31: SyRS Evaluation and Updates Report

Req #	SOW Requirement
4.5.4-01 (modified)	The Contractor shall develop and deliver a SyRS Evaluation and Updates Report for each feature release. The report shall be produced by exporting the entire set of approved and implemented system requirements from the System Requirements Management Tool, with a filter applied to show all requirements either implemented (as part of the feature release) or impacted (by a priority or maintenance release) since the previously submitted SyRS Evaluation and Updates Report.

4.6 RELEASE MANAGEMENT

Release management is the process of managing, planning, scheduling, and controlling a software build through different stages and environments, including testing and deploying software releases. The Contractor will participate in the release management as described in the following sections.

4.6.1 Release Management Plan

The Release Management Plan identifies release management processes and procedures for CalHEERS during the Maintenance and Operations Phase. The plan provides a framework for the process, procedures and activities that are implemented for each release. The plan also includes the Release Installation Procedures and the Release Back out Procedures.

Table 4-32: Release Management Plan (CD-4.6-1)

Req #	SOW Requirement
4.6.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Release Management Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Introduction to Release Management Plan 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Release Management Plan Approach 4. 4.6.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.6.1-03 (modified)	The Contractor shall take over, update, deliver, maintain and execute the Release Management Plan in accordance with current ISO/IEC/IEEE Standard 15289-2015 (Systems and Software Engineering - Life Cycle Information Items, Section 10.61 – Release Plan). (Technical Preparation and Organizational Preparation) which includes but is not limited to: 1. Pre-Implementation Review 2. System Development Planning 3. System Requirements Analysis and Validation 4. Current and Accurate Detailed System Design

Req #	SOW Requirement
	5. Current and Accurate Coding and Documentation 6. System Integration Test (SIT) 7. User Acceptance Testing (UAT) as appropriate 8. Training as appropriate 9. Deployment and Production Release 10. Post Implementation Review As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.6.1-04 (modified)	The Contractor shall create, update, implement, and maintain a life cycle methodology used for Release Planning (Technical Preparation and Organizational Preparation) which includes but is not limited to: 1. Capacity Planning 2. Release Management Facilitation and Collaboration with other impacted Change Management/Change Support activities, workflows and Deliverables
4.6.1-05 (new)	The State identifies and associates the following artifacts to the Release Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Pre-Release Webinar • Job Aid Review Process • Process Overview for Functional Support - Post Go Live Feature Release • Release Management Process • Release Notes Process • Release Notes Template_ADA Compliance • Release_Notes_Formatting • SOP for SAWS Communication for Priority Release
4.6.1-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.6.1-07 (new)	The Contractor shall update or develop the following appendices and attach them to the Release Management Plan deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with

Req #	SOW Requirement
	this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.6.2 Release Management Execution

Table 4-33: Release Management Execution

Req #	SOW Requirement
4.6.2-01 (new)	The Contractor shall staff, manage, lead and execute all Release Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.6-1 – Release Management Plan.
4.6.2-02 (existing)	The Contractor shall collect and document all issues and concerns that the users encounter with the Release for six (6) months after the Implementation date and report them in the Project tracking System.
4.6.2-03 (existing)	The Contractor shall be responsible for making recommendations for maximizing the effectiveness of the Release Schedule on at least an annual basis. The Contractor must be responsive to the State's request for modifications to the Release Schedule to address specific priorities or issues.
4.6.2-04 (modified)	The Contractor shall be responsible for working closely and cooperatively with the State to plan for and prioritize Application Releases and Technical Changes.
4.6.2-05 (new)	The Contractor shall, in collaboration with the State, develop, enhance, deliver, and maintain a Change Request Roadmap that tracks all CR's designated as either Functional or Technical within the Change Request Tracking Tool (EWM).
4.6.2-06 (new)	The Contractor shall facilitate a Release Management planning meeting that wholistically focuses on all changes to CalHEERS, including Functional and Technical Change Requests (CRs), and review project roadmaps, as well as discuss potential impacts and risks.
4.6.2-07 (existing)	The Contractor shall be responsible for working closely and cooperatively with the State in providing notification of Release content. Notification shall include but not be limited to: 1. Job Aids 2. Webcasts 3. Release Notes
4.6.2-08 (existing)	The Contractor shall hold and facilitate, with State participation, a Release Initiation and Planning Meeting in accordance with the Release Management Plan, for every release.
4.6.2-09 (existing)	The Contractor shall conduct all release planning, management and execution activities according to the Release Management Plan.
4.6.2-10 (modified)	If the Deliverables and Services required for Go-Live of a Release, the System, or the Hosting Services have received Acceptance, but the State decides to delay Go-Live for reasons beyond Contractor's reasonable control, and there are cost or Schedule impacts from such delay on the Contractor, a CR shall accurately be issued pursuant to Special Provisions.
4.6.2-11 (existing)	When the State decides to Go-Live for a Release, the System and the Hosting Services, Contractor shall accurately provide Services for the State as described in this Contract.
4.6.2-12 (existing)	For releases, as described in the Release Management Plan, the Contractor shall further divide and track the release into sub-phases for requirements validation, design, coding, testing, training, implementation and post implementation review.

Req #	SOW Requirement
4.6.2-13 (existing)	The Contractor shall tailor release planning to combine the milestones for project initiation, and each subsequent phase of the system development life cycle, with approval from the State Project Director or designee.
4.6.2-14 (existing)	As part of the Release Readiness Review, the Contractor shall provide, and conduct a walkthrough of, the release-applicable deliverables, in accordance with the Release Management Plan.
4.6.2-15 (existing)	The Contractor shall track and report to the State Project Director or designee the actual cost of each release and the cumulative cost of all releases for the year, calendar and fiscal, and compare to the Contract annual maintenance appropriation to ensure the annual appropriation is not exceeded.
4.6.2-16 (modified)	The Contractor shall conduct high-level walkthroughs, with State participation if requested, to help evaluate the software products in accordance with IEEE 1028-2008 - IEEE Standard for Software Reviews and Audits (Section 7 - Walkthroughs). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.6.2-17 (existing)	The Contractor shall hold and facilitate, with State participation, Monthly Release Reviews in accordance with the Release Management Plan, the Contractor shall include, but not be limited to, the following: 1. Release Readiness Review 2. Post Statewide Implementation Review
4.6.2-18 (existing)	The Contractor shall hold and facilitate, with State participation, Quarterly Release Reviews in accordance with the Release Management Plan, the Contractor shall include the following: 1. Release Analysis and Design Review 2. Modification Development and Test Readiness Review 3. Release Test Review and Release Readiness Review 4. Post Statewide Implementation Review
4.6.2-19 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.6.3 Pre-Release Webinar

Table 4-34: Pre-Release Webinar

Req #	SOW Requirement
4.6.3-01 (existing)	The Contractor shall provide a pre-release webinar no less than ten (10) Days prior to a Release.

4.6.4 Source Code Implementation

Table 4-35: Source Code Implementation

Req #	SOW Requirement
4.6.4-01 (existing)	The Contractor shall deploy code and data in accordance with an approved Release Schedule, unless the State identifies a critical need for an additional emergency/priority Release.

4.6.5 Business Product Deliverable

Table 4-36: Business Product Deliverable (CD-4.6-2)

Req #	SOW Requirement
4.6.5-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Business Product Deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.1.1 Contractor Roles and Responsibilities 6.1.2 State Roles and Responsibilities 7. BUSINESS PRODUCTS 8. GLOSSARY AND ACRONYMS 8.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
4.6.5-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.6.5-03 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.6.5-04 (new)	The Contractor shall update or develop the following appendices and attach them to the Business Product Deliverable: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 5. Deliverable Section Number and Title 6. Deliverable Requirement Statement(s) 7. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 8. Validation Method (The method the Contractor used to validate Deliverable compliance) 9. The Contractor's QA Manager sign-off on compliance

Req #	SOW Requirement
	Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.6.6 Business Product Execution

Table 4-37: Business Product Execution

Req #	SOW Requirement
4.6.6-01 (new)	The Contractor shall staff, manage, lead and execute all Business Product Deliverable activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.6-2 – Business Product Deliverable.
4.6.6-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.6.7 Release Based Training

The following requirements apply to the Contractor's release based training responsibilities.

Table 4-38: Release Based Training

Req #	SOW Requirement
4.6.7-01 (existing)	The Contractor shall coordinate with the State regarding the training materials needing to be developed by the Contractor for each release.
4.6.7-02 (modified)	The Contractor shall provide all final training materials thirty (30) Business Days prior to the implementation date of each release.
4.6.7-03 (existing)	The Contractor shall develop and provide web-based training sessions focused on specific, new or existing CalHEERS functionality and processes for each major release.
4.6.7-04 (existing)	The Contractor shall develop and provide webinar style training sessions focused on specific, new or existing CalHEERS functionality and processes specific to various user groups (e.g. service center representatives, count eligibility staff) as defined by the requirements of the CR.
4.6.7-05 (existing)	The Contractor shall provide training on the current application version in production or an upcoming release, if directed by the State Project Director or designee.

4.7 ORGANIZATION & BUSINESS CHANGE MANAGEMENT

The purpose of the Organizational and Business Change Management process is to assist the users in planning and smoothly implementing changes to their organization and business processes. For large or complex changes where the State agrees on the need, the Contractor shall perform the services described in this section.

4.7.1 Organizational and Business Change Management Plan

The Organizational and Business Change Management Plan shall provide the approach and methodology for analyzing, documenting, and strategizing for impacts to the CalHEERS Project at both the project level and change request level (both release and non-release).

Table 4-39: Organizational and Business Change Management Plan (CD-4.7-1)

Req #	SOW Requirement
4.7.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Business and Organizational Change Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. CHANGE MANAGEMENT METHODOLOGY 6.1 Executive Summary 6.2 Overview 6.3 Methodology 6.4 Lessons Learned 7. ORGANIZATIONAL CHANGE MANAGEMENT 7.1 OCM Approach 7.2 Approach to Analyze Project Changes and Impacts 7.3 Approach for Defining Project Change Support Strategies 7.4 Roles and Responsibilities 7.5 Tools and Templates for Analysis 7.5.1 Audience Analysis 7.5.2 OCM Tracking Tool 8. BUSINESS CHANGE MANAGEMENT 8.1 BCM Approach 8.2 Approach to Analyze Business Process Impacts 8.3 Approach to Defining Change Readiness Strategies 8.4 Roles and Responsibilities 8.5 Tools, Templates, Techniques, and Standards for Analysis 8.6 Change Readiness Plan 9. GLOSSARY AND ACRONYMS 9.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS

Req #	SOW Requirement
4.7.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.7.1-03 (modified)	The Contractor shall identify the methodology, strategies, tools, techniques, roles and responsibilities and standards to be used, and how they relation to the Contractor's organization change management team's activities.
4.7.1-04 (modified)	The Contractor shall coordinate with the State to prepare, develop, deliver, maintain and execute an Organizational and Business Change Management methodology.
4.7.1-05 (modified)	The Contractor shall update the Organizational and Business Change Management Plan annually, documenting the year's activities against the plan, recording lessons learned, and updating the plan for the next year.
4.7.1-06 (modified)	The Contractor shall develop, deliver, maintain, and execute a business change management methodology for change requests (release and non-release) on CalHEERS. This methodology must include, but not be limited to the following information: 1. Business change management approach 2. Approach to analyze business process impacts 3. Approach to defining change readiness strategies 4. Roles and responsibilities 5. Tools, templates, techniques, and standards for analysis 6. Relationship & integration with change readiness planning 7. Activities and feedback mechanisms
4.7.1-07 (modified)	The Contractor shall develop, deliver, maintain, and execute the organizational change management methodology that addresses non-change request project-based changes, which shall include at a minimum the following: 1. Executive summary 2. Overview 3. Organizational change management methodology, including the Prosci methodology used at a minimum for the shift from Project to Product Management 4. Approach to analyze project changes and impacts 5. Approach to defining project change support services 6. Roles and responsibilities 7. Tools and templates for analysis 8. Activities and feedback mechanisms
4.7.1-08 (new)	The State identifies and associates the following artifacts to the Organizational and Business Change Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • CalHEERS Education Sessions Process Guide • CalHEERS Virtual Support Issue Documentation Process
4.7.1-09 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.7.1-10 (modified)	The Contractor shall update or develop the following appendices and attach them to the Business and Organizational Change Management Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable)

Req #	SOW Requirement
	Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.7.2 Organizational and Business Change Management Execution

Table 4-40: Organizational and Business Change Management Execution

Req #	SOW Requirement
4.7.2-01 (new)	The Contractor shall staff, manage, lead and execute Organizational Business Change Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.7-1 – Organizational and Business Change Management Plan.
4.7.2-02 (modified)	The Contractor shall provide a Business Process Management System to design, implement and manage the CalHEERS Business Process Management lifecycle that includes but is not limited to the following functions: 1. Analyze 2. Model 3. Design 4. Build 5. Test 6. Deploy 7. Manage 8. Monitor
4.7.2-03 (modified)	The Contractor shall design, document and maintain the CalHEERS Business Process Models, that includes but is not limited to each of the following business functions: 1. Eligibility and Enrollment 2. Plan Management 3. Financial Management 4. Consumer Assistance 5. Reports and Notices 6. Interfaces

Req #	SOW Requirement
4.7.2-04 (existing)	The Contractor shall define and implement an end-to-end Service Analysis and Design Methodology process for Business Process Analysis and Modeling, Service Identification and Specification, based on the following standards, processes, and best practices, including but not limited to: 1. SOA Architectural Styles 2. Service Oriented Modeling and Architecture (SOMA) 3. Model Driven Architecture (MDA) 4. XML Schema design best practices
4.7.2-05 (existing)	The Contractor shall provide and implement an industry standard Business Rules Management System (BRMS) for the maintenance of CalHEERS business rules.
4.7.2-06 (existing)	The Contractor shall implement a single centralized business rules repository in a consistent, standards-based, human readable format.
4.7.2-07 (existing)	The Contractor shall report business change management status as part of the CalHEERS SDMO Status Report and weekly project status meetings.
4.7.2-08 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.7.3 Organizational Change Management Tracking Tool

Table 4-41: Organizational Change Management Tracking Tool (CD-4.7-2)

Req #	SOW Requirement
4.7.3-01 (modified)	The Contractor shall provide an OCM Tracking Tool to manages OCM related data and support change support strategies on CalHEERS.

4.8 TESTING

The CalHEERS System is tested in stages to ensure the number of variables is kept to a minimum in both the application and test environment for each stage of testing. Additional development system(s) may be used as necessary. Testing starts with the evaluation of the simplest element, a unit of software in a test environment, and progresses to the most complex, the full system in the production-equivalent environment. With this in mind, the types of testing include, but not limited to, the following:

- Software Unit and Component Testing
- Integration Testing
- Functional & Security Testing
- System Performance Testing
- Regression Testing
- UAT

Testing on CalHEERS is also done with differing types of test data, as identified below:

- Artificial – Data created to follow a code path or test specific test cases.
- Simulated – Data created to model real data, including A/B testing.
- Real – Data that was processed on the production system.

4.8.1 Test and Evaluation Master Plan

The Test and Evaluation Master Plan (TEMP) documents the overall test and evaluation strategy for CalHEERS, including its structure and objectives, based on current IEEE standards for Software Test Methodology. The TEMP provides a framework within which to generate detailed test and evaluation plans, and it documents the high-level schedule, roles and responsibilities, and resource requirements associated with the test and evaluation function. As

new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.

The TEMP focuses on the overall structure, major elements, and objectives of the test and evaluation program. Release specific test documentation will be included in the Release Test Plan. The Defect Management Process resides in the TEMP and applies to defects in both production and nonproduction environments.

Table 4-42: Test and Evaluation Master Plan (CD-4.8-1)

Req #	SOW Requirement
4.8.1-01 (modified)	The Contractor shall take over, adopt, enhance, deliver, and maintain the Test and Evaluation Master Plan (TEMP), which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Test and Evaluation Master Plan Approach 3.2 CalHEERS Software Testing Timeline 3.3 Test Schedule and Milestones 4. 4.8.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.8.1-03 (existing)	The Contractor shall provide a TEMP that documents the high-level schedule, roles and responsibilities, and resource requirements associated with the test and evaluation function.
4.8.1-04 (modified)	The Contractor shall maintain the TEMP in accordance with ISO/IEC/IEEE 29119-3, Software and systems engineering – Software Testing, Part 3: Test Documentation (Section 6.2 - Test Plan) , or more recent version as directed under the Special Provisions of this contract.
4.8.1-05 (new)	The Contractor shall incorporate into the TEMP (and Release Plans)- Planning and execution of routine web accessibility testing, including the use of screen reading software and other assistive technologies.
4.8.1-06 (new)	The Contractor shall incorporate into the TEMP (and Release Plans)- First-pass testing within the System and UAT Testing phases, including reporting the % script pass data to the State Project Director or designee on an ongoing basis.
4.8.1-07 (new)	The Contractor shall collaborate with the State and Sponsors to incorporate into the TEMP (and Release Plans)- Script writing guidelines for such things as but not limited to: • System test script writing and artifacts requirements for witness testing. • Sponsor input regarding the format for all UAT test scripts resulting in test scripts having uniformity, consistency with expectations, and • Tests scripts being created with deadlines and ready at least five business days before tests are due to be completed by the State and Sponsor testers.
4.8.1-08 (new)	The Contractor shall collaborate with the State and Sponsors to incorporate into the TEMP (and Release Plans)- Additional measurable steps in the schedule/release guidelines process that ensure that for each CR, the Contractor has adequate resource coverage and expertise for on-shore teams.
4.8.1-09 (new)	The Contractor shall collaborate with the State and incorporate into the TEMP (and Release Plans) test script automation development, automated test percentage goals, changes, and script maintenance as requested by the State. Additionally, the Contractor shall change/add/update automation scripts as directed by the State.
4.8.1-10 (new)	Test Data Support- The Contractor shall update the TEMP (CD-4.8-1), to include a new subsection Test Data for Covered California Groups. In this new subsection, the

Req #	SOW Requirement
	Contractor shall, in collaboration with the State, include the assessment, development, and support processes for providing CovCA Groups such as Covered California University (CCU), Marketing, Policy, Eligibility & Research Division (PERD), with necessary test data to support on-going CalHEERS Releases, and other CalHEERS-specific testing data needs. The TEMP shall (in its entirety) be inclusive of infrastructure, processes, and approach, that also supports the test data needs of the requesting CovCA Group.
4.8.1-11 (new)	DHCS Test Data Support- The Contractor shall update the TEMP (CD-4.8-1), to include a new subsection Test Data for DHCS. In this new subsection, the Contractor shall, in collaboration with the State, include the assessment, development, and support processes for providing DHCS Testers with necessary test data to support on-going CalHEERS Releases, and other CalHEERS-specific testing data needs. The TEMP shall (in its entirety) be inclusive of infrastructure, processes, and approach, that also supports the test data needs of DHCS Testers.
4.8.1-12 (new)	Test Data Description and Details- The Contractor shall update the TEMP (CD-4.8-1), to incorporate the following requirement: The Contractor shall (for all releases involving test using test data) include a summary of the test data used to perform the test and the environment where the testing is to be performed. The test data identified must be described in such a manner that the State can determine that test data preparation is complete, accurate, and sufficient to validate testing in the specified environment. The Contractor shall collaborate with the State to develop a process by which test data will be determined, created, mapped, and utilized to ensure coverage of testing is complete, accurate, and sufficient to validate testing for all environments using the test data. The Contractor shall deliver the Test Data Description and Details in subsection 9 – Test Data of each CD-4.8-2 - Release Test Plan.
4.8.1-13 (new)	The State identifies and associates the following artifacts to the Test and Evaluation Master Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • UAT Checklist for Change Request • UAT Desk Reference Manual • UAT- How to Write a Defect in ALM • Regression Test Coverage Report • Copy of Ad hoc Test Template • Test cases for Sponsors Template • UAT Screenshot template
4.8.1-14 (new)	Regression Testing – The Contractor shall update the TEMP (CD-4.8-1), to address the following requirement: The Contractor shall develop and maintain an automated regression test suite that continuously expands to cover all existing, modified, and newly implemented system functionalities, including integrations, security updates, and performance optimizations.
4.8.1-15 (new)	The Contractor shall align the regression test suite with the evolving system architecture and business requirements to ensure complete system stability with each software release.
4.8.1-16 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.8.1-17 (new)	The Contractor shall update the following appendices and attach them to the Test and Evaluation Master Plan deliverable: Appendix 1–SOW to Deliverable Traceability Checklist

Req #	SOW Requirement
	Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.8.2 Test and Evaluation Master Plan Execution

Table 4-43: Test and Evaluation Master Plan Execution

Req #	SOW Requirement
4.8.2-01 (new)	The Contractor shall staff, manage, lead and execute all Testing activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.8-1 – Test and Evaluation Master Plan.
4.8.2-02 (new)	The Contractor shall make available, for use by the State, all Contractor Test Tools to support test packet review and validation and User Acceptance Testing efforts. All web-based testing tools shall be accessible via the State desired set of web browsers.
4.8.2-03 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.8.3 System Test

Table 4-44: System Test

Req #	SOW Requirement
4.8.3-01 (existing)	The Contractor shall conduct Unit, Assembly, System, End-to-End, Automated Regression, and Performance/Stress Testing on System and System modifications.
4.8.3-02 (existing)	The Contractor shall ensure that end-to-end functional Testing is done across all organizational boundaries including all interfaces.
4.8.3-03 (modified)	The Contractor shall conduct System Test first-pass script execution on each release, reporting the outcome via % script pass to the State Project Director or designee, and continue that reporting until ST completion, in accordance with the TEMP.
4.8.3-04 (existing)	The Contractor shall provide the capability for regression testing that supports complete System life cycle testing.
4.8.3-05 (new)	The Contractor shall for any identified defects, have corresponding test cases added to the regression suite to prevent defect recurrence. Proper regression coverage based on the defects in the release.
4.8.3-06 (new)	The Contractor shall provide the State with the following new artifact, the Regression Test Coverage Report and provide a walkthrough (for each Feature Release), inclusive of prior releases between reports, identifying a summary of prior modifications to regression and automated regression test scripts, as well as all planned Feature Release modifications to regression and automated regression test scripts for State review and approval prior to regression test execution. The report shall consist of, at minimum, the following: • Test Coverage for new functionality • Test Coverage updates for modified functionality • Automated test coverage for new functionality • Updates to automated test coverage for modified functionality • Contractor recommendations for Regression Testing improvement
4.8.3-07 (new)	Within the management of the regression and automated regression test scripts, the Contractor shall identify for the State those scripts and/or scenarios the Contractor intends to remove from the existing regression test suites, gaining State approval prior to removal.
4.8.3-08 (existing)	The Contractor shall support the ability to test and implement two concurrent releases on a monthly basis.
4.8.3-09 (existing)	The Contractor shall provide a library of test cases and use cases that may be selected and modified by the user for testing.
4.8.3-10 (existing)	The Contractor shall include a test version of all batch and on-line programs and files to be used for testing releases and non-release changes.
4.8.3-11 (existing)	The Contractor shall provide search capability for the test case library that is cross referenced to the logic/edit that the identified test case is designed to test.
4.8.3-12 (existing)	The Contractor shall provide the ability to execute impact analysis testing of any proposed change.
4.8.3-13 (existing)	The Contractor shall provide the ability to save and reuse all test cases without the need to re-enter the data.
4.8.3-14 (existing)	The Contractor shall allow for testing of all System development projects before and after implementation.
4.8.3-15 (existing)	The Contractor shall allow users to create and edit application, enrollment, case and health plan records for testing.
4.8.3-16 (existing)	The Contractor shall provide the ability to “select” production data for input into test environment. Production data must be de-identified. The requirement for de-identified data may be waived or modified at the discretion of the State.
4.8.3-17 (existing)	The Contractor shall provide and maintain the capability for on-line end-to-end testing of all CalHEERS business processes through the System and return processing and error messages to the submitter.
4.8.3-18 (existing)	The Contractor shall provide analysis of production versus test results (e.g., field level compares with reporting).

Req #	SOW Requirement
4.8.3-19 (existing)	The Contractor shall track test cases that have expected results documented to show that the proposed change does not introduce other changes that produce unwanted results.
4.8.3-20 (existing)	The Contractor shall allow for setup of test cases for positive and negative testing and configurations that enable testing new capability that is not yet in production.
4.8.3-21 (existing)	If a Deficiency (other than a Cosmetic Deficiency and/or Minor Deficiency) occurs during these Acceptance Tests, the State shall accurately give Contractor Notice of its nonacceptance, with such Notice delineating Deficiencies used as the grounds for the State's decision. Contractor shall accurately promptly correct Deficiencies provided to Contractor in any notice(s) of non-acceptance from the State. Contractor shall accurately give Notice to the State if the State has not given Contractor a timely Notice of rejection or Acceptance and, if the State does not give such Notice within ten (10) Business Days following receipt of Notice from Contractor, the State will allow Contractor to issue an invoice for one half of the applicable payment that would have been due if the Deliverable had received Acceptance, and the second half would be invoiced following Acceptance of such Deliverable.
4.8.3-22 (new)	The Contractor shall obtain a pass on 90% of the ST test scripts as exit criteria from ST/entrance criteria for UAT.
4.8.3-23 (new)	For any release where ST first-pass testing completes with a script pass % less than 90%, the Contractor shall conduct a root cause analysis (identifying the cause(s) for the low %) and a corrective action plan (calling out the actions the Contractor will take to ensure the ST completion date is met, as well as the actions the Contractor will take to improve the % for future releases), providing both to the State Project Director or designee within 14 days of first pass test completion.
4.8.3-24 (new)	The Contractor shall ensure that the system is tested for web accessibility and is compliant with the web accessibility standards identified by the State in SOW Section 6, OPERATIONS REQUIREMENTS.
4.8.3-25 (new)	The Contractor shall make available, for use by the State, all Contractor Test Tools to support test packet review and validation and System Test efforts. All web-based testing tools shall be accessible via the State desired set of web browsers.

4.8.4 User Acceptance Test

Table 4-45: UAT Test

Req #	SOW Requirement
4.8.4-01 (new)	The Contractor shall provide a dedicated UAT Lead that will support all UAT activities on CalHEERS.
4.8.4-02 (existing)	The Contractor shall not incorporate or include UAT hours for every appropriate activity unless the State has confirmed that UAT hours for testing is appropriate for each specific activity.
4.8.4-03 (existing)	The State is responsible for performing its Acceptance testing obligations in accordance with the Work Plan under this Contract.
4.8.4-04 (existing)	The State will provide Acceptance for the System and Hosting Services if they have no Deficiencies (except Cosmetic Deficiencies and/or Minor Deficiencies) during these Acceptance Tests.
4.8.4-05 (existing)	After Contractor has corrected such Deficiencies, the State shall verify whether the System and Hosting Services satisfy the Acceptance Tests and in writing shall either accept or not accept the System and Hosting Services following such re-tests. If Contractor corrects all Deficiencies (except Cosmetic Deficiencies and Minor Deficiencies) in the System and Hosting Services, which then successfully perform the Acceptance Tests without Deficiencies (except for Cosmetic Deficiencies and Minor Deficiencies), the State shall give Contractor Acceptance therefor.

Req #	SOW Requirement
4.8.4-06 (modified)	If the Contractor is unable to correct all Deficiencies (except Cosmetic Deficiencies and Minor Deficiencies) in the System and the Hosting Services within the number of days of the scheduled Acceptance Date as required in the Work Plan, or if no such date is in the Work Plan, within 60 Days from such scheduled Acceptance Date, the State may, at its option: (a) immediately terminate the Contract, in whole or in part, as provided in Appendix A-2, SPECIAL PROVISIONS, Section 17.2, INABILITY TO CORRECT DEFICIENCIES DURING CURE PERIOD, without penalty to the State; (b) request Contractor to provide replacement Software and Equipment for further Acceptance Tests; or (c) continue performing Acceptance Tests on the System and Hosting Services and require Contractor to continue until Deficiencies (except Cosmetic and Minor Deficiencies) are corrected.

4.8.5 Release Test Plan

The Release Test Plan provides a detailed description of each test required to ensure that all of the system, interfaces, and components comply with the requirements and specifications outlined in the related CR. The plan contains defined test activities and scenarios for the CalHEERS Application for the applicable releases. The Release Test Plan includes the roles and responsibilities of the Contractor and State teams that are involved in testing activities, scope, approach, schedule, and deliverables for each release. Release testing is intended to test the CalHEERS Application for its compliance with functional requirements and test scenarios that are contained and outlined in the CR.

Table 4-46: Release Test Plan (CD-4.8-2)

Req #	SOW Requirement
4.8.5-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Release Test Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Release Test Plan Deliverable Key Takeaways 3. ASSUMPTIONS, CONSTRAINTS AND RISKS 3.1 Assumptions 3.2 Constraints 3.3 Risks 4. Testing Strategy 4.1 Timeline 4.2 System Testing 4.3 Integration Testing 4.4 Test Terms 5. TEST PROCESS OVERVIEW 5.1 Testing Planning and Approach 5.2 Test Tools 5.3 Test Scenario and Script Development 5.4 Test Design and Review 5.5 Example Test Scenario 5.6 Example Test Cases 5.7 Test Case Management and Requirement Traceability in ALM 5.8 Test Execution 5.9 Test Automation 5.10 Test Reporting

Req #	SOW Requirement
	5.11 System Test Case Review Process 6. TEST ACTIVITIES/PHASES 6.1 Unit Testing 6.2 Assembly Testing 6.3 Functional/System Testing 6.4 Integration Testing 6.5 Section 508 Compliance Testing 6.6 ETL Testing 6.7 Stress/Performance Testing 6.8 Security/Vulnerability Testing 6.9 Build Validation Testing 6.10 Regression Testing (Manual, Automated and End-to-End) 6.11 User Acceptance Testing 7. TEST DATA 10. TEST ENVIRONMENT 11. TESTING TEAM 11.1 Testing Team Structure 11.2 Roles & Responsibilities 12. GLOSSARY AND ACRONYMS 12.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
4.8.5-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.8.5-03 (modified)	The Contractor shall prepare the Release Test Plan in accordance with ISO/IEC/IEEE 29119-3, Software and systems engineering – Software Testing, Part 3: Test Documentation (Section 6.2 - Test Plan). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.8.5-04 (new)	The State identifies and associates the following artifacts to the Release Test Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Installation Verification Test Plan • Installation Verification Test Execution Report • Automation and Regression process Flow • Copy case tool guide • Selenium Installation Guide • ABE Timeshifting Schedule NEW • ABE_How To Process • Launchpad_TimeMachine(002)

Req #	SOW Requirement
4.8.5-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.8.5-06 (new)	The Contractor shall update or develop the following appendices and attach them to the Release Test Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.8.6 Release Test Management Execution

Table 4-47: Release Test Management Execution

Req #	SOW Requirement
4.8.6-01 (new)	The Contractor shall staff, manage, lead and execute all Release Test Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.8-2 – Release Test Plan.
4.8.6-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.8.7 Installation Verification Test Plan

The Installation Verification Test Plan ensures that the software was successfully installed and will operate as designed, testing not only the basic system functionality but also specific system screens and functionality included within the release.

Table 4-48: Installation Verification Test Plan

Req #	SOW Requirement
4.8.7-01 (existing)	The Contractor shall prepare the Installation Verification Test Plan in accordance with ISO/IEC 12207, IEEE 12207-2008 Systems and Software Engineering-Software Life Cycle Processes (Section 7 - Software Specific Process; Section 7.2 - Software Support Processes) pertaining to System Testing and Implementation.

4.8.8 Installation Verification Test Execution Report

The Installation Verification Test Execution Report shall contain the detailed documentation supporting the execution of the Installation Verification Test Plan to ensure each release implemented is successfully installed and will operate as designed.

Table 4-49: Installation Verification Test Execution Report

Req #	SOW Requirement
4.8.8-01 (existing)	The Contractor shall prepare a Test Report that includes but is not limited to: 1. Summary Assessment 2. Detailed Test Results 3. Variances 4. Test Incidents 5. Recommendations
4.8.8-02 (existing)	The Contractor shall prepare the Installation Verification Test Execution Report in accordance with current ISO/IEC/IEEE 29119-3, Software and systems engineering – Software Testing, Part 3: Test Documentation (Section 6-Test Management Processes Documentation, Section 7-Dynamic Test Processes Documentation) related to System Testing and Implementation.

4.8.9 Contractor Certification of Successful Release

The Contractor Certification of Successful Release identifies the successful completion of all testing activities associated with the release.

Table 4-50: Contractor Certification of Successful Release

Req #	SOW Requirement
4.8.9-01 (modified)	The Contractor shall prepare the Contractor Certification of Successful Release Test Completion in accordance with ISO/IEC/IEEE 29119-3, Software and systems engineering – Software Testing, Part 3: Test Documentation (Section 6-Test Management Processes Documentation, Section 7-Dynamic Test Processes Documentation), pertaining to System Testing. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.

Req #	SOW Requirement
4.8.9-02 (existing)	The Contractor and the State shall conduct tests for measuring and certifying the achievement of the Service Level Agreements (SLA). The Contractor must implement all testing, measurement and monitoring tools and procedures required to measure and report the Contractor's performance of the System against the applicable SLAs. Such testing, measurement and monitoring must permit reporting at a level of detail sufficient to verify compliance with the Service Level Contracts and will be subject to audit by the State.

4.8.10 Performance Test Materials Packet

The Performance Test Materials Packet contains the detailed documentation supporting the Release Test Plan and the TEMP to verify that the application is performing properly and the technical infrastructure for the application is adequate. The Performance Test Materials Packet includes test cases and other materials to validate that the application conforms to the performance requirements as defined in the Contract for both online and batch environments.

Table 4-51: Performance Test Materials Packet (CD-4.8-3)

Req #	SOW Requirement
4.8.10-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Performance Test Materials Packet, which includes but is not limited to: 1. CALHEERS RELEASE ### CRs 1.1 CR # 1.2 CR # - Etc. 2. SCENARIOS AND WORKLOAD MODEL 3. R### BATCHES EXECUTIONS 4. PERFORMANCE TEST EXECUTIONS 5. PERFORMANCE TEST PLAN TIMELINE 6. PERFORMANCE TESTING SCHEDULE DEPENDENCY 7. ENVIRONMENT AND TOOLS 8. EXIT CRITERIA 9 APPENDIX – CALHEERS RELEASE ### CRs – Out of Scope - APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST - APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST - APPENDIX 3: ASSOCIATED ARTIFACTS
4.8.10-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.8.10-03 (modified)	The Contractor shall prepare the Performance Test Materials Packet in accordance with current ISO/IEC/IEEE 29119-3, Software and systems engineering – Software Testing, Part 3: Test Documentation (Section 6-Test Management Processes Documentation, Section 7-Dynamic Test Processes Documentation) and IEEE 1012-2012 - Standard for System and Software Verification and Validation (Section 11.3.1 V&V Test Documentation, Section 12.9 VVP, Section 8, V&V Test Documentation Requirements) pertaining to: 1. System Testing 2. Software Test Documentation 3. Test Case Specification 4. Test or Validation Procedures As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.8.10-04 (modified)	The Contractor shall update and maintain the Performance Test Materials Packet to include, at a minimum, the following content:

Req #	SOW Requirement
	1. Test Case List: a. Test Case ID b. Test Case name c. Test Case version d. Test cases e. Test data information used to meet conditions necessary to test. f. Interfaces tested (if applicable) g. Untestable items h. Defect Reporting Process i. Test materials metrics: i) Total number of planned test cases ii) Total number of requirements tested. iii) Total number of untestable requirements 2. A test case summary report a. Test Scripts: i) Test Case ID ii) Test Case Name iii) Test case description content (Shall include test data required for executing the test case, pre-conditions and test case post condition.) iv) Step Name v) Step Description vi) Expected Result vii) Execution Status viii) Tester ID ix) Creation Date
4.8.10-05 (modified)	The Performance Test Materials Packet shall include automated test scripts which shall meet all criteria for Test Procedures. Automated test scripts shall be re-usable in performance testing. Automated test scripts shall include, at a minimum, the following: 1. Test Case ID 2. Test Case Name 3. Test Case Summary 4. Test Case Expected Result 5. Creation Date 6. CI linkage, if applicable
4.8.10-06 (modified)	The Contractor shall update and maintain the Performance Test Materials Packet to include, at a minimum, the following content: 1. Document control 2. Executive summary 3. List of Covered Online/ Batch CRs 4. Scenarios and Workload Model (this includes all test case details) 5. Performance Test Executions 6. Performance Test Plan Timeline 7. Environment and Tools 8. Exit Criteria (includes Issues/defect handling, Assumptions, dependencies and constraints, General roles and responsibilities)
4.8.10-07 (modified)	The Contractor shall submit the Performance Test Materials Packet to the State Project Director or designee for review between 15 - 30 Business Days prior to performance test date.
4.8.10-08 (new)	The State identifies and associates the following artifacts to the Performance Test Materials Packet. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Performance Center Components and configurations • Running Load Tests in Performance Center

Req #	SOW Requirement
4.8.10-09 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.8.10-10 (new)	The Contractor shall update or develop the following appendices and attach them to the Performance Test Materials Packet deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.8.11 Performance Test Results Packet

The Performance Test Results Packet contains the detailed documentation supporting the execution of the Performance Test Materials Packet. The performance test is conducted to verify that the application is performing properly and the technical infrastructure for the application is adequate. The Performance Test Results Packet includes test artifacts to document the results of both the online and batch performance tests.

Table 4-52: Performance Test Results Packet (CD-4.8-4)

Req #	SOW Requirement
4.8.11-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the Performance Test Results Packet, which includes but is not limited to: 1. EXECUTIVE SUMMARY 2. System Performance Testing, including: 2.1 YELLOWSTONE NON-OE COMPOSITE LOAD TEST (PORTAL + SAWS) 2.2 YELLOWSTONE COMPOSITE ENDURANCE TEST RESULTS (NON-OE) 2.3 YELLOWSTONE COMPOSITE STRESS TEST RESULTS (OE LOAD) 2.4. CALHEERS RELEASE ### ENHACEMENTS CRS 2.4.1 CR # 2.4.2 CR # 2.4.3 Etc. 3. SAWS INTEGRATED TEST RESULTLS (if applicable) 4. CMS TEST RESULTS (if applicable) 5. FTB TEST RESULTS (if applicable) 6. IDP TEST RESULTS (if applicable) 7. EDD TEST RESULTS (if applicable) 8. Tech Refresh CRS (if applicable) 8.1 CR # 8.2 CR # 8.3 Etc. 9. BATCH RESULTS 10. PERFORMANCE ISSUES/DEFECTS 11. EXIT CRITERIA 12. APPENDIX – ENVIRONMENT AND TOOLS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
4.8.11-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.8.11-03 (existing)	The Contractor shall provide documentation of test results on all System changes. Implementation of the new functionality may only begin after approval by the State of the test results and required deliverables.
4.8.11-04 (modified)	The Contractor shall prepare the Performance Test Results Packet in accordance with ISO/IEC/IEEE 29119-3, Software and systems engineering – Software Testing, Part 3: Test Documentation (Section 6-Test Management Processes Documentation, Section 7-Dynamic Test Processes Documentation) and IEEE 1012-2012, Standard for Software Verification and Validation System and Software Verification and Validation pertaining to: 1. Executive Summary (System Testing, Test Summary Report) 2. Approach (Test or Validation Plans and Procedures) 3. Results (Validation Results Report, Test Log) 4. Batch Jobs Results (Validation Results Report) 5. Appendix 1- Workload Profile (Includes Test Documentation, Test case specification, Test Item Transmittal Report)

Req #	SOW Requirement
	As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
4.8.11-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.8.11-06 (new)	The Contractor shall update or develop the following appendices and attach them to the Performance Test Results Packet deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.8.12 Performance Test Execution

Table 4-53: Performance Test Execution

Req #	SOW Requirement
4.8.12-01 (new)	The Contractor shall staff, manage, lead and execute all Performance Test Management activities on CalHEERS as defined in this Statement of Work and in accordance with both the CD-4.8-3 – Performance Test Materials Packet and the CD-4.8-4 – Performance Test Results Packet.
4.8.12-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.8.13 Contractor Testing Staff

Table 4-54: Contractor Testing Staff

Req #	SOW Requirement
4.8.13-01 (existing)	The Contractor shall provide a testing team operationally distinct from the development team to perform all testing activities for each release according to the TEMP and the Release Test Plan.
4.8.13-02 (modified)	The Contractor shall support CalHEERS Project Office execution of a thorough User Acceptance Testing (UAT). This test shall verify that the application is functioning as required by the State. The Contractor shall provide the following in support of UAT: 1. Setup and execution of a minimum of three (3) Production-like test environment/region. 2. Provide specifications for hardware and software to support UAT equipment and environment(s). 3. Identify and provide to the State patching and software updates that State support staff can implement, in a manner that does not impact the UAT schedule, and the State's execution timeframe for performing UAT. 4. Provide technical consultation for the duration of UAT, to include reconciling differences between UAT defects logged by State and UAT defects logged by the Contractor. 5. Provide system support for the UAT environment, to include loading of identified production data, masking and subsets of Production data, and generation of batch jobs for application and interface processing.
4.8.13-03 (existing)	The Contractor shall provide support for UAT for each release. UAT support shall be release specific, and include but not be limited to: 1. Providing access to business analysts and development teams. 2. Providing access to the Contractor Test Teams. 3. Provide access to the Contractor Project Management. 4. Providing access to the Contractor Batch Team. Provide access to the Contractor resources that execute the loading and refresh of test environment data. 5. Providing access to the Contractor resources for creation of Security Groups and Roles.

4.9 DEFECT MANAGEMENT

Generally, defect management can be defined as a process of detecting defects and fixing them.

4.9.1 Defect Management Plan

Table 4-55: Defect Management Plan (CD-4.9-1)

Req #	SOW Requirement
4.9.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the Defect Management Plan, which includes but is not limited to the table of contents herein. The Contractor shall review the current Defect Management Plan with the State and determine applicable sections that will be updated as a result of new requirements from this Contract. Table of Contents: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience

4.9.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
4.9.1-03 (new)	The Contractor shall review the current Defect Management Plan with the State and determine applicable sections that will be updated as a result of new requirements from this Contract.
4.9.1-04 (new)	The Contractor shall update CD-4.9-1 Defect Management Plan and applicable artifacts (e.g., RCA Process Guide) to properly address Impacts from updates within Appendix A-2 - CalHEERS SDMO SPECIAL PROVISIONS, Section N- SLA-SYSTEM DEFICIENCY.
4.9.1-05 (new)	Defect Identification and Reporting Process - The Contractor shall update the Defect Management Plan, to provide more detail on the Defect Identification process and associated reporting, including but not limited to:

Req #	SOW Requirement
	- Processes for identifying defects within the expected timeframes, identified in Appendix A-2 - CalHEERS SDMO SPECIAL ROVISIONS, Section N- SLA-SYSTEM DEFICIENCY, Figure 2: Deficiency Resolution Expectations, and Section C- SLA- ROOT CAUSE AANALYSIS SUBMISSION SLA, and processed in the CalHEERS Defect Management tool(s). - Reporting on all potential defects awaiting triage (e.g., incidents, problems, etc.), including: - The method of entry into the defect workflow (e.g., incident triage, problem triage, etc.) - Date in which the potential defect was identified - Date in which the potential defect started being reviewed in the defect workflow - Defect validity - Defect categorization (production or non-production) - Defect categorization date - Defect priority designation determined using the heatmap and Deficiency Resolution Expectations Figure 2 in Section N, SLA-System Deficiency. - Ordering defects by categorization first, then by Priority.
4.9.1-06 (new)	Defect Triage and Reporting Process - The Contractor shall update the Defect Management Plan, to provide a higher level of detail on the Defect Triage process and associated reporting, including but not limited to: - Processes for triaging defects within the expected timeframes, identified in Appendix A-2 - CalHEERS SDMO SPECIAL PROVISIONS, Section N- SLA-SYSTEM DEFICIENCY, Figure 2: Deficiency Resolution Expectations, and Section C- SLA- Root Cause Analysis Submission SLA, and processed in the CalHEERS Defect Management tool(s). - Reporting on the triage status of all open system defects, within, at a minimum, a Monthly Status Report and Defect Management tool(s), including the following, but not limited, details: - System Deficiency - Defect Number - Current Status - Impact - Severity - Priority - Triage Start Date (Defect Identification Date) - Triage Completion Date Note: The State may limit data by environment, status or defect type as needed.
4.9.1-07 (new)	The Contractor shall update all applicable areas in the Defect Management Plan, and any associated tools or artifacts, to remove the defect disposition of Not Under Warranty, as that disposition/term is no longer in use on CalHEERS (refer to Section 10.1.2 - Not Under Warranty (NUW), of the Special Provisions). The Contractor shall re-disposition defects under that classification as necessary.
4.9.1-08 (new)	The Contractor shall update the Defect Management Plan to define Reconciliation, Enrollment, and Membership (REM) defects as “Inaccuracies that could impact data quality for enrollment, including but not limited to 834 transactions, that may put CalHEERS out of sync with Carriers.”
4.9.1-09 (new)	The Contractor shall update the Defect Management Plan to define a structured process for early detection and categorization of REM data discrepancies as internal (CalHEERS), external (carrier-related), or joint system issues requiring cross-entity resolution.
4.9.1-10 (new)	The Contractor shall update the Defect Management Plan to identify the Defect Escalation Protocol to notify Covered CA of persistent data discrepancies.
4.9.1-11 (new)	The State identifies and associates the following artifacts to the Defect Management Plan. The Contractor shall adopt, update, maintain, and deliver this artifact in accordance with Appendix 3 of this deliverable including, but not limited to:

Req #	SOW Requirement
	- Defect Management Process - Defect Management Process Guide - Prod NUW Defects_Fix at No Cost_Review Approval Process EWM Workflow_Final_v2 - Production SIRs_L3 Checklist_Final- 6-1-2024 - Alternate Procedures - CAP Report - Defects Impacting Scripts - Director's Report/Defect Management Section (including defect burndowns per request which are displayed in 'release section' of DR') Defect Management reports are displayed below which are input in the DR: - Open Non-Production Defects – Defects by Month extract - Open Non-Production Triage SIRs by Planned for Release extract - Open Production Warranty/Warranty Triage SIRs by Month extract - Open Production Warranty/Warranty Triage SIRs by Planned for Release extract - Open Sev 1 to 4 Not Under Warranty Defects by Planned for Release extract - Open Sev 1-4 Not Under Warranty Defects (Production) by Month and Warranty Status extract - Open vs. Closed Production Warranty/Warranty Triage SIRs by Month extract - Outstanding Non-Prod Triage Defects (Sev 1 to 4) per Aging extract - Outstanding Production SIRs (Sev 1 to 4) per Aging extract - Production Must-Have Report - Production NUW New Vs Closed Vs Outstanding Vs Triaged report extract - RXX.X_All_Open_Defects_and_Must_Haves_MMDDYYYY - SLA Report/System Deficiency Correction extract - Status of list of "Warranty Disposition" = "Non-Warranty" Production extract - Top Error Codes - Top SAWS Error Report - CalHEERS_CalSAWS Integration Testing Defects Identification_Triage_Fix Process-v2.2_4-19-2024 - How to Write a Defect in ALM.pdf - How to Write a Defect in RTC_v2 - Root Cause Analysis Process Guide - SOP - CAP Defects & SIRs_Final - SOP on Externally Assigned Defects Report_Final - Standard Operating Procedure (SOP) for Service Level Agreement (SLA) on Defects_v0.1 - Template - Defects Moving out of Releases - Template to Share Defects Moving out of Release - Enterprise Tools - ALM Defects Training.mp4 - Enterprise Tools - ALM Defects Training.story - Enterprise Tools - ALM Defects Training.zip
4.9.1-12 (new)	The Contractor shall update the following appendices and attach them to the Defect Management Plan deliverable: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable)

Req #	SOW Requirement
	4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

4.9.2 Defect Management Execution

Table 4-56: Defect Management Execution

Req #	SOW Requirement
4.9.2-01 (new)	The Contractor shall staff, manage, lead and execute all Defect Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-4.9-1 – Defect Management Plan.
4.9.2-02 (modified)	The Contractor shall be responsible for resolving all identified defects regardless of Severity, Impact, and Priority (unless otherwise mutually agreed upon and documented within the defect management tool).
4.9.2-03 (modified)	The Contractor shall use all commercially reasonable efforts to provide solutions, changes, and corrections to system defects within the correction periods below or a schedule agreed to by the State Project Director or designee: 1. Priority 1 - Within two (2) calendar days of defect identification (through an Exception Release) 2. Priority 2 - Within seven (7) calendar days of defect identification 3. Priority 3 – a. For Production Defects: Within the next 40 calendar days b. For Non-Production Defects: within one-week post defect prioritization date i. If defect is identified close to code freeze, the fix will be delivered in the earliest build possible ii. Exceptions could be case on case basis where-in the fix might need additional time/confirmation from a trading partner 4. Priority 4 - a. For Production Defects: no more than 65 calendar days b. For Non-Production Defects: Within two weeks post defect prioritization date, implies agreement on proposed FDD date

Req #	SOW Requirement
4.9.2-04 (modified)	The Contractor shall notify the State Project Director or designee via phone call and electronically of a Priority 1 defect within one (1) hour of occurrence, and within two (2) hours of a Priority 2 defect occurrence. The Contractor shall provide daily updates for Priority 1 defect until resolved.
4.9.2-05 (modified)	The Contractor shall, for defects designated as Priority 1 & 2, provide a Root Cause Analysis (RCA) as defined in the Root Cause Analysis Process Guide. Additionally, for defects designated as Priority 3 & 4, the Contractor shall provide a brief root cause description within the defect management tool.
4.9.2-06 (existing)	The Contractor shall provide Defect support in the following areas: 1. Helpdesk Support 2. Defect Triage Monitoring 3. Defect Trending Analysis 4. Defect Prioritization 5. Defect Resolution Planning
4.9.2-07 (modified)	The Contractor shall categorize each defect by Severity and Impact and Priority during defect Identification as defined by the triage process within CD-4.9-1 Defect Management Plan.
4.9.2-08 (new)	The Contractor shall receive, research, and respond to all inquiries for defect status from the State.
4.9.2-09 (modified)	The Contractor shall support all code and data fixes associated with REM activities on CalHEERS after prioritization by the Data Integrity Analysis Team.
4.9.2-10 (new)	The Contractor shall coordinate REM defect resolution efforts with Covered California as needed to resolve data discrepancies.
4.9.2-11 (new)	The Contractor shall develop and provide monthly REM Data Discrepancy Reports with insights on volume of data discrepancies, trend analysis, and recommended resolution strategies to support data-driven decision-making.
4.9.2-12 (new)	The Contractor shall actively participate in Covered CA's existing REM defect discussions, ensuring prompt identification, prioritization, and resolution of REM defects while collaborating on process improvements.
4.9.2-13 (new)	The Contractor, before implementing any system or process changes impacting REM reconciliation, shall engage Covered CA in pre-development discussions to validate assumptions, conduct impact assessments, and ensure alignment with business, technical, and external system dependencies.
4.9.2-14 (new)	The Contractor shall implement the ability for CalHEERS to concurrently execute REM jobs, without performance degradation, supporting ad hoc reconciliation requests to meet CMS policy changes.
4.9.2-15 (existing)	The Contractor shall design, perform and test data fixes resulting from carrier reconciliation as necessary.
4.9.2-16 (existing)	The Contractor shall track all defects from discovery through resolution and document the details defined within the Defect Management Process utilizing the defect management tool, in accordance with the TEMP.
4.9.2-17 (existing)	The Contractor shall identify, triage, and document defects within a State approved defect management tool, in accordance with the Defect Management Process and the TEMP.
4.9.2-18 (modified)	The State Project Director or designee may modify the time-to-fix period of a defect, if in his or her sole judgment it is in the best interest of the State and provide written notification to the Contractor.
4.9.2-19 (modified)	The Contractor shall abide by Severity defect categorization defined by the following: • Severity 1 - Renders the System totally inoperable or there is a critical system, network or application outage impacting many or all locations or include such severe performance degradations such that the System is effectively unavailable. Examples include but are not limited to the user cannot log into the System in most or all locations, or the Tester is unable to access the test environment. Critical functions are defined in the O&M Manual. • Severity 2 Type Results in critical functions being unusable at a major location or

Req #	SOW Requirement
	prevents the accomplishment of a critical function where there is no alternate procedure by which the function can be performed. Examples include but are not limited to System errors (i.e., Null Pointer, JAVA run time) preventing users from completing critical functions and Deficiencies causing data corruption. Critical functions are limited to the following where at least 75% of the System total users and/or associated transactions for the following are unable to process to successful completion: - o Application Login - o Initial Application Save or Submission - o Report-a-Change on Application Save or Submission - o Renewal Application Save or Submission - o Eligibility Determinations for Initial Applications, Renewals, and Report-a-Change are Correct - o Individual Plan Selection - o MEDS HX18, HX20 and HX40 Transaction Processing - o eHIT Transaction Processing - o 834 Transaction Processing - o Critical Notice Generation: NOD01 - o CMS and IRS Monthly and Annual File Submission - o FPACT transactions including the Master Provider File (MPF) • Severity 3 - A component, application or procedure is down, unusable, or difficult to use causing some operational impact but where an alternate procedure acceptable to the State in its reasonable judgment is available to avoid operational impacts on the users'. Examples include but are not limited to a page within the system is not working but other avenues are available to complete the business process, albeit less conveniently; a functional component or service outage with an alternative workaround where the workaround degrades the operation of the system from the user perspective; preferred method for completing business process is blocked but alternate method is available; test script can be executed and completed with work-around. • Severity 4 - Any disruption in service that has a minor business or job impact affecting multiple users or customers where those people affected are still able to perform their functions. A service component or procedure, which is not critical, is unusable but where an alternate procedure acceptable to the State is available. Examples include, but are not limited to, a degradation in system performance, or data element is mislabeled, element is misplaced on the page, test script can be completed without having to alter the page flow.
4.9.2-20 (new)	The Contractor shall categorize each defect based on a Priority categorization. Defect priority, while based on defect severity and impact (refer to heatmap and Appendix A-2, SPECIAL PROVISIONS, Section N, SLA-SYSTEM DEFICIENCY Figure 2 Deficiency Resolution Expectations), specifies the order in which the defect should be fixed in both production and non-production. Additionally, the Contractor shall adhere to the Priority correction periods as outlined in SLA 14.

Req #	SOW Requirement
4.9.2-21 (new)	The Contractor shall categorize each defect by Priority as defined in RFP Appendix A-2 SPECIAL PROVISIONS, Section N, SLA-SYSTEM DEFICIENCY, Figure 2 Deficiency Resolution Expectations. Impact is one factor to determine Priority based on the following: • Non-Production Impacts are measured by the effect on the test case(s) and the testing phase: - o Impact 1 - One or both of the following is true: ▪ Testing is completely blocked. The application is unavailable/unstable to allow for any functionalities to be validated. ▪ Application functionality pertaining to a specific CR is majorly impacted or 85% - 100% of the remaining (Not Run / Incomplete) CR test cases cannot be executed. 2 One or both of the following - o Impact 2 - One or both of the following is true: ▪ Significant application functionality pertaining to multiple CRs is impacted and there is no potential workaround. \ ▪ Application functionality pertaining to a specific CR is majorly impacted or impacts 50% - 84% of the remaining (Not Run / Incomplete) CR test cases. - o Impact 3 – Application functionality pertaining to a specific CR is impacted and impacts 26% - 49% of the remaining (Not Run / Incomplete) CR test cases. - o Impact 4 – Application functionality pertaining to a specific CR is impacted and impact 11% - 25% of the remaining (Not Run / Incomplete) CR test cases. - o Impact 5 - Application functionality pertaining to a specific CR is impacted and impacts 1% - 10% of the remaining (Not Run / Incomplete) CR test cases. • Production Impacts are defined by the number of affected cases: - o Impact 1 – Impacts > 1 million cases - o Impact 2 – Impacts > 200,000 and <= 1 million cases - o Impact 3 – Impacts >2000 and <= 200,000 cases - o Impact 4 – Impacts >20 and <= 2000 cases - o Impact 5 – Impacts <= 20 cases
4.9.2-22 (new)	The Contractor Data Integrity Analysis team (REM) and carrier support team shall be available to support carrier reconciliation activities between the hours of 8:00 a.m. to 9:00 p.m. Pacific time (PT). See also SOW 2.1.1 for additional clarity on Contractor staff coverage work for assignments in support of the State.
4.9.2-23 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.9.3 Defect Management Reports

Table 4-57: Defect Management Reports

Req #	SOW Requirement
4.9.3-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Defect Management Report, which includes but is not limited to: • SLA Report/System Deficiency Correction extract • Director's Report/Defect Management Section (including defect burndowns per request which are displayed in 'release section' of DR) Defect Management reports are displayed below which are input in the DR: - o Open Production Triage SIRs by Month extract - o Open Production Triage SIRs by Planned for Release extract - o Outstanding Production SIRs (Sev 1 to 4) per Aging extract - o Open vs. Closed Production Triage SIRs by Month extract - o Open Non-Production Defects – Defects by Month extract - o Open Non-Production Triage SIRs by Planned for Release extract - o Outstanding Non-Prod Triage Defects (Sev 1 to 4) per Aging extract - o CAP Report - o RCA Reports for Priority 1 and Priority 2 - o Defects Impacting Scripts - o Alternate Procedures - o Top Error Codes
4.9.3-02 (new)	The Contractor shall report to the State on production and non-production deficiencies identified as follows: 1. Priority of the defect specifies the order in which the defect should be identified in both production and non-production processes. 2. The priority of the defect is updated based on the heatmap and Figure 2 Deficiency Resolution Expectations in Section N, SLA-System Deficiency.
4.9.3-03 (new)	The Contractor shall report, at a minimum, within the Monthly Status Report and Defect Management tool(s): • All System Deficiencies (The State may limit environments or status or type as needed.) • Number • Current Status • Priority • Impact
4.9.3-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
4.9.3-05 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

4.9.4 Defect Fix Releases

Software can be released outside a release cycle for emergency fixes as an exception release and as approved by the State. Emergency fixes are defined as updates necessary to correct errors that have a severely adverse effect on the DHCS or Covered California Programs.

Table 4-58: Defect Fix Releases

Req #	SOW Requirement
4.9.4-01 (existing)	The Contractor shall execute emergency updates to CalHEERS as an exception release outside of scheduled releases if approved in writing by the State Project Director or designee. Exception releases are to correct defects that have a Priority 1 or Priority 2 impact to the DHCS or Covered California Programs and cannot wait until the next scheduled release.
4.9.4-02 (existing)	The Contractor shall commence the correction period based upon approval of the defect priority by the State Project Director or designee.
4.9.4-03 (existing)	For exception releases to production that are needed to correct a Priority 1 or Priority 2 Defect, the Contractor shall provide written notification to the State Project Director or designee within two (2) hours of identifying the need for the exception release.

5 PROGRAM SUPPORT REQUIREMENTS

The following Services are currently being provided to the State via a Time and Materials (T&M) Change Request (CR). The State requires that these Services be provided under the fixed price cost to reduce overhead costs related to tracking the work under CRs. Each Service will require the creation, review, and ongoing maintenance of Project Artifact(s) that fully describe the service being provided as well as the associated Project Process Guide or Standard Operating Procedure (SOP) that the Contractor will use to ensure that the services are consistent, traceable and have results and outcomes as reviewed and approved by the State.

All deliverables, activities, services and service improvements or enhancements called for under SOW Section 5, PROGRAM SUPPORT REQUIREMENTS, shall be provided by the Contractor under the Fixed Price Cost component of the Contract. Please note that this section of the Sstatement of wWork (SOW) may reference multiple sets of standards, which are subject to change over time. Refer to Appendix A-2, CALHEERS SDMO SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

5.1 PROGRAM SUPPORT SERVICES

The Contractor shall operationalize and execute processes and standard operating procedures in a manner that reduces impact to State staff and interface partners, schedule, and cost without introducing risk to the ongoing performance and success of the CalHEERS.

5.1.1 Program Support

The Contractor shall provide the Program Support Plan that will provide the approach and timeline associated with the development, review, approval and implementation of all the Services as described in the following Services requirements and Project Artifact definitions.

Table 5-1: Program Support Plan (CD-5.1-1)

Req #	SOW Requirement
5.1.1-01 (Modified)	The Contractor shall develop, deliver, enhance, and maintain a Program Support Plan, defining the Contractors approach for providing all services called for under SOW Section 5, PROGRAM SUPPORT REQUIREMENTS. The plan will define the tasks, roles and responsibility, approach, and describe the solutions the Contractor will use to support the services identified in this section of the SOW. The Contractor shall provide a timeline for development, review, approval, implementation, and ongoing maintenance for all services or service improvements or enhancements, managing those implementations through the existing CalHEERS processes. The Program Support Plan shall include at a minimum the following: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Deliverable Hierarchy 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. ROLES AND RESPONSIBILITIES 6. PROGRAM SUPPORT ACTIVITIES

Req #	SOW Requirement
	6.1 Program Support Services 7. CONSUMER EXPERIENCE ACTIVITIES 7.1 Consumer Experience Support Services 8. REASONABLE OPPORTUNITY PERIOD (ROP) BATCH ACTIVITIES 8.1 Reasonable Opportunity Support Services 9. BOT ACTIVITIES 9.1 BOT Support Services 10. SMALL CHANGE NOTICES ACTIVITIES 10.1 Small Change Notices Support Services 11. SALESFORCE APPLICATION MAINTENANCE ACTIVITIES 11.1 Salesforce Application Maintenance Support Services 12. INTELLIGENT DOCUMENT PROCESSING (IDP) ACTIVITIES 12.1 Intelligent Document Processing Support Services 13. APPLICATION MAINTENANCE ACTIVITIES 13.1 Application Maintenance Support Services 14. USABILITY RESEARCH ACTIVITIES 14.1 Usability Research Support Services 15. ELIGIBILITY SYSTEM INTERFACE (EHIT) ACTIVITIES 15.1 eHIT Support Services 16. FEDERAL REGULATORY ANALYSIS AND IMPLEMENTATION ACTIVITIES 17.1 Advanced Premium Tax Credit (APTC) Reporting Support Services 17. STATE REGULATORY ANALYSIS AND IMPLEMENTATION ACTIVITIES 17.1 State Level Advanced Premium Tax Credit (SPTC) Reporting Support Services 18. ANALYTICS ENHANCEMENT AND SUPPORT ACTIVITIES 18.1 Analytics Monitoring and Assessment Support services 19. PRINT MAIL CENTER ACTIVITIES 19.1 Print Mail Center Support Services 19.2 Print Mail Service Report 20. GENERAL INNOVATIONS ACTIVITIES 20.1 Private Sector-Like Ideation 20.2 World Class Innovation 20.3 Time to Market SDLC Innovation 21. DATA USAGE INNOVATIONS 21.1 Data Warehouse & Data Analytics Innovations 21.2 Enterprise Data Warehouse Innovations 21.3 Predictive Analytics Innovations 21.4 Outcome Realization Innovations 22. CONSUMER JOURNEY & EXPERIENCE INNOVATIONS 22.1 Consumer Journey & Experience Innovations 22.2 Assisted Consumer Journey & Experience Innovations 22.3 Consumer Feedback Collection Solution Innovations 22.4 Choice Architecture & Nudging Innovations 23. ARTIFICIAL INTELLIGENCE INNOVATIONS 23.1 Enhancing AI On the Project 23.2 Implementing GenAI On the Project 24. ORGANIZATIONAL INNOVATIONS 24.1 Multi-Sponsor Design Strategy 24.2 Project to Product Management 25. SECURITY INNOVATIONS 25.1 Security Innovations 26. GLOSSARY AND ACRONYMS 26.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS

Req #	SOW Requirement
5.1.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
5.1.1-03 (new)	The State identifies and associates the following artifacts to the Program Support Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Postage Usage Report • Ad Hoc Requests Process Guide • General Audit Process • SharePoint Audit and Policy Request Process • Batch fallout support • Carrier renewal reconciliation file • CMS reporting and CMS performance stats (i.e., average concurrent users, unique visits, etc.) • Covered CA Arbitration E-Signature Reports (from Enrollment) • Daily Batch Summary-Fax • Daily Batch Summary-Mail • Daily Inbound Report • Daily Mail Run Data File (MRDF) • Daily Outbound Report • Daily Postage Balance • IRS 1095 reporting • Marketing and Outreach (e.g., assisters, delegates, service channels) • Monthly Print Production SLA Report • Monthly SLA Inbound • Open Enrollment reports • Per receipt each file Daily Acknowledgement File • Postage Use Report • Program transition population reports • Renewal reports • ROP Reporting Automatically discontinue members after 90 days • Truven data file • Analytics Monitoring Support Services • Application Maintenance Services • BOT Services • Customer Experience • Eligibility System Interface (eHIT) Support Services? • Federal Regulatory Analysis and Implementation Services • IDP Services • Postage Usage Report Process • Print Mail Center Services • Research and Strategy Services • ROP Batch Services • Salesforce Application Maintenance Services • State Level Advanced Premium Tax Credit Reporting Services ? • <u>TURF Update Process Flow (Small Notices Change Services)</u> • <u>HCD Process and SOPs</u>
5.1.1-04 (new)	The Contractor shall, in collaboration with the State, update the CD-5.1-1 - Program Support Plan, to include additional sections covering the following topics: 1. Service Center Maintenance Services 2. Usability Research Activities 3. Consumer Feedback Collection Solution Innovations
5.1.1-05 (new)	The Contractor shall update or develop the following appendices and attach them to the Program Support Plan:

Req #	SOW Requirement
	Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact
5.1.1-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

5.1.2 Program Support Execution

Table 5-2: Program Support Execution

Req #	SOW Requirement
5.1.2-01 (new)	The Contractor shall staff, manage, lead and execute all Program Support activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.1.2-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.2 CONSUMER EXPERIENCE SERVICES

The Contractor shall provide Human Centered Design services in support of Consumer Experience, as described within the requirements of Table 5-3, Consumer Experience Support

(below). These services are currently being provided via T&M CRs. See example CR 274047 in the Bidders' Library.

5.2.1 Consumer Experience Support

The Contractor shall provide the consumer experience services described in this section and include Standard Operating Procedures to document how these services are carried out.

Table 5-3: Consumer Experience Support

Req #	SOW Requirement
5.2.1-01 (new)	The Contractor shall staff, manage, lead and execute all Consumer Experience Support activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan, and HCD Standard Operating Procedures.
5.2.1-02 (new)	The Contractor shall provide a User Experience (UX) team to provide Consumer Experience services using iterative processes and tools that will provide functional design solutions that can then be implemented into the CalHEERS System.
5.2.1-03 (new)	The Contractor shall develop, enhance, deliver and maintain a project artifact that documents the CalHEERS Human Centered Design (HCD) processes, which produce at a minimum the following outputs: 1. Feature discovery and research activities 2. Feature definition 3. Design of small to large features 4. Delivery of functional design artifacts
5.2.1-04 (new)	The Contractor shall assess and innovate the HCD processes ensuring they remain current with industry standards, best practices, and lessons learned allowing for an improved service delivery. All enhancements to the process will be documented and approved by the state via the project artifact.
5.2.1-05 (new)	The Contractor shall make any configuration or platform change required to support existing tools.
5.2.1-06 (new)	The Contractor shall acquire and configure any new tools used to support Consumer Experience Services. The State will pay associated cloud services and licenses for approved tools upgrades.
5.2.1-07 (new)	The Contractor shall assess and develop a process, in concert with the CalHEERS Project State Team to ensure that identified modifications are documented and implemented within 30 days of the approval of changes to the process.
5.2.1-08 (new)	The Contract shall on an annual basis assess the process documentation with results being shared with the application State teams to ensure that there is an agreement of the assessment and that outcomes are determined with every approved update to the process.
5.2.1-09 (new)	The Contractor shall maintain a UX team with a consistent number of resources to address improvement in Consumer Experience as defined by the state to ensure that the CalHEERS user is provided with a clear and concise flow when performing all eligibility and enrollment tasks within the CalHEERS portal(s).
5.2.1-10 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.2.1-11 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.3 REASONABLE OPPORTUNITY PERIOD (ROP) BATCH SERVICES

The Contractor shall provide ROP Batch services as described within the requirements of Table 5-4, ROP Batch Services (below). These services are currently being provided via T&M CRs. See example CR 165890 in the Bidders' Library.

5.3.1 ROP Batch Services

The Contractor shall provide the ROP support services described in this section.

Table 5-4: ROP Batch Services

Req #	SOW Requirement
5.3.1-01 (new)	The Contractor shall staff, manage, lead and execute all ROP Batch Services on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.3.1-02 (new)	The Contractor shall provide a project artifact that will adopt, maintain, and enhance the existing ROP Batch Services process(es) required to perform these services in the most efficient manner to the state.
5.3.1-03 (new)	Any documentation required to support updates to the CalHEERS System can be submitted via a No Cost Change Request.
5.3.1-04 (existing)	The Contractor shall evaluate and implement changes associated with the Federal Poverty Level Cost of Living Adjustments (COLA).
5.3.1-05 (Modified)	The Contractor shall, through ongoing, year-round efforts, evaluate and implement changes associated with all annual tax filing forms, notices and interface files for the Internal Revenue Services (IRS) and the Franchise Tax Board (FTB).
5.3.1-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.3.1-07 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.4 BOT SERVICES

The Contractor shall provide BOT services as described within the requirements of Table 5-5, BOT Services Support (below). These services are currently being provided as T&M CR's. See example CR 266444 in the Bidders' Library.

5.4.1 BOT Services Support

The Contractor shall provide the BOT support services described in this section.

Table 5-5: BOT Services Support

Req #	SOW Requirement
5.4.1-01 (new)	The Contractor shall staff, manage, lead and execute all BOT Services on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.4.1-02 (new)	The Contractor shall develop, enhance, deliver, and maintain a project artifact that documents the existing BOT Services processes, required to support the existing BOT services, as well as updates associated with new BOT technologies or enhancements implemented to provide these services in the most efficient manner for the state.
5.4.1-03 (new)	The Contractor shall support existing CalHEERS BOT technology and provide assessment, creation, and maintenance of future BOT development for the CalHEERS solution.
5.4.1-04 (new)	The Contractor shall partner with the State to assess and determine how BOT technology can be used to operate as an agent for a user, other program or to simulate a human activity. BOTS will be used to automate certain tasks without specific instructions from a CalHEERS agent, and to replace a repetitive task that a CalHEERS agent would otherwise have to perform.
5.4.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

Req #	SOW Requirement
5.4.1-06 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.5 SMALL CHANGE NOTICES SERVICES

The Contractor shall provide Small Change Notices services as described within the requirements of Table 5-6, Small Change Notices Services (below). These services are currently being provided as T&M CR's See example CR 200128 in the Bidders' Library.

5.5.1 Small Change Notices Services

The Contractor shall provide Small Change Notices Services, previously known as the Text Update Request Form (TURF) support services, as described in this section below.

Table 5-6: Small Change Notices Services

Req #	SOW Requirement
5.5.1-01 (new)	The Contractor shall staff, manage, lead and execute all Small Change Notices Services, previously known as TURF services, on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.5.1-02 (new)	The Contractor shall adopt, maintain, and enhance the Text Update Request Form (TURF) Process Flow and rename it as the Small Notices Change Services artifact. The artifact will document the Contractor's flexible approach to updating language in Consumer Notices when changes are needed in support of Sponsor request for clarity or errors.
5.5.1-03 (new)	The Contractor shall provide Small Change Notices Services as they relate to text changes only.
5.5.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.5.1-05 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.6 SALESFORCE APPLICATION MAINTENANCE SERVICES

The Contractor shall provide Salesforce Application Maintenance services as described within the requirements of Table 5-7, Salesforce Application Maintenance Support Services (below). These services are currently being provided as T&M CR's. See example CR 250129 in the Bidders' Library.

5.6.1 Salesforce Application Maintenance Support

The Contractor shall provide the Salesforce Application Maintenance support services described in this section.

Table 5-7: Salesforce Application Maintenance Support Services

Req #	SOW Requirement
5.6.1-01 (new)	The Contractor shall staff, manage, lead and execute all Salesforce Application Maintenance Support Services on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.6.1-02 (new)	The Contractor's Salesforce team shall provide functional design solutions for implementation into the Agent/Agency and Enroller Portal Feature of the CalHEERS System.

Req #	SOW Requirement
5.6.1-03 (new)	The Contractor shall evaluate the Salesforce system upgrades to assess and correct any regression issues that may be found.
5.6.1-04 (new)	The Contractor shall evaluate and maintain all existing Enroller Portal reports, screens, and list views to meet the changing needs of the business monthly in the prioritized order as determined by the state.
5.6.1-05 (new)	The Contractor shall provide a project artifact that will adopt, maintain, and enhance the existing Salesforce Application Maintenance Services process(es) required to provide these services in the most efficient manner to the state.
5.6.1-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.6.1-07 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.7 INTELLIGENT DOCUMENT PROCESSING (IDP) SERVICES

The Contractor shall provide the ongoing process services supporting Intelligent Document Processing as described within the requirements of Table 5-8, IDP Support Services (below). These services are currently being provided as T&M CR's. See example CR 274413 in the Bidders' Library.

5.7.1 Intelligent Document Processing Support

The Contractor shall provide the IDP support services described in this section.

Table 5-8: IDP Support Services

Req #	SOW Requirement
5.7.1-01 (new)	The Contractor shall staff, manage, lead and execute all IDP Services on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.7.1-02 (new)	The Contractor shall provide an IDP team to provide IDP support services to the state.
5.7.1-03 (new)	The Contractor shall continuously monitor, assess and implement changes within the IDP tool that will improve and enhance the ability for documents to be uploaded by the consumer and received through the interface file from the Print Vendor Mail and Fax services. These services include, but are not limited to, the following: 1. UI/UX Improvement and redesign of the Document upload process on the Upload Eligibility Documents and Documents and Correspondence Page. 2. Prevent the upload of Duplicate documents by the Consumer. 3. Fuzzy Name Matching functionality.
5.7.1-04 (new)	The Contractor shall add or revise document types, via no cost CR's, as required to support document verification by IDP.
5.7.1-05 (new)	The Contractor shall trigger corresponding operational tasks to assist in identification and resolution of documents uploaded that failed the IDP verification process.
5.7.1-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.7.1-07 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.8 APPLICATION MAINTENANCE SERVICES

The Contractor shall provide the ongoing process services supporting Application Maintenance as described within the requirements of Table 5-9 Application Maintenance Services. These services are currently being provided as T&M CR's. See example CR 274762 in the Bidders' Library.

5.8.1 Application Maintenance Support

The Contractor shall provide the Application Maintenance support services described in this section.

Table 5-9: Application Maintenance Services

Req #	SOW Requirement
5.8.1-01 (new)	The Contractor shall staff, manage, lead and execute all Application Maintenance Services on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.8.1-02 (new)	The Contractor shall provide a dedicated team of analysts and developers to provide Application Maintenance services. This team will provide functional design solutions that can be implemented into the CalHEERS System.
5.8.1-03 (new)	The Contractor shall evaluate CalHEERS enhancements to assess and correct any regression issues that may be found.
5.8.1-04 (new)	The Contractor shall evaluate and maintain all existing Enroller Portal reports, screens, and list views to meet the changing needs of the business monthly in the prioritized order, including the Salesforce feature releases (which occur 3 times annually), as determined by the state.
5.8.1-05 (new)	The Contractor shall provide a project artifact that will adopt, maintain, and enhance the existing Application Maintenance Services process(es) required to provide these services in the most efficient manner to the state.
5.8.1-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.8.1-07 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.9 USABILITY RESEARCH SERVICES

The Contractor shall provide the ongoing process services supporting usability research as described within the requirements of Table 5-10, Usability Research Services (below). These services currently being provided as T&M CR's. See example CR 274049 in the Bidders' Library. Additionally, the Contractor shall proactively bring forward recommendations and facilitate informed decisions that help define and support the Sponsor's vision for key strategic outcomes. These recommendations include, but are not limited to, the following:

1. Ensure that CalHEERS is solving the right problems - Problem definition before solutioning
2. Centralize data sources to inform and drive decision-making - Complete data driven decisions
3. Integrate team efforts to reduce redundancies in Discovery work - Efficiently prioritize opportunities
4. Help Sponsors define their vision with HCD as a strategic partner executing on goals - Maximize value
5. Work ahead allowing research to lead, not follow - Be proactive and avoid reactive responses

5.9.1 Usability Research Services

The Contractor shall provide the usability research support services described in this section.

Table 5-10: Usability Research Services

Req #	SOW Requirement
5.9.1-01 (new)	The Contractor shall staff, manage, lead and execute all Usability Research Services on CalHEERS as defined in this Statement of Work and in accordance with the CD-5.1-1 – Program Support Plan.
5.9.1-02 (new)	The Contractor shall adopt, maintain, and enhance the Usability Research Services framework.
5.9.1-03 (new)	The Contractor shall adopt, maintain, and enhance a framework artifact that will include, but is not limited to, the following: 1. Establish, maintain, and update a Vision/North Star 2. Defines and maintains the Key Performance Indicators (KPIs) required to measure success 3. Defines and maintains the Ecosystem Map 4. Defines and maintains a Prioritization Scoring System that will allow the Sponsor's to influence the prioritization of research and analysis efforts
5.9.1-04 (new)	The Contractor shall proactively bring forward recommendations and facilitate informed decisions that help define and support the Sponsor's vision for key strategic outcomes. These recommendations include, but are not limited to, the following: 1. Ensure that CalHEERS has been fully and accurately understood, and documented prior to attempting a solution. 2. Centralize data sources to inform and drive decision-making - Complete data drives decisions 3. Integrate team efforts to reduce redundancies in Discovery work - Efficiently prioritize opportunities 4. Help Sponsors define their vision with HCD as a strategic partner executing on goals - Maximize value 5. Work ahead allowing research to lead, not follow - Be proactive and avoid reactive responses
5.9.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.9.1-06 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

5.10 ELECTRONIC HEALTH INFORMATION TRANSFER (EHIT) SERVICES

The Contractor shall provide the ongoing process services supporting the EHIT interface as described within the requirements of Table 5-11 Eligibility System Interface Services. These services are currently being provided as T&M CR's. See example CR 178286 in the Bidders' Library.

5.10.1 EHIT Support

The Contractor shall provide the EHIT support services described in this section.

Table 5-11: Eligibility System Interface (eHIT) Services

Req #	SOW Requirement
5.10.1-01 (new)	The Contractor shall develop, maintain and execute a process artifact that will allow for the identification and implementation of changes required to support the expansion of data components required to ensure accurate information share with the California Statewide Automated Welfare System (CalSAWS).
5.10.1-02 (new)	The Contractor shall define a repeatable process to ensure that updates to the Determination Eligibility Response (DER) is initiated by CalHEERS and successfully process by CalSAWS following any update to the data components requested by the Sponsor's organizations.
5.10.1-03 (new)	The Contractor shall define a repeatable process to ensure that updates to the Eligibility Determination Response (EDR) is initiated by CalSAWS and successfully processed by CalHEERS following any update to the data components requested by the Sponsor's organizations.
5.10.1-04 (new)	The Contractor shall define the process for the regular maintenance of the eHIT interfaces including, but not limited to: 1. Regular schema version updates 2. Data element updates or additions related to the interfaces
5.10.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

5.11 FEDERAL REGULATORY ANALYSIS AND IMPLEMENTATION SERVICES

The Contractor shall provide the ongoing process services supporting Federal Regulatory Analysis. These services are being expanded and defined as described within the requirements of Table 5-12 Federal Regulatory Analysis and Implementation Services (below).

5.11.1 Advanced Premium Tax Credit (APTC) Reporting Support

The Contractor shall provide the Federal Regulatory Analysis and Implementation support services described in this section.

Table 5-12: Federal Regulatory Analysis and Implementation Services

Req #	SOW Requirement
5.11.1-01 (new)	The Contractor shall provide a team of analysts familiar with eligibility for and reporting of APTC for Covered California programs.
5.11.1-02 (new)	The Contractor shall evaluate and design, code and implement the changes required by Federal or State regulation to the IRS Tax forms 1095, 1095A, 1095B and 1095C. Any new forms identified for the purposes of Federal Tax Reporting are outside of the scope of this service.
5.11.1-03 (new)	The Contractor shall assess, refine and implement any modifications to the existing CalHEERS architecture and processes associated with Federal Regulation changes that impact the existing technical architect and operating environment.
5.11.1-04 (new)	The Contractor shall provide a project artifact(s) that will adopt, maintain, and enhance the existing Federal Regulatory Analysis and Implementation Services process(es) required to provide these services in the most efficient manner to the state.
5.11.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

5.12 STATE REGULATORY ANALYSIS AND IMPLEMENTATION SERVICES

The Contractor shall provide the ongoing process services supporting as described within the requirements of Table 5-13 California Premium Subsidy Program Services (below).

5.12.1 California Premium Subsidy Program (CAPS) Reporting Support

The Contractor shall provide the State Regulatory Analysis and Implementation support services described in this section.

Table 5-13: California Premium Subsidy Program Services

Req #	SOW Requirement
5.12.1-01 (new)	The Contractor shall provide a team of analysts familiar with eligibility for State level tax credits and reporting of SPTC for Covered California programs.
5.12.1-02 (new)	The Contractor shall evaluate and design, code and implement the changes required by Federal or State regulation to the FTB Tax forms 3895, 3895A, 3895B and 3895C. Any new forms identified for the purposes of Federal Tax Reporting are outside of the scope of this service.
5.12.1-03 (new)	The Contractor shall assess, refine and implement any modifications to the existing CalHEERS architecture and processes associated with State Regulation changes that impact the existing technical architect and operating environment.
5.12.1-04 (new)	The Contractor shall provide a project artifact that will adopt, maintain, and enhance the existing California Premium Subsidy Program Reporting Services process(es) required to provide these services in the most efficient manner to the state.
5.12.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

5.13 DATA & ANALYTICS SUPPORT SERVICES

The Contractor shall provide support services that enable the CalHEERS Data and Analytics program to use data in innovative ways to serve customers, help CalHEERS and its sponsors make data-driven decisions, and foster innovation.

5.13.1 Data & Analytics Services

The Contractor shall provide the Data & Analytics support services described in this section.

Table 5-14: Analytics Monitoring and Assessment Support

Req #	SOW Requirement
5.13.1-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute the existing data analytics services on CalHEERS. (Examples of such Services include, but are not limited to: CR 183057, CD-4.3-2 Architectural Design Document, CD-6.2-1 Operations Manual, CD-6.3-1 Daily Production Status Report , and CD-6.14-1 Hardware and Software Inventory Management Plan deliverables; Section 6.3, OPERATIONS REPORTING, DATA, AND ANALYTICS deliverables and as described in this section of the SOW)
5.13.1-02 (new)	The Contractor shall adopt, develop, maintain, and enhance a project artifact of the existing Analytics Monitoring Support Services process(es) required to provide these services and reports in the most efficient manner to the state.
5.13.1-03 (new)	The Contractor shall maintain configuration, security, maintenance, access control, and performance monitoring across all tools and systems, including but not limited to AWS S3, Databricks, Snowflake, Tableau, SQL Server, and Okta.
5.13.1-04 (new)	The Contractor shall oversee data quality and lifecycle management, including quality reporting, defect identification, root cause analysis, and mitigation.
5.13.1-05 (new)	The Contractor shall ensure performance monitoring and support to provide timely results to data users from the system.

Req #	SOW Requirement
5.13.1-06 (new)	The Contractor shall provide resources for both regular and new development, triaging new requests and adapting the data and analytics provided to Covered California and DHCS for the evolving business needs or questions. New and ad-hoc data and analytics development support shall include a hybrid agile process, and sufficient bandwidth to develop multiple data products simultaneously (see monthly agile sprint CRs for examples).
5.13.1-07 (new)	The Contractor shall provide Data and Analytics training and technical assistance through various venues such as team-led trainings, ad-hoc support, investigations, and weekly office hour sessions.
5.13.1-08 (new)	The Contractor shall perform ad-hoc analytics and data investigations upon request from sponsors to address emerging or urgent issues.
5.13.1-09 (new)	The Contractor shall track emerging system changes for downstream impacts to data and analytics and shall proactively identify data & analytics improvement opportunities which arise from new system enhancements.
5.13.1-10 (new)	The Contractor shall provide strategic updates and maintain a roadmap to ensure the CalHEERS data and analytics program evolves to meet business needs in a changing landscape, ensuring the data platform grows sustainably while leveraging opportunities for modernization.
5.13.1-11 (new)	The Contractor shall ensure all new data, reporting, and analytics products are fully documented and cataloged, making data about data products and resources accessible, easily understood, and efficiently used by all users. Documentation about every new data assets, products, and reports shall be integrated into a centralized repository with a logical structure that builds a continually-evolving single view of the entire data landscape at CalHEERS.
5.13.1-12 (new)	The Contractor shall provide responsive audit and operational reporting support for federal and state oversight activities and other audits as needed.
5.13.1-13 (new)	The Contractor shall prepare for operational cycles by revisiting the prior year's reports and making modifications for the new year, as appropriate. Reporting and extract requirements are categorized as, but not limited to, the following: 1. Renewal reports 2. Program transition population reports 3. Open Enrollment reports 4. IRS 1095 reporting 5. FTB 3895 reporting 6. Marketing and Outreach (e.g., assisters, delegates, service channels) 7. CMS reporting and CMS performance stats (i.e., average concurrent users, unique visits, etc.) 8. Batch fallout support 9. Carrier renewal reconciliation file 10. ROP Reporting Automatically discontinue members after 90 days 11. Truven data file
5.13.1-14 (new)	The Contractor shall process ad-hoc requests for reports including, but not limited to: • Covered CA Arbitration E-Signature Reports (from Enrollment).
5.13.1-15 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
5.13.1-16 (modified)	The Contractor shall adopt or provide, update, and maintain the CalHEERS Business reporting tools (i.e., Tableau and Snowflake) that manage business reporting and analytics on the project.

5.14 PRINT MAIL CENTER SUPPORT

The Contractor shall perform the Print-Mail Services, as further described in this document and consisting generally of providing the Print-Mail Service mail processing, and document management functionality.

5.14.1 Print Mail Center Services

Table 5-15: Print Mail Center Services

Req #	SOW Requirement
5.14.1-01 (new)	The Contractor shall provide a project artifact that will adopt, maintain, and enhance the existing Print Mail Center Services process(es) required to provide these services and reports in the most efficient manner to the state.
5.14.1-02 (modified)	The Contractor shall provide support for printing services and print mail processing for the CalHEERS System, including, but not limited to, the following list: 1. Inbound Mail Processing 2. Outgoing Mail Processing 3. Color Copying 4. Automated Insert 5. Presorting 6. Move Update Service 7. Returned Mail Service 8. Manual Processing 9. Document Classification and Scanning 10. Document Entry into Exchange Work-flow 11. Hard-copy storage for a period less than 6 months 12. Hard-copy storage for a period more than 6 months 13. Secure Document Destruction 14. Alternative Format Services in accessible formats, including but not limited to braille, large font, audio, data, encrypted audio, and encrypted data
5.14.1-03 (new)	The Contractor shall provide all the envelopes needed under the Print and Mail Services, including but not limited to the list below. Additionally, should additional size or types of envelopes become needed by the project, the Contractor shall procure those as well. 1. 6x9 DBL WDO Envelope 2. 9 x 12 Color Envelope 3. #11 Pink Large WDO Envelope 4. #10 STD DBL (9X10) WDO Envelope 5. #10 White large (9X10) WDO Envelope 6. #10 DBL (9X10) WDO Tax Envelope w/tint 7. Green DBL WDO Envelope - Renewal 8. Green DBL WDO Envelope - Special Env
5.14.1-04 (modified)	The Contractor shall manage, maintain, and process all postage for CalHEERS generated mailings, including but not limited to: 1. All notices 2. Forms 3. Letters 4. Postcards 5. Flyers 6. Brochures 7. Enrollment packages 8. Ad hoc mass mailings 9. Any other mailing required for operation of CalHEERS
5.14.1-05 (modified)	The Contractor shall, at a minimum, provide the State with access to the following functionality or reporting: 1. View postage account balances
5.14.1-06 (new)	The Contractor shall notify the State when the cost of external materials (e.g., envelopes, paper, etc.) increases or decreases, possibly triggering (at the sole discretion of the State) a reevaluation of Contract Transaction-Based Costs

Req #	SOW Requirement
5.14.1-07 (new)	In the event the Contractor utilizes one (or more) third party print vendors, or print vendor facilities, the Contractor shall ensure the following: - Print Mail Center services shall be billed to the State utilizing the rates established by the contract Cost Workbook regardless of which print vendor or facility provides the service. - Third party vendors shall comply with all security and confidentiality requirements as the Contractor and as stated in CD-3.1-1 – DEL - Project Management Plan.
5.14.1-08 (new)	The Contractor shall bear the cost of all unused product inventory utilized in providing Print Mail Services.
5.14.1-09 (new)	The Contractor shall work with the State to identify what cost effective service provider(s) the State would like to utilize on the contract for Print Mail Services.
5.14.1-10 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this service in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

5.14.2 Print Mail Services Report

Table 5-16: Postage Usage Report

Req #	SOW Requirement
5.14.2-01 (existing)	The Contractor shall provide to the State, in conjunction with the associated invoice, a monthly report which provides an accurate accounting of all postage usage.
5.14.2-02 (new)	The Contractor shall provide a project artifact that will adopt, maintain, and enhance the existing Print Mail Center Services process(es) required to provide these services and reports in the most efficient manner to the state.
5.14.2-03 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

5.15 GENERAL INNOVATIONS

The following sections 5.15 - 5.20 define the maintenance and operations requirements associated with Innovations that will be carried out under the fixed price, while the Contractor will implement the State Approved Innovations through the existing CalHEERS Change Request Processes. Each section is broken up by Innovation Planning and Innovation Support.

5.15.1 Private Sector-Like Innovation and Ideation

Table 5-17: Private Sector-Like Ideation Planning

Req #	SOW Requirement
5.15.1-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute the existing Innovation Ideation Process on CalHEERS.
5.15.1-02 (new)	The Contractor shall assess the existing CalHEERS innovation ideation process and compare it to private-sector processes and industry best practices to identify, report on, and recommend improvement opportunities to the State.
5.15.1-03 (new)	The Contractor shall produce and maintain an Innovation Ideation Process Analysis & Recommendations Report that documents the Contractor's understanding of the CalHEERS mission, culture, goals, needed staffing skillsets, and end user needs, and detail out the assessment process, assessment results, and suggested improvement opportunities with State associated disposition.

Req #	SOW Requirement
5.15.1-04 (new)	The Contractor shall coordinate innovation ideation activities with the Contractor OCM team, to ensure seamless planning and execution of OCM related activities, including education and training, around the overall innovation ideation process and individual innovation initiatives at no cost to the State.
5.15.1-05 (new)	The Contractor shall ensure the innovation ideation processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.15.1-06 (new)	The innovation ideation process shall conclude with the Contractor development of an initial requirement set and an associated change request for each innovation the State approves to move forward with, including the following: • Identification of staffing and skillset needs for the innovation effort. • Identification of the effort needed to complete all phases of the Innovation effort. • Identification of any and all HW/SW necessary for the innovation.

Table 5-18: Private Sector-Like Ideation Support

Req #	SOW Requirement
5.15.1-07 (new)	The Contractor shall provide maintenance and operations support for all innovation ideation processes, improvements or enhancements, and innovations.
5.15.1-08 (new)	The Contractor shall implement any innovation ideation improvements, enhancements, and innovations approved by the State Project Director or designee via Special Change Request.
5.15.1-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any innovation ideation activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.15.1-10 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any innovation ideation innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.15.1-11 (new)	The Contractor shall coordinate with the State to identify and track innovation ideation goals, success criteria, and key performance indicators (KPI) over the term of the contract in the State desired format at no cost to the State.
5.15.1-12 (new)	The Contractor shall ensure the innovation ideation process addresses the following: Identification of State approved innovation ideation key performance indicators (KPI) Identification of State approved innovation ideation success criteria Consideration of limiting factors to innovation ideation, such as: • Contractor and State staffing compacity • Federal and State legislation and policy impacts • Legal and Ethical Considerations • Identification of State approved process stage-gates for innovation project phases, including entrance and exit criteria.

Req #	SOW Requirement
5.15.1-13 (new)	The Contractor shall ensure the innovation ideation processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.15.2 World Class Innovation

Table 5-19: World Class Innovation Planning

Req #	SOW Requirement
5.15.2-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all existing CalHEERS Innovation Program, strategy, services, activities, improvements or enhancements, and Innovations on CalHEERS, as defined in the CD-3.15-1 - CalHEERS Strategic Plan, and CD-3.15-2 - Strategic Roadmap deliverables.
5.15.2-02 (new)	The Contractor shall develop, deliver, and maintain a CalHEERS Innovation Program Assessment & Recommendations Report, that provides the Contractor's assessment, findings, and Contractor recommended improvements or enhancements associated with the CalHEERS Innovation Program (for State consideration), including, but not limited to, the following: - Inputs from assessing the existing CalHEERS Innovation Program - Contractor shall ensure the CalHEERS Innovation Program Assessment & Recommendations Report assess the following, but is not limited to: - CalHEERS business and innovation goals - Additional staffing needs for the innovation program - Existing innovation program/strategy - Staff inclusion, including learning environment, experimentation, idea generation, and brainstorming, use of Proof of concepts, and demos - Metric tracking and reporting pre/post implementation - Key performance indicators (KPI) and qualitative measurements used to track innovation progress - Planned and actual State return on investment (ROI) tracking - Recommendations for Improvement and innovation
5.15.2-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the CalHEERS Innovation Program Assessment & Recommendations Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.15.2-04 (new)	The Contractor shall develop, update, deliver, and maintain a CalHEERS Innovation Program Plan, that details out the processes for conducting an assessment, reporting assessment results, and identification of recommended improvements and/or innovations for the CalHEERS innovation program, including but not limited to the following: - Defines the CalHEERS business and innovation goals - Implements an innovation strategy with a well-defined process that flows from an idea to implemented innovations - Identifies a dedicated Innovation team, including additional staffing needs - Considers resource capacity on the project - Processes to empower staff, promote learning and innovative thinking - Cultivates a culture of experimentation, idea generation, and brainstorming - Includes the utilization of Proof of concepts, Demos, small project - Schedule for improvement or innovation implementations - Defines, track and reports on metrics pre/post innovation implementation - Identifies key performance indicators (KPI) and qualitative measurements to track innovation program progress and effectiveness - Planned and actual State return on investment (ROI) tracking

Req #	SOW Requirement
5.15.2-05 (new)	The Contractor shall implement any CalHEERS Innovation Program improvements, enhancements, and innovations approved by the State Project Director or designee.

Table 5-20: World Class Innovation Support

Req #	SOW Requirement
5.15.2-06 (new)	The Contractor shall provide maintenance and operations support for all CalHEERS Innovation Program processes, improvements or enhancements, and innovations.
5.15.2-07 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any CalHEERS Innovation Program associated activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.15.2-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any CalHEERS Innovation Program associated innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.15.2-09 (new)	The contractor shall implement CalHEERS Innovation Program improvements or enhancements, and innovations via the existing CalHEERS change management processes.
5.15.2-10 (new)	The Contractor shall coordinate with the State to identify and track CalHEERS Innovation Program key performance indicators (KPI) over the term of the contract in the State desired format.
5.15.2-11 (new)	The Contractor shall ensure the CalHEERS Innovation Program processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.15.2-12 (new)	The Contractor shall ensure the Contractor CalHEERS Innovation Program processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.15.3 Time to Market SDLC Innovation

Table 5-21: Time to Market SDLC Innovation Planning

Req #	SOW Requirement
5.15.3-01 (new)	The Contractor shall develop, deliver, and maintain a Time to Market SDLC Innovation Assessment & Recommendations Report, that provides the Contractor's assessment, findings, and Contractor recommended improvements or enhancements to the CalHEERS software development lifecycle (SDLC) (for State consideration), including, but not limited to, the following: • Inputs from assessing the existing CalHEERS SDLC • Assessment results from analyzing CalHEERS for improvements or enhancements to the SDLC that will reduce the time it takes to implement change requests on CalHEERS • Additional staffing or skillsets needed to support the proposed improvements or enhancements • Schedule for improvement or enhancement implementation • Identification and tracking of metrics pre/post improvement or enhancement implementation • Key performance indicators (KPI) and qualitative measurements to track time to market improvement or enhancement implementation progress • Reporting • Planned and actual State return on investment (ROI) tracking • Schedule for consumer usability testing within SDLC
5.15.3-02 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Time to Market SDLC Innovation Assessment & Recommendations Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.15.3-03 (new)	The Contractor shall implement any Time to Market SDLC Innovation improvements, enhancements, and innovations approved by the State Project Director or designee.
5.15.3-04 (new)	The contractor shall implement Time to Market SDLC Innovation improvements, enhancements, and innovations via the existing CalHEERS change management processes.

Table 5-22: Time to Market SDLC Innovation Support

Req #	SOW Requirement
5.15.3-05 (new)	The Contractor shall provide maintenance and operations support for all Time to Market SDLC Innovation processes, improvements or enhancements, and innovations.
5.15.3-06 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Time to Market SDLC Innovation activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.15.3-07 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Time to Market SDLC Innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.15.3-08 (new)	The Contractor shall coordinate with the State to identify and track Time to Market SDLC Innovation key performance indicators (KPI) over the term of the contract in the State desired format.

Req #	SOW Requirement
5.15.3-09 (new)	The Contractor shall ensure the Time to Market SDLC Innovation processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.15.3-10 (new)	The Contractor shall ensure the Time to Market SDLC Innovation processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.16 DATA USAGE & ANALYTICS INNOVATIONS

5.16.1 Data Usage & Analytics Innovations

Table 5-23: Data & Analytics Innovations Planning

Req #	SOW Requirement
5.16.1-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all existing Data Management and Data Analytics Innovation activities on CalHEERS, as defined in CD-4.3-2 Architectural Design Document, CD-6.2-1 Operations Manual, CD-6.3-1 Daily Production Status Report, and CD-6.14-1 Hardware and Software Inventory Management Plan deliverables.
5.16.1-02 (new)	The Contractor shall develop, deliver, and maintain a Data Management and Data Analytics Innovation Assessment & Recommendations Report, that provides the Contractor's assessment, findings, and recommended improvements, enhancements or innovations associated with Data and Analytics. The analysis and resulting report will include four components, focusing respectively on: 1) Data and Analytics Program: including data strategy and data governance 2) Data Platform: including architecture and technology for data warehousing and analytics and reporting 3) Analytics and Reporting Development Lifecycle: including expanding curated data domains and the capabilities to respond to new information needs 4) Data Science and Advanced Analytics: including strategies to maximum data value for all aspects of sponsors' missions using AI and innovative research While inter-related and inter-dependent, the four components may be delivered independently, if mutually agreed with State. Each of the four components of the analysis and resulting report will include an assessment of: 1) Sponsor goals for the Data and Analytics innovations 2) Current state, across data domains, infrastructure, personnel, processes 3) Future state, including opportunities to innovate with a focus for all proposals on:

Req #	SOW Requirement
	- o Strategy: proposal should enable CalHEERS to move to the future state in a nimble yet sustainable way, track the metrics and key performance indicators (KPI's) necessary to report progress, identify a schedule for innovation implementation, - o Value: proposal should include and help build concrete measures to track the planned and actual CalHEERS return on investment (ROI), both across the project and specifically within the Data and Analytics domains. Examples of Sponsor goals for the CalHEERS Data and Analytics program are contained in RFP Section 4.5.5.
5.16.1-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Data Management and Data Analytics Innovation Assessment & Recommendations Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.16.1-04 (new)	The Contractor shall implement any Data Management and Data Analytics improvements, enhancements, and innovations approved by the State Project Director or designee.
5.16.1-05 (new)	The contractor shall implement Data Management and Data Analytics improvements or enhancements, and innovations via the existing CalHEERS change management processes.

Table 5-24: Data & Analytics Innovations Support

Req #	SOW Requirement
5.16.1-06 (new)	The Contractor shall provide maintenance and operations support for all Data Management and Data Analytics processes, improvements or enhancements, and innovations.
5.16.1-07 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Data Management and Data Analytics activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.16.1-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Data Management and Data Analytics innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.16.1-09 (new)	The Contractor shall ensure the Data Management and Data Analytics Innovation processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.16.1-10 (new)	The Contractor shall coordinate with the State to identify and track Data Management and Data Analytics Innovation key performance indicators (KPI) over the term of the contract in the State desired format.

Req #	SOW Requirement
5.16.1-11 (new)	The Contractor shall ensure the Data Management and Data Analytics Innovation processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.16.2 Outcome Realization Innovations

Table 5-25: Outcome Realization Innovations Planning

Req #	SOW Requirement
5.16.2-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute any existing Outcome Realization services, activities, improvements or enhancements, and Innovations on CalHEERS, as defined in CD-4.2-1 - Change Request Process, and CD-4.2-2 – CR Basis of Estimate (BOE) deliverables.
5.16.2-02 (new)	The Contractor shall produce and maintain an Outcome Realization Innovation Analysis & Recommendations Report that documents the Contractor's understanding of the existing CalHEERS outcome realization process, state desired outcomes, outcome owners, reporting processes, needed staffing skillsets, and recommended improvement opportunities with State associated disposition.
5.16.2-03 (new)	The Contractor shall develop and maintain an Outcome Realization Innovation Plan, which shall include, but not limited to the following: • Inputs from assessing the existing outcome realization process: - o State desired outcomes - o Outcome owners - o Identification and analysis of project data, defining insight data (Learning from existing data/reporting) and hindsight data (Identifying factors impacting outcomes) - o Proposed Improvements with State disposition • Approach to providing outcome realization services going forward, including: - o Staffing - o Process improvement As-is/To-be diagrams - o Schedule for process improvement implementation - o Confirmation of outcomes - o Timeframes/schedule to outcomes - o Outcome measurement (6 -12 months post implementation) - o Comparing actual outcome vs. expected outcomes - o Key performance indicators (KPI) and qualitative measurements to track progress - o Reporting - o State return on investment (ROI) - o System Change Requests as requested by sponsors - o Data analytics processes integrating the following: ▪ Insight (Learning from existing data/reporting) ▪ Hindsight (Identifying factors impacting outcomes) ▪ Foresight (using Data Analysis to understand/anticipate the future)
5.16.2-04 (new)	The contractor shall detail out within the Outcome Realization Innovation Plan how they will implement, execute, mature, and enhance data analytics, including Insight, Hindsight and Foresight.
5.16.2-05 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Outcome Realization Innovation Analysis & Recommendations Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.

Req #	SOW Requirement
5.16.2-06 (new)	The Contractor shall implement any outcome realization improvements, enhancements, and innovations approved by the State Project Director or designee.
5.16.2-07 (new)	The contractor shall implement outcome realization associated improvements or enhancements, and innovations via the existing CalHEERS Change Management processes.

Table 5-26: Outcome Realization Innovations Support

Req #	SOW Requirement
5.16.2-08 (new)	The Contractor shall provide maintenance and operations support for all outcome realization associated processes, improvements or enhancements, and innovations.
5.16.2-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Outcome Realization activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.16.2-10 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Outcome Realization innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.16.2-11 (new)	The Contractor shall coordinate with the State to identify and track outcome realization key performance indicators (KPI) over the term of the contract in the State desired format.
5.16.2-12 (new)	The Contractor shall enhance outcome realization, utilizing the Contractor Data Analytics team to investigate and extract from the project's data warehouse and change management processes, to inform process changes to improve state return on its investment.
5.16.2-13 (new)	The Contractor shall integrate the data analytic techniques of Insight, Hindsight, Predictive Analysis and Foresight, ensuring they inform, at a minimum, the following CalHEERS Processes: • Usability Research Services Process • Strategic Planning & 24 Month Roadmap Processes • Prioritization Processes
5.16.2-14 (new)	The Contractor shall ensure the outcome realization processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.16.2-15 (new)	The Contractor shall ensure the outcome realization processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.17 CONSUMER JOURNEY & EXPERIENCE INNOVATIONS

5.17.1 Self-Service Consumer Journey & Experience Innovations

Table 5-27: Self-Service Consumer Journey & Experience Innovations Planning

Req #	SOW Requirement
5.17.1-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all existing Self-Service Consumer Innovation activities on CalHEERS, including, but not limited to Consumer Journey, experience, and management of data in SOW 5.2.1 CONSUMER EXPERIENCE SUPPORT.
5.17.1-02 (new)	The Contractor shall develop, update, deliver, and maintain a Self-Service Consumer Innovation Plan, that details out the processes for conducting assessments, reporting assessment results, alignment with sponsor strategic plans, and identification of recommendations for self-service consumer improvements, enhancements or innovations, including but not limited to: • Consumer Journey, including but not limited to: - o Possible and recommended boundaries with a focus on outcome realization - o Consumer Journey Framework, tools, processes, strategies and techniques - o Vision, standards, goals, and desired outcomes - o Measurement details, including metrics ,dashboards, and reporting • Consumer Experience, including but not limited to: - o Experience Framework, tools, processes, strategies and techniques - o A/B Testing - o Web Accessibility Standards - o Surveys and interviews - o Monitoring customer feedback and reviews - o Customer interactions - o Tracking customer retention and churn rates - o Experience Level Agreements - o Any additional metrics captured by the project - o Dashboards and reporting - o Impact Assessment • Consumer 360, including but not limited to: - o Data collection and data management strategies - o Data source connections - o Data quality - o Data standardization - o Data security and privacy - o Data governance - o Unified data view • Service Center Services
5.17.1-03 (new)	The Contractor shall develop, deliver and maintain Self-Service Consumer Innovation Assessment & Recommendations Reports, that provide the Contractor's assessment, findings, and Contractor recommended improvements or enhancements (for State consideration), for Consumer Innovation related topics, including but not limited to: • Consumer Journey, including recommended boundaries • Consumer Experience • Consumer 360 • Service Center Services

Req #	SOW Requirement
5.17.1-04 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Self-Service Consumer Innovation Assessment & Recommendations Reports. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.17.1-05 (new)	The Contractor shall implement any self-service consumer associated improvements, enhancements, and innovations approved by the State Project Director or designee.
5.17.1-06 (new)	The contractor shall implement self-service consumer associated improvements or enhancements, and innovations via the existing CalHEERS change management processes.

Table 5-28: Self-Service Consumer Journey & Experience Innovations Support

Req #	SOW Requirement
5.17.1-07 (new)	The Contractor shall provide <u>maintenance</u> , and operations support for all self-service consumer associated processes, improvements or enhancements, and innovations.
5.17.1-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any self-service consumer associated activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.17.1-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any self-service consumer associated innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.17.1-10 (new)	The Contractor shall ensure that self-service consumer innovation processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.17.1-11 (new)	The Contractor shall ensure that all implemented self-service consumer innovation processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.17.2 Assisted Consumer Journey & Experience Innovations

Table 5-29: Assisted Consumer Journey & Experience Innovations Planning

Req #	SOW Requirement
5.17.2-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all existing Agent (an individual who assists a consumer with a Medi-Cal or Covered California application, examples include call center representatives, community health navigators, community non-profit organizations, authorized representatives, licensed insurance agents) assisted innovation activities on CalHEERS SOW 5.2.1 CONSUMER EXPERIENCE SUPPRT.

Req #	SOW Requirement
5.17.2-02 (new)	The Contractor shall develop, update, deliver, and maintain an Assisted Consumer Innovation Plan, that details out the processes for conducting assessments, reporting assessment results, alignment with sponsor strategic plans, and identification of recommended assisted consumer innovation improvements or enhancements of the following existing CalHEERS agent related topics, including but not limited to: - Assisted Consumer Journey, including but not limited to: - Journey Framework, tools, processes, strategies and techniques - Vision, standards, goals, and desired outcomes - Measurement details, including metrics ,dashboards, and reporting - Assisted Consumer Experience, including but not limited to: - Experience Framework, tools, processes, strategies and techniques - A/B Testing - Web Accessibility Standards - Surveys and interviews - Monitoring agent feedback and reviews - Agent interactions - Tracking customer retention and churn rates - Experience Level Agreements - Any additional metrics captured by the project - Dashboards and reporting - Assisted Consumer 360, including but not limited to: - Data collection and data management strategies - Data source connections - Data quality - Data standardization - Data security and privacy - Data governance - Unified data view
5.17.2-03 (new)	The Contractor shall develop, deliver and maintain Assisted Consumer Innovation Assessment & Recommendation Reports, that provide the Contractor's assessment, findings, and Contractor recommended improvements or enhancements (for State consideration), for assisted consumer innovation related topics, including but not limited to: - Agent Journey - Agent Experience - Agent 360
5.17.2-04 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Assisted Consumer Innovation Assessment & Recommendation Reports. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.17.2-05 (new)	The Contractor shall implement any Assisted Consumer associated improvements, enhancements, and innovations approved by the State Project Director or designee.
5.17.2-06 (new)	The contractor shall implement Assisted Consumer associated improvements or enhancements, and innovations via the existing CalHEERS Change Management processes.

Table 5-30: Assisted Consumer Journey & Experience Innovations Support

Req #	SOW Requirement
5.17.2-07 (new)	The Contractor shall provide maintenance and operations support for all Assisted Consumer associated processes, improvements or enhancements, and innovations.

Req #	SOW Requirement
5.17.2-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Assisted Consumer associated activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.17.2-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Assisted Consumer associated innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.17.2-10 (new)	The Contractor shall ensure that Assisted Consumer innovation processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.17.2-11 (new)	The Contractor shall ensure that all implemented Assisted Consumer innovation processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.17.3 Consumer Feedback Collection Solution Innovations

Table 5-31: Consumer Feedback Collection Solution Innovations Planning

Req #	SOW Requirement
5.17.3-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all consumer feedback and insight activities, services and functionality utilized on CalHEERS, as defined within CD-3.10-1 Quality Management Plan deliverable.
5.17.3-02 (new)	The Contractor shall develop, update, deliver, and maintain a Consumer Feedback Collection Solution Innovation Assessment & Recommendation Report, that provides the Contractor's assessment, findings, and Contractor recommended improvements or innovations associated with consumer feedback collection solution functionality and services (for State consideration), including, but not limited to, the following: • Inputs from assessing the CalHEERS consumer feedback • Assessment of any existing code or functionality already implemented in the system, whether in use or not • Proposed approach to implement consumer feedback or insights via recommended or existing methods (e.g., surveys or A/B Testing), whether via updating and reinstituting existing code/functionality or via implementing an all-new solution • Recommended improvements or enhancements to consumer feedback functionality • Additional staffing or skillsets needed to support the consumer feedback functionality or services • Schedule for reinstituting or implementing consumer feedback, and any improvements or enhancements, or innovations

Req #	SOW Requirement
	- Approach to integration of consumer feedback functionality with the consumer and assisted consumer journey and experience services - Key performance indicators (KPI) and qualitative measurements to track consumer feedback improvement or enhancement, or innovation implementation progress - Reporting - Planned and actual State return on investment (ROI) tracking
5.17.3-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Consumer Feedback Collection Solution Innovation Assessment & Recommendations Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.17.3-04 (new)	The Contractor shall implement any consumer feedback functionality, improvements, enhancements, and innovations approved by the State Project Director or designee.

Table 5-32: Consumer Feedback Collection Solution Innovations Support

Req #	SOW Requirement
5.17.3-05 (new)	The Contractor shall provide maintenance and operations support for the Consumer Feedback Collection services or functionality on CalHEERS, including improvements or enhancements, and innovations.
5.17.3-06 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Consumer Feedback Collection activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.17.3-07 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Consumer Feedback Solution Innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.17.3-08 (new)	The Contractor shall ensure that all Consumer Feedback Solution processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: - Project management - Schedule management - Cost management, including cost estimation - Staffing management - Communications management - Quality management - Strategic planning & strategic roadmap - Organizational change management - Change management - Program Support - Operations - Document management
5.17.3-09 (new)	The Contractor shall ensure the consumer feedback processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.17.4 Choice Architecture & Nudging Innovations

Table 5-33: Choice Architecture & Nudging Innovations Planning

Req #	SOW Requirement
5.17.4-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all existing Choice Architecture and Choice Architecture Innovation activities on CalHEERS.
5.17.4-02 (new)	The Contractor shall develop, deliver, and maintain a Choice Architecture Innovation Assessment & Recommendation Report, that provides the Contractor's assessment, findings, and Contractor recommended improvements or enhancements associated with Choice Architecture (for State consideration), including, but not limited to, the following: • Inputs from assessing the existing choice architecture of CalHEERS, including: - o Defaults - o Framing - o Salience - o Progress indicators - o Social proof • Inputs from assessing the existing nudging functionality, including: - o Opt-in/opt-out - o Commitment devices - o Feedback loops - o Gamification • Approach to providing choice architecture innovations, including but not limited to: - o Additional staffing needs for Choice Architecture Innovations - o Contractor Choice Architecture Innovation recommendations, including but not limited to: ▪ Defaults ▪ Framing ▪ Salience ▪ Progress Indicators ▪ Social Proof - o Contractor Nudging Innovations recommendations, including but not limited to: ▪ Opt-in/opt-out ▪ Commitment devices ▪ Feedback loops ▪ Gamification - o Schedule for innovation implementations - o Identification and tracking of Choice Architecture metrics pre/post innovation implementation - o Key performance indicators (KPI) and qualitative measurements to track choice architecture innovation progress - o Reporting - o Planned and actual State return on investment (ROI) tracking
5.17.4-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Choice Architecture Innovation Assessment & Recommendation Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.17.4-04 (new)	The Contractor shall implement any choice architecture improvements, enhancements, and innovations approved by the State Project Director or designee.
5.17.4-05 (new)	The contractor shall implement choice architecture improvements or enhancements, and innovations via the existing CalHEERS Change Management processes.

Table 5-34: Choice Architecture & Nudging Innovations Support

Req #	SOW Requirement
5.17.4-06 (new)	The Contractor shall provide maintenance and operations support for all choice architecture processes, improvements or enhancements, and innovations.
5.17.4-07 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any choice architecture activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.17.4-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any choice architecture innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.17.4-09 (new)	The Contractor shall coordinate with the State to identify and track Choice Architecture Innovation key performance indicators (KPI) over the term of the contract in the State desired format.
5.17.4-10 (new)	The Contractor shall ensure the Choice Architecture Innovation processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.17.4-11 (new)	The Contractor shall ensure the Choice Architecture Innovation processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.18 ARTIFICIAL INTELLIGENCE INNOVATIONS

5.18.1 Enhancing AI on the Project

Table 5-35: Enhancing AI on the Project Planning

Req #	SOW Requirement
5.18.1-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all Artificial Intelligence (AI) solutions utilized on CalHEERS, including but not limited to the following, and as defined within CD-3.12-1 Enterprise Tools and CD-6.14-1 Hardware and Software Inventory Management Plan deliverables and SOW 5 Section 5.4.1, BOT SERVICES SUPPORT: • Predictive AI Ops (utilizing Dynatrace) • Security Operations (utilizing Google Chronicle) • Intelligence Document Processing (IDP) (utilizing Google AI)
5.18.1-02 (new)	The Contractor shall provide a dedicated AI/GenAI Technical Lead to manage and support all AI Activities on CalHEERS.

Req #	SOW Requirement
5.18.1-03 (new)	The Contractor shall develop, update, deliver, and maintain a CalHEERS AI Innovation Plan, that details out the processes for conducting an assessment, reporting assessment results, and identification of recommended AI improvements or innovations for the CalHEERS AI environment, assessing the environment for, but not limited to: • Data accuracy • Solution accuracy and efficiency • Cost savings • Resource optimization • Improved decision-making and risk management • Scalability and adaptability • Legal, ethical, and security considerations • Speed of deployment and content updates
5.18.1-04 (new)	The Contractor shall produce and maintain a CalHEERS AI Innovation Assessment & Recommendations Report that documents the Contractor's analysis, findings, and recommendations for improvement or enhancement to the CalHEERS AI environment for State consideration.
5.18.1-05 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the CalHEERS AI Innovation Assessment & Recommendations Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.18.1-06 (new)	The Contractor shall implement any AI improvements, enhancements, and innovations approved by the State Project Director or designee.

Table 5-36: Enhancing AI on the Project Support

Req #	SOW Requirement
5.18.1-07 (new)	The Contractor shall provide maintenance and operations support for all AI on CalHEERS, including improvements, enhancements, and innovations.
5.18.1-08 (new)	The Contractor shall populate and provide to the State, for review and approval, the CalHEERS Artificial Intelligence Risk Assessment Form whenever a proposed solution includes an AI component.
5.18.1-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any AI activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.18.1-10 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any AI Innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.18.1-11 (new)	The Contractor shall ensure compliance with any current or future Federal or State law, policy, and guideline pertaining to the development, implementation, and operation of AI Solutions (e.g., California Executive Order N-12-23) and ensure the solutions operate in an ethical, transparent, and trustworthy way.
5.18.1-12 (new)	The Contractor shall represent and warrant that the CalHEERS AI products/services do not create unlawful bias.
5.18.1-13 (new)	The Contractor shall ensure the State maintains complete ownership of all AI solutions (including any third-party technology), all inputs and outputs (including any work product or deliverable created from that output), all training data, and any prompts.
5.18.1-14 (new)	The Contractor shall represent and warrant that the Contractor has the right to use any third-party technology that exists in through a license and shall comply with all use restrictions under that license, and that the products/services will not misappropriate, violate, or infringe any third-party IP rights.

Req #	SOW Requirement
5.18.1-15 (new)	The Contractor shall ensure that all Artificial Intelligence Innovation processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.18.1-16 (new)	The Contractor shall ensure the Artificial Intelligence Innovation processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.18.2 Implementing GenAI on the Project

Table 5-37: Implementing GenAI on the Project Planning

Req #	SOW Requirement
5.18.2-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all existing Generative Artificial Intelligence (GenAI) Services, solutions, and any related Innovation activities on CalHEERS
5.18.2-02 (new)	The Contractor shall develop, deliver, and maintain a GenAI Innovation Assessment & Recommendation Report, that provides the Contractor's assessment, findings, and Contractor recommended improvements or enhancements and innovations associated with GenAI (for State consideration), including but not limited to the following: • Inputs from assessing the existing GenAI solutions of CalHEERS, including: - o Data Accuracy - o Integration requirements - o Data security measures - o Explanation and source attributions - o Solution Accuracy and reliability - o Resource optimization - o Domain-specific understanding - o Scalability and adaptability - o Legal, ethical, and security considerations - o Speed of deployment and content updates - o Required effort to maintain - o Cost Savings • Approach to providing GenAI innovations, including but not limited to: - o Additional staffing needs for GenAI Innovations - o Contractor GenAI Innovation recommendations, including but not limited to: ▪ Content Generations ▪ Chatbots ▪ Data Analysis ▪ Explanations and Tutoring ▪ Personalized Content ▪ Search and recommendation

Req #	SOW Requirement
	▪ Software code generation ▪ Infrastructure support (e.g. predictive maintenance, incident response, resource optimization, cost optimization, anomaly detection, issue detection and automated response) - o Schedule for innovation implementations - o Identification and tracking of GenAI metrics pre/post innovation implementation - o Key performance indicators (KPI) and qualitative measurements to track GenAI innovation progress - o Reporting - o Planned and actual State return on investment (ROI) tracking
5.18.2-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the GenAI Innovation Assessment & Recommendation Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or Designee.
5.18.2-04 (new)	The Contractor shall implement any GenAI improvements, enhancements, and innovations approved by the State Project Director or designee.
5.18.2-05 (new)	The contractor shall implement GenAI improvements or enhancements, and innovations via the existing CalHEERS Change Management processes.

Table 5-38: Implementing GenAI on the Project Support

Req #	SOW Requirement
5.18.2-06 (new)	The Contractor shall provide maintenance and operations support for all GenAI processes, improvements or enhancements, and innovations.
5.18.2-07 (new)	The Contractor shall populate and provide to the State, for review and approval, the CalHEERS Artificial Intelligence Risk Assessment Form whenever a proposed solution includes a GenAI component.
5.18.2-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any GenAI activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.18.2-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any GenAI innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.18.2-10 (new)	The Contractor shall ensure compliance with any current or future Federal or State law, policy, and guideline pertaining to the development, implementation, and operation of AI Solutions (e.g., California Executive Order N-12-23) and ensure the solutions operate in an ethical, transparent, and trustworthy way.
5.18.2-11 (new)	The Contractor shall represent and warrant that the GenAI products/services do not create unlawful bias.
5.18.2-12 (new)	The Contractor shall ensure the State maintains complete ownership of all GenAI solutions (including any third-party technology), all inputs and outputs (including any work product or deliverable created from that output), all training data, and any prompts.
5.18.2-13 (new)	The Contractor shall represent and warrant that the Contractor has the right to use any third-party technology used in a CalHEERS GenAI solution, via providing a copy of the license, and shall comply with all use restrictions under that license, and that the products/services will not misappropriate, violate, or infringe any third-party IP rights.

Req #	SOW Requirement
5.18.2-14 (new)	The Contractor shall ensure the GenAI processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management • Consumer Journey
5.18.2-15 (new)	The Contractor shall ensure the GenAI processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.19 ORGANIZATIONAL INNOVATIONS

5.19.1 Multi-Sponsor Design Strategy

Table 5-39: Multi-Sponsor Design Strategy Planning

Req #	SOW Requirement
5.19.1-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all multi-sponsor design strategy services, including any innovation activities on CalHEERS.
5.19.1-02 (new)	The Contractor shall develop, deliver, and maintain a Multi-sponsor Design Strategy Innovation Assessment & Recommendations Report, that provides the Contractor's assessment, findings, and Contractor recommended improvements or innovations associated with the CalHEERS design strategy (for State consideration), including, but not limited to, the following: • Inputs considered pertaining to the implementation of a multi-sponsor design strategy • Assessment results that address, the following, but not limited to: - o Sponsor design expectations - o Benefits of implementing a multi-sponsor design strategy, including: ▪ Shared cost effectiveness ▪ Increased (shared) marketing budget ▪ Marketing synergy ▪ Increased return on investment (ROI) from marketing collaboration ▪ A seamless and consistent consumer experience - o Metrics to monitor and measure success
5.19.1-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the multi-sponsor design strategy Innovation Assessment & Recommendations Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or designee.

Req #	SOW Requirement
5.19.1-04 (new)	The Contractor shall develop, update, deliver, and maintain a Multi-sponsor Design Strategy Implementation Plan, that details out the processes for conducting an assessment, reporting assessment results, and an implementation approach for the Multi-sponsor Design Strategy, including but not limited to the following: • Defined design goals of each participating sponsor • Proposed implementation approach for the multi-sponsor design strategy • Defined design conflict resolution process • Multi-sponsor design communication processes • Additional staffing needs to support the multi-sponsor design strategy activities • Schedule for implementing the multi-sponsor design strategy • Key performance indicators (KPI) and qualitative measurements to track multi-sponsor design strategy progress • Reporting • Planned and actual State return on investment (ROI) tracking
5.19.1-05 (new)	The Contractor shall implement any multi-sponsor design strategy improvements, enhancements, and innovations approved by the State Project Director or designee.
5.19.1-06 (new)	The contractor shall implement multi-sponsor design strategy improvements, enhancements, and innovations via the existing CalHEERS Change Management processes.

Table 5-40: Multi-Sponsor Design Strategy Support

Req #	SOW Requirement
5.19.1-07 (new)	The Contractor shall provide maintenance and operations support for all multi-sponsor design strategy processes, improvements or enhancements, and innovations.
5.19.1-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any multi-sponsor design strategy activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.19.1-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any multi-sponsor design strategy innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.19.1-10 (new)	The Contractor shall coordinate with the State to identify and track multi-sponsor design strategy Innovation key performance indicators (KPI) over the term of the contract in the State desired format.
5.19.1-11 (new)	The Contractor shall ensure the multi-sponsor design strategy processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations Document management
5.19.1-12 (new)	The Contractor shall ensure the multi-sponsor design strategy processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.19.2 Project to Product Management

Table 5-41: Project to Product Management Planning

Req #	SOW Requirement
5.19.2-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute any existing project-to-product management process, activity, or innovation on CalHEERS.
5.19.2-02 (new)	The Contractor shall produce and maintain a Project-to-Product Management Innovation Analysis & Recommendations Report that documents the Contractor's understanding of the CalHEERS mission, culture, goals, needed staffing skillsets, and end user needs, and detail out the assessment process, assessment results, recommended as-is and to-be organizational charts, and suggested improvement opportunities with State associated disposition.
5.19.2-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Project-to-Product Management Innovation Assessment & Recommendation Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or designee.
5.19.2-04 (new)	The Contractor shall develop, update, deliver, and maintain a CalHEERS Project-to-Product Management Innovation Plan, that includes inputs from the associated analysis and recommendation report and details out the process for implementing the State approved recommended project-to-product management innovations for CalHEERS, including but not limited to the following: • Define the CalHEERS product vision • Define user needs • Proposed staffing re-organization • Recommended development methodology • Proposed reprioritization of product features based on value to end users • Prosci OCM process for educating the project and sponsors on the project-to-product management innovation(s) • OCM process for implementing project-to-product management innovation(s) • Proposed key performance indicators for tracking the project-to-product management innovation progress • Continual improvement/feedback process loop
5.19.2-05 (new)	The Contractor shall implement any project-to-product management improvements, enhancements, and innovations approved by the State Project Director or designee.
5.19.2-06 (new)	The contractor shall, when applicable, implement project-to-product management improvements or enhancements, and innovations via the existing CalHEERS Change Management processes.

Table 5-42: Project to Product Management Support

Req #	SOW Requirement
5.19.2-07 (new)	The Contractor shall provide maintenance and operations support for all project-to-product management processes, improvements or enhancements, and innovations.
5.19.2-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any project-to-product management activity, service, improvements, or enhancements, coordinating with the State to provide the necessary onboarding.
5.19.2-09 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any project-to-product management innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.19.2-10 (new)	The Contractor shall coordinate with the State to identify and track project-to product management innovation goals, success criteria, and key performance indicators (KPI) over the term of the contract in the State desired format.

Req #	SOW Requirement
5.19.2-11 (new)	The Contractor shall coordinate project-to-product management innovation activities with the Contractor OCM team, to ensure seamless planning and execution of OCM related activities, including education, training, and execution of project-to-product management innovation initiatives.
5.19.2-12 (new)	The Contractor shall ensure the project-to-product management processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.19.2-13 (new)	The Contractor shall ensure the project-to-product management processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

5.20 SECURITY INNOVATIONS

5.20.1 Security Innovations

Table 5-43: Security Innovations Planning

Req #	SOW Requirement
5.20.1-01 (new)	The Contractor shall takeover, staff, manage, enhance, lead, and execute all Security Services, solutions, and any related Innovation activities on CalHEERS.
5.20.1-02 (new)	The Contractor shall develop, deliver, and maintain a Security Innovation Assessment & Recommendation Report, that provides the Contractor's assessment, findings, and Contractor recommended improvements or enhancements and innovations associated with security (for State consideration), including but not limited to the following: • Contractor assessment process • Inputs from assessing the existing CalHEERS' security environment, including, but not limited to: - o Threat analysis - o Vulnerability assessment - o Access control assessment - o Network security review - o Data protection assessment - o Application security analysis - o Incident response plan evaluation - o Compliance assessment - o Third-party vendor management • Approach for providing the recommended Security Innovations, including but not limited to: - o Additional staffing needs for security services and security innovations - o Contractor security Innovation recommendations to improve CalHEERS' security posture and reduce risk of cyberattack via:

Req #	SOW Requirement
	▪ Advanced threat detection ▪ Real-time Monitoring ▪ Automated incident response ▪ Reduced False Positives ▪ Predictive Analytics ▪ User Behavior Analysis ▪ Vulnerability Assessment - o Contractor security Innovation recommendations to improve CalHEERS' security availability risk reduction via: ▪ Procedures for point-in-time recovery to a cloud host region other than the region hosting Production Environment ▪ Procedures for establishing interface connections to a recovered instance of Production Environment in a cloud host region other than the region normally hosting the Production Environment - o Schedule for security innovation implementations - o Identification and tracking of security innovation metrics pre/post innovation implementation - o Key performance indicators (KPI) and qualitative measurements to track security innovation progress - o Reporting - o Planned and actual State return on investment (ROI) tracking
5.20.1-03 (new)	The Contractor shall develop, maintain and facilitate presentations (e.g., PowerPoint presentations conveyed in either digital meetings or physical conference rooms) that accompany the Security Innovation Assessment & Recommendation Report. The presentations shall be developed for, and provided to, CalHEERS State and Contractor staff, project sponsors, as well as any other attendees approved by the State Project Director or designee.
5.20.1-04 (new)	The Contractor shall implement any security improvements, enhancements, and innovations approved by the State Project Director or designee.
5.20.1-05 (new)	The contractor shall implement security improvements or enhancements, and innovations via the existing CalHEERS Change Management processes.

Table 5-44: Security Innovations Support

Req #	SOW Requirement
5.20.1-06 (new)	The Contractor shall provide maintenance and operations support for all security processes, improvements or enhancements, and innovations.
5.20.1-07 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Security Innovation activity, service, improvements or enhancements, coordinating with the State to provide the necessary onboarding.
5.20.1-08 (new)	The Contractor shall provide any additional staff and skillsets necessary to successfully conduct any Security Innovations, coordinating with the State to provide the necessary onboarding and rate card information (if applicable).
5.20.1-09 (new)	The Contractor shall coordinate with the State to identify and track security Innovation key performance indicators (KPI) over the term of the contract in the State desired format.
5.20.1-10 (new)	The Contractor shall ensure compliance with all current or future Federal or State law, policy, and guidelines and security standards applicable to CalHEERS.
5.20.1-11 (new)	The Contractor shall represent and warrant that the AI security products/services do not create unlawful bias. (See Appendix A-1, GENERAL PROVISIONS, <u>Section-Paragraph 28 – INDEMNIFICATION</u>).
5.20.1-12 (new)	The Contractor shall ensure the State maintains complete ownership of all CalHEERS AI security solutions (including any third-party technology), all inputs and outputs (including any work product or deliverable created from that output), all training data, and any prompts.

Req #	SOW Requirement
5.20.1-13 (new)	The Contractor shall represent and warrant that the Contractor has the right to use any third-party technology used in CalHEERS' Security solutions, via providing a copy of the license, and shall comply with all use restrictions under that license, and that the products/services will not misappropriate, violate, or infringe any third-party IP rights.
5.20.1-14 (new)	The Contractor shall ensure the Security processes, improvements or enhancements, and innovations integrate into all applicable areas of the CalHEERS Project, as identified by the State, including but not limited to: • Project management • Schedule management • Cost management, including cost estimation • Staffing management • Communications management • Quality management • Strategic planning & strategic roadmap • Organizational change management • Change management • Program Support • Operations • Document management
5.20.1-15 (new)	The Contractor shall ensure the Security processes, improvements or enhancements, and innovations get updated into all applicable Project Deliverables and/or Artifacts, as agreed to by the State.

TABLE OF FIGURES

Figure 6-1: Technology Refresh Interactions..... 35

Figure 6-2: Technology Refresh versus System Enhancement..... 36

6 OPERATIONS REQUIREMENTS

The Contractor is responsible for the California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS) Operations, to include planning, execution, batch processing, transaction processing, interface support, coding, defect correction, reconciliation, reporting, performance monitoring, capacity planning and sizing, technology recovery, development and delivery of Operational Deliverables, upgrades, and evaluating and resolving Operational issues.

Please note that this section of the Sstatement of wWork (SOW) references multiple sets of standards, which are subject to change over time. Please refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

6.1 OPERATIONS PLANNING AND MANAGEMENT

The Contractor is responsible for providing Services to support the daily Operation and administration of the CalHEERS Project and the execution of the Operations Plan. The Contractor is responsible for making sure that scheduled System Operations are performed effectively and efficiently to meet the CalHEERS business and technical requirements, and System service levels.

6.1.1 Operations Plan

The Operations Plan addresses the operations for all CalHEERS components ranging from the operating system to the transaction batch jobs. The Operations Plan coordinates all of the plans required to support ongoing Operations such as the CalHEERS data management, network, and System Security Plans.

Table 6-1: Operations Plan (CD-6.1-1)

Req #	SOW Requirement
6.1.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.1-1 - Operations Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Introduction 3.2 Approach and Update Methodology 3.3 Operations Tools 3.4 Standard Operating Procedures 3.5 Operations Deliverables Hierarchy and DEL Update Schedule 4. GLOSSARY AND ACRONYMS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARDS MAPPING
6.1.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.1.1-03 (modified)	The Operations Manual shall be prepared in accordance with current standards. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee: 1. ISO/IEC/IEEE 16326 - Systems and Software Engineering - Life Cycle Processes -Project Management (5.7 - Product Delivery, 5.8.5.1 - Documentation, 5.9 – Additional Plans) 2. ISO/IEC/IEEE 15289 - Systems and Software Engineering - Content of life-cycle information items (documentation) (10.15 - Concept of Operations, 10.44 – Maintenance Plan, 10.45 - Maintenance Procedure, 10.48 - Operational test procedure) pertaining to Operations Management.
6.1.1-04 (new)	The State identifies and associates the following artifacts to the Operations Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this Deliverable including, but not limited to: • Enrollment Microservices developer guide • How to Log Time in JIRA • Infrastructure Advisory Committee Process • Joint Application Design Guidelines

Req #	SOW Requirement
	• Navigating Sunflower Process Guide • Operations Manual Frequently Asked Questions • Run a Workload Test • Technology Recovery Plan Results • SOPTracker
6.1.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.1.1-06 (new)	The Contractor shall update the Operations Plan in include a section on Technology Refresh Management. This section shall be incorporated into the existing Operations Plan to describe the approach, strategy, and methodology used to oversee, plan for, and execute Technology Refresh activities in a repeatable and strategic manner. The section shall also include the relationship and interactions with the Technology Refresh Plan, Technology Refresh Assessment Report, as well as the relationship to the CR Process, to make interactions consistent, streamlined, and compatible with one another.
6.1.1-07 (new)	The Contractor shall update the following appendices and attach them to the Operations Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.1.2 Operations Planning and Management Execution

Table 6-2: Operations Planning and Management Execution

Req #	SOW Requirement
6.1.2-01 (new)	The Contractor shall staff, manage, lead and execute Operations on CalHEERS as defined in this statement of work and in accordance with the Operations Plan.
6.1.2-02 (new)	The Contractor shall develop, administer, update, patch, support, and spin up and down environments as needed, for growth, including change requests, or ad hoc additional environments as directed by the State. Environments can require varying combinations of CPU, memory, storage, networking capacity, and other customizations as required to support the purpose of the environment as directed by the State.
6.1.2-03 (new)	The Contractor shall request approval and notify the Enterprise Infrastructure Chief or designee in the event any State-accessed environment will be temporarily or permanently unavailable or decommissioned.
6.1.2-04 (modified)	The Contractor shall maintain the daily operation and administration of the CalHEERS technical solution, services, applications, and supporting functionality, including but not limited to: 1. Database, operating system, middleware, and other supporting Software 2. Forms and reporting architecture, in coordination with the State and counties 3. All CalHEERS environments, Production, Non-Production, and other supporting environments 4. CalHEERS Real-time and Batch Processing for processing of internal and external interfaces 5. Print-Mail Services
6.1.2-05 (existing)	The Contractor shall perform the responsibilities related to: 1. CalHEERS Operations 2. Technical support 3. Helpdesk and Service ticket processing 4. Maintenance 5. Troubleshooting and repair 6. Release management and testing
6.1.2-06 (existing)	The Contractor shall adopt, enhance and maintain, and execute processes and procedures for all tasks in CalHEERS Operation environments in accordance with the Operations Plan and Operations Manual.
6.1.2-07 (existing)	The Contractor shall adopt, enhance, maintain and execute processes and techniques for Operations management in accordance with the Operations Plan.
6.1.2-08 (existing)	The Contractor shall manage, facilitate, and coordinate the CalHEERS System Design, Maintenance and Operations (SDMO) activities with State-contracted service providers, as directed by the State Project Director or designee.
6.1.2-09 (existing)	The Contractor shall manage, facilitate and coordinate the CalHEERS SDMO issue identification and resolution activities with State-contracted service providers as directed by the State Project Director or designee.
6.1.2-10 (modified)	The Contractor shall manage, facilitate, coordinate, and provide Provider Directory Services as directed by the State.
6.1.2-11 (new)	The Contractor shall create and provide test data at any time for the CalHEERS environments as requested by State.
6.1.2-12 (new)	The Contractor shall implement all changes to the System that improve the Contractor's ability to meet SLAs via no cost change requests.
6.1.2-13 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.2 OPERATIONS MANUAL

The Operations Manual includes detailed processes and procedures describing how the CalHEERS operational environment is managed and supported on a daily basis. The support requirements encompass all facilities, Services and environments associated with the CalHEERS Project, including interface points, information/data flow, and personnel responsibilities.

6.2.1 Operations Manual Requirements

Table 6-3: Operations Manual (CD-6.2-1)

Req #	SOW Requirement
6.2.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CD-6.2-1 - Operations Manual, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH AND METHODOLOGY 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. 6.2.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.2.1-05 (new)	The Contractor shall update the following appendices and attach them to the Operations Manual: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: - SOW Requirement ID # - SOW Requirement Text - Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) - Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts

Req #	SOW Requirement
	Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.2.2 Operations Manual Execution

Table 6-4: Operations Manual Execution

Req #	SOW Requirement
6.2.2-01 (new)	The Contractor shall staff, manage, lead and execute Operations activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-6.2-1 – Operations Manual.
6.2.2-02 (modified)	The Contractor shall adopt, enhance, maintain, and execute all Service Desk Services identified within the Operations Manual.
6.2.2-03 (modified)	The Contractor shall provide toll-free telephone connectivity to the Service Desk for Covered California, DHCS, and CalHEERS Project staff and users as directed by the State.
6.2.2-04 (existing)	The Contractor shall provide for, at a minimum, 1,000 concurrent users for the automated Service Desk management Tool.
6.2.2-05 (new)	The Contractor shall develop, deliver, and maintain detailed Standard Operating Procedures (SOPs) for all processes for which the State requests, including existing and newly-developed, as part of a CR, processes. The procedures shall be stored in a version control tool in a user-friendly, uniform, and easily accessible way. The required SOPs are those currently available, with the addition of the following: 1. Procedures with respect to all efforts for maintaining external partner interfaces 2. Procedures for regular testing and updating of external links within CalHEERS 3. Procedures for Service Center operations
6.2.2-06 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.2.3 Operations Planning and Management Miscellaneous Deliverables and Processes

The following, in tandem with the CalHEERS Operations Manual are associated work products, deliverables and processes that provide direction and auditability for the CalHEERS components Operations. The contents and services included in each of these plans are governed by the Change Advisory Board (CAB).

6.2.3.1 Technical Change Management Plan

Table 6-5: Technical Change Management Plan (CD-6.2-2)

Req #	SOW Requirement
6.2.3-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain a CD-6.2-2 - Technical Change Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. STEP-BY-STEP PROCEDURAL DOCUMENTS 11. GLOSSARY AND ACRONYMS 11.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.2.3-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.2.3-03 (existing)	The Contractor shall provide written explanation, cause, resolution, and timeframe for the correction of any and all audit discrepancies.

Req #	SOW Requirement
6.2.3-04 (new)	The State identifies and associates the following artifacts to the Technical Change Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • CalHEERS Change Management - Change Advisory Board (CAB) • CalHEERS Change Management - Create Emergency Change • CalHEERS Change Management - Create Normal Change • CalHEERS Change Management - Create Standard Change • CalHEERS Change Management - Create a Standard Change Template • CalHEERS Change Management - Creating Change Tasks • CalHEERS Change Management - Determining Which Change Path to Use. (Emergency, Normal, or Standard) • CalHEERS Change Management - Requesting an Extension • CalHEERS Change Management - Walk-On Procedure • CalHEERS Knowledge - Change Deployment Time Audit • CalHEERS Knowledge - Closed Changes Status Report • CalHEERS Knowledge - Implementation of Technical Change Requests • Create Splunk Support Ticket • Create a New Comprehensive Change • Create a New Emergency Change • Create a New Master Ticket • Create a New Routine Change • DOC 2 Template – CAB Meeting Agenda • DOC 3 Template – CAB Meeting Minutes • DOC 4 Template – CAB Freeze Meeting Agenda • DOC 5 Template – CAB Freeze Meeting Minutes • Daily RUEI Performance Reports • How to Establish a Technical Change Freeze • How to Submit a HWSW Request • How to create Service Test • SOP CCA DW Changes via CAB Process • SOP Service Center Changes via CAB Process • Update Deployment with SCCM
6.2.3-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.2.3-06 (new)	The Contractor shall update the following appendices and attach them to the Technical Change Management Plan: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s)

Req #	SOW Requirement
	3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.2.3.2 Technical Change Management Execution

Table 6-6: Technical Change Management Execution

Req #	SOW Requirement
6.2.3-07 (new)	The Contractor shall staff, manage, lead and execute all technical change management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.2-2 – Technical Change Management Plan.
6.2.3-08 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.2.3.3 Network Management Plan

Table 6-7: Network Management Plan (CD-6.2-3)

Req #	SOW Requirement
6.2.3-09 (new)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.2-3 - Network Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. 6.2.3-12 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.2.3-13 (new)	The Contractor shall update the following appendices and attach them to the Network Management Plan: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: - SOW Requirement ID # - SOW Requirement Text - Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) - Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance Appendix 3–Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: - Artifact Name - Associated Parent DEL - State Approver - SI Point of Contact - Review Frequency - Submission Frequency - Artifact File Format - Artifact Location (e.g., SharePoint breadcrumb) - Link to artifact

6.2.3.4 Network Management Execution

Table 6-8: Network Management Execution

Req #	SOW Requirement
6.2.3-14 (new)	The Contractor shall staff, manage, lead and execute all network management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.2-3 – Network Management Plan.

Req #	SOW Requirement
6.2.3-15 (existing)	The Contractor shall be responsible to analyze any potential impacts to the enterprise Networks and all associated components due to modifications and/or enhancements to the CalHEERS System, third-party software, interfaces, and State sites and Networks.
6.2.3-16 (existing)	The Contractor shall coordinate and communicate the network management activities with State, interface partners, State sponsor agencies, and third-party vendors (e.g., hosting and telecommunications providers).
6.2.3-17 (existing)	The Contractor shall expose the CalHEERS Services consistent with WS-I web service guidelines and interoperability tests that are based on Service Contract Specification.
6.2.3-18 (existing)	The Contractor shall report its compliance with Section 508 of the Federal Rehabilitation Act and the World Wide Web Consortium (W3C) Web Accessibility Initiative, Section 508, (a)(1)(A).
6.2.3-19 (modified)	The Contractor shall report compliance with web accessibility standards of Section 508 of the Rehabilitation Act, WCAG 2.1, and California Government Code Sections 7405, 11135, and 11546.7 to ensure the online application is accessible to all users, and regulations implementing that act as set forth in Part 1194 of Title 36 of the Federal Code of Regulations.
6.2.3-20 (existing)	The Contractor shall provide real-time access to System jobs and maintenance schedules, submission and processing statistics, and System performance tools for designated staff.
6.2.3-21 (existing)	The CalHEERS Business Processes shall comply with the following business transaction standards as mandated by the Affordable Care Act (ACA) HIPAA Transaction Standards: Adopt HIPAA transaction standards for electronic health care transactions. Electronic Eligibility and Enrollment rules: CalHEERS Electronic Eligibility and Enrollment transactions shall comply with the set of operating rules as described in HIT Policy and Standards as defined at www.healthit.gov .
6.2.3-22 (existing)	The Contractor shall provide Network Engineer Support services for all Network and security Hardware and Software at all Project Worksites, for all Network circuits, including but not limited to: - All Local Area Networks (LAN), Wide Area Networks (WAN), and metropolitan area networks (MAN). - All Virtual Private Networks (VPN) connections - All internet connections - All private (dedicated) circuits - All wireless access points (WAP) - All wireless LAN controllers
6.2.3-23 (existing)	The Contractor shall intake, prioritize, manage, and resolve all Network management issues, which includes Hardware and Software for all firewalls, web application firewalls (WAF), Intrusion Prevention Systems (IPS)/Intrusion Detection Systems (IDS), Security Information and Event Management (SIEM) Systems, switches, routers, wireless LAN controllers, WAP, Print Servers, LTS racks/air conditioner blowers, UPS battery backups (including replacements) and all relevant Network infrastructure Equipment.
6.2.3-24 (existing)	The Contractor Network Security Team shall provide the following Network support services, including, at a minimum: - Conducting, at a minimum, the following security activities: - General Infrastructure security scanning, monitoring and alerting - IDS/IPS scanning, monitoring and alerting - IT Security and Compliance scanning, monitoring and alerting - Cloud Provider security scanning, monitoring and alerting (at every network and subnet layer) - Server security scanning, monitoring and alerting - Anti-Virus and Malware scanning, monitoring and alerting - Network Whitelist scanning, monitoring and alerting - VPN scanning, monitoring and alerting

Req #	SOW Requirement
	i. Maintain a tool (e.g., Qualys) for scanning and reporting, vulnerability management, compliance monitoring, security operations, auditing, compliance and protection for all IT assets. j. Identify and Access Management of (IAM) scanning, monitoring and alerting of all CalHEERS environments, including Multi-Factor authentication (MFA) k. Data Classification scanning, monitoring and alerting of PII, PHI, FTI and relevant confidential data. l. Network capacity monitoring and alerting m. Application performance monitoring and alerting n. Security monitoring and alerting of the entire CalHEERS infrastructure o. Network monitoring and alerting to include all networks (LANs, MANs, WANs, VPNs, Dedicated Circuits, etc.) p. System log (Syslog) monitoring and reporting q. Network Access monitoring, segmentation and alerting r. Email SPAM detection and deletion 2. Management, at a minimum, of the following network security related activities: a. Wi-Fi related accounts, including: usernames, passwords, Role Based Access Control (RBAC) b. Active Directory (AD) / Network accounts, including: usernames, passwords, Domains, Role Based Access Control (RBAC), network segmentation c. Configuration backups of all infrastructure equipment
6.2.3-25 (existing)	The Contractor shall adopt, enhance and maintain, deliver and execute Operations procedures, as specified in the Operations Manual and referenced in the Operations Plan.
6.2.3-26 (existing)	The Contractor shall leverage existing State efforts conducted with identity management with the Department of Motor Vehicles (DMV), the California Employment Development Department, and other partners.
6.2.3-27 (existing)	The Contractor shall make the network management and control System and all resultant Data and reports accessible to State for review and independent analysis within 24 hours of being requested.
6.2.3-28 (new)	The Contractor shall staff, manage, lead and execute all network management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.2-3 – Network Management Plan.
<u>6.2.3-28a (existing)</u>	<u>The Contractor shall ensure that Network management and control System tool is made available to a minimum of three (3) designated members of the State.</u>
<u>6.2.3-28b (modified)</u>	<u>The Contractor shall provide all Equipment and Software necessary to support and maintain a Network management and control system to support all components that is based upon industry standard protocols.</u>
<u>6.2.3-28c (existing)</u>	<u>The Contractor shall provide a network management and control system that is capable of remote monitoring and tuning of each vendor component attached to the Network.</u>
<u>6.2.3-28d (existing)</u>	<u>The Contractor shall provide a Network Management and Control System that either provides advanced monitoring and tuning tools or is capable of interacting with widely used third-party tools for advanced monitoring and tuning of Network components.</u>

6.2.3.5 Capacity Management Plan

The CalHEERS Capacity Management Plan is the overall approach and direction for capacity management of CalHEERS. The Capacity Management Plan is needed to ensure resources are sufficient to meet current and future infrastructure needs of the Project.

Table 6-9: Capacity Management Plan (CD-6.2-4)

Req #	SOW Requirement
6.2.3-29 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CD-6.2-4 - Capacity Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 7. TOOLS 8. CAPACITY MANAGEMENT SUB-PROCESSES 9. CAPACITY MANAGEMENT 9.1 Capacity Planning and Design 9.2 Capacity Trending 9.3 Capacity Bench%ing 9.4 Capacity Forecasting 9.5 Capacity Monitoring 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.2.3-30 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.2.3-31 (existing)	The Capacity Management Plan shall accurately include, but not be limited to: • Approach towards capacity management Methodology that describes the utilization of capacity management mathematical analysis Contractor, State Project staff and State roles and responsibilities • Tools to be used for capturing, analyzing, and reporting data for capacity management of enterprise infrastructure • Processes and procedures for capacity management, planning, forecasting and communications • Assumptions • Design Capacity • Lead, Lag, Match and Adjustment strategies
6.2.3-32 (existing)	The Contractor shall develop the Project work plans to include tasks, summary tasks and activities described in CalHEERS Project plans and shall specify task start and finish dates that are consistent with high level milestones included in the Capacity Management Plan.
6.2.3-33 (existing)	The Contractor shall document and determine the Production, Systems Engineering and Interactive Voice Response capacity(s) needed to meet changing demands in a Maintenance and Operations environment.
6.2.3-34 (new)	The State identifies and associates the following artifacts to the Capacity Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Procedural Appendix 12 - Template - 20XX QX Audit Report

Req #	SOW Requirement
6.2.3-35 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.2.3-36 (new)	The Contractor shall update the following appendices and attach them to the Capacity Management Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.2.3.6 Capacity Management Execution

Table 6-10: Capacity Management Execution

Req #	SOW Requirement
6.2.3-37 (new)	The Contractor shall staff, manage, lead and execute all capacity management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.2-4 – Capacity Management Plan.
6.2.3-38 (existing)	The Contractor shall report and address all capacity issues that impact System performance requirements.
6.2.3-39 (modified)	The CalHEERS System shall retain up to five (5) years of data that can be viewed online through the CalHEERS portal and up to ten (10) years of data in a retrievable storage area unless directed otherwise by the State Project Director or Designee.

Req #	SOW Requirement
6.2.3-40 (existing)	The Contactor shall accurately include forecasts for next calendar year for expected needs for Central Process Unit (CPU) resources, Network bandwidth and Data storage capacities for all Contractor Equipment within the annual update to the Operations Manual.
6.2.3-41 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.3 OPERATIONS REPORTING, DATA, AND ANALYTICS

The Operational Reporting, Data, and Analytics is intended to provide the CalHEERS organization with reporting, data and analytics to support day-to-day activities, critical initiatives, strategic planning, and impact measurement across the CalHEERS organization.

6.3.1 Daily Production Status Report

The Contractor shall perform the Operations Reporting services described in this section.

Table 6-11: Daily Production Status Report (CD-6.3-1)

Req #	SOW Requirement
6.3.1-01 (modified)	The Contractor shall adopt, enhance, maintain and provide the CD-6.3-1 - Daily Production Status Report that accurately specifies scheduled system downtime and provides a corrective action taken for any unscheduled downtime that occurred.
6.3.1-02 (existing)	The Daily Production Status Report shall accurately specify accomplishments during the report period in a task-by-task format, including all tasks that are being performed on schedule, tasks that are behind schedule, tasks planned for next period, any administrative problems encountered, and the proposed resolution of all problem areas.
6.3.1-03 (modified)	The Contractor shall document an SOP to produce the CD-6.3-1 - Daily Production Status Report and include the following metrics as part of the Daily Production Status Report email at a minimum (and additional items at the request of the State Project Director or designee): • System Performance Metrics • Operations Summary by Area • Operations Details • Data Warehouse • Daily CalHEERS User Report • Daily CalHEERS Transaction Report • Program Support Status • Notice Generation • Inbound Images • Production Defect Release Level Status Metrics • Financial Metrics • Financial Management Processing • Individual Participation Fee Billing • Special Provisions and Service Level Agreement (SLA) Metric
6.3.1-04 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.3.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

6.3.2 Daily Production Status Report Execution

Table 6-12: Daily Production Status Report Execution

Req #	SOW Requirement
6.3.2-01 (new)	The Contractor shall staff, manage, lead and execute all daily production status reporting activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.3-1 – Daily Production Status Report.
6.3.2-02 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.3.3 Operations Reporting Dashboard

This section includes the requirements for the Operations Reporting miscellaneous deliverables.

Table 6-13: Operations Reporting Dashboard (CD-6.3-2)

Req #	SOW Requirement
6.3.3-01 (existing)	The Contractor shall adopt, enhance, maintain and provide the CD-6.3-2 - Operations Reporting Dashboard that serves as a real time portal for designated State Project staff to receive an up-to-date summary presentation of System Operations status at any time.
6.3.3-02 (existing)	The Contractor shall design the Operations Reporting Dashboard to provide drill down capabilities to all State Project staff to view detailed information in each category of information presented on the dashboard.
6.3.3-03 (existing)	The Contractor shall design the Operations Reporting Dashboard to be intuitive and user friendly for nontechnical users and with consistent look-and-feel throughout the application.
6.3.3-04 (existing)	The Contractor shall design the Operations Reporting Dashboard to display alerts and updates for System problems and outages which impacts 100 or more users and/or multiple sites.
6.3.3-05 (existing)	The Contractor shall provide an Operations Reporting Dashboard that includes capabilities to print and download information in Adobe™ PDF and Microsoft Excel® formats.
6.3.3-06 (existing)	The Contractor shall design the Operations Reporting Dashboard to integrate with other tools proposed by the Contractor that includes, but is not be limited to: 1. Service Desk Application 2. CR Management
6.3.3-07 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.3.3-08 (modified)	The Contractor shall document a SOP to produce the Operations Reporting Dashboard and provide an Operations Reporting Dashboard that must display graphical and textual representation of the following information, including, but not limited to: 1. Problem Management 2. CR Management 3. Status of batch jobs and batch processing activities 4. Status of interface jobs and interface processing activities 5. Status of management reporting jobs and activities 6. Status of print processing jobs and activities 7. Performance charts displaying live and historical performance of production system 8. Status of User Acceptance Test (UAT) and Production environments 9. Broadcast messaging to State Project staff 10. Dashboard legend

Req #	SOW Requirement
6.3.3-09 (new)	The State identifies and associates the following artifacts to the Operations Reporting Dashboard. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: CalHEERS Reports List
6.3.3-10 (new)	The Contractor shall update or develop the following appendices and attach them to the Daily Status Report deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: - SOW Requirement ID # - SOW Requirement Text - Requirement Traceability (Define traceability of the requirements to the Deliverable) - Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: - Daily Status Report Artifact Name - Associated Parent DEL - State Approver - SI Point of Contact - Review Frequency - Submission Frequency - Artifact File Format - Artifact Location (e.g., SharePoint breadcrumb) - Link to artifact

6.3.4 Operations Reporting Dashboard Execution

Table 6-14: Operations Reporting Dashboard Execution

Req #	SOW Requirement
6.3.4-01 (new)	The Contractor shall staff, manage, lead and execute all Operations Reporting Dashboard reporting activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.3-2 – Operations Reporting Dashboard.
6.3.4-02 (existing)	The Contractor shall provide the Operations Reporting Dashboard on a 24/7/365 basis.
6.3.4-03 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.3.5 Ongoing and ad Hoc Reporting

Table 6-15: CalHEERS Reports List

Req #	SOW Requirement
6.3.5-01 (existing)	The Contractor shall adopt, update and maintain the CalHEERS Reports List as reports are added and modified.

6.3.6 Data, Analytics, and Reporting Support

Table 6-16: Data, Analytics, and Reporting Support

Req #	SOW Requirement
6.3.6-01 (new)	The Contractor shall staff, manage, and execute all system activities needed to maintain and enhance the operations of CalHEERS operational reporting and analytics, including the CalHEERS Data Warehouse and related ad-hoc reports, as defined in existing CalHEERS artifacts and design documents.
6.3.6-02 (existing)	The Contractor shall adopt, enhance, and maintain the CalHEERS data warehouse used for storing, and maintaining CalHEERS data.
6.3.6-03 (new)	The Contractor shall ingest data from CalHEERS and external sources, including Google Analytics, Salesforce, Tableau, other state agencies, and custom datasets.
6.3.6-04 (existing)	The Contractor shall transmit CalHEERS data, as directed by the State Project Director or designee, including but not limited to: 1. Application processing data that includes standardized denial reasons and applicant demographics by program; 2. Monthly enrollment data by member and program (if not already collected by the MIS/DSS); 3. Disenrollment data that includes standardized reasons for voluntary and involuntary disenrollment as needed per program and enrollee demographics; and 4. Other data required to perform statistical analysis required of each program by applicable state and federal agencies.
6.3.6-05 (new)	The contractor shall utilize an Extract, Transform, and Load (ETL) design developed to meet CalHEERS analytics and data needs. The ETLs shall deliver data refreshes at business-required latencies, such as daily for financial reports, and hourly, or more frequently, for consumer actions that require immediate response.
6.3.6-06 (new)	The contractor shall host the analytics platform on a cloud platform, leveraging cloud-native technologies, and supporting data assets in staging, curated, and final reporting stages.
6.3.6-07 (new)	The contractor shall document and catalog data lineage and metadata comprehensively. The catalog shall be accessible and allow for a variety of user roles to maintain authoritative and up-to-date content from data owners and stewards throughout the CalHEERS data ecosystem.
6.3.6-08 (new)	The contractor shall enable User Acceptance Testing (UAT) for new reports and data products on a production-like copy to simulate realistic data behaviors and volumes.
6.3.6-09 (new)	The contractor shall enable the integration and governance of external data sources, per CalHEERS policies, as needed by the Department of Health Care Services or Covered California.
6.3.6-10 (new)	The contractor shall host and integrate data with separate servers as required by sponsors, such as SQL Server and ArcGIS, per CalHEERS policies.
6.3.6-11 (new)	The contractor shall automate data integrations with other cloud data platforms, such as SAS Viya or Snowflake, per CalHEERS policies.
6.3.6-12 (new)	The contractor shall provide secured data environments integrated with the core data platform for CalHEERS approved data engineers and analysts at Covered California or DHCS to securely test, develop, and maintain new data products, per CalHEERS policies.

Req #	SOW Requirement
6.3.6-13 (new)	The contractor shall allow authorized users to obtain data and results through no-code and advanced self-service tools such as Tableau for visualization, direct querying access to the data warehouse (such as through Snowflake, Databricks), and via ODBC with industry-standard data analytic tools such as Python, R, etc., per CalHEERS policies.
6.3.6-14 (new)	Upon transition completion, the Contractor shall review the CalHEERS Report List, all related SOPs, and requirements with CalHEERS, seeking report approval, and shall only alter or modify the structure or content of reports with the approval of the State Project Director or designee.
6.3.6-15 (new)	The Contractor shall receive approval of the State Project Director or designee for each report, including SOP to produce the report, report design, delivery, accessibility, and schedule.
6.3.6-16 (new)	The Contractor will ensure report listing, and complete report documentation is maintained, and updated based on report assessments or subsequent changes. Report documentation will be searchable and cataloged, and shall include details about the purpose, data sources and lineage, transformations, applicable code (i.e., SQL queries, etc.), definitions, and any other needed attributes to enable report users to interpret the report and report producers to replicate the report.
6.3.6-17 (new)	The Contractor shall process updates to Reports and associated documentation within the timeframes identified by CalHEERS.
6.3.6-18 (modified)	The Contractor shall adopt, enhance and maintain the CalHEERS business intelligence (BI) System with sufficient licenses, per CalHEERS Procurement Processes, to support business and operational needs as defined by the State Project Director or designee.
6.3.6-19 (existing)	The Contractor shall assist data warehouse and analytic users by: 1. Refining queries to achieve their desired analytic output 2. Providing data model and coding expertise for pulling the needed data 4. Identifying issues and performing issue resolution 5. Responding to questions and concerns from users 6. Appropriately indicating when issues will be escalated and mitigated either by CalHEERS Project Management Office (PMO) or via the use of the Defect Management Process
6.3.6-20 (modified)	The Contractor shall generate the reports and extracts as identified by sponsors. The data domains for CalHEERS reports including, but are not limited to: • Carrier Data • Enrollment and premium trends • Eligibility determination outcomes • Consumer experience, including website interaction data • Notices and member communications • Financial reports • Audit and compliance reporting, including related to data interfaces (such as with IRS) • Transactional and system monitoring reports • Consumer assistance reporting (such as by broker, certified assister, Service Center or county eligibility workers)
6.3.6-21 (new)	The contractor shall provision role-based access control, per CalHEERS policy, across all platform layers (both production and test environments) and apply role-based security controls, including column-level masking.
6.3.6-22 (existing)	As new reports and extracts are identified, the Contractor Reporting team shall work with State users to identify the data requirements and update the report or extract inventory to reflect the new item.
6.3.6-23 (existing)	The Contractor shall prepare for operational cycles by revisiting the prior year's reports and making modifications for the new year, as appropriate. Reporting and extract requirements are categorized as: 1. Enrollment Renewal reports

Req #	SOW Requirement
	2. Program transition population reports 3. Open Enrollment reports 4. IRS 1095 reporting 5. FTB 3895 reporting 6. Marketing and Outreach (e.g., assisters, delegates, service channels) 7. CMS reporting and CMS performance stats (i.e., average concurrent users, unique visits, etc.) 8. Service Center Reporting/Dashboards 9. Batch fallout support 10. Carrier renewal reconciliation file 11. ROP Reporting: Automatically discontinue members after 90 days 12. Truven data file
6.3.6-24 (existing)	The Contractor Reporting team must keep copies of the final build code on CalHEERS Repository.
6.3.6-25 (existing)	The Contractor shall add the final copies of the code to the CalHEERS Project's Reports Library.
6.3.6-26 (existing)	The Contractor shall provide documentation for carriers and Covered California for interpretation and utilization of the audit file.

6.4 OPERATIONS MAINTENANCE

Operations Maintenance addresses Commercial off the Shelf (COTS) and Operating System (O/S) updates, as well as upgrades and patches to supporting software. The plan describes the roles and responsibilities, procedures, data source, and action items for the Contractor in maintaining the CalHEERS infrastructure. This plan applies to all CalHEERS environments hosted.

6.4.1 Operations Audit Support

Table 6-17: Operations Audit Support

Req #	SOW Requirement
6.4.1-01 (existing)	The Contractor shall undergo an annual Statement of Standards for Attestation Engagements No. 18 (SSAE 18) or successor audit as directed by the State Project Director or designee.
6.4.1-02 (existing)	The Contractor shall actively participate and assist State auditors in conducting annual audits.
6.4.1-03 (existing)	The Contractor shall work collaboratively with the auditors and provide complete and accurate information and Documentation at no cost to the State for such participation, assistance, and work.
6.4.1-04 (existing)	The Contractor shall notify the appropriate State staff, Service Desks, and all impacted vendors of any incident (e.g., limited access, outages, and security violations).
6.4.1-05 (existing)	The Contractor shall deliver to the authorized State representative who will determine outcomes.

6.4.2 Operations Maintenance Requirements

Table 6-18: Operations Maintenance Requirements

Req #	SOW Requirement
6.4.2-01 (existing)	The Contractor shall update and maintain all data elements as required by the Federal General Systems Design for Federal reporting.
6.4.2-02 (modified)	The Contractor shall accurately document and provide within the Operations manual, processes and procedures to manage availability of the System and cloud-based Services. This includes, but is not limited to: 1. Approach to monitor, analyze, and manage the availability of the System to meet the availability requirements 2. Contractor, State Project staff and State roles and responsibilities 3. Assumptions 4. Moves, additions, changes, and de-installation of System and cloud-based services and configurations. 5. Install and upgrade software components 6. Monitor all System availability for System and cloud-based service including the identification, analysis, resolution and reporting of issues
6.4.2-03 (existing)	The State and the Contractor shall jointly determine the criteria using reasonable judgment, for replacement of any equipment component which, after multiple service calls, fails to effectively perform or function in an acceptable manner.
6.4.2-04 (modified)	The Contractor shall accurately detail Contractor and State roles & responsibilities in the Operations Plan Deliverable.
6.4.2-05 (modified)	The Contractor shall provide the following information on where Asset Management Tool will reside. The information shall include but not be limited to: 1. Environment(s) 2. Interfaces 3. Accessibility 4. Usability 5. Reliability 6. Backup and recovery
6.4.2-06 (modified)	The Contractor shall provide information on Asset Management Tool Security. The information shall include but not be limited to: 1. Overall security of the tool 2. Administrative Overview
6.4.2-07 (existing)	The Contractor shall be fully responsible for the availability, performance, growth, capacity, equipment, software, and operational services of the System.
6.4.2-08 (existing)	The Contractor shall be responsible for maintaining and operating the System.
6.4.2-09 (existing)	The Contractor shall formally request approval for scheduled maintenance periods at least 72 hours prior to the maintenance activity. Scheduled maintenance periods shall be mutually agreed upon and approved by the State and the Contractor.
6.4.2-10 (modified)	The Contractor shall evaluate and implement state and federal statutory and/or regulatory changes associated with the Affordable Care Act Renewal and Open Enrollment functionality.
6.4.2-11 (existing)	The Contractor shall evaluate and implement state and federal regulatory or contractual changes associated with the annual update to carrier offers of insurance through the Covered California marketplace. Changes include but are not limited to: 1. Onboarding of new carriers 2. Upload of new insurance offerings and rates 3. Decommission of non-Contracted carriers 4. Carrier interface testing and certification activities
6.4.2-12 (new)	The Contractor shall evaluate and implement changes associated with the Federal Poverty Level Cost of Living Adjustments (COLA).

Req #	SOW Requirement
6.4.2-13 (new)	The Contractor shall, through ongoing, year-round efforts, evaluate and implement changes associated with all annual tax filing forms, notices, and interface files for the Internal Revenue Services (IRS) and the Franchise Tax Board (FTB).

6.5 INTERFACE SUPPORT

6.5.1 Interface Control Document

The CalHEERS Project works closely and collaboratively with various stakeholders across the State. Part of this collaboration includes interfaces with both State and federal systems in an effort to support the State. The Contractor shall perform the Interfaces Support Services as described in the requirements in this section.

Table 6-19: Interface Control Document (CD-6.5-1)

Req #	SOW Requirement
6.5.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.5-1 - Interface Control Document, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. INTERFACE PARTNERS 7.1 Partnerships 7.2 Federal Data Service Hub 7.3 Department of Health Care Services 7.4 Insurance Carriers 7.5 Employment Development Department 7.6 Franchise Tax Board 7.7 Statewide Automated Welfare System 7.8 Salesforce 7.9 Smarty Streets 7.10 Intelligent Document Processing (IDP) 7.11 KP Corp and DFS Activity 7.12 AIM Interface 7.13 Contingency Plans 7.14 Detailed Interface Requirements 7.15 Integrated Healthcare Association (IHA) 7.16 California Medicaid Management Information System (CA-MMIS) and Health Access Programs (HAP) 8. TECHNICAL INTERACTIONS 8.1 Web Services 8.1.1 Producer 8.1.2 Consumer 8.2 Integration Fuse

Req #	SOW Requirement
	8.2.1 Communication Protocol 8.2.2 Security Methodology 8.3 Batch Service 8.3.1 Batch File Exchange 8.3.2 Communication Protocol 8.3.3 Security Methodology 9. TESTING APPROACH 9.1 Unit Testing 9.1.1 Trigger Test – Web Services 9.1.2 Trigger Test – Batch 9.1.3 Response Test – Web Service 9.1.4 Response Test – Batch 9.2 Assembly Testing – All Services 9.3 System Testing 9.3.1 System Testing – Web Services 9.3.2 System Testing – Batch 9.4 Network Connection Test – All Services 9.5 Integration Test 9.5.1 Integration Test – Web Services 9.5.2 Integration Test – Batch 9.6 Interface Performance (Load Testing) 9.6.1 Web Services 9.6.2 Performance Testing – Batch 9.7 Security Testing 9.8 UAT Testing 9.8.1 User Acceptance Testing – Web Services 9.8.2 User Acceptance Testing – Batch 9.9 Testing Schedule 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: RETIRED INTERFACE PARTNERS APPENDIX 5: RETIRED INSURANCE CARRIER INTERFACES
6.5.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.5.1-03 (new)	The State identifies and associates the following artifacts to the CD-6.5-1 - Interface Control Document. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • CalHEERS - product vendor access list • Partner Contacts
6.5.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.5.1-05 (new)	The Contractor shall update the following appendices and attach them to the Interface Control Document: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text

Req #	SOW Requirement
	3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.5.2 Interface Support Execution

Table 6-20: Interface Support Execution

Req #	SOW Requirement
6.5.2-01 (new)	The Contractor shall staff, manage, lead and execute all interface support activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.5-1 – Interface Control Document.
6.5.2-02 (existing)	The Contractor shall be responsible for managing and maintaining the interconnections and services between the System and interface partners on behalf of the CalHEERS Project.
6.5.2-03 (existing)	The Contractor shall provide consultation and technical assistance in support of ANSI EDI 834 carrier transaction creation and potential file splits in support of yearly enrollment transactions.
6.5.2-04 (existing)	The Contractor shall generate enrollment flat file to send to carriers for alternative Electronic Data Interchange (EDI) processing and process the response files to effectuate coverage as necessary.
6.5.2-05 (existing)	The Contractor shall monitor and report upon the processing of batch files and review the batch logs of all interfaces, in accordance with the Operations Plan and is responsible for any issues/defects that occur as a result of failed batch/interface transactions.
6.5.2-06 (existing)	The Contractor shall assist the State in the development of Inter-Agency Agreements with each entity that the System will interface with. The Inter-Agency Agreements will document interface file layouts, interface transaction frequencies, interface test procedures, security and file transfer protocols.

Req #	SOW Requirement
6.5.2-07 (existing)	The Contractor shall propose and implement a strategy to interface with each of the existing Statewide Automated Welfare Systems.
6.5.2-08 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.6 TECHNOLOGY REFRESH

Technology Refresh (also referred to as Tech Refresh) is the systematic processes and governance for maintaining relevancy of System components and Services driven primarily by the shear pace of technology that causes obsolescence, devaluation of component functionality, and creates System vulnerabilities, maintainability, and supportability issues.

To support the State's technology refresh needs, the Contractor will assist the State in creating several documents outlined below to guide the process of technology refresh and to ensure refresh activities are planned for and rolled out in a strategic, and systematic way.

There are three important processes to consider when implementing Tech Refresh: Technology Refresh, System Enhancements, and Technical Change Management. The relationship between the three aspects of tech refresh is identified in SOW 6.1.1 OPERATIONS PLAN and shown in the figure below.

Figure 6-1: Technology Refresh Interactions

Technology Refresh versus System Enhancements: Technology refresh does have cross-over to Enhancement activities discussed in SOW 4. However, enhancements push the CalHEERS forward-looking to newer functionality and innovation in scope over time while technology refresh looks back in order to ensure the existing functionality remains supportable, sustainable, secure and maintainable over time.

Figure 6-2 below helps to illustrate how both technology refresh and system enhancements interact with one another while maintaining different purposes and focus. [Technology refresh services mostly strive to maintain system relevancy, with a maintenance focus, while also ensuring that the technology does not become obsolete, outdated, and unreliable. Funding for technology refresh is provided with funding sources from the Appendix D - Cost Workbook \(CWB\) Tabs D-2 thru D-5. Converse, System Enhancement services mostly strive to find cutting edge technology to bring efficiencies, innovation, and productivity improvements. Funding for system enhancements is provided with funding sources from CWB Tab D-7. As shown in the figure below, there is a grey area between Technology Refresh and System Enhancements. For the grey areas, the State will work in partnership and on a case-by-case basis to decide the best classification to assign costs.](#)

Figure 6-2: Technology Refresh versus System Enhancement

6.6.1 Technology Refresh Management Process

The Tech Refresh Management process is the establishment of consistent and repeatable processes that govern and strategically drive the Tech Refresh activities through the System Enhancements processes (SOW 4) within the CalHEERS management [structure](#). Governance for Tech Refresh is done via the Architectural Review Board (ARB) and interacts with the existing CalHEERS Change Request (CR) processes and Release Planning lifecycles.

Table 6-21: Technology Refresh Management Process (CD-6.6-1)

Req #	SOW Requirement
6.6.1-01 (new)	The Contractor shall develop, adopt, enhance, deliver, and maintain a Technology Refresh Management Process that identifies repeatable processes that govern and strategically drive/manage the tech refresh activities for CalHEERS. The deliverable shall include but is not limited to: REVISION HISTORY 1. INTRODUCTION 1.1. Purpose of this Deliverable 1.2. Reference Documents (used to create this del and/or referenced by this del) 1.3. Deliverable/Artifact Hierarchy Diagram Relationships 1.4. Intended Audience for this Deliverable 2. SCOPE 2.1. Scope of the Tech Refresh Management Process DEL 2.2. Tech Refresh In-Scope/Out-of-Scope 2.3. Definitions 2.4. Distinctions between Tech Refresh, System Enhancements (CR's), Technical Change Requests (TCR's) 2.5. Update Frequency 2.6. SOW requirements for this deliverable (reference Appendix 1,2,3) 2.7. Other requirements (implied or other) for this deliverable 3. The Tech Refresh Life Cycle 3.1. Tech Refresh Life Cycle Timeline (Figure and Narrative) 3.2. How the Tech Refresh Life Cycle Works 3.3. Role of Architectural Review Board (ARB) in Tech Refresh 3.4. Interfaces to Enhancement CR Cycles and Technology Change Cycles 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1. Assumptions for managing Tech Refresh 4.2. Constraints for managing Tech Refresh 4.3. Risks to the management of Tech Refresh 5. SPECIFIC PROCESSES FOR MANAGING TECH REFRESH 5.1. Assessments, Findings, & Recommendations Report Processes 5.2. Assessment Presenting, Prioritizing & Approving Candidate Processes 5.3. Architectural Review Board (ARB) Process 5.4. Processes for Interfacing System Enhancement Governance (e.g. CRs) 5.5. Tech Refresh Plan & Tech Refresh Implementation Processes 5.6. Tech Refresh Implementation Completion and Retrospect Process. 5.7. Processes for Managing the Tech Refresh Life Cycle 5.8. Process for Cost Review/Approvals, Cost Traceability, & Cost Management Plan 6. ROLES AND RESPONSIBILITIES (by Tech Refresh Processes) 6.1. Process 5.1 - R&Rs (SI, Sponsor, OTSI CalHEERS Technical, PM, Fiscal, etc.) 6.2. Process 5.2 - R&Rs (SI, Sponsor, OTSI CalHEERS Technical, PM, Fiscal, etc.) 7. TOOLS 7.1. Approach for Using Tools to Manage Tech Refresh 8. MANAGEMENT OF OPERATIONS AREAS APPLICABLE TO TECH REFRESH 8.1. Cloud Infrastructure 8.2. Capacity 8.3. Compute – CPU, Servers and Memory 8.4. Network 8.5. Storage 8.6. Database 8.7. Other 9. TRIGGERS DRIVING TECHNOLOGY REFRESH & FUNDING CATEGORIES 10. GLOSSARY AND ACRONYMS 10.1. Existing Terms Used for Tech Refresh

Req #	SOW Requirement
	10.2. New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.6.1-02 (new)	The Contractor shall include as part of the Technology Refresh Management Process, a description of the process for collaboration with the <u>State</u> in the planning and development of the Technology Refresh Roadmap.
6.6.1-03 (modified)	The Contractor shall include as part of the technology refresh management process a description of the <u>following</u> tech refresh triggers (and <u>applicable</u> funding category), including, but not limited to: • Hardware <u>Triggers / Funding category- CWB D-2 Hardware</u> - o <u>Version compliance</u> - o <u>No longer supportable</u> - o End-of-Life including impact of continued vendor maintenance availability - o <u>Independent outside feedback</u> • Hosting <u>Triggers / Funding category- CWB D-4 Cloud Hosting Data Center Services</u> - o CPU resources - o Network bandwidth - o Data storage - o Capacity • Software <u>Triggers / Funding category- CWB D-3 Software</u> - o Licenses - o N-1 version compliance - o Support retention - o Product defect correction - o End-of-Life including impact of continued vendor maintenance availability - o Pre-existing security vulnerabilities - o <u>Independent outside feedback</u> • SDMO <u>Triggers / Funding category- CWB D-5 SDMO Services</u> - o Tech Refresh planning, research, analysis, reporting, tracking, presenting, deliverable development, artifact development, etc. - o Contractor role in ARB process, including proof of concept (POC), sandbox, pilot, and other activities that lead to solution selection. - o Effort related to implementing & configuring Technology Refresh solutions • System Enhancement <u>Triggers / Funding category- CWB D-7 Enhancements</u> - o State <u>approved</u> enhancements to <u>hHardware</u>, <u>sSoftware</u>, <u>eCloud</u> <u>hosting data center sServices</u>, and <u>enterprise</u> <u>tools</u> beyond the scope of Tech Refresh (e.g., replacing an <u>industry standard</u> <u>obsolete</u> tool with a state-of-the-art AI solution)
6.6.1-04 (new)	The Contractor shall document the Architectural Review Board (ARB) process, including diagrams and associated roles and responsibilities within the CD-6.6-1 - Technology Refresh Management Process deliverable.
6.6.1-05 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
6.6.1-06 (new)	The State identifies and associates the following artifacts to the Technology Refresh Management Process. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this Deliverable including, but not limited to: • API Integration with 3Scale • LWReleaseSchedule • OCP_Clusterwise_ProjectInventory • SOP - ClamAV Installation and Operation - Updated • SOP-ApiPolicy_Custom_AT_Build • SOP-ApiPolicy_Custom_AT_Deployment

Req #	SOW Requirement
	- SOP-APIPolicy_Custom_Dev_Build - SOP-APIPolicy_Custom_Dev_Deployment
6.6.1-07 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.6.1-08 (new)	The Contractor shall update or develop the following appendices and attach them to the Technology Refresh Assessment Report Deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: - SOW Requirement ID # - SOW Requirement Text - Requirement Traceability (Define traceability of the requirements to the Deliverable) - Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: - Deliverable Section Number and Title - Deliverable Requirement Statement(s) - Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) - Validation Method (The method the Contractor used to validate Deliverable compliance) - The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: - Artifact Name - Associated Parent DEL - State Approver - SI Point of Contact - Review Frequency - Submission Frequency - Artifact File Format - Artifact Location (e.g., SharePoint breadcrumb) - Link to artifact

6.6.2 Technology Refresh Assessments & Findings Reports

Tech Refresh Assessments are scheduled events done periodically and in accordance with the CalHEERS Operations Plan processes for Tech Refresh and in collaboration with the State. The assessments assess the CalHEERS System components (e.g. Hardware, Software, Cloud Services, and enterprise tools) for technology that needs to be considered for replacement or upgrade due to supportability, maintainability, or other factors that could put the System at risk operationally.

Assessment findings are then summarized in the Technology Refresh Assessment Report. The report includes a presentation of findings and recommendations for when and how candidates might be implemented as part of a future release. The implementation of Tech Refresh activities are coordinated through the Tech Refresh Plan and coordinated with the existing CalHEERS release planning processes for eventual release.

Table 6-22: Technology Refresh Assessment Report (CD-6.6-2)

Req #	SOW Requirement
6.6.2-01 (new)	The Contractor shall develop, adopt, enhance, deliver, and maintain a CD-6.6-2 - Technology Refresh Assessment Report, which includes but is not limited to: REVISION HISTORY 1. INTRODUCTION 1.1. Purpose of this Deliverable 1.2. Reference Documents 1.3. Intended Audience for this Deliverable 1.4. SOW Reference and Traceability (reference to Appendix 1, 2, 3) 1.5. Deliverable/Artifact Hierarchy Diagram (applicable to this Report) 2. BACKGROUND 2.1. Technology Refresh Assessment Methodology and Approach Used 2.2. Timeframe for creation of the Report 2.3. Specific areas focused on by this Report during this Tech Refresh cycle 2.4. Triggers that are driving this Tech Refresh cycle (HW, SW, Cloud, etc.) 2.5. Exceptions / Items Not Addressed by this Tech Refresh cycle 3. EXECUTIVE LEVEL SUMMARY OF FINDINGS AND RECOMMENDATIONS 3.1. Report Findings & Recommendations Executive Summary Table 3.2. 	5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.6.3 Technology Refresh Planning / Technology Refresh Implementation Plan

Technology Refresh planning is the mechanism used to implement needed tech refresh updates as governed by the Technology Refresh Process, and through the existing CalHEERS Change Request (CR) process and release planning lifecycles.

As shown in Figure 1, the Technology Refresh Implementation Plan (also referred to as the Tech Refresh Implementation Plan) is an implementation-type plan that specifically outlines how a point-in-time technology refresh release(s) will be planned and implemented (start to finish). There will be many Tech Refresh Plans created and implemented throughout the life of the Contract and coordinated in accordance with the Technology Refresh Management Process in the Operations Plan.

Table 6-23: Technology Refresh Implementation Plan (CD-6.6-3)

Req #	SOW Requirement
6.6.3-01 (new)	The Contractor shall develop, adopt, enhance, deliver, and maintain a CD-6.6-3 - Technology Refresh Implementation Plan, which includes but is not limited to: REVISION HISTORY 1. INTRODUCTION 1.1. Purpose 1.2. List of Reference Documents 1.3. Recap of Findings from the Tech Refresh Assessment Report 1.4. Intended Audience for the Plan 2. SCOPE / CR SUMMARY 2.1. Overview of Technology Refresh Changes being Implemented or Proposed 2.2. Tech Refresh-Specific CR Requirements Summary 2.3. In-Scope and Out-of-Scope Considerations & Clarifications 2.4. SOW Requirements Traceability (reference to Appendix 1,2,3) 3. SCHEDULE AND COST SUMMARY 3.1. Tech Refresh Release Roadmap (if multiple releases, show full roadmap) 3.2. Tech Refresh Workplan (.mpp file) 3.3. Tech Refresh Change-to-Cost Category (HW/SW/Hosting) Traceability Matrix 3.4. Specific Schedule/Cost Considerations, Assumptions, Constraints made 3.5. Invoicing and Payment Plan Details & Interaction with the Cost Mgmt Plan 4. IMPLEMENTATION APPROACH 4.1. Implementation Strategies Employed 4.2. Triggers that are driving the Tech Refresh Upgrade (HW, SW, Cloud, etc.) 4.3. Planning & Implementation Considerations 4.4. Detailed Roadmap/Schedule Information (Microsoft Schedule for this Plan) 4.5. PowerPoint Presentation & Materials for Management Mtgs and Reviews 4.6. Meeting Agenda's and Meeting Minutes (Including Action Item tracking, etc.) 5. IMPLEMENTATION ASSUMPTIONS, CONSTRAINTS, AND RISKS 5.1. Assumptions for this Tech Refresh effort 5.2. Constraints for this Tech Refresh effort 5.3. Risks with implementing this Tech Refresh effort 6. IMPLEMENTATION ROLES AND RESPONSIBILITIES 6.1. System Integrator R&Rs

Req #	SOW Requirement
	6.2. Sponsor CalHEERS R&Rs (if any) 6.3. OTSI CalHEERS Technical Team R&Rs 6.4. OTSI CalHEERS Fiscal Team R&Rs 6.5. Other R&Rs 7. IMPLEMENTATION CLOSEOUT 7.1. Retrospect 7.2. Lessons Learned 8. Other 9. GLOSSARY AND ACRONYMS 9.1. Existing Acronyms used in this Plan 9.2. New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.6.3-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.6.3-03 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.6.3-04 (new)	The Contractor shall update or develop the following appendices and attach them to the CalHEERS Policy and Legislative Change Support Plan deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL

Req #	SOW Requirement
	3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.6.4 Technology Refresh Execution

Table 6-24: Technology Refresh Execution

Req #	SOW Requirement
6.6.4-01 (new)	The Contractor shall staff, manage, lead and execute all technology refresh activities on CalHEERS as defined in this Statement of Work and in accordance with the approved Technology Refresh deliverables.
6.6.4-02 (new)	The Contractor shall conduct all Technology Refresh planning, management, assessment, reporting, tracking, Deliverable development, workplan development and maintenance activities under the Fixed Price. Note: The Implementation of the State approved technology refresh recommendations will be executed via the existing CalHEERS change management processes, as defined within the CD-4.2-1 - Change Request Process, and costed as described below: • Tech Refresh HW costs → Appendix D-2, SDMO Hardware Costs • Tech Refresh SW costs → Appendix D-3, SDMO Software Costs • Tech Refresh Cloud Hosting Service Costs → Appendix D-4, Cloud Hosting Data Center Services Costs • Tech Refresh Implementation Effort → Appendix D-5, SDMO Fixed Price Costs. • State approved Enhancements driven by Tech Refresh → Appendix D-7, System Change Costs (not typical/used on an exception basis).
6.6.4-03 (new)	The Contractor shall conduct a Technology Refresh Assessment, which shall assess the projects technology (e.g., Hardware, Software, Cloud Services, and enterprise tools) with a focus on System supportability, maintainability, and enhancing CalHEERS, as defined in Requirement #6.6.1-03.
6.6.4-04 (new)	The Contractor shall facilitate all Technology Refresh meetings, including planning, technical, pilots/demos, financial, weekly status, workplan review, and any other meetings deemed necessary by the State, providing agendas, presentation materials, minutes, and any other documentation necessary.
6.6.4-05 (new)	The Contractor shall update all project documentation related to technical refresh, e.g., Weekly Director's Report , and Deliverables & artifacts, including design documents, technical and target State architecture diagrams, etc.
6.6.4-06 (new)	The Contractor shall communicate out Technical Refresh planning and status information to the project.
6.6.4-07 (new)	The Contractor shall collaborate with the State to review the Technology Refresh Assessment recommendations and determine where proposed upgrades fall, as defined in ~~Requirement Rqmt~~ #6.6.1-03.
6.6.4-08	~~Intentionally Left Blank~~
6.6.4-09 (new)	The Contractor shall utilize the Architectural Review Board (ARB) process for general and technology refresh architectural changes, as directed by the State, analyzing and approving newly introduced technical solutions, architectural changes, or add-on features to existing solutions for use on CalHEERS.

Req #	SOW Requirement
6.6.4-10 (new)	The Contractor shall support the CalHEERS ARB process, including but not limited to those activities required to narrow down and finalize solution selection: • Licensing or tool-related costs required for any pre-state decisioning • Hosting or environment changes • Proof of Concept (POC), sandbox, pilot, etc. • Testing • Additional reporting, data, or testing requested by the State in relation to tool review and/or testing. Cost Consideration: • ARB support for Tech Refresh efforts shall be costed under the Fixed Price (Appendix D, D-5 Fixed Price, SOW 6.6). • ARB support for Technology Enhancements & Innovation shall be costed under the System Changes Costs (Appendix D, D-7 System Change).
6.6.4-11 (new)	The Contractor shall facilitate, organize, and implement all phases of the ARB process, which at a minimum scrutinizes each new change or item (whether Software has licensing cost or no cost, such as Open Source Software) for security and technical synergy with CalHEERS. The State Contract Management team should be involved as soon as costs or contractual obligations become part of the discussion. Three phases in the ARB process: 1. ARB Preparation a. Requires development of a use case for the solution and then a narrowing of options for State review from all industry-leading and other recommended Software that fit CalHEERS needs to a minimum of three (3). Criterion for developing the use case and narrowing of options shall include but not be limited to: i. Requirements gathering is the first step, which should involve the State Technical Team and Sponsors, and, when applicable, the team who will be using the Software. (When an enterprise tool, this of course must include State team members who use the tool, State PMO, etc.) This step includes but is not limited to, a review of environment(s) required for, Data Governance, interfaces, accessibility, usability, reliability, space and resource needs, backup and recovery. ii. POCs, pilots, sandbox, and other testing, vetting, narrowing of options. iii. Review options based on risks to the State/CalHEERS. (Including review of terms and conditions, end user license agreements, etc., for State risks.) iv. Review options based on CalHEERS needs, fit with existing interfacing Software or interfaces, and pain points. v. Review options based on the security viability of each option. b. State and CalHEERS ISO security review of top 3 or more options Contractor proposes proceeding with as options for review in next phases. 2. Official ARB – Once narrowed to top three options, the Official ARB process shall begin with presentation of options to the State, providing pros and cons and results gathered from the ARB Preparation phase for each option. Presentation to State with these options shall include but not be limited to: a. SI must provide a minimum of 3 product choices of industry best software for the solution along with the larger list (minimum of the top ten (10) industry-best tools shall always be measured against State needs and pain points) of all tools originally reviewed and considered. b. Tech synergy discussions and compatibility with existing project Software, where applicable. c. Cost comparisons among options including total cost for initial and

Req #	SOW Requirement
	projected for the future (including all additional related costs required such as Software, hosting, etc.) d. Comparisons of pros and cons, costs for current solution (when applicable) versus all costs for each proposed solution, features, and State needs. e. Data retention plan. f. Options to avoid “lock-in.” Lock-in is the effort and costs necessary to transition, accurately and efficiently, all active and historical data when a new tool is required by the State. (Lock-in does not just refer to the tool itself, but often to related tools and infrastructure. For example, the use of some tools can cause the System to be locked-in to using the current cloud provider or require the use of other, related tools.) g. All ARB presentations must include Data Governance Diagrams (as defined in 6.9.2 Data Management Execution, with enough detail to support data sharing with external partners, if required. 3. Post-ARB a. State team using Software and State Technical Team may give final review and make final decision on options and additional changes and tool settings to improve the tool. b. As part of the ramp up in use of any new tool are tool-related changes, improvements, and new pain points requiring settings tweaks, additional Software, and add-on features that may also require ARB review, or at a minimum, security review. c. Any product previously approved by the ARB and being considered for additional features, must have an additional ARB review to ensure that the expanded use is evaluated for compatibility with architecture and Data Governance.
6.6.4-12 (new)	The Contractor shall, when proposing a “lock-in” solution/configuration in the ARB process (a solution/configuration that “locks” the State onto a technical path that may limit downstream or future solution options) document and present the State with an analysis that includes, but is not limited to the following: 1. Identification of all solution system impacts to the System 2. List of pre-dispositioned follow-on solutions that result from the lock-in 3. List of solutions rendered non-viable for CalHEERS because of the lock-in
6.6.4-13 (new)	The Contractor shall be responsible for the complete and accurate extraction, conversion, and migration of any and all data from the existing to ARB approved solutions.
6.6.4-14 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.7 SYSTEM SECURITY

During the term of this Contract, the Contractor and the State will have access to and become acquainted with each party’s Confidential Information. The requirements below describe the responsibilities of the Contractor as it pertains to CalHEERS security for both State and federal requirements.

6.7.1 System Security Plan

The Contractor shall perform the System Security Plan services described in this section.

Table 6-25: System Security Plan (CD-6.7-1)

Req #	SOW Requirement
6.7.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.7-1 - System Security Plan, ensuring it meets all the needs of the State, and includes the following appendices: APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.7.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.7.1-03 (modified)	The Contractor shall adopt, enhance and maintain a System Security Plan which documents the System's security level and describes managerial, technical and operational security controls, that includes but is not limited to: 1. System Identification 2. Security Controls Detail by area 3. Threat Mitigation, including but not limited to applications, network, and facilities
6.7.1-04 (modified)	The Contractor shall provide and maintain a Security Policy and System Security Plan that includes, but is not be limited to: 1. The overall approach to State Security management and the Contractor, State Project staff and State roles and responsibilities. 2. Process and procedures for authentication of users based on role categories and access mechanisms. 3. Tools and regular tests used for monitoring security threats and vulnerabilities. 4. Processes and procedures for managing and responding to security incidents. 5. Procedures and templates for communications related to security activities and incidents.
6.7.1-05 (modified)	The Security Policy and System Security Plan shall accurately conform to the principles contained in the following Standards, Codes, acts, policies, publications and other documents: 1. Current ARC-AMPE. 2. Federal Information Processing Standards (FIPS) Publications 3. Federal Information Security Management Act (FISMA) and related U.S. Department of Health and Human Services (DHHS) Information Resource Management (IRM) and Office of the Chief Information Officer (OCIO) policies and Standards 4. Information Practices Act (Civil Code section 1798, et seq.) 5. OMB Circular A-130. Applicable International Organization for Standardization (ISO) Standards. Sarbanes Oxley 6. California Civil Code Section 1798.29 & 1798.82. AB 1298 (California Civil Code Sections 56.6, 1785.11.2, 1798.29, and 1798.82, relating to personal information) 7. Welfare and Institutions Code Section 10850 8. Civil Code 56.35© (5) 9. National Institute of Standards and Technology (NIST) Publications 10. SAS-70 Audit Standards 11. California Government Code 12168.7
6.7.1-06 (modified)	The Contractor shall develop, maintain, and execute a System Security Plan that utilizes and is maintained to the most current version of the Acceptable Risk Controls for Affordable Care Act (ACA), Medicaid, and Partner Entities (ARC-AMPE) and other security best practices to ensure that the CalHEERS has the appropriate level of System security.

Req #	SOW Requirement
6.7.1-07 (existing)	The Contractor shall accurately maintain a System Security Document which describes in specified detail the System's security level and describes managerial, technical and operational security controls, that includes, but is not limited to: 1. System Identification 2. Security Controls Detail by area
6.7.1-08 (new)	The State identifies and associates the following artifacts to the System Security Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Information Security Risk Assessment • Security Incident Report • System Security Briefing • Keepass Setup_2022_ StepbyStep • OPAM User Guide - General Users • OPAM User Guide - Team Admins • Privacy Incident Process Overview - Best Practices • SOP - Guidance for upgrading Splunk enterprise • SOP - Prisma Cloud Container Scanning tool Upgrade • SOP - Trend Micro Upgrade • SOP-Palo Alto Firewall Upgrade • Security Incident Process Overview - Best Practices
6.7.1-09 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.7.1-10 (new)	The Contractor shall update or develop the following appendices and attach them to the System Security Plan deliverable: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table that identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Define traceability of the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the SOW requirements have been fulfilled by this Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor will comply with or has complied with the requirement statements within the plan) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency

Req #	SOW Requirement
	6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.7.2 System Security Execution

6.7.2.1 System Security Execution

Table 6-26: System Security Execution

Req #	SOW Requirement
6.7.2-01 (new)	The Contractor shall staff, manage, lead, and execute all System Security activities on CalHEERS as defined in the Statement of Work and in accordance with the CD-6.7-1 – System Security Plan.
6.7.2-02 (existing)	The Contractor <u>shall</u> develop, maintain, and execute a System Security Plan that includes but is not limited to monitoring activities to ensure that the CalHEERS System is <u>kept, at a minimum, up to the current industry best practices and current standards for</u> system security.
6.7.2-03 (new)	The Contractor shall mitigate, support, review, and respond to findings based on all Interagency Agreements. These activities will include, at a minimum: 1. Annual review to ensure compliance with data retention requirements. 2. Annual review to ensure compliance with cloud environment security.
6.7.2-04 (new)	The Contractor shall support independent penetration testing activities, reporting, and outcome resolutions, at the State's direction.
6.7.2-05 (existing)	The Contractor <u>shall</u> use a multi-layered approach to meet business and technical requirements and service level needs in both prevention and reaction. This includes but is not limited to physical boundary security, redirection of connections, separation of duties, user authentication and authorization, and end user behavior analysis.
6.7.2-06 (existing)	The Contractor, and each of their officers, employees, and authorized Contractors and Agents, shall maintain all Confidential Information of the other party in confidence and at least to the extent as it protects the confidentiality of its own confidential proprietary information of like kind, but in no event with less than reasonable care.
6.7.2-07 (existing)	No party will at any time use, publish, reproduce, or disclose any Confidential Information, except to authorized officers, employees, contractors and agents requiring such information under confidentiality requirements as authorized in writing by the other party, as otherwise specifically permitted herein, or to perform its obligations as authorized hereunder.
6.7.2-08	<u>Intentionally Left Blank</u>
6.7.2-09 (existing)	All parties shall take all steps necessary, including without limitation oral and written instructions to all Staff to safeguard, in accordance with applicable federal and State law, regulation and codes, the other party's Confidential Information against unauthorized disclosure, reproduction, publication or use, and to satisfy their obligations under this Contract.

Req #	SOW Requirement
6.7.2-10 (modified)	Each party agrees that, prior to disclosing any Confidential Information of the other party to any third party, it will obtain from that third party a written acknowledgment that such third party will be bound by the same terms with respect to the Confidential Information. In addition to the requirements expressly stated, the Contractor and its Subcontractors will comply with any applicable policy, rule, or reasonable requirement of the State or the Federal government (as of the Execution Date and thereafter as addressed in executed CRs) that relates to the safeguarding or disclosure of information relating to applicants and recipients of Covered California's services, the Contractor's operations, or the Services performed by Contractor under this Contract, including without limitation the terms of HIPAA; the HITECH Act; the HIPAA Privacy and Security Rules, 45 C.F.R. Part 160 and Part 164, Subparts A, C and E; 42 C.F.R. Part 2; 26 U.S.C. Section 6103; IRS Publication 1075 (Sep 2021 Version), the California Information Practices Act, California Civil Code <u>Section 1798 et seq.</u> ; the privacy and security provisions of the Information Exchange Agreement between the Social Security Administration and the California DHCS; and the Computer Matching and Privacy Protection Act Agreement between the Social Security Administration and the California Health and Human Services (CalHHS) Agency.
6.7.2-11 (existing)	The parties acknowledge and agree that such Information Exchange Agreement and Computer Matching and Privacy Protection Act Agreement, containing such privacy and security provisions, have been provided to the Contractor as of the Execution Date and are incorporated into the Contract by this reference. In the event that there are changes after the Execution Date in any applicable policy, rule or requirement of the State or federal governments relating to the safeguarding or disclosure of information as described above, such changes shall be treated as CRs if requested by either party.
6.7.2-12 (existing)	Each party, and its officers, employees, Subcontractors, and agents shall at all times comply with (i) all security standards which are described in the <u>Contract</u> , and (ii) practices and procedures which shall be documented in the System Security Plan Deliverable (as of the Execution Date and thereafter as addressed in executed CRs), and (iii) other security standards, practices and procedures of the State or the federal government (as of the Execution Date and thereafter as addressed in executed CRs), including the Information Exchange Agreement and Computer Matching and Privacy Protection Act Agreement. Such compliance shall be required with respect to information and materials which come into each party's possession and to which such party gains access under this Contract, including without limitation all Confidential Information.
6.7.2-13 (existing)	The State reserves the right to monitor, audit or investigate the Contractor's use of the State Confidential Information collected, used, or acquired by the Contractor under this Contract.
6.7.2-14 (modified)	Subject to record retention laws and Section 6.8, DATA RETENTION, BACKUP AND RECOVERY and Archive each party shall promptly return to the disclosing party, on termination or expiration, all of the disclosing party's Confidential Information, including copies thereof.
6.7.2-15 (existing)	The following information shall not be considered Confidential Information for the purposes of this Contract: information previously known when received from the other party and not subject to confidentiality obligations; information freely available to the general public; information which now is or hereafter becomes publicly known by other than a breach hereof; information which is developed by one party independently of any disclosures made by the other party of such information; or information which is disclosed by a party pursuant to subpoena or other legal process and is lawfully obtainable by the general public.
6.7.2-16 (existing)	Notwithstanding the above, the Contractor acknowledges that this Contract shall be a public record under State law, subject to California Government Code Section 100508. Any specific information that is claimed by the Contractor to be Confidential Information must be clearly identified as such by the Contractor. To the extent consistent with State law, including the California Public Records Act, the State will maintain the confidentiality of all such information marked Confidential Information.

Req #	SOW Requirement
6.7.2-17 (existing)	If a request is made to view the Contractor's Confidential Information, the State will notify the Contractor of the request and of the date that any such records will be released to the requester unless the Contractor obtains a court order enjoining that disclosure or other appropriate remedy. If the Contractor fails to obtain the court order enjoining disclosure prior to the deadline for responding to the request for documents, the State may release the identified requested information on the date specified without penalty or liability. The State reserves the right to also seek reimbursement for all costs and expenses incurred by the State in their refusal to produce the Contractor's confidential documents.
6.7.2-18 (existing)	As part of its nondisclosure obligations, the Contractor shall comply and require its officers, employees and Subcontractors to comply with the provisions of Section 14100.2 of the California Welfare and Institutions Code, Title 22 of the California Code of Regulations, Section 51011, and all other statutory laws relating to privacy and confidentiality.
6.7.2-19 (existing)	The Contractor shall keep confidential and not open to examination, for any purpose not directly connected with the administration of public social services, any applications and records concerning any individual made or kept by a public officer or agency in connection with the administration of the provision of the Welfare and Institutions Code relating to any form of public social services.
6.7.2-20 (existing)	The Contractor shall inform all of its employees, agents, Subcontractors, and partners of the above provision and that any person knowingly and intentionally violating the provisions of this State law is guilty of misdemeanor.
6.7.2-21	Intentionally Left Blank
6.7.2-22	Intentionally Left Blank
6.7.2-23 (modified)	The Contractor shall ensure that all data being stored or exchanged outside of the direct CalHEERS certified data hosting locations is handled based on current Acceptable Risk Controls for Affordable Care Act (ACA), Medicaid, and Partner Entities (ARC-AMPE). This includes, but is not limited to: 1. Offsite backup media; 2. Desktop/laptop disk drives; and 3. Data exchanges between any CalHEERS stakeholders including interface partners. 4. Other tool-specific Software-as-a-Service hosting solutions.
6.7.2-24 (existing)	The Contractor shall accurately provide and update a Data Use/Data State/Interconnection Security Agreement Document as required by Centers for Medicare and Medicaid Services (CMS).
6.7.2-25 (existing)	The Contractor shall prepare a Data Use/Data Exchange/Interconnection Security Agreement (Final) to address and include the following information: The Data Use Agreement (DUA) must be developed by the Business Owner and Project Manager and initiated in the design phase, continued throughout the development phase and test phase, and completed in the implementation phase. A DUA is a legal binding agreement between a federal agency and an external entity (e.g., Contractor, private industry, academic institution, other federal government agency, or state agency), when an external entity requests the use of personal identifiable data that is covered by the Privacy Act of 1974. The Agreement delineates the confidentiality requirements of the Privacy Act, security safeguards, and the federal agency's data use policies and procedures. The DUA serves as both a means of informing data users of these requirements and a means of obtaining their agreement to abide by these requirements. Additionally, the DUA serves as a control mechanism through which the Federal agency can track the location of its data and the reason for the release of the data. A DUA requires that a system of record notice be in effect, which allows for the disclosure of the data being used.

Req #	SOW Requirement
6.7.2-26 (existing)	The Contractor shall be responsible for defining, documenting, and maintaining authentication processes for various users based on role categories and access mechanisms.
6.7.2-27 (existing)	The Contractor shall ensure that all CalHEERS back-up files are encrypted. The key for encryption shall not be stored with the State backup files and Data. The encryption process shall be performed and verified prior to shipping the files and data backups off-site. The State reserves the right to audit the back-up process at its discretion.
6.7.2-28 (existing)	The Contractor shall not transmit over any public or private Network unencrypted files or messages containing System Data unless <u>coordinated with and approved</u> by the State.
6.7.2-29	<u>Intentionally Left Blank</u>
6.7.2-30 (existing)	The Contractor shall give read only access for independent analysis and verification.
6.7.2-31 (existing)	The Contractor shall, at a minimum, be responsible for: 1. Managing security of logging Data and Equipment used for security logging services 2. Routine monitoring of security logs and to identify threats and trends 3. Recommending and/or taking immediate remedial action based on the severity of the threat
6.7.2-32 (existing)	The Contractor shall be responsible for defining, configuring, and monitoring security events and System notifications.
6.7.2-33 (existing)	The Contractor shall be responsible for managing all security incidents through its standard lifecycle that includes, but is not limited to: 1. Identification 2. Collection and preservation of evidence 3. Containment 4. Eradication 5. Recovery 6. Follow-up
6.7.2-34 (modified)	<u>At a minimum, the Contractor shall conduct semi-annual <u>System security</u> audits in accordance with the <u>System Security Plan and</u> as requested by the State Project Director or designee.</u>
6.7.2-35 (new)	The Contractor shall develop and execute Corrective Action Plans (CAP) and Plan of Action Milestone (POAM) tasking resulting from security audit findings at no additional cost to the State and in accordance with the Configuration Management Plan.
6.7.2-36 (existing)	Every six (6) months the Contractor shall accurately prepare and deliver a semi-annual briefing (presentation) and written summary to the State on the overall security of the System.
6.7.2-37 (existing)	The Contractor shall complete the annual Information Technology Executive Committee (ITEC) security assessment.
6.7.2-38 (existing)	The Contractor shall monitor and maintain security and privacy standards to protect consumer privacy and continually add best practices to ensure consumer privacy is consistently maintained.
6.7.2-39 (new)	The Contractor shall execute the initial implementation, update, or replacement of any and all standards, regulations, or codes on the project, including all Deliverables and Services, under the SDMO Fixed Price.
6.7.2-40 (existing)	The Contractor shall take the lead role and responsibility for ensuring <u>processes and tools</u> ~~Business Associate Agreements~~ are in place in order to exchange Personally Identifiable Information (PII) and <u>Protected</u> Health Information (PHI), following <u>State, CalHEERS, and Sponsor</u> ~~DHCS~~ policies, best practices, and HIPAA regulations. The <u>DHCS-State</u> will function as the Subject Matter Expert support with this requirement.
6.7.2-41 (existing)	The Contractor shall design, document, and implement a CalHEERS Risk-Based Security & Privacy Framework.

Req #	SOW Requirement
6.7.2-42 (existing)	The Contractor shall maintain the Information Collection for Automated Mapping (ICAM) service principles. The information shall include but not be limited to: 1. Identity Proofing: Provide a minimum set of administrative controls and requirements for identity proofing (user proofing who they say they are) and for periodic management of authenticators. 2. Authorization: Users will be assigned roles to ensure that they have access to data that is needed to get the job done and nothing more (least privilege). 3. Authentication: Enabling increasing complexity of authentication as the sensitivity of the System and Data increases including but not limited to password policies, automatic password expiration policies, etc. 4. In addition to implementing ICAM services, the CalHEERS Security and Privacy Framework shall consider appropriate accountability and nonrepudiation requirements for most critical transactions.
6.7.2-43 (existing)	The Contractor shall provide a CalHEERS Security and Privacy Framework that must consider necessary security provisions and controls on the cloud (public, community and private) through a thorough evaluation of the System and Data classification for the exchange on the cloud, determine the level of risk the stakeholder will <u>tolerate and that the Contractor will manage</u>, <u>defining an</u> appropriate managed services model that will support the implementation of multi-zone architecture and a secure infrastructure on the cloud.
6.7.2-44 (modified)	The Contractor shall provide a CalHEERS Security and Privacy Framework that must implement a data encryption mechanism for all Equipment, workstations and laptops that process and/or store PHI or PII shall be encrypted using FIPS 140-2 validated Software. The encryption solution shall be full-disk unless otherwise approved by the ISO.
6.7.2-45 (modified)	The Contractor shall provide a CalHEERS Security and Privacy Framework with a data encryption mechanism for all electronic files that contain PHI or PII data shall be encrypted using FIPS 140-2 validated Software when stored on any removable media or portable device (e.g., USB thumb drives, mobile phone, floppies, CD/DVD, Blackberry, backup tapes).
6.7.2-46 (existing)	The Contractor shall provide a CalHEERS Security and Privacy Framework that provides a data encryption mechanism for all transmissions and data-links sending PHI or PII data between the System and the Database Management System shall be encrypted using FIPS 140-2 validated Software.
6.7.2-47 (existing)	The Contractor shall provide a CalHEERS Security and Privacy Framework that uses the Public Key Infrastructure (PKI) that follows standard practices such as the use of accepted Certification Authorities, documented Certificate Policies, and Certificate Practice Statements which will include key escrow strategy. Implementation shall use fundamental technical standards such as X.509 certificate format and Public Cryptographic Standards. The PKI used across entities shall address interoperability requirements.
6.7.2-48 (existing)	The Contractor shall provide a CalHEERS Security and Privacy Framework that includes but is not limited to the following information to minimize loss and facilitate effective technology recovery: 1. Systems shall be "fail-safe" to ensure that the System in failed state doesn't reveal any Sensitive Information or leave any access controls open for attack. 2. Fully redundant network and Equipment components 3. Use offsite storage in the event of physical disaster 4. Build in contingencies for the storage of transactions where there is dependency on availability of data from business partners that provide authoritative data (e.g., the IRS, DHS, and SSA). 5. Leverage virtualization to expedite technology recovery.

Req #	SOW Requirement
6.7.2-49 (modified)	The Contractor shall provide or maintain a CalHEERS Security and Privacy Framework that, at a minimum, must support the following baseline oversight activities: 1. CalHEERS Security and Privacy Framework, shall define and implement appropriate process, tools, and technologies to integrate compliance oversight activities with the Operations Governance extending to partners like Covered California, and DHCS. 2. Ensure risk management is performed in accordance with NIST SP 800-37 guidance. 3. Ensure secured coding practices are implemented in the SDLC best practices to avoid common Software weaknesses and vulnerabilities. 4. Ensure documentation of necessary and appropriate privacy artifacts. 5. Serve as approval authority for accreditation of Systems and interconnections. 6. Enforce ongoing monitoring and periodic compliance reporting and providing evidence on the compliance levels of security and privacy requirements, data exchange and usage agreements. 7. Conduct System assessment. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
6.7.2-50 (existing)	The CalHEERS Security and Privacy Framework shall adopt the following privacy principle in guidance with the Federal DHHS: 1. Individual Access 2. Correction 3. Openness and Transparency 4. Individual Choice 5. Collection 6. Use and Disclosure Limitation 7. Data Integrity 8. Accountability
6.7.2-51 (existing)	The Contractor shall provide a Business Capability Matrix and a transformation roadmap for each CalHEERS Business Process Model that describes the MITA Maturity Model.
6.7.2-52 (existing)	The CalHEERS shall have the ability to time-out users using the web portal after a period of inactivity. The period of time shall be defined by the State.
6.7.2-53 (existing)	The Contractor shall conduct monthly physical security audits of selected requirements to ensure HIPAA compliance.
6.7.2-54 (existing)	The Contractor shall ensure that the State's third-party auditors shall have security access at the Contractor's Project worksite as authorized in writing by the State.
6.7.2-55 (existing)	The Contractor shall conform to the Sponsors Security Policies, CalHEERS Policies , and other relevant OTSI policies to ensure adherence to all State security policies, standards, and guidelines.
6.7.2-56 (existing)	The Contractor shall provide administrative access to designated and approved CalHEERS stakeholders.
6.7.2-57 (existing)	The Contractor shall provide single sign-on access to the CalHEERS System and subprograms (e.g., BPM tools).
6.7.2-58 (existing)	The Contractor shall update, deliver, maintain, and execute processes and procedures for monitoring and reporting attempts at unauthorized access to the System and/or application, in accordance with the System Security Plan.
6.7.2-59 (existing)	The Data Use Agreement (DUA) shall be developed by the Contractor's business owner and project manager and initiated in the design phase, continued throughout the development phase and test phase, and completed in the implementation phase.
6.7.2-60 (existing)	The DUA will be a legal binding agreement between a federal agency and an external entity (e.g., Contractor, private industry, academic institution, other federal government agency, or State agency), when an external entity requests the use of personally identifiable data that is covered by the Privacy Act of 1974.

Req #	SOW Requirement
6.7.2-61 (existing)	The DUA shall delineate the confidentiality requirements of the Privacy Act, security safeguards, and the federal agency's data use policies and procedures.
6.7.2-62 (existing)	The DUA shall serve as both a means of informing data users of these requirements and a means of obtaining their agreement to abide by these requirements.
6.7.2-63 (existing)	The DUA shall serve as a control mechanism through which the federal agency can track the location of its data and the reason for the release of the data.
6.7.2-64 (existing)	The DUA shall document the requirement that a System of Record Notice be in effect, which allows for the disclosure of the data being used.
6.7.2-65 (modified)	All Contractor and Subcontractor networks used to access or transmit CalHEERS Data shall include Intrusion Detection Systems including inbound and outbound communications traffic as required in the current Acceptable Risk Controls for Affordable Care Act (ACA), Medicaid, and Partner Entities (ARC-AMPE) that provide alerts in the event of cyberattacks and attempts at unauthorized access, including but not limited to: 1. Unauthorized Network Intrusion 2. Unusual or unauthorized activities or conditions 3. Breach of Information, including ~~data~~Data, electronic devices, portable media and inadvertent transmission of confidential, sensitive or personal information
6.7.2-66 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.7.2.2 System Security Briefing

Table 6-27: System Security Briefing

Req #	SOW Requirement
6.7.2-67 (modified)	The Contractor shall provide a System Security briefing (presentation) that includes, but is not limited to: 1. The current status of information security of the System. 2. New threats identified in the six (6) months prior. 3. Findings of the Contractor's Security and Confidentiality audits. 4. New information security-related laws, regulations or standards that shall accurately be met by the System. 5. Description of each information security incident that occurred in the prior six (6) months and what actions the Contractor has taken as a result of each incident.

6.7.2.3 Information Security Risk Assessment

The Information Security Risk Assessment is a key element of the overall CalHEERS enterprise security framework. The framework contains various security components that interact to achieve the core objectives of CalHEERS [security](#).

Table 6-28: Information Security Risk Assessment

Req #	SOW Requirement
6.7.2-68 (existing)	The Contractor shall accurately maintain an Information Security Risk Assessment Document that includes, but is not limited to: 1. Introduction 2. System Identification 3. Risks and Safeguards

6.7.2.4 Security Incident Report

The Security Incident Report is used to document any known, or suspected, lost or compromised Sensitive Information, as defined in the System Security Plan.

Table 6-29: Security Incident Report

Req #	SOW Requirement
6.7.2-69 (modified)	The Contractor shall provide a formal report to the State that describes the information security incident, the current status of the incident, and action taken within 24 hours of initial notification of an information security incident, including but not limited to: 1. What Data elements were involved, and the extent of the Data involved in the Breach; 2. A description of the unauthorized persons known or reasonably believed to have improperly used or disclosed Sensitive Information; 3. A description of where Sensitive Information is believed to have been improperly transmitted, sent, or used; 4. A description of the probable causes of the improper use or disclosure; and 5. Whether Civil Code Sections 1798.29 or 1798.82 or any other State or federal laws requiring individual notifications of Breaches are triggered.

6.7.2.5 Security Incident Reporting

Table 6-30: Security Incident Reporting

Req #	SOW Requirement
6.7.2-70	Intentionally Left Blank
6.7.2-71 (existing)	The Contractor shall immediately report to the State any and all unauthorized disclosures or uses of the State's Confidential Information of which it or its Staff is aware or has knowledge.
6.7.2-72 (existing)	The Contractor acknowledges that any publication or disclosure of the State's Confidential Information to others may cause immediate and irreparable harm to the State.
6.7.2-73 (existing)	If Contractor publishes or discloses such Confidential Information to others without authorization, the State shall immediately be entitled to injunctive relief or any other remedies to which it is entitled under law or equity without requiring a cure period.
6.7.2-74 (existing)	The State will immediately report to the Contractor any and all unauthorized disclosures or uses of Contractor's Confidential Information of which the State is aware or has knowledge.
6.7.2-75 (existing)	The State acknowledges that any publication or disclosure of the Contractor's Confidential Information to others may cause immediate and irreparable harm to the Contractor.
6.7.2-76 (existing)	If the State publishes or discloses such Confidential Information to others without authorization, the Contractor shall immediately be entitled to injunctive relief or any other remedies to which it is entitled under law or equity without requiring a cure period.
6.7.2-77 (existing)	The Contractor shall comply with State of California-required actions in response to a Breach that includes, but is not limited to: 1. Reporting timeframes 2. Reporting party 3. Research and investigation activities 4. Mitigation of the circumstances that resulted in the Breach

6.7.3 Safeguard Security Report

Table 6-31: Safeguard Security Report (CD-6.7-2)

Req #	SOW Requirement
6.7.3-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.7-2 – Safeguard Security Report, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents and Standards 1.3 Audience 2. SUMMARY 3. APPROACH 3.1 Backup Management 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. XXX 8. GLOSSARY AND ACRONYMS 18.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.7.3-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.7.3-03 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.7.3-04 (new)	The Contractor shall update the following appendices and attach them to the Data Retention, Backup and Recovery Plan: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance

Req #	SOW Requirement
	Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.7.3.1 Safeguard Security Report Execution

Table 6-32: System Security Report Execution

Req #	SOW Requirement
6.7.3-05 (new)	The Contractor shall staff, manage, lead, and execute all System Security activities on CalHEERS as defined in the Statement of Work and in accordance with the CD-6.7-2 – Safeguard Security Report.
6.7.3-06 (new)	The Contractor shall collaborate with the State to develop and maintain the Safeguard Security Report in compliance with IRS Publication 1075 Safeguard Security Report.
6.7.3-07 (existing)	The Contractor shall support, review and respond to findings based on the IRS Publication 1075 Requirements. -These activities will include, at a minimum: 1. Response to Safeguard Review findings 2. Corrective Action Plan 3. 45 Day Notification of New Subcontractor handling of FTI

6.8 DATA RETENTION, BACKUP AND RECOVERY

The Contractor is responsible for developing, maintaining, and executing CalHEERS data retention, archive, and purge activities, as outlined in the Operations Plan and Capacity Management Plan, that ensure that these activities meet CalHEERS business and technical requirements, and the CalHEERS service level needs.

Additionally, the Contractor is responsible for executing backup and recovery activities, as described in the Operations Plan, that meet CalHEERS business and technical requirements, and CalHEERS service level needs. CalHEERS data files are to be backed up on a regular schedule. At a minimum, noncritical files are to be recoverable to the end of the prior Day. Critical files are journalized to allow restoration up to the last committed transaction. All System maintained files are backed up in such a manner that allows for recovery to the end of the prior Day.

6.8.1 Data Retention, Backup and Recovery Plan

Table 6-33: Data Retention, Backup and Recovery Plan (CD-6.8-1)

Req #	SOW Requirement
6.8.1-01 (new)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.8-1 - Data Retention, Backup and Recovery Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents and Standards 1.3 Audience 2. SUMMARY 3. APPROACH 3.1 Backup Management 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. BACKUP AND RECOVERY PLAN 7.1 Production PostgreSQL Database 7.1.1 Automated Backups 7.1.2 Weekly DB Snapshot Backups 7.1.3 Cross Region Backups 7.1.4 Restore Management 7.2 Microsoft SQL Server Databases (ABE) 7.2.1 Backup Management 7.2.2 Restore Management 8. DATA WAREHOUSE (SNOWFLAKE) 9. TAPE BACKUPS AND RESTORATION 10. DATA RETENTION AND ARCHIVAL 11. DATA MANAGEMENT STRATEGY 11.1 Data Governance 11.1.1 Data Standards 11.1.2 Information Exchange Standards 11.1.3 Physical Data Design Standards 11.1.4 Data Management Standards for Security and Privacy 11.1.5 Data Governance Roles 11.1.6 Data Governance Processes 11.1.7 Data Governance Tools 11.2 Data Architecture 11.2.1 Data Movement 11.2.2 Storage Architecture 11.2.3 Master Data Management 11.2.4 Data Sharing Architecture 12. GLOSSARY AND ACRONYMS 12.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: CALHEERS DATA RETENTION POLICY INPUTS
6.8.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
6.8.1-03 (existing)	The Contractor shall adopt, enhance, and maintain within the Operations Manual, an approach to backup and restoration of System Data and source code.
6.8.1-04 (modified)	The Contractor shall provide and/or maintain a System Backup and Restoration Plan that includes, but is not limited to: 1. Approach for System Backup and Restoration, and managing Data during and after Project execution 2. Contractor, State Project staff and State roles and responsibilities 3. Processes and procedures 4. Data archiving plan 5. Data retention plan
6.8.1-05 (existing)	The Contractor shall adopt, enhance and maintain documentation in the electronic library through the end of the term of the Contract.
6.8.1-06 (existing)	The Contractor shall define, document and implement process tools and technologies for a comprehensive Data Management Strategy that include but are not limited to the following topics: 1. Data Governance 2. Data Architecture 3. Storage Architecture 4. Master Data Management 5. Data Sharing Architecture 6. Data Warehouse and Business Intelligence
6.8.1-07 (existing)	The Contractor shall provide a CalHEERS Conceptual Data Model that is designed, built, and maintained in compliance with NIEM and HL7 reference models.
6.8.1-08 (new)	The Contractor shall update the CD-6.8-1 - Data Retention, Backup and Recovery Plan Deliverable with the following additional content pertaining to data retention: 1. Subsections documenting Contractor processes for facilitating: a. An annual collaborative review of any inputs that may change the CalHEERS data retention policy. b. Ad Hoc collaborative reviews of changes to the CalHEERS data retention policy, upon the State's request. c. The methodology and tools used in the identification of data to be purged based on the CalHEERS Data Retention Policy. 2. A new appendix identifying specific data elements/groups in the queue for a scheduled purge (based on the policy) and/or changes needed to the current or future data retention purge schedule. 3. A new appendix that documents all the applicable inputs to the CalHEERS Data Retention policy (e.g., OTSI Data Retention Policy, Inter Agency Agreements, etc.).
6.8.1-09 (existing)	The Contractor shall document the CalHEERS Technical Capability Matrix to various MITA 3. Maturity Levels (MITA Maturity Model, MMM).
6.8.1-10 (new)	The State identifies and associates the following artifacts to the Data Retention, Backup and Recovery Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this Deliverable including, but not limited to: • 1Deloitte-CalHEERS Tape RaaS Solution Design • 2Deloitte-CalHEERS Tape RaaS Procurement and Build • 3 Tape Restore-as-a-Service Test Plan • 4Tape_Verification_Report • 5TRaaS Operational Runbook • 6NTT MS Patching Framework • 7Calheers Oracle 12c Documentation • AWS Aurora Backup and Recovery

Req #	SOW Requirement
	• CalHEERS Annual DR Test 2022_Timeline_Plan • CalHEERS Annual TRP Test 2024_Draft Plan • CalHEERS Overall Application Recovery Plan • DR Activity Capture Book • dr exercise rds screen shots • DR Simulation Test Report • dr-bcp-summary-salesforce-services • dr-testing-site-switching-summary • New Lambda Script_Prod2_HA_Validation_Screenshots • switcover_Version • UAT - DR_Testing
6.8.1-11 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.8.1-12 (new)	The Contractor shall update the following appendices and attach them to the Data Retention, Backup and Recovery Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.8.2 Data Retention, Backup and Recovery Execution

Table 6-34: Data Retention, Backup and Recovery Execution

Req #	SOW Requirement
6.8.2-01 (new)	The Contractor shall staff, manage, lead and execute all Data Retention, Backup and Recovery activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.8-1 – Data Retention, Backup and Recovery Plan.
6.8.2-02 (new)	The Contractor shall execute the annual and ad hoc collaborative reviews of the inputs that could change the CalHEERS data retention policy, and how the data retention policy is implemented .
6.8.2-03 (existing)	The CalHEERS System shall have the ability to backup, recover, restart, and cancel jobs.
6.8.2-04 (existing)	The Contractor shall restore Data from backup media within 24 hours or sooner if requested by State Project Director or designee.
6.8.2-05 (modified)	The Contractor shall encrypt the backup Data.
6.8.2-06 (modified)	The Contractor shall provide secure storage and transportation of the backup Data .
6.8.2-07 (existing)	The Contractor shall verify and validate that the moveable backup media are functional by testing the backup and restoration processes on a quarterly basis.
6.8.2-08 (modified)	In the event of a System outage , the Contractor shall recover all databases and transactions to the last fully processed transaction as they were before the loss of the System(s).
6.8.2-09 (modified)	In the event of a System outage and Data recovery , the Contractor shall support the State with validating the transactions.
6.8.2-10 (existing)	The Contractor shall ensure the Restoration of Databases must automatically process all possible transactions completed prior to the loss of the System.
6.8.2-11 (existing)	The Contractor shall ensure that all Backup Operations support the critical and essential business function identified by the State and shall allow for noncritical functions to be postponed or rescheduled.
6.8.2-12 (existing)	The Contractor shall ensure the System shall provide for all Databases to be completely restored as they were before the loss of the System.
6.8.2-13 (existing)	The Contractor shall be responsible for all System backups and restoration processes.
6.8.2-14 (existing)	The Contractor shall perform backups of the System without impacting the System Production environment's performance and/or availability.
6.8.2-15 (existing)	The Contractor shall utilize automated backup and restoration processes that require minimal human intervention.
6.8.2-16 (existing)	The Contractor shall deploy a secure backup and restoration solution to prevent unauthorized access to System data.
6.8.2-17 (modified)	The Contractor shall provide a backup Availability Zone that replicates the primary Availability Zone via continuous configuration management.
6.8.2-18 (modified)	The Contractor shall retain and manage complete copies of System software backups of the two most recent major versions at the backup Availability Zone.
6.8.2-19 (modified)	The Contractor shall develop and maintain a business resumption plan for recovering from a service outage at the primary Availability Zone and/or backup Availability Zone.
6.8.2-20 (modified)	The Contractor shall configure all network services to automatically failover to backup network service locations when an outage occurs.
6.8.2-21 (modified)	In accordance with the Data Retention, Backup and Recovery Plan , the Contractor shall keep current the System documentation, user documentation, and all program libraries related to technology recovery/business continuity planning and execution.
6.8.2-22 (modified)	The Contractor shall agree and adhere to the conditions of all applicable State and federal regulations which are incorporated herein by this reference, regarding retention and access requirements relating to all financial and programmatic records supporting documents, statistical records, and other records of this Contract.

Req #	SOW Requirement
6.8.2-23	<u>Intentionally Left Blank</u>
6.8.2-24	<u>Intentionally Left Blank</u>
6.8.2-25 (existing)	The Contractor shall keep all Records involving matters in litigation related to this Contract shall be kept for one (1) year following the resolution of any litigation, claim, financial management review or audit, including all appeals if the litigation has not terminated within ten (10) years from date of expiration of this Contract.
6.8.2-26 (existing)	The Contractor shall keep Records required to be maintained under HIPAA for ten (10) years from the date of creation or date when the action, activity or designation documented in the record was last in effect, whichever is later. All such records shall be subject at reasonable times and upon prior Notice to examination, inspection, copying, or audit by personnel so authorized by the State Project Director, or designee, and/or state and federal officials so authorized by law, rule regulation or Contract, when applicable.
6.8.2-27 (existing)	During the term of this Contract, access to these items will be provided within Sacramento County, California at all applicable State Project facility(ies).
6.8.2-28 (modified)	During the four (4) year period, after the final payment under the Contract or, after such four (4) year period, one (1) year following the resolution of any litigation, claim, financial management review or audit, delivery of and access to view these items at a site in Sacramento, California will be at no cost to the State.
6.8.2-29 (existing)	The Contractor shall be responsible for any audit exceptions or disallowed costs incurred by the Contractor or any of its Subcontractors, subject to the State's or the federal government's review and approval of such audit finding or exceptions, as applicable, and the Contractor's right to pursue the dispute resolution process in this Contract.
6.8.2-30 (existing)	The records retention and review requirements of this section shall be included by the Contractor in any of its subcontracts with Subcontractors.
6.8.2-31 (existing)	The State's personnel shall be accompanied by the Contractor's personnel at all times during any examination, inspection, review or audit.
6.8.2-32 (modified)	The Contractor shall <u>provide audit services and other support</u> in connection with an audit <u>at no additional cost to</u> the State.
6.8.2-33 (modified)	<u>The Contractor shall provide, upon the State's request, a copy of those nonconfidential portions of Contractor's and its Subcontractor's internal audit reports relating to the Services provided to the State under this Contract.</u>
6.8.2-34 (modified)	<u>In the event of a System outage and Data recovery,</u> the Contractor shall identify in process and last fully processed transactions and make the data available to designated State staff, who will validate the transactions.
6.8.2-35 (existing)	The Contractor shall maintain records and supporting documentation under audit or involved in litigation for a period of three (3) years, or as directed the State following the conclusion of the litigation or audit and the date that the State submits the last expenditure report to the Federal DHHS. The Contractor shall verify this period with the State prior to storing any Confidential Information.
6.8.2-36 (modified)	<u>When proposing a Data Retention, Backup and Recovery solution,</u> the Contractor shall <u>comply</u> with hosting and Data Center architecture requirements, standards, federal, <u>and</u> State regulations.
6.8.2-37 (existing)	The Contractor shall provide consultation and technical assistance on data analysis and methodology.
6.8.2-38 (existing)	The Contractor shall store all Data files that are transitioned to the Contractor. These files shall be stored in the back-end once the Data has been converted.
6.8.2-39 (existing)	The Contractor shall accurately retain backup copies in writing and on electronic media of all Deliverables until 180 days after termination or expiration of this Contract and shall accurately provide the State on its request with a copy thereof until that time.
6.8.2-40 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.9 DATA MANAGEMENT

The Contractor is responsible for the maintenance and assurance of the accuracy and consistency of the data over its entire life cycle. The Contractor will be updating the Data Integrity Plan to become a Data Management Plan in support of the broadening of associated solutions and services.

6.9.1 Data Integrity Plan [to be retitled as the Data Management Plan]

Table 6-35: Data Integrity Plan (CD-6.9-1) [to be retitled as the Data Management Plan]

Req #	SOW Requirement
6.9.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.9-1 - Data Integrity Plan (Data Management Plan), which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 1.4 Deliverable Hierarchy 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. FUNCTIONAL DATA INTEGRITY 7.1 PCAP Data Integrity Report 7.2 Data Warehouse 7.3 Enroller Portal 7.4 FPACT 8. DATABASE INTEGRITY 8.1 Data Governance 8.2 Data Architecture 8.3 Data Sharing Architecture 8.4 Data Backup and Recovery 9. DATA SECURITY AND CONTROLS 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.9.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
6.9.1-03 (new)	The Contractor shall update the CD-6.9-1 - Data Integrity Plan, retitling it the Data Management Plan, developing a DED for the updates per SOW Section 8.2.1 - DELIVERABLE EXPECTATION DOCUMENT (DED), and adding the State desired content necessary to define how CalHEERS' Data is collected, stored, maintained, and is used. Updates should include Data Architecture Diagrams, as wells as subsections and topics including but not limited to: • Data Governance - o Roles, responsibilities, and policies. • Data and analytics lifecycle management - o Strategic evolution of the data and analytics program - o Evolution of the data platform - o Ad-hoc requests and analyses • Data collection and ingestion - o Alignment with source system changes through ongoing CR processes - o Sources, formats, and validation • Data storage and security - o Encryption - o Backup, archiving, retention periods, disposal - o Data usage constraints • Data quality, integrity and validation - o Extract, Transform & Load (ETL) Process and error handling • Data reporting and usage - o Tools and analytics frameworks • Metadata Management - o Cataloging and data lineage • Access control - o Role based access and permissions • Audit trails - o Monitoring of data modification • Validation Processes - o Ensuring Data accuracy and completeness • Error prevention, detection & correction • Change management and version control • Compliance & regulatory standard adherence
6.9.1-04 (new)	The Contractor shall collaborate with the State to align, integrate, and reference applicable guidance into the Data Management Plan from the following strategy documents: • CalHHS IT and Data Strategic Plan (latest version) • Covered California Strategic Plan & Data Strategy (latest versions) • DHCS Strategic Plan & Data Strategy (latest versions)
6.9.1-05 (new)	The State identifies and associates the following artifacts to the Data Integrity Plan (Data Management Plan). The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • AWS Aurora Backup and Recovery • Asset Management Tool Upgrade Maintenance Plan • Oracle FDW Setup between Postgres DB to Oracle DB
6.9.1-06 (new)	The Contractor shall update the CD-6.9-1 - Data Integrity Plan (Data Management Plan), with a new section that describes the Contractor's processes for ensuring Data Quality in reporting data, applicable to both core reporting and reporting related to systems like Google Analytics, including, but not limited to: • Data validation and cleansing • ETL • Monitoring & auditing • Data Governance

Req #	SOW Requirement
6.9.1-07 (new)	The State identifies and associates the following artifacts to the Data Integrity Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Data Integrity Report
6.9.1-08 (new)	The Contractor shall update the following appendices and attach them to the Data Integrity Plan (Data Management Plan): Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.9.2 Data Management Execution

Table 6-36: Data Management Execution

Req #	SOW Requirement
6.9.2-01 (new)	The Contractor shall staff, manage, lead and execute all Data Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.9-1 – Data Integrity Plan (Data Management Plan).
6.9.2-02 (existing)	The System shall ensure data management and consistency through the life of the CalHEERS Data.
6.9.2-03 (existing)	The Contractor shall check critical databases and files for corruption and data integrity prior to backup.

Req #	SOW Requirement
6.9.2-04 (existing)	The System shall provide data retrieval tools enabling authorized users to retrieve archived records from the archive database and restore them to the database while preserving data integrity across the System's relational databases.
6.9.2-05 (existing)	The Contract shall conduct data processing audits to examine the controls within the CalHEERS IT infrastructure, via collection and evaluation of the systems, practices, and operations in place to properly safeguard assets, maintain data integrity, and operate effectively and efficiently.
6.9.2-06 (modified)	The Contractor shall ensure data integrity of the <u>Database Management System (DBMS)</u> , including, but not limited to, the use of appropriate integrity constraints for entity integrity, domain integrity, and referential integrity.
6.9.2-07 (new)	The Contractor shall develop and maintain detailed Data Governance Diagrams and related documentation for all of CalHEERS, identifying the transmission, sharing, or use of data between two or more agencies. These diagrams must clearly depict the following, but not limited to: • Data flow paths • Data ownership delineation • Data security responsibilities • Data classification (e.g., public, confidential, sensitive) • Data usage and storage locations • Data access permissions and controls
6.9.2-08 (new)	All Data Governance Diagrams and practices must comply with the latest State-mandated information security policies, federal data protection laws, and relevant industry best practices (e.g., NIST Cybersecurity Framework, ISO 27001).
6.9.2-09 (new)	Prior to any the implementation of inter-agency data exchanges, the Contractor shall submit all Data Governance Diagrams, and associated documentation, to the State Technical, Contracts, and Information Security teams for review and written approval. No inter-agency Data transmission may occur without formal State approval.
6.9.2-10 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.10 TECHNOLOGY RECOVERY

The Contractor is responsible for developing, maintaining, and executing a Technology Recovery Plan (TRP) that meets CalHEERS technical requirements, business continuity and service level needs. Technology Recovery is required when there is a loss of an enterprise processing facility, (e.g., loss of the System function due to a major catastrophe such as fire, earthquake, explosion, or flood). Successful recovery requires that the System and application are available and that the users can perform the same business activities as before the disaster. Technology Recovery activities shall be maintained and executed in accordance with SIMM 5325-A, Technology Recovery Plan Instructions. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.

6.10.1 Technology Recovery Plan

The Technology Recovery Plan (TRP) documents how, in the event significant loss of the enterprise environment, the operational System functions can be successfully recovered. Successful recovery assumes that the System is available and that end users can perform the same business activities as prior to the disaster.

A successful demonstration, as determined by the State, shall be considered a key decision criteria factor for Implementation/Go-Live. Failure to successfully demonstrate the procedures

may be considered grounds for termination of this Contract. The State reserves the right to waive or defer part or all of the demonstrations.

Table 6-37: Technology Recovery Plan (CD-6.10-1)

Req #	SOW Requirement
6.10.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.10-1 - Technology Recovery Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.2 Recovery Team Roles and Responsibilities 7. SYSTEMS MANAGEMENT 7.1 Network 7.2 Server 7.3 Backup and Restore 7.4 Data and Database 8. TECHNOLOGY RECOVERY PLAN 8.1 Notification Phase 8.1.1 Identification 8.1.2 Notification 8.1.3 Disaster Declaration 8.1.4 Declared Disaster 8.2 Activation Phase 8.3 Build Verification 8.3.1 Infrastructure Recovery Priority Sequencing 8.3.2 Infrastructure and Application/Tool Ranking 8.4 Functional Test 8.5 Turnover 8.5.1 Return to the Primary Availability Zone 8.6 Hosting Site Review Procedures 9. DAMAGE ASSESSMENT REPORT 9.1 Post Disaster Review 10. DATA RESTORATION/ASSESSMENT PLAN 11. MAINTAINING THE TECHNOLOGY RECOVERY PLAN 11.1 Yearly Updates 11.2 On Going Maintenance 11.3 Testing TRP - Exercise 12. GLOSSARY AND ACRONYMS 12.1 New Acronyms and Terms 13. APPENDICES 13.1 Appendix 6.11-1.1: SOW to Deliverable Traceability Checklist 13.2 Appendix 6.11-1.2: Disaster Recovery Contact List 13.3 Appendix 6.11-1.3: Associated Artifacts 13.4 Appendix 6.11-1.4: CMT Checklist

Req #	SOW Requirement
	13.5 Appendix 6.11-1.5: CMT Call Tree 13.6 Appendix 6.11-1.6: Initial Damage Assessment Checklist 13.7 Appendix 6.11-1.7: Damage Assessment Form 13.8 Appendix 6.11-1.8: Overall Application Recovery Plan 13.9 Appendix 6.11-1.9: Technology Recovery Exercise Packet 13.10 Appendix 6.11-1.10: Deliverable and IEEE Reference Standards 13.11 Appendix 6.11-1.11: CalHEERS AWS Architecture Diagram APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.10.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.10.1-03 (modified)	The Contractor shall successfully recover, also documenting within the TRP the details on how this is to be tested and accomplished, upon complete or significant loss of the enterprise environment, the critical operational application functions to the end of business on the prior Business Day within four (4) calendar days, and noncritical application functions within six (6) calendar days, of a disaster.
6.10.1-04 (existing)	The Contractor shall provide a TRP or a reasonable summary thereof to enable the State to verify the sufficiency of such Plan and shall be made available to the State for review upon the State's request.
6.10.1-05 (modified)	The Contractor shall prepare the Technology Recovery Plan Results Deliverable in accordance with ISO/IEC/IEEE 15289 – Systems and software engineering – Content of life cycle information items (documentation), second edition (10.69 - Service continuity and availability plan) pertaining to Technology Recovery Planning and Testing. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
6.10.1-06 (new)	The State is consolidating a number of Deliverable(s) under the Technology Recovery Plan and reclassifying them as <u>artifacts</u>. The Contractor shall adopt, update, maintain, and deliver these artifact(s) in association with this Deliverable, as defined in Appendix 3. The artifacts will be submitted in the following format at the request and frequency indicated by the State: • Damage Assessment Report • Technology Recovery Plan Results • Adding comp and env in LaunchPad • Adding Deleting Recipients in Outage email • Batch Modernization Roadmap • Batch_Categorization • Bi Annual Password Change Activity • Build and deployment Lifecycle • CalHEERS OSS Sustaining Existing Platform SOP • CalHEERS OSS Sustaining Existing Platform SOP (DLT rev IVV Cmts) • component vs domain deployment • components vs prod servers • Create and delete label in LP • Damage Assessment Report • Data Refresh in Non Prod Environments • DATA RESTORATION/ASSESSMENT PLAN • Deployment to non-prod environment • Deployment to prod environment • Deployment-step-config in LP • Disaster Recovery Contact List • Enroller Portal SF environment details

Req #	SOW Requirement
	• How To create a Branch in Gitlab • How to create a merge request • How To create a Tag • How to Set up MINGW64 (Git bash) and Generate an SSH Key • LP components - Inventory - Updated • Reverting Deployment in Launchpad • Running Queries in EWM • SOP- Salesforce Env Process • Technology Recovery Plan Test Results • Tools Integration • Tools Restart • Updating the environment in Jenkins Build Validation job • Web hook configuration details • WebLogic_Patching_JanCPU
6.10.1-07 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.10.1-08 (new)	The Contractor shall develop the following appendices and attach them to the Technology Recovery Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.10.2 Technology Recovery Execution

Table 6-38: Technology Recovery Execution

Req #	SOW Requirement
6.10.2-01 (new)	The Contractor shall staff, manage, lead, and execute all technology recovery activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.10-1 – Technology Recovery Plan.
6.10.2-02 (modified)	At least annually or more frequently as may be conducted, the Contractor shall provide <u>a report</u> to the State <u>to include, but not be limited to:</u> 1. <u>With the details of the work performed in the review, including the Contractor's auditors' report or any other findings</u> applicable to the State's business; and ~~4.2.~~ <u>any other review conducted by a third party, including, without limitation, regulatory agencies, public or private certification entities such as the International Standards Organization, but excluding such reviews conducted by other customers of the Contractor.</u>
6.10.2-03 (new)	The Contractor shall include in the Technology Recovery Plan detailed steps to recover the entire CalHEERS System including interfaces to all external services ~~to a non-west coast cloud region.~~
6.10.2-04 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
<u>6.10.2-05</u> (new)	<u>The Contractor shall design and maintain System architecture and Data protection mechanisms that ensure critical Data can be recovered to a point no greater than fifteen (15) minutes prior to any unplanned outage or System disruption. Backup and replication processes shall be sufficient to meet this recovery point and protect against data loss in accordance with State and federal security requirements.</u>
<u>6.10.2-06</u> (new)	<u>The Contractor shall ensure that critical System functionality can be restored and made operational within one (1) hour following an unplanned outage or declared disaster. The Contractor's disaster recovery and continuity plans shall demonstrate how System restoration within this timeframe will be achieved and verified through regular testing and documentation.</u>

6.10.3 Technology Recovery Plan Results

The Technology Recovery Plan Results documents the detailed results of the Technology Recovery Plan exercise.

Table 6-39: Technology Recovery Plan Results

Req #	SOW Requirement
6.10.3-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CalHEERS Technology Recovery Plan, which includes but is not limited to: 1. Executive Summary 2. Overview: 2.1 Simulation and Recovery Activities 2.2 TR Validation Activities 2.3 Switch Back Database to Primary Zone Activities 2.4 Goal and Objectives 2.5 Schedule 2.6 Outcome 2.7 Recovery Site Information 2.8 Risks, Issues and Concerns Prior to Exercise or Event 3. Action Items and Status 4. Goals and Objectives for the Next Technology Recovery Plan exercise 5. New Items included in current Technology Recovery Plan exercise

Req #	SOW Requirement
	6. New Items planned for the Next Technology Recovery Plan exercise 7. Technology Recovery Plan exercise procedures completion information 8. Risk Remediation and Mitigation 9. Lessons Learned 10. Glossary and Acronyms 10.1 New Acronyms and Terms

6.11 BUSINESS CONTINUITY

The Business Continuity Plan documents how, upon significant loss of the enterprise environment, the Contractor will support the CalHEERS Business Continuity activities. Successful recovery means that the System is available and that end users can perform the same business activities as prior to the disaster.

6.11.1 Business Continuity Plan

Table 6-40: Business Continuity Plan (CD-6.11-1)

Req #	SOW Requirement
6.11.1-01 (modified)	The Contractor shall adopt, enhance, deliver, maintain and execute the CD-6.11-1 - Business Continuity Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.1.1 Contractor Roles and Responsibilities 6.1.2 State Roles and Responsibilities 7. BUSINESS CONTINUITY PLAN AND SYSTEM RISK MANAGEMENT PLAN 7.1 Business Continuity Plan Phases and Activities 7.1.1 Initiation Phase 7.1.2 Notification Phase 7.1.3 Activation Phase 7.1.4 Return to Normal Operation 7.2 Assessment and Analysis 7.2.1 Risk Assessment 7.2.2 Business Impact Analysis 7.3 Business Continuity Plan Maintenance 8. GLOSSARY AND ACRONYMS 8.1 New Terms and Acronyms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS

Req #	SOW Requirement
	APPENDIX 4: STANDARDS MAPPING - ISO/IEC/IEEE 16085-2021 8.1-RISK MANAGEMENT PLAN
6.11.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.11.1-03 (<u>modified</u>)	The Contractor shall update the business continuity/technology recovery processes and procedures in the Operations Plan and present for review and Acceptance to the State Project Director or designee on annual basis.
6.11.1-04 (existing)	The Business Continuity Plan or a reasonable summary thereof to enable the State to verify the sufficiency of such Plan, will be made available to the State for review upon the State request. At least annually or more frequently as may be conducted, the Contractor shall provide to the State a copy: (i) to the extent they perform such review, the Contractor's auditors' report, or portions thereof applicable to the State's business; and (ii) any other review conducted by a third party, including, without limitation, regulatory agencies, public or private certification entities such as the International Standards Organization, but excluding such reviews conducted by other customers of the Contractor. The State acknowledges that such reports provided by Contractor under this Section shall be considered the Contractor's Confidential Information. Provided, however, the State may disclose such reports to the auditors and regulators having jurisdiction over the CalHEERS System.
6.11.1-05 (modified)	The Contractor shall include in the Business Continuity Plan a System Risk Management Plan. The System Risk Management Plan shall include, but not be limited to: 1. Risk analysis and risk mitigation for each core business process 2. Potential System failures for each core business process 3. Common-sense activities that reduce the risk of disruption to business unit operations, regardless of the likelihood of a disruptive event 4. Handling of critical business unit information (electronic or not) 5. Response team coordination 6. Integration with other continuity planning efforts
6.11.1-06 (existing)	The Contractor shall update the Risk Management Plan in accordance with current ISO/IEC 16085:2006, IEEE Std 16085-2006 – Systems and software engineering - Life Cycle Processes - Risk Management (Annex A-Risk Management Plan).
6.11.1-07 (new)	The State identifies and associates the following artifacts to the Business Continuity Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • CalHEERS Annual DR Test AI List • DR_UAT_Validations • DR activity 2024 - CloudOps Screenshots and Validations • DR_Activity_Network_Security • SysOps DR AZ validations • Update DW Configs to Use current end points
6.11.1-08 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.11.1-09 (new)	The Contractor shall update the following appendices and attach them to the Business Continuity Plan: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable)

Req #	SOW Requirement
	4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.11.2 Business Continuity Execution

Table 6-41: Business Continuity Execution

Req #	SOW Requirement
6.11.2-01 (new)	The Contractor shall staff, manage, lead, and execute all Business Continuity activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.11-1 – Business Continuity Plan.
6.11.2-02 (modified)	<u>In accordance with the Business Continuity Plan,</u> the Contractor shall successfully <u>execute</u> a complete test of the business continuity/technology recovery procedures once every two (2) years.
6.11.2-03 (existing)	The Contractor shall conduct a desktop simulation of the business continuity/technology recovery procedures once every two (2) years alternating with the complete test.
6.11.2-04 (existing)	The Contractor shall administer business continuity/technology recovery procedures through the Term of the Contract in the event of a disaster.
6.11.2-05 (modified)	The Contractor shall demonstrate <u>and report</u> to the State Project Director or designee on an annual basis that all business continuity/technology recovery components, procedures and activities described in the <u>Business Continuity Plan and</u> Operations Plan have been fully tested.
6.11.2-06 (modified)	The Contractor shall conduct <u>business continuity</u> tests and demonstrations <u>of the alternate facility</u> and shall include but not be limited to: 1. Procedures and activities to support <u>backup site facility</u> becoming functional 2. Procedures and activities to support the <u>alternate facility</u> becoming functional
6.11.2-07 (existing)	The Contractor shall have System application and Data available at all times for production use at the <u>backup facility</u> .
6.11.2-08 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.12 SYSTEM ENVIRONMENTS

The Contractor is responsible for managing and maintaining the CalHEERS architecture and environments, which include the Production, Test, Training and Development environments, to meet CalHEERS business and technical requirements and System service level needs. The Contractor is responsible for ensuring that the CalHEERS architecture and environments support the CalHEERS data processing needs and provides a stable and flexible System to meet the ever-changing program needs.

6.12.1 System and Training Environments

The Contractor shall perform the Training Environment services described in this section.

Table 6-42: Training Environment

Req #	SOW Requirement
6.12.1-01 (existing)	The Contractor shall provide the Training and UAT environments accessible via the internet.
6.12.1-02 (modified)	The Contractor shall ensure that the Training Environment User's Guide shall be prepared in accordance with ISO/IEC 14764 IEEE Std 14764-2006 - Software Engineering – Software Life Cycle Processes - Maintenance (7.3.3 -Maintenance Plan Topics) and ISO/IEC/IEEE 15289, Second Edition 2015-05-15 (10.38 - Installation Plan) pertaining to end user training. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
6.12.1-03 (modified)	The Contractor shall maintain the Training Environment Technical Guide in accordance with ISO/IEC 14764 IEEE Std 14764-2006 – Software Engineering – Software Life Cycle Processes – Maintenance (7.3.3 - Maintenance Plan Topics) and ISO/IEC/IEEE 15289, Second Edition 2015-05-15 (10.38 - Installation Plan) pertaining to end user training. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
6.12.1-04 (existing)	The Contractor shall provide on-line testing environments that support unit, System, integration, regression and parallel testing, prototype development and that replicate the full functionality of the production environment.
6.12.1-05 (existing)	The Contractor shall ensure and demonstrate that the test environments meet Production capability but do not affect Production performance or Data.
6.12.1-06 (modified)	The Contractor shall be responsible for hosting and providing technical support for the required quantity and specifications of State UAT environments, as directed by the State Project Director or designee.
6.12.1-07 (existing)	All environments shall operate independently allowing for maintenance or any administrative operations on any environment to not impact or be impacted upon by other environments.
6.12.1-08 (existing)	The Contractor shall maintain the UAT environments with at least the Production version of the System code unless requested otherwise by the State Project Director or designee.
6.12.1-09 (existing)	The Contractor shall manage and support batch schedules for UAT environments which may be different from the Production environment batch schedules. Specific requests from the State Project Director or designee for the UAT batch scheduler run cycles shall be executed within two (2) hours.
6.12.1-10 (existing)	The Contractor shall be responsible for hosting and providing technical support for a State training environment.
6.12.1-11 (existing)	The Contractor shall make training environments accessible to designated State Project staff.
6.12.1-12 (existing)	The Contractor shall maintain training environments with at least the Production version of the System code or one version earlier unless requested otherwise by the State Project Director or designee.

Req #	SOW Requirement
6.12.1-13 (existing)	The Contractor shall manage and support batch schedules for Training environment. Specific requests from the State Project Director or designee for the training batch scheduler run cycles shall be executed within two (2) hours.
6.12.1-14 (existing)	The Contractor shall continue to provide a Production loaded test environment that includes CalHEERS System data to support testing of data fixes prior to their deployment in Production.
6.12.1-15 (existing)	The Contractor shall provide a copy of full Production Data, partial Production Data, and/or Data sets representative of operational complexity in the UAT environments as determined by the State.
6.12.1-16 (existing)	The Contractor shall maintain the test data within the UAT environments and utilize strict and consistent configuration management practices in support of UAT Data management.
6.12.1-17 (existing)	The Contractor shall have the ability to copy and restore UAT data and code as requested by the State.
6.12.1-18 (existing)	The Contractor shall synchronize, and clean-out, the reference tables within the UAT environments with Production reference tables, as requested by the State Project Director or designee.
6.12.1-19 (modified)	The CalHEERS System shall provide an operational environment to run the batch for Ops Copy segmented from Production.

6.13 SYSTEM PERFORMANCE

The Contractor is responsible for monitoring, tuning, and applying corrections to CalHEERS, in accordance with SLAs, the Capacity Management Plan, and the Operations Plan, to ensure that CalHEERS performance meets CalHEERS business and technical requirements, and System service level agreements.

Refer to Attachment A-2.3, SERVICE LEVEL AGREEMENTS AND LIQUIDATED DAMAGES for liquidated damages associated with these requirements.

6.13.1 System Performance Plan

Table 6-43: System Performance Plan (CD-6.13-1)

Req #	SOW Requirement
6.13.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.13-1 - System Performance Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. Req #	SOW Requirement
6.13.1-07 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.13.1-08 (new)	The Contractor shall update the following appendices and attach them to the System Performance Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.13.2 System Performance Execution

Table 6-44: System Performance Execution

Req #	SOW Requirement
6.13.2-01 (new)	The Contractor shall staff, manage, lead and execute all System Performance activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.13-1 – System Performance Plan.
6.13.2-02 (modified)	Following receipt of Notice from the Contractor that Confirmation has occurred for the System and Hosting Services, the State shall perform all necessary Acceptance Tests to determine whether the System and Hosting Services perform without Deficiency.
6.13.2-03 (existing)	The Contractor shall assist the State as reasonably requested by the State in writing (including e-mail) in performing such acceptance tests at no additional cost to the State.

Req #	SOW Requirement
6.13.2-04 (modified)	The Contractor shall be responsible for tuning and optimizing the performance of the System, as directed by the State Project Director or designee, including but not limited to, efficiencies and system performance based on: - Updated industry standards - Updated security standards - Best practices as defined within the CalHEERS Project
6.13.2-05 (existing)	The Contractor shall conduct periodic and on-request performance tests, analyze issues and take corrective actions to operate the System at optimal levels of performance through the term of the Contract.
6.13.2-06 (modified)	The Contractor shall monitor CPU utilization, network bandwidth consumption, Data storage usage and all other factors and resources that impact System performance for all Contractor and Contractor managed hosting and Equipment on a continuous basis during the term of the Contract and shall provide additional System resources.
6.13.2-07 (existing)	The Contractor shall make available to the State all data gathered for CPU utilization, network bandwidth consumption, Data storage usage and all other factors and resources that impact System performance.
6.13.2-08 (modified)	The Contractor shall deploy and utilize performance monitoring and failure alert tools.
6.13.2-09 (modified)	The Contractor's performance monitoring tools shall also be made available to designated State Project staff to allow unrestricted access to the performance monitoring and failure alert data.
6.13.2-10 (existing)	The Contractor shall make the performance monitoring and failure alert tool available to additional parties for independent analysis and verification as requested by the State Project Director or designee.
6.13.2-11 (existing)	The Contractor's performance monitoring and failure alert tools shall not adversely impact the CalHEERS System and/or Network performance and availability.
6.13.2-12 (modified)	The Contractor shall be responsible for strategic and tactical planning of hosting services, data (including but not limited to Data storage and Data synching among CalHEERS elements), access, access security, port management, and Network device configurations to meet performance requirements.
6.13.2-13 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.14 SYSTEM HARDWARE/SOFTWARE

The Contractor has the responsibility for purchasing, hosting, installing, maintaining, refreshing, and/or tracking the assets that make up the CalHEERS. The State retains the option of purchasing Hardware and Software external to the Contract, to be determined at the time of purchase.

6.14.1 Hardware and Software Inventory Management

The CalHEERS Hardware and Software Inventory Management Plan documents the inventory of all CalHEERS and Software purchased by the Contractor.

Table 6-45: Hardware and Software Inventory Management Plan (CD-6.14-1)

Req #	SOW Requirement
6.14.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.14-1 - Hardware and Software Inventory Management Plan, which includes but is not limited to: 1. INTRODUCTION

6.14.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.14.1-03 (modified)	The Contractor shall include an approach to change management support for State and Contractor and Software upgrades, Change Requests (CRs) and System releases.
6.14.1-04 (modified)	The Contractor shall accurately document the description of all Services and Service elements needed to support CalHEERS in the cloud. The Plan must include but not be limited to: 1. Configuration schematic showing all equipment, facilities, locations. 2. Description of all storage and available capacity and owner. 3. Projected response times using the Production environment and associated calculations. 4. Contingency plans for acquisition and installation of all elements in case of schedule delay. 5. The detailed maintenance contracts for all cloud accounts and elements (where applicable).
6.14.1-05 (modified)	The Contractor shall provide all details in the format requested by the State of ongoing inventory and asset management activities in the Hardware and Software Inventory Management Plan and associated work products.
6.14.1-06 (modified)	The Contractor shall provide inventory and asset management services from procurement through disposal or destruction of all CalHEERS assets based on federal and State requirements, including, but not limited to, all data retention media, laptops, monitors, and other data processing and storage devices.
6.14.1-07 (existing)	The Contractor shall develop the processes required to conduct inventory and asset management.
6.14.1-08 (existing)	The Contractor shall adopt, enhance and maintain specified documentation and reports for Software inventory management and Software license compliance.
6.14.1-09 (new)	The Contractor shall update the CD-6.14-1 - Hardware and Software Inventory Management Plan to identify the process and procedures for addressing Hardware or Software that approaches an end-of-life state, including the necessary reporting, current and historical tracking (of hard drive destruction, inventory kept on hand, and final disposition of each item in inventory), and storage of surplus items for use as backup inventory for project team use as defined by the State.
6.14.1-10 (modified)	The Contractor shall provide periodic reporting, detailing updates to the Hardware and Software asset base in the format requested by the State. Reporting of the asset base must be automated to provide customizable levels of detail. For example, there may be ten lines for an item in the system of record (one to indicate maintenance costs and another specific to license costs). The reporting must allow a high-level version of the report, listing simply each individual item (vendor or product title) with total counts currently in use, currently available, and current costs.
6.14.1-11 (modified)	The Contractor shall update and maintain the CalHEERS Hardware and Software Inventory System Documentation in accordance with ISO/IEC 12207, IEEE Std 12207-2008 - Systems and software engineering – Software life cycle processes (6 - System Life Cycle, 7-Software Specific Processes), ISO/IEC/IEEE 15289 - Systems and Software Engineering – Content of life cycle information items (documentation), Second Edition (10.5- Asset management plan), and NIST SP 800-37, Rev. 2 – Risk management framework for information systems and organizations (destruction). As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.

Req #	SOW Requirement
6.14.1-12 (new)	The Contractor shall, in collaboration with the State, update the Hardware and Software Inventory Management Plan (CD-6.14-1) to include an additional subsection that addresses the pricing and payment approach for the HW/SW Bill of Material (BOM). This new subsection shall be titled as Cost Payment Methodology for HW/SW, and include but not be limited to the following topics: • Cost Payment Methodology for HW/SW 1 Fixed Budget Pricing 2 Payment for HW/SW Bill of Material (BOM) 3 Determination of <u>True Cost</u> ~~Actual Cost~~ 4 Tools and Reporting of HW/SW BOM Costs 5 Other Considerations
6.14.1-13 (new)	The State identifies and associates the following artifacts to the CD-6.14-1 - Hardware and Software Inventory Management Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • Technical Asset Inventory Reports (modified) • 6.15-F1 - Request for Quote Form • 6.15-F2 - EULA Questionnaire Form • 6.15-F2 - EULA Template Form • 6.15-F3 - Purchase Detail Form • 6.15-O1 - FlexNet Manager Suite System Operations Manual • 6.15-O2 - 2021 FlexNet Operations Manual • 6.15-O5 - CalHeers Campus Rack Diagram As of 11.1.2021 • 6.15-P1 - CA State Administrative Manual Section 5900 - Disposal of IT Equipment and Supplies Process Guide • 6.15-P2 - Equipment Moves Within Facility Process Guide • 6.15-P3 - Desktop Support Annual Audit Process Guide • 6.15-P4 - Desktop Support Flexera Actions Process Guide • 6.15-P5 - Flexera Daily Backup and Recovery Process Guide • 6.15-P6 - Flexera Pre-Implementation Checklist Process Guide • 6.15-P6 - FNMP Pre-Implementation Checklist Process Guide • 6.15-P7 - Lost and Stolen Assets Process for CalHEERS Campus Process Guide • 6.15-T1 - Flexera Accessing Reports Process Training Guide • 6.15-T2 - Flexera Building Custom Views Process Training Guide • 6.15-T3 - Flexera Application Management Process Training Guide • 6.15-T4 - Flexera License Reconciliation Process Training Guide • 6.15-T5 - Flexera Hardware Asset Management Process Training Guide • 6.15-T6 - Flexera Contract Management Process Training Guide • 6.16-F3 - Purchase Detail Form • 6.16-T7 - Flexera Training Agenda Process Guide • 6.19-P1 - Pulling Reports from Flexera Process Guide • AM Invoicing Process Guide • AM Quote Process Guide • AM role inEWM Process Guide • Appendix A 2.0 - CalHEERS OSS Inventory Tracker • ARIN renewal Process Guide • CalHEERS O365 & SP Password Reset Guide • Flexera Database Change Process Guide • Flexera Management Process Guide for Desktop Support Team • Flexera Training Agenda Process Guide • HWSW RFQ Template • Microsoft Distribution List Process Guide

6.14.1-14 (modified)	The Contractor shall update the CD-6.14-1 – Hardware and Software Inventory Management Plan Deliverable with the process for development and maintenance of the Technical Asset Inventory Report (Hardware & Software).
6.14.1-15 (new)	The Contractor shall develop, adopt and maintain a new Project Artifact, that will support the maintenance of all Software in the CalHEERS in compliance with the N-1 requirement defined within this SOW section 6.14.1, HARDWARE AND SOFTWARE INVENTORY MANAGEMENT.
6.14.1-16 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.14.1-17 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
6.14.1-18 (new)	The Contractor shall update the following appendices and attach them to the Hardware and Software Inventory Management Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency

Req #	SOW Requirement
	7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.14.2 System Hardware/Software Execution

This section includes the requirements for the [Hardware and Software Inventory Management Plan](#).

Table 6-46: System Hardware/Software Execution

Req #	SOW Requirement
6.14.2-01 (new)	The Contractor shall staff, manage, lead and execute Hardware and Software planning, procurement, installation, configuration, maintenance, and tracking via HW/SW Inventory activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.14-1 – Hardware and Software Inventory Management Plan.
6.14.2-02 (existing)	The Contractor shall connect the Equipment of State's Sites and Facilities to the Network in accordance with the Specifications and work plan.
6.14.2-03 (modified)	As part of requirements to keep CalHEERS Software at most one version level lower than the latest available version from its manufacturer, the Contractor shall maintain: 1. An Asset Management Software (AMS) platform that enables the real-time discovery and management of Software assets across the CalHEERS Project and platform. 2. A tool that provides real-time data on the latest version available from each Software's manufacturer, identifying the iterative changes in recent years. 3. AMS tool reports which provide the current version of all installs on all environments and equipment across the project and the associated current version available from the manufacturer, identifying the number of iterative changes between. 4. Tracking of plans and dates for updates and justifications for items that are not compliant. 5. All reporting shall be done on items in a uniform way that allows simple-as-possible traceability from AMS to reports to tracking systems for change requests and related tracking and Tech Refresh reporting to detail documents to invoices, etc. Often vendors use different naming for a product than the project uses, so traceability is important for consolidation and review of the big picture in an AMS tool and reports.
6.14.2-04 (existing)	The Contractor shall maintain an AMS platform that provides desktop to datacenter Software asset management functionality, including surveys of Software installations and usage.
6.14.2-05 (existing)	The Contractor shall maintain an AMS platform that provides purchased versus installed license reconciliation.
6.14.2-06 (new)	The Contractor shall provide license reconciliation reporting to the State with any purchase requests for additional licenses.
6.14.2-07 (existing)	The Contractor shall maintain an AMS platform that enables the Contractor to identify and evaluate areas of compliance concern and take required actions when warranted.
6.14.2-08 (existing)	The Contractor shall maintain an AMS platform that integrates with the Information Technology Systems Management platform's Configuration Management Database application.
6.14.2-09 (existing)	The Contractor shall provide a data file from the AMS to the State and IV&V as requested.
6.14.2-10 (existing)	The Contractor shall manage the procurement, licensing, configuration, implementation, maintenance and disposal of the assets for the duration of the Contract.

Req #	SOW Requirement
6.14.2-11 (existing)	The Contractor shall provide inventory and asset management services from procurement through disposal of the asset based on federal and state requirements.
6.14.2-12 (existing)	The Contractor shall configure the AMS platform to support the defined processes.
6.14.2-13 (existing)	The Contractor shall load asset management data including maintenance, warranty, and Contract data into the AMS platform.
6.14.2-14 (existing)	The Contractor shall verify received Equipment against orders and affix asset control tags per specifications.
6.14.2-15 (existing)	The Contractor shall track installation, moves, additions and changes of Hardware and update the AMS data as they happen, or at most, on a daily basis.
6.14.2-16 (existing)	The Contractor shall answer questions and reconcile discrepancies identified.
6.14.2-17 (existing)	The Contractor inventory and asset management Staff shall interact with and support the State staff or designees.
6.14.2-18 (existing)	The Contractor shall support annual inventory audits by providing reports detailing the current status and location of State assets, coordinating site visits to the Project facilities and storage.
6.14.2-19 (modified)	The Contractor shall define, track, monitor, maintain, all assets used or required on the Project (State-owned or not, State-purchased or not) through their lifecycle (procurement through to destruction, uninstall, or end of life) using an AMS platform which allows State to self-serve using real-time reporting.
6.14.2-20 (existing)	The Contractor shall define a lost/stolen asset process.
6.14.2-21 (existing)	The Contractor shall track and define a process for inventory of peripherals (all equipment and accessories in support of other inventoried items, such as power cords, computer mice, and keyboards).
6.14.2-22 (existing)	The Contractor shall track and define a process for Equipment and Software purchases and ongoing maintenance and support, including Software license agreements, and financial information required for asset and inventory management, and audit purposes.
6.14.2-23 (existing)	The Contractor shall install all cables, adapters, and connectors necessary for interconnection and proper operation of all Equipment.
6.14.2-24 (modified)	The Contractor shall install all Network wiring supporting CalHEERS devices with industry best practice level infrastructure (e.g., Category 5e).
6.14.2-25	<u>Intentionally Left Blank</u>
6.14.2-26	<u>Intentionally Left Blank</u>
6.14.2-27	<u>Intentionally Left Blank</u>
6.14.2-28 (existing)	The Contractor shall procure and manage the licenses for all Software components and renew them as needed through the Term of the Contract.
6.14.2-29 (modified)	The Contractor shall procure, configure, test, update associated APIs, and implement all Software components of the CalHEERS (including all enterprise tools and System Software and operating system Software elements of project or System hardware) through the Term of the Contract to be at most one version level lower than the latest available version (not just versions considered major, but all versions) from its manufacturer (also known as “N minus one,” written “N-1”) unless otherwise Accepted by the State. The latest available version includes platform changes, such as when a manufacturer tool upgrade converts a tool from a Contractor-installed instance to a cloud-based Software as a Service or other general upgrades across platforms, product name changes, restarting of versioning numbers, tool or vendor name changes, sale of a tool to a new vendor and the like.

Req #	SOW Requirement
6.14.2-30 (new)	Upon completion of the Transition phase of this Contract to primary System Integrator, the Contractor shall be responsible as part of the fixed cost to bring all items into compliance with the Hardware, Software, and cloud-based requirements. The fixed cost bid, for example, applies to all items making up the CalHEERS whether installed by the current or a past System Integrator.
6.14.2-31 (existing)	The Contractor shall advise the State of the impact of any Software upgrade to the operations of the System and/or interface partners 90 Days prior to upgrading the Software.
6.14.2-32 (existing)	The Contractor shall provide Services required for upgrading the Software components of the System that includes, but is not limited to: 1. Impact analysis 2. Planning 3. Testing 4. Implementation
6.14.2-33 (modified)	The Contractor shall be responsible for making application programming changes to the System (including implementation and testing and updates to System code, Application Programming Interfaces, etc.) required to support all new installs (in support of keeping System current and upgrades to best practices and standards) and upgrades to third-party Software components.
6.14.2-34 (existing)	The Contractor shall request Acceptance of any open-source Software implementation from the State 30 Days prior to implementation.
6.14.2-35 (existing)	The Contractor shall procure and manage maintenance contracts for all Software components and renew them as needed throughout the term of the Contract.
6.14.2-36 (existing)	The Contractor shall provide justification for proposed maintenance support levels for each Software component to the State.
6.14.2-37 (existing)	The Contractor shall notify the State if there is no commercially available maintenance support for any Software component.
6.14.2-38 (existing)	Through structured quality assurance and testing processes, the Contractor shall certify Software upgrades and security patches for any Third-Party Software to support the System.
6.14.2-39 (existing)	The Contractor shall procure, install, configure, and operate ~~Hardware, Cloud Services,~~ and Software to the CalHEERS Project and System.
6.14.2-40 (existing)	The Contractor shall provide a comprehensive Network infrastructure which leverages automatic notifications.
6.14.2-41 (existing)	The Contractor shall provide the necessary industry standard tools and technologies to support deployment, runtime operations, administration, monitoring, alerting and on-demand provisioning of resources.
6.14.2-42 (existing)	The Contractor shall provide all the necessary industry standard tools and technologies to support all storage requirements including, but not limited to: 1. File storage 2. Content management 3. Data warehouse 4. Business intelligence and reporting 5. Relational database 6. Business rules repository 7. Identity storage 8. Certificate storage
6.14.2-43 (existing)	The CalHEERS Data Layer shall include industry standard tools and technologies to support design, development, testing (e.g., functional, load and performance), runtime management and monitoring of all information Systems.

Req #	SOW Requirement
6.14.2-44 (existing)	The Contractor shall maintain CalHEERS Physical Data Model (PDM) based in NIEM and HL7 reference mode that includes, but is not limited to: 1. Persistent Data Model 2. Core XML Schema Model 3. Message XML Schema Model
6.14.2-45 (existing)	The Contractor shall design and implement Technical Services that comply with principles and standards from the most current MITA Technical Services specification, Part III Chapter 6-Technical Services Specification. As new versions of standards are available, adoption of the new standard will be considered through the change control process and approved by the State Project Director or designee.
6.14.2-46 (existing)	The Contractor shall implement service access patterns (e.g., "External Gateway Pattern", "Electronic Data Interface (EDI) Gateway" etc.) to provide unique access points to the CalHEERS services from various access channels.
6.14.2-47 (existing)	The Contractor shall procure, install, configure, and operate the System (e.g., Equipment, Software, Network, and database management system).
6.14.2-48 (new)	The Contractor shall develop, document, and implement a terms and End-User License Agreement (EULA) process to track all terms accepted by the CalHEERS.
6.14.2-49 (new)	The Contractor technical, security, and legal teams shall review all terms (e.g., EULAs) for known or new risks to the State, tracking and alerting the State when terms include risks or pain points that the State would prefer to avoid. The Contractor shall renegotiate those terms whenever possible to meet State needs and track all accepted, rejected, deviations from State needs, and renegotiated terms.
6.14.2-50 (new)	When new or updated (since previously accepted by the CalHEERS) terms are implemented by the manufacturer, the Contractor shall provide a comparison document along with the new terms to show in track change format the changes that have occurred since previous version.
6.14.2-51 (new)	When submitting terms (e.g., EULAs) the Contractor shall point out areas that do not apply to the CalHEERS within the terms. For example, if the terms are for ten products and CalHEERS uses only four of the ten, call out terms that are not relevant or needing review to aid in State review. The Contractor shall also, if there are links (URLs) or references to relevant terms not provided in the terms document, obtain those terms and include them in the text of the terms package for State review.
6.14.2-52 (new)	The Contractor shall notify State of any changes to terms (e.g., EULAs) within 14 days of vendor publication of any terms changes that are known State concerns, may degrade functionality or security, pose unacceptable level of risk to the State, or amend or modify any clauses of this Contract. The Contractor shall make all attempts to amend these changed terms with the vendor and then seek State approval of the resulting final changes.
6.14.2-53 (new)	The Contractor shall archive the terms documents (e.g., EULAs) for State to access the signed and final versions (all signatures and date fields completed) of these terms. Signed copies may require multiple copies, which would include both the accepted by the CalHEERS, signed copy and the Contractor-signed copy (where applicable).
6.14.2-54 (new)	The Contractor shall execute the <u>cost payment methodology</u> as defined in the Hardware and Software Inventory Management Plan (CD-6.14-1), <u>cost payment methodology</u> for HW/SW subsection. The Contractor shall provide to the State at a minimum but not limited to: • A tracking of total HW and total SW costs for the year against the fixed annual budgets established by the State so the remaining balance of funds is clearly identifiable. • Any updates needed to the invoicing tool to allow for the implemented cost model.
6.14.2-55 (new)	The Contractor shall share their True Costs with the State for all (including all known, planned, or unplanned) Hardware, ~~Cloud Services~~ , and Software costs under this Contract, identifying the True Cost of the item.

Req #	SOW Requirement
6.14.2-56 (new)	When the Contractor is the manufacturer of a given Hardware, ~~Cloud Services~~ , or Software item, the Contractor shall not markup, but charge an agreed upon, discounted rate with the State based on the standard industry rates or the standard published rate, as appropriate.
6.14.2-57 (new)	The Contractor shall not include any mark-up on assets procured by the State <u>and shall perform all required activities as part of fixed cost just as they would when procured by Contractor.</u>
6.14.2-58 (new)	The Contractor shall provide ~~Hardware, Cloud Services, and Software~~ assets at the True Cost, no more than industry standard <u>best available</u> prices and avoid the use of resellers or other middle markup scenarios unless it is to obtain lower rates. Contractor shall not use a reseller that is an affiliated/partner, including marketplace alliances/business relationships, that add any additional cost to the State.
6.14.2-59 (new)	The Contractor shall pay the best possible rate for ~~Hardware, Cloud Services, and Software~~ . The State reserves the right to shop for a better rate and, if one is found, the Contractor will charge no more than that rate.
6.14.2-60 (existing)	The Contractor shall provide Asset Management Software (AMS) reporting of all Software, Hardware, ~~Cloud Services elements~~ , and other assets making up the System. The documentation shall include but not be limited to: 1. Reports to be provided. 2. Exportability 3. Time frame for compliance reporting 4. Ability for ad hoc reports

6.14.3 Technical Asset Inventory Reports

Table 6-47: Technical Asset Inventory Reports

Req #	SOW Requirement
6.14.3-01 (existing)	The Contractor shall develop, or takeover and update, maintain and provide Asset Inventory Reports for all Project Worksites throughout the term of the Contract, providing the State with Asset Inventory Reports as follows: 1. Technical Asset Inventory Report (Hardware & Software) - provided quarterly

6.15 PROBLEM MANAGEMENT

The Contractor shall identify, determine the root cause, and document operational problems, potential problem areas, and recommended solutions. The Contractor shall work closely and cooperatively with the State Project Director or designee, Covered California, DHCS, and all others necessary to resolve issues accurately, quickly, efficiently, and effectively.

6.15.1 Problem Management Plan

Table 6-48: Problem Management Plan (CD-6.15-1)

Req #	SOW Requirement
6.15.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CD-6.15-1 - Problem Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY

Req #	SOW Requirement
	2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Roles and Responsibilities 6.1.1 Contractor Roles and Responsibilities 6.1.2 State Roles and Responsibilities 7. PROBLEM MANAGEMENT 7.1 ServiceNow Case/Incident/Problem Processes and Procedures 7.1.1 Incoming Call Management 7.1.2 Problem Identification 7.1.3 Problem Analysis 7.1.4 Documentation 7.1.5 Monitoring 7.1.6 Problem Quality Control 7.2 Escalation 7.2.1 Escalation Protocol 7.2.2 Escalation Matrices 7.3 Problem Prioritization 7.4 Severity/Impact/Priority Definition 7.5 Problem Resolution 7.5.1 ServiceNow Problem Record Resolution 7.5.2 ServiceNow Incident Record Resolution 7.5.3 ServiceNow Case Record Resolution 7.6 Communication 7.6.1 Major Incident Communication 7.6.2 Defect Resolution Communication 7.6.3 End User Notification 7.6.4 Communication Templates and Standards 7.7 Problem Reporting 7.7.1 Aging Reports 7.7.2 Metrics and Reports 7.8 Production Triage Meetings 8. GLOSSARY AND ACRONYMS 8.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STANDARD OPERATING PROCEDURE
6.15.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.15.1-03 (existing)	The Contractor shall accurately develop and document an approach to Problem Management within the Operations manual.
6.15.1-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

Req #	SOW Requirement
6.15.1-05 (new)	The Contractor shall update the following appendices and attach them to the Problem Management Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.15.2 Problem Management Execution

Table 6-49: Problem Management Execution

Req #	SOW Requirement
6.15.2-01 (new)	The Contractor shall staff, manage, lead and execute all Problem Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.15-1 – Problem Management Plan.
6.15.2-02 (existing)	If the Contractor fails to deliver Deliverables or to provide Services which satisfy Contractor's obligations hereunder, the State may provide Notice to the Contractor of such failure. If the Contractor fails to correct such failure within 30 Days of the date of such Notice, the State shall have the right to withhold payments due hereunder for the Deliverables or Services which the Contractor has failed to deliver or provide as required in the Contract, respectively, in the State's reasonable judgment.

Req #	SOW Requirement
6.15.2-03 (existing)	The Contractor shall be responsible to proactively provide reports on problems, including statistics on total number of problems, outstanding problems, and resolution time. Investigate, verify, record, and report Hosting, Hardware, and System nonperformance or downtime, and Software errors.
6.15.2-04	~~Intentionally Left Blank~~
6.15.2-05 (existing)	The Contractor shall be responsible to promptly document reported problems upon receipt, and monitor, control, communicate, and report on each problem until it is resolved and/or completely corrected.
6.15.2-06 (existing)	The Contractor shall maintain appropriate and timely communications with the State and affected users on all problems through resolution.
6.15.2-07 (modified)	The Contractor shall expedite handling of problems that are of high business priority as defined in the Problem Management Plan and the Defect Management Plan.
6.15.2-08 (modified)	The Contractor shall work with the State to prioritize and resolve problems.
6.15.2-09 (modified)	The Contractor shall correct all problems. A problem will not be considered corrected until the Contractor receives validation from the State that the issue is resolved to the State's satisfaction (confirmation from the individual that first reported or owns the problem or an appropriate State designee).
6.15.2-10 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.16 HELP DESK SERVICES

The Contractor will perform the Help Desk activities described in this section.

Table 6-50: Help Desk Ticket Resolution Process (CD-6.16-1)

Req #	SOW Requirement
6.16-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain a CD-6.17-1 - Help Desk Ticket Resolution Process, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 2.2 Out of Scope 3. APPROACH TO DESKTOP SUPPORT 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. GLOSSARY AND ACRONYMS 12.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.16-02 (new)	The Contractor shall staff, manage, lead and execute Help Desk activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-6.16-1 – Help Desk Ticket Resolution Process.
6.16-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.16-04 (existing)	The Contractor shall intake, prioritize, manage and resolve desktop support issues, submitted via an IT service management issue tracking system, including but not limited to: 1. Initial imaging and reimaging of laptops 2. Hardware & Software installation and updates, access (e.g., password resets), maintenance, and support 3. Wi-Fi and VPN access issues 4. Maintenance of Contractor-managed distribution list
6.16-05 (existing)	The Contractor shall intake, prioritize, manage, and resolve the desktop support issues, not submitted via phone, email, or in person if staff are unable to log into their laptop or access the IT service management issue tracking system.

Req #	SOW Requirement
6.16-06 (existing)	The Contractor shall provide asset destruction services, including: 1. The identification of assets that should be decommissioned 2. Provide information and options to help facilitate the State's decision to destroy, transfer ownership, or place into a State reuse program 3. Coordinate the facilitation of the State's decision 4. Update the asset management tracking system, as appropriate
6.16-07 (existing)	The Contractor shall conduct roll-on support services, which include at a minimum, the following activities: 1. Equipment preparation, including: a. Laptop imaging with current Software and Hardware peripherals b. Installation of monitors and docking stations in their workspace or office c. Installation of State-approved non-standard Software and Hardware as identified on their roll-on form 2. Clean work area prior to use, wiping down work surfaces, cleaning chairs, removing any trash/debris, ensuring name plates are level, and providing roll-on documentation 3. First day support, including: a. Logon verification b. Outlook password setup c. SharePoint access verification d. Other access as required for their duties e. Printer set-up f. Provide CalHEERS building badge/access. g. CalHEERS Equipment Check-in/Check-out form completion
6.16-08 (existing)	The Contractor shall conduct roll-off support services, which include at a minimum, the following activities: 1. Removal of all access required, including: a. System/Server/VPN access b. Email account c. CalHEERS building badge/access 2. Blocking account sign-in 3. Removal of email contacts 4. Removal of licenses from the Microsoft Exchange 5. Equipment retrieval, including: a. Laptops b. Monitors c. Docking stations d. Other computer accessories 6. Equipment Check-in/Check-out form completion 7. Clean work area prior after use, wiping down work surfaces, cleaning chairs, removing any trash/debris, ensuring name plates are level 8. Laptop drive wipe and reuse preparation 9. Placement of equipment in storage
6.16-09 (existing)	The Contractor shall manage an email inbox that collects all blocked spam emails, confirming with the CalHEERS Project staff the spam designation.
6.16-10 (<u>modified</u>)	The Contractor shall provide security patching via Microsoft System Center Configuration Manager (SCCM) monthly <u>or current tool</u> , when <u>requested</u> by the State Project Director or designee.
6.16-11 (existing)	The Contractor shall conduct print server management, including reviewing Network monitoring reports to identify printer/print server outages.
6.16-12 (existing)	The Contractor shall execute Data Loss Protection (DLP) services weekly, monitoring staff file transmissions for excessive file upload/downloads, and take follow-on action if necessary.

Req #	SOW Requirement
6.16-13 (existing)	The Contractor shall update the Access Control Log Report quarterly (January, April, July, and October) and deliver to the State Project Director or designee.
6.16-14 (modified)	The Contractor shall provide the following <u>components</u> at the Project Worksites, or as requested by the State: - State staff laptops configured with the following Software, <u>or most current configuration</u>, at a minimum: - Windows - Office 365 (including Project and Visio) - Teams - Chrome - Symantec VIP - Adobe Acrobat (Professional or Reader, determined by the State) - MS Silverlight - Oracle Java - VPN Global Protect Software - Laptops with copies of all Software and Software licenses used in development, testing and maintenance. - Servers and all Software to support administration, development, testing and maintenance and additional servers as needed. - Current number of networked printers located throughout the Project Worksite(s) and any additional network printers as needed.
6.16-15 (existing)	The Contractor Desktop Support Team shall, upon the State's identification of an IT scenario that calls for collaboration with the State's IT Support Team, interact and assist the State in resolving the issue.
6.16-16 (new)	The State identifies and associates the following artifacts to the Desktop Ticket Resolution Process. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this <u>Deliverable</u> including, but not limited to: - CalHEERS Getting Help from Service Desk - CalHEERS Support Request Guide - Desktop Support Annual Audit Process guide - Desktop Support Flexera Actions Process Guide - Desktop Support Management of Active Directory (AD) Process Guide - Job Aid: Using CalHEERS ServiceNow for Fulfillers - Job Aid: Using CalHEERS ServiceNow for Requesters - Job Aid: CalHEERS ServiceNow MFA Quick Reference Guide (QRG) - Job Aid: Reset the CalHEERS ServiceNow Password - SOP on Automated Call Distribution System. Amazon Connect - Submitting a Support Ticket Step by Step - The Service Now (SNOW) Ticket Management System <u>UserCreation_SalesforceSOP</u> <u>Access Control Log Report</u>
6.16-17 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.16-18 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

Req #	SOW Requirement
6.16-19 (new)	The Contractor shall update the following appendices and attach them to the Desktop Ticket Resolution Process: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.17 HOSTING SERVICES

6.17.1 Hosting Services Plan

The Hosting Services Plan provides operational and cloud-based service requirements for CalHEERS.

Table 6-51: Hosting Services Plan (CD-6.17-1)

Req #	SOW Requirement
6.17.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.17-1 - Hosting Service Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience

Req #	SOW Requirement
	2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Cloud Environments Terminology 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 6.1 Cloud Services (AWS, Google, etc.) 6.1.1 AWS Regions and Availability Zones 6.1.2 Software as a Service (SAAS) tools (Salesforce, etc.) 6.2 Cloud System Updates and Maintenance 6.2.1 Resource Provisioning 6.2.2 Image management 6.2.3 Resource Orchestration 6.2.4 Monitoring pattern 6.2.5 Tagging Pattern 6.3 Processes, Procedures and Best Practices 7. GLOSSARY AND ACRONYMS 7.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: AWS DATA CENTER CONTROLS
6.17.1-02 (new)	The Contractor shall staff, manage, lead, and execute Hosting Services activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-6.17-1 – Hosting Services Plan.
6.17.1-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.17.1-04 (new)	The Contractor shall ensure that the Cloud Hosting Solution for CalHEERS includes a multi-region recovery capability <u>(or other option as approved by the Project Director or designee), that includes at least one non-west coast region.</u>
6.17.1-05 (new)	The State identifies and associates the following artifacts to the CD-6.178-1 - Hosting Service Plan. The Contractor shall adopt, update, maintain, and deliver these artifacts in accordance with Appendix 3 of this deliverable including, but not limited to: • ABE Service Account Password Change • Add Domain to EM12c • Add_Remove Servers from OTD_SOP • Akamai_Purging • Analyse_OHS_Logs • Autosys Service Account Password Change • Autosys Service Account Password Change for PROD_Nonprod_DR • Batch Incident Management Document • CalHEERS - AWS Mgmt Console Access Setup Guide • Cannot Start Agent Out of Memory Error • Change Metric Thresholds in EM13c • Change the EM Password • Change_threads_sbconsole_SOP • Check EHIT EDR Processing Times in EM • Check for hogging threads • Checking_Weblogic_Patching_Versions_12c • Create Backout in EM12c

Req #	SOW Requirement

6.17.1-06 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

Req #	SOW Requirement
6.17.1-07 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
6.17.1-08 (new)	The Contractor shall update the following appendices and attach them to the Hosting Service Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact
6.17.1-09 (new)	The Contractor shall accurately document the description of all <u>Services</u> and service elements needed to support the CalHEERS in the cloud. The Plan must include but not be limited to: 1. Configuration schematic showing all elements. 2. Description of all storage and available capacity and owner. 3. Projected response times using the production environment and associated calculations. 4. Contingency plans for acquisition and installation of all elements in case of schedule delay. 5. The detailed maintenance contracts for all cloud accounts and elements (where applicable). 6. Forecasted growth and current usage on all hosting service elements.

Req #	SOW Requirement
6.17.1-10 (new)	The Contractor shall collaborate with the State to update the Hosting Services Plan to incorporate similar asset management processes as described for the Hardware/Software components (Section 6.14) for things such as but not limited to: 1. Reporting of cloud services components 2. Mechanisms for providing cohesive summary of component information 3. Mechanisms for keeping track of the fixed budget and summary of information useful for managing costs and communicating variances accurately. 4. Tracking and management of EULAs.

6.17.2 Hosting Services Requirements

Table 6-52: Hosting Services Requirements

Req #	SOW Requirement
6.17.2-01 (existing)	The Contractor shall provide to the State Hosting Services through the System for 24 hours per day, 7 days per week throughout the term of this Contract. The System and Hosting Services shall be available 24 hours a day except during scheduled System maintenance as agreed in advance. Such maintenance shall not be during the hours of 8:00 a.m. to 9:00 p.m. Pacific time (PT).
6.17.2-02 (existing)	The Contractor shall provide at least 48 hours advance notice to the CalHEERS Management in the event of a scheduled downtime in excess of 15 minutes except in the case of an emergency where immediate action by the Contractor is required. The Contractor shall minimize any disruption, inaccessibility and/or inoperability of the Hosting Services. For the avoidance of doubt, this scheduled System maintenance does not apply to the Contractor's core network maintenance which is performed on the System between 9:00 p.m. and 8:00 a.m. PT during which the Contractor may perform scheduled maintenance of the core network and the expected actual duration of which the Contractor will give the State reasonable prior written notice.
6.17.2-03 (existing)	The Contractor shall represent to the State that it has covenants and that it shall maintain a: - Technology Recovery (TR) plan and the necessary resources and capabilities covering the data center facilities used by Contractor to fully perform the Services under this Contract, such that Contractor' performance under this Contract would not be adversely affected if Contractor's hosting environment or data center facilities were rendered inoperable or inaccessible ("TR Plan"); and - Business Continuation (BC) plan and the necessary resources and capabilities required to fully perform the Services under this Contract, such that the Contractor' performance under this Contract would not be adversely affected if the Contractor's facilities where the Services are performed became inoperable or inaccessible ("BC Plan"). The TR Plan and the BC Plan, or reasonable summaries thereof to enable the State to verify the sufficiency of each such Plan, will be made available to the State for review upon the State request. At least annually or more frequently as may be conducted, the Contractor shall provide a copy to the State that includes but is not limited to: - The extent they perform such review, the Contractor's auditors' report, or portions thereof applicable to the State's business; and - Any other review conducted by a third party, including, without limitation, regulatory agencies, public or private certification entities such as the International Standards Organization, but excluding such reviews conducted by other customers of the Contractor. The State acknowledges that such reports provided by Contractor under this Section shall be considered the Contractor's Confidential Information. Provided, however, the State may disclose such reports to the auditors and regulators having jurisdiction over the CalHEERS System.

Req #	SOW Requirement
6.17.2-04 (modified)	<u>The Contractor shall provide the State with an isolated Hardware, Cloud Services, and Software environment.</u> The Contractor shall procure and maintain the Hardware, <u>Cloud Services, and System Software</u> and other <u>Third-Party</u> Software, data feeds, telecommunications, networks, peripherals and other items and services (collectively referred to as "Third Party Products"), which comprise the specified configuration ("Specified Configuration") required at the hosting site and for updating the Specified Configuration in accordance with Contractor's published updates.
6.17.2-05	<u>Intentionally Left Blank</u>
6.17.2-06 (existing)	The Contractor shall <u>support System monitoring functions to include but not be limited to:</u> 1. Monitor systems for alerts, alarms, and events, including all alerts, alarms, and events that are handled through all of the in-scope monitoring tools. Alarms and alerts may be added or removed by the State any time, as they are needed, following standard TCMP or CR procedures. 2. Respond to alerts per standard trouble shooting and resolution procedures and escalate where required to the appropriate support group to ensure expeditious problem resolution. 3. Manage service interruption notification processes. Ensure the appropriate levels of leadership and technical personnel are aware at all times of problems that are impacting <u>System</u> availability. 4. Provide an operations interface into change management functions to ensure that proper operations and validation procedures are in place to implement scheduled changes. 5. Manage and maintain ownership of all server-related problems, including break fix activities such as the Contractor management, the Contractor escalation and coordination of technical operations support groups to expedite problem resolution and recovery activities. 6. Monitor interface architecture error logs for situations where alerts and events are not captured by automated tools due to inconsistencies in message formats. 7. Maintain operations documentation in all critical areas. This documentation will include checklists for critical functions such as server reboots and monitoring the successful completion of server backups (checking for tape <u>or other</u> errors and restarting backups as needed). Documentation will be kept current and will reflect changes as a result of new business and technical requirements.
6.17.2-07 (new)	The Contractor shall maintain FedRAMP Moderate Impact industry standard for cloud infrastructures.
6.17.2-08 (new)	The Contractor shall share all their true and actual costs with the State for all (including all known, planned, or unplanned) Cloud Service costs under this Contract identifying the True Cost of the service <u>and associate elements</u> .
6.17.2-09 (new)	The Contractor shall <u>invoice the State for hosting components at the True Cost.</u> The State reserves the right to shop for a better rate using other State-owned instances and other discounted rates, and if a better rate is found, the Contractor must charge no more than that rate.
6.17.2-10 (new)	The Contractor shall not charge a mark-up on assets procured by the State. For example, if the State decides to move to a State-procured hosting option due to better rates, the Contractor cannot charge any mark-up on those rates.
6.17.2-11 (new)	The Contractor shall provide the State access to view and customize all existing cloud-provider real-time reporting and shall provide (using self-serve option for the State, pulled from real-time data) additional custom reports and related data points, including but not limited to Contractor's True Costs, projected growth, planning data, savings plan in use (options for optimization), true and projected utilization, or other data as requested by the State.

Req #	SOW Requirement
6.17.2-12 (new)	The Contractor shall implement and maintain industry best practices to maximize System availability in the event of an unexpected outage or event (e.g., a disaster), ensuring there are a minimum of two (a primary and alternate) Data Centers in two separate regions <u>(or other option as approved by the Project Director or designee)</u>, established for the CalHEERS Production environments, according to the following conditions: • <u>The Alternate Data Center shall be in a geographically separate region (or other option as approved by the Project Director or designee), at a distance of 100 miles or more from the primary Data Center (ensuring that a major disaster impacting the primary location would not impact the alternate location).</u> • The CalHEERS Production environments shall be setup and maintained in a high-availability failover mode that utilizes the alternate Data Center to minimize any downtime if the primary location is impacted by a disaster. — Each of the primary and alternate locations shall be ready (with as little time as possible) to be used to implement a comp_ • lete CalHEERS Production environment recovery to a prior point in time if requested by the State (ranging from just prior to 14 calendar days prior to the disaster event). • If a prior point in time recovery is undertaken, the Contractor shall have a plan to avoid competing against (or being impacted by) other entities who also might be impacted by a disaster and are moving data to and/or from the same primary or alternate locations.
<u>6.17.2-13 (new)</u>	<u>The Contractor shall share their True Costs with the State for all (including all known, planned, or unplanned) Cloud Services costs under this Contract, identifying the True Cost of the item.</u>
<u>6.17.2-14 (new)</u>	<u>The Contractor shall not include any mark-up on assets procured by the State and shall perform all required activities as part of fixed cost just as they would when procured by Contractor.</u>
<u>6.17.2-15 (new)</u>	<u>The Contractor shall provide Cloud Services at the True Cost, no more than industry standard best available prices and avoid the use of resellers or other middle markup scenarios unless it is to obtain lower rates. Contractor shall not use a reseller that is an affiliated/partner, including marketplace alliances/business relationships, that add any additional cost to the State.</u>
<u>6.17.2-16 (new)</u>	<u>The Contractor shall pay the best possible rate for Cloud Services. The State reserves the right to shop for a better rate and, if one is found, the Contractor will charge no more than that rate.</u>

6.18 PROJECT SUPPORT SERVICES

The set of requirements below focus on the Project Worksites where the CalHEERS staff are located and other project support services which the State requires the Contractor to provide.

6.18.1 Project Worksite Maintenance Plan

Table 6-53: Project Worksite Maintenance Plan (CD-6.18-1)

Req #	SOW Requirement
6.18.1-01 (modified)	The Contractor shall adopt, enhance, deliver, and maintain the CD-6.18-1 - Project Worksite Maintenance Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY

Req #	SOW Requirement

6.18.2 Project Worksite Maintenance Execution

The Contractor is responsible for providing the project worksites required to maintain and operate CalHEERS. The State would like to house staff in the Gateway Oaks Campus, throughout the term of the Contract, to reduce potential impact to administering the CalHEERS.

Table 6-54: Project Worksite Maintenance Execution

Req #	SOW Requirement
6.18.2-01 (new)	The Contractor shall staff, manage, lead and execute all Project Worksite Maintenance activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.18-1 – Project Worksite Maintenance Plan.
6.18.2-02 (modified)	The Contractor shall acquire, equip, provide, manage and operate the appropriate number and types of Project Worksites needed to successfully operate CalHEERS, including at a minimum the following: 1. Gateway Oaks Campus (Primary Project Worksite) - located within 5 miles of the OTSI Headquarters located at 2870 Gateway Oaks, Sacramento, CA 95833 2. Offshore Development Facility 3. Print & Mail Facility (Contractor is responsible for Subcontractor facilities)
6.18.2-03 (existing)	The Contractor is responsible for the purchase, lease/rent, or subcontract, and operation of all Project Worksites necessary to administer the CalHEERS. The Contractor shall provide, at a minimum, the following goods and services for each Project Worksite, not part of a subcontract, in coordination with property management: 1. Utilities 2. Leasehold improvements (including State requests) 3. Insurance

Req #	SOW Requirement
	4. Janitorial Services 5. Lighting maintenance 6. Window Cleaning (interior/exterior) 7. Fire extinguisher checks 8. Telephone System, including communication lines with service providers 9. LAN/WAN & connectivity 10. Secured wireless and remote access 11. Office equipment installation and maintenance 12. HVAC services and maintenance 13. Plumbing maintenance 14. Security cameras and patrol services 15. Storage
6.18.2-04 (existing)	The Contractor shall be responsible for all costs related to the operation of all Project Worksites used to administer the CalHEERS, for the term of the Contract, providing detailed invoices and any supporting documentation requested by the State.
6.18.2-05 (modified)	The Contractor shall obtain a lease, takeover the existing lease from the previous contractor, or purchase the Gateway Oaks Campus (Primary Project Worksite) so that State staff, Contractor staff and other staff authorized by OTSI are able to effectively administer the CalHEERS. The Gateway Oaks Campus consists of the following: • 2329 Gateway Oaks Drive, Suites 100 & 250, Sacramento, CA 95833: - o Suite 100 (32,204 rentable sq. ft.) - o Suite 250 (5,763 rentable sq. ft.)
6.18.2-06 (modified)	The Contractor shall ensure the lease for the Gateway Oaks Campus (Primary Project Worksite) includes all services provided by Property Management under the current/previous contract, including but not limited to: 1. Utilities, (e.g., water & electrical power) at all Project Worksites 2. Leasehold Improvements (including State requests) 3. Insurance 4. Janitorial services, including but not limited to: a. vacuuming, damp mopping of hard floors, wipe down of common area surfaces and conference rooms, garbage removal, clean/restock restrooms, ad hoc requests and potential for extended support on weekends and late nights when requested. The Janitorial services shall also detail Project Worksites (cleaning carpet edges and dusting approximately 1/4 of each Project Worksite) weekly. 5. Lighting services (e.g., replacement of light bulbs when they go out) 6. Window cleaning services (interior/exterior) 7. Yearly inspection of Fire Extinguishers and updating of tags 8. Phone system/Communication Lines & Providers 9. LAN/WAN & Connectivity 10. Secured wireless & remote access 11. Office equipment 12. HVAC Services, (e.g., maintenance, repair, addressing when Project Worksites are too hot or too cold) a. Changing the server room air filter, checking air flow, and making sure the system is working properly on a quarterly basis. 13. Plumbing Services, (e.g., clogged drains in breakrooms or bathrooms) 14. Security cameras & Security patrol services, including: a. Security escorts between the buildings/suites, when requested b. Security escorts from buildings/suites to staff vehicles, when requested 15. Enough parking spaces (based on occupancy, potential visitors, and in compliance with ADA)

Req #	SOW Requirement
6.18.2-07 (existing)	The Contractor shall, in the event the Contractor is unable to provide the Gateway Oaks Campus as the Primary Project Worksite, provide similar facility(ies) that meet all applicable requirements within this statement of work, and are located within 15 miles of the OTSI Headquarters located at 2970 Gateway Oaks, Sacramento, CA 95833.
6.18.2-08 (existing)	The Contractor shall ensure the Gateway Oaks Campus (Primary Project Worksite) provides office space at least equal to that provided in the current Gateway Oaks Campus. This includes, at a minimum, work areas (e.g., cubicles, offices, shared spaces) for the following number of on-site project staff: 1. One hundred and forty (140) State staff 2. Contractor Staff (subject to space availability and Contractor need) The Contractor shall modify and/or reconfigure workspaces, at the direction of the State Project Director or designee, to meet specific job requirements and/or business needs of the Project.
6.18.2-09 (existing)	The Contractor shall ensure the Gateway Oaks Campus (Primary Project Worksite) provides the State with a State Secured Area, separate and distinct from the Contractor via badge access, configured and furnished (including office equipment) for up to fifteen (15) State or State Contractor Staff. The State Secured Area must have a minimum of two private offices with locking offices.
6.18.2-10 (existing)	The Contractor shall ensure the Gateway Oaks Campus (Primary Project Worksite) includes a minimum of twenty-two (22) individual locking offices dedicated for State use, allocation to non-State staff must be approved by the State Project Director, or designee.
6.18.2-11 (modified)	The Contractor shall ensure the Gateway Oaks Campus (Primary Project Worksite), includes at a minimum, the following: 2329 Gateway Oaks: 1. One (1) large conference room with the capacity to seat 65 people at or around tables and accommodate at least 125 people absent of tables 2. Two (2) large conference rooms with a capacity to seat 25 3. Three (3) conference rooms with a capacity to seat 16 4. Three (3) conference rooms with a capacity to seat 8
6.18.2-12 (existing)	The Contractor shall ensure the Gateway Oaks Campus (Primary Project Worksite) includes at least six (6) private areas/study booths, each providing enough space for two (2) individuals to work, facilitate confidential phone calls or discussions, or hold private one-on-one meetings.
6.18.2-13 (existing)	The Contractor shall ensure the Gateway Oaks Campus (Primary Project Worksite) includes, at a minimum, one (1) wellness/lactation room containing a lounge chair, refrigerator, and countertop surface with a sink.
6.18.2-14 (existing)	The Contractor shall ensure the Gateway Oaks Campus (Primary Project Worksite) provides a dedicated space or room for a minimum of 20 testing staff.
6.18.2-15 (existing)	All <u>project workspaces</u> that host <u>State servers</u> , <u>State Data</u> , and central print equipment ~~shall have, shall have~~ at a minimum, physical security measures including secured doors and entry mechanisms and locked <u>server</u> rooms with floor-to-ceiling walls. Site entrance doors and doors to <u>server</u> rooms must always be secured and shall have an <u>auditable</u> entry mechanism (e.g., card reader) that records all entries and departures.
6.18.2-16 (existing)	The Contractor shall ensure that all hosting environments and data centers comply with data center and architecture requirements, standards, as well as federal and <u>State</u> regulations.
6.18.2-17 (existing)	The <u>project workspaces</u> shall have a break room with furnishings to meet the capacity of full-time staff (tables and chairs so staff can sit down to eat), and trash/recycling receptacles.
6.18.2-18 (existing)	The Contractor shall provide additional offices, conference rooms, breakout rooms, workspaces and furnishings related to any alternate or additional Project Worksite approved by the State Project Director, or designee, to support the project.
6.18.2-19 (existing)	All <u>project workspace(s)</u> , identified at Contract Execution or thereafter, shall be subject to prior written acceptance by the State Project Director, or designee.

Req #	SOW Requirement
6.18.2-20 (existing)	The Contractor shall, in the event an alternate or additional Project Worksite becomes necessary, provide the facility, all furniture, Equipment , Hardware , Software , Network connectivity and office supplies to support all staff located at the worksite.
6.18.2-21 (existing)	The Contractor shall not commence work at any Project Worksite without prior written authorization from the State Project Director, or designee.
6.18.2-22 (existing)	The Contractor shall be responsible for ensuring the Gateway Oaks Campus (Primary Project Worksite), and any other project worksite in California, comply with all applicable requirements, as determined by the State, regarding Americans with Disabilities Act (ADA), Disabled Veterans Business Enterprise (DVBE), and California Environmental Quality Act (CEQA) requirements, as well as applicable asbestos and lead criteria. The State may adopt such additional requirements, procedures and guidelines as it deems necessary and appropriate to best meet the needs of the State and the efficient and effective accomplishment of its responsibilities.
6.18.2-23 (existing)	The Contractor shall be responsible for ensuring that all project worksite(s) , other than the Gateway Oaks Campus (Primary Project Worksite) or other California project worksite(s) , meet the applicable local, State , and federal laws, codes, and regulations, or any applicable laws, building codes, or regulations that are applicable to the project worksite(s) location.
6.18.2-24 (existing)	The Contractor shall ensure that all project worksites include an adequate number of parking spaces for the on-site CalHEERS Project staff and meeting attendees, adjacent to the project worksite .
6.18.2-25 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

6.18.3 Office Setup & Maintenance Execution

The requirements that follow define how the Contractor will initially setup and furnish, then maintain the CalHEERS Project Worksites.

Table 6-55: Office Setup & Maintenance Execution

Req #	SOW Requirement
6.18.3-01 (existing)	The Contractor shall setup, maintain and operate all Project Worksites for the term of the Contract, including, but not limited to, the following: 1. Purchase, lease or rental of each Project Worksite 2. Leasehold improvements of each Project Worksite 3. Insurance for each Project Worksite 4. Utilities of each Project Worksite 5. Maintenance and repairs of each Project Worksite 6. Janitorial services for each Project Worksite 7. Furniture installation and maintenance for each Project Worksite 8. Telephone System, including communication lines with service providers, for each Project Worksite 9. LAN/WAN installation and maintenance of each Project Worksite 10. Secured wireless (Wi-Fi) and remote (VPN) connectivity and Access for each Project Worksite 11. Security measures for each Project Worksite 12. Printers, high-speed printer/copiers, fax machines (and related supplies) at the Project Worksites 13. Office equipment installation and maintenance for the Project Worksites 14. Storage space, including document storage at the Project Worksites

Req #	SOW Requirement
6.18.3-02 (existing)	The Contractor shall furnish and maintain each conference room at the Gateway Oaks Campus (Primary Project Worksite) with the following: 1. White boards sized for the space (the minimum being the current size) 2. Monitors for the smaller conference rooms, sized so all meeting attendees can see what's presented, that are maintained with the necessary adapters for presentation capabilities and maintained by the Contractor 3. Ergonomic table(s) and chairs to match the capacity of each conference room 4. Voice conferencing <u>Equipment</u>, including auxiliary microphones 5. Phone and data lines (data lines to accommodate LAN and SharePoint access for attendees) 6. An integrated projection device/system capable of audio/visual presentation for the large conference rooms, sized for conference room capacity. 7. A laptop imaged with the current software, network access and a locking cable 8. Conference room office supplies (e.g., white board markers and eraser, pens, tablets of post it notes, highlighters)
6.18.3-03 (existing)	The Contractor shall furnish and equip each private area/study booth at the Gateway Oaks Campus (Primary Project Worksite) with the following: 1. One (1) ergonomic desk or work surface 2. One (1) telephone 3. Two (2) data lines 4. Two (2) chairs 5. One (1) white board
6.18.3-04 (existing)	The Contractor shall provide all workspaces at the Gateway Oaks Campus (Primary Project Worksite) for on-site State staff (e.g., cubicles, offices, shared spaces) that shall be furnished and equipped with, at a minimum, the following: 1. One (1) ergonomic desk 2. One (1) ergonomic desk chair 3. One (1) bookcase in offices 4. One (1) locking file cabinet or equivalent 5. One (1) laptop imaged with current software, docking station, locking cable, dual monitors with an adjustable monitor stand, keyboard, mouse, and mouse pad 6. One (1) speaker telephone (with headset upon request)
6.18.3-05	<u>Intentionally Left Blank</u>
6.18.3-06 (existing)	The Contractor shall provide, at the Gateway Oaks Campus (Primary Project Worksite), one (1) or more spaces designated for State staff and equipped with print, copy, scan and fax equipment, including at a minimum of one (1) color, high-speed, networked copy/prINTER machine with "lock-print" functionality, and storage for the related supplies.
6.18.3-07 (existing)	The Contractor shall, at the State's request, make available and/or reconfigure seating space, workspaces, conference rooms, and office space to meet the needs of the State throughout the term of the Contract.
6.18.3-08 (existing)	All seating assignments at the Gateway Oaks Campus (Primary Project Worksite), including all Contractor and State staff, as well as designated shared areas shall be subject to the approval of the State Project Director, or designee.
6.18.3-09 (existing)	The Contractor shall provide the following, at a minimum, to support State staff visiting any Project Worksites other than the Gateway Oaks Campus (Primary Project Worksite): 1. Ergonomic office furniture 2. Ergonomic computer equipment 3. Laptops including current software 4. LAN/WAN Network Connectivity 5. Telephone (with headset upon request)
6.18.3-10 (existing)	The Contractor shall ensure the conference rooms within all Project Worksites can be made private through the application of blinds or privacy frosting to necessary glass panes.

Req #	SOW Requirement
6.18.3-11 (existing)	The Contractor shall not acquire any furnishings or <u>Equipment</u> for use on the CalHEERS Project, without approval of the State Project Director, or designee, prior to acquisition.
6.18.3-12 (existing)	Title to <u>all items purchased on behalf of the State in support of this Contract</u> shall remain in ownership of the State at the end of the Contract or upon <u>Contract termination and as directed through Special Provisions</u> .
6.18.3-13 (existing)	The Contractor shall facilitate the downsizing of any Project Worksite upon the State's request.
<u>6.18.3-14</u> <u>(new)</u>	<u>The Contractor shall staff, manage, lead and execute all Office Setup & Maintenance activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.18-1 – Project Worksite Maintenance Plan.</u>

6.18.4 Business Maintenance & Support Execution

The requirements in this section define the Project Support Services the Contractor is to provide via subcontracted vendors, and the process to be utilized to do so.

Table 6-56: Business Maintenance & Support Execution

Req #	SOW Requirement
6.18.4-01 (existing)	The Contractor shall ensure that all Project Worksites, during non-working hours, are protected against intrusion by appropriate security measures (e.g., security system and security cameras). The level of security measures to be implemented, for each Project Worksite, shall be approved by the State Project Director, or designee.
6.18.4-02 (existing)	The Contractor shall provide hourly security patrols at all Project Worksite(s), seven (7) days a week, to monitor all Project Worksites and provide a security presence.
6.18.4-03 (existing)	The Contractor shall provide all subcontracted services of the existing contract, which are not included in the Gateway Oaks Campus (Primary Project Worksite) lease agreement, including but not limited to: 1. Monitoring and surveillance equipment: a. Security cameras at all interior exit doors, LTS Storage rooms, and server rooms b. Alarm system (for exterior windows) c. Reception desk panic button 2. Cleaning Maintenance Services, including periodic and spot cleaning, as needed for all conventional and modular system furniture 3. Weekly recycling services 4. Weekly confidential destruct services
6.18.4-04 (existing)	The Contractor shall, when subcontracting for a new service or alternate service vendor to fulfill a facility work order, acquire three (3) vendor estimates/bids, unless otherwise approved by the State Project Director, or designee. The Contractor shall provide the three (3) estimates along with the Contractor's recommendation/justification to the State Project Director or designee for approval prior to executing a contract with a vendor.
<u>6.18.4-05</u> <u>(new)</u>	<u>The Contractor shall staff, manage, lead and execute all Business Maintenance& Support activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.18-1 – Project Worksite Maintenance Plan.</u>

6.18.5 CalHEERS Business Support Services

The requirements in this section describe the Project Support Services that Contractor staff provide.

Table 6-57: CalHEERS Business Support Services

Req #	SOW Requirement
6.18.5-01 (existing)	The Contractor shall provide an individual as the point of contact (POC) for each Project Worksite.
6.18.5-02 (existing)	The Contractor shall provide security badges and badge management services, at the Project Worksites.
6.18.5-03 (modified)	The Contractor shall provide security badges services at the Gateway Oaks Campus (Primary Project Worksite) including, but not limited to, the following: 1. Project staff badge – Provides external access to common building areas and internal access to the Primary Project Worksite suites within the building but does not provide access to State Secured Area (see rqmt 6.18.2-09) These badges shall include the staff member's photo 2. State Secured Area badge – Provides external access to common building areas and internal access to the Primary Project Worksite suites within the building, as well as provide access to State Secured Area (see rqmt 6.18.2-09). These badges shall include the staff member's photo 3. Temporary access badge – Provides the same access as the Project staff badge but are only active for a short, designated timeframe (e.g., one day, one week, etc.). These badges shall be visually different than the Project staff badge and will not include a photo 4. Visitor stickers – Provided with the following info: Visitor, the visitor's name, and the date
6.18.5-04 (existing)	The Contractor shall provide twenty (20) project staff badges to the State UAT Test Lead for use.
6.18.5-05 (existing)	The Contractor shall provide full time reception staff and services, including but not limited to the following: 1. Sign in of visitors, collecting the date, time, organization name, purpose for visit and conducting an ID check, as well as escort visitors to their meeting location 2. Mail distribution to project team members (e.g., USPS, FedEx, UPS, inter-office) 3. Project communications for: a. Outages (e.g., printers, phones, badge readers, doors) b. General building concerns (e.g., car lights left on, security concerns) 4. Audio visual equipment check-in/checkout (e.g. projectors) 5. Processing project staff roll-on requests 6. Processing project staff roll-off requests 7. Conduct monthly badge audits 8. Conduct monthly Visitor Log reviews 9. Conduct monthly Client Data Protection walkthroughs, looking for: a. Unattended laptops not wire-locked to a desk/table b. Unattended laptops with screens unlocked c. Test badge access readers and ensure physical doors latch properly d. Test security cameras at all interior exit doors, LTS storage rooms, and server rooms e. Test alarm system/reception desk panic button 10. Provide monthly updates to seating charts and phone lists
6.18.5-06 (existing)	The Contractor shall conduct the following daily business support tasks at the Gateway Oaks Campus (Primary Project Worksite): 1. Respond to, and resolve project business support requests, including but not limited to: a. Conference room reservations b. AV/Projector assistance

Req #	SOW Requirement
	c. Supply requests d. Voicemail PIN resets 2. Organization and management of keys for offices, secured rooms, storage rooms and locking drawers/cabinets 3. Printer maintenance and repairs 4. Reconfiguring of work areas, as requested 5. Refresh the breakroom three (3) times per day 6. Refresh conference rooms and breakout rooms each morning 7. Reconfigure layout of tables/chairs in conference rooms to meet specific meeting needs 8. Walk through of suites to ensure supplies are available and office equipment is working properly, and to identify facility-related issues, including but not limited to: a. Verify all door badge readers are working b. Identify any burned-out lights c. Check supply and printer areas/cabinets for low/missing supplies or paper, restock as needed d. Check for debris/trash on floors and common area counters e. Assess carpet cleaning needs (i.e., large spills/stains) 9. Clean and organize storage rooms, as needed 10. Resolve all issues identified in the daily walk-through by contacting the appropriate person and working with that person to ensure the issue is addressed.
6.18.5-07 (existing)	The Contractor shall takeover and update, or develop, and maintain all process guides that detail the procedures utilized to provide the Project Support Services of this <u>Statement of Work</u> .
6.18.5-08 (modified)	The Contractor shall provide training to all State staff, on the use of project <u>Equipment</u> , <u>Software</u> , processes and procedures, unless otherwise approved by the State.
6.18.5-09 (existing)	The Contractor shall conduct an inventory of office supplies at the Gateway Oaks Campus (Primary Project Worksite) on a weekly basis, placing an order once per month, at a minimum, that consists of: 1. Any needed supplies identified by the inventory findings 2. Requests of project staff that are approved by the State Project Director, or designee.
6.18.5-10 (existing)	The Contractor shall conduct a weekly test of all conference room audio and video equipment at the Gateway Oaks Campus (Primary Project Worksite) and place a work order for any repairs or defective equipment within two (2) Business Days.
6.18.5-11 (existing)	The Contractor shall check water level of the AC/dehumidifier in the server room at the Gateway Oaks Campus (Primary Project Worksite) on a weekly basis and empty as needed.
6.18.5-12 (existing)	The Contractor shall escort/assist subcontracted vendors in providing the following <u>Services</u> at the Gateway Oaks Campus (Primary Project Worksite) once per week: 1. Confidential destruct services (e.g., collection of confidential documentation and onsite destruction) 2. Recycling services (e.g., non-confidential documents, aluminum cans/plastic bottles, and used toner cartridges)
6.18.5-13 (existing)	The Contractor shall participate in State (OTSI) Emergency Evacuation planning activities at the Gateway Oaks Campus (Primary Project Worksite) and any other site designated by the State, as well as provide Safety Wardens at the request of the State. The Contractor-designated Safety Wardens will be responsible for, but not limited to, the following: 1. Knowing their role as a Safety Warden and the actions they should take in the event of an emergency 2. Assist in the coordination of, and attend all, project safety meetings 3. Verify Safety Warden emergency kits are stocked appropriately and in good working order

Req #	SOW Requirement
	4. Assist in the coordination of all-staff safety drills every six (6) months
6.18.5-14 (existing)	All Contractor staff shall participate in safety drills at the Gateway Oaks Campus (Primary Project Worksite), and any other site designated by the State.
6.18.5-15	<u>Intentionally Left Blank</u>
6.18.5-16 (existing)	The Contractor shall provide access for the State or designated auditors to inspect all Project Worksites and assets in accordance with security protocols and procedures; assisting with the identification of assets; providing resources to resolve discrepancies or issues generated by audit activity.
6.18.5-17 (existing)	The Contractor shall provide office supplies at Gateway Oaks Campus (Primary Project Worksite) over the duration of the Contract, presenting all office supply offerings to the State for approval, prior to initial acquisition. Office supplies include, at a minimum, but is not limited to: 1. Writing supplies 2. Dry erase supplies 3. Paper supplies 4. Folders/envelopes 5. Small desk items (e.g., stapler, tape dispenser, scissors) 6. Other desk items (e.g., binders, batteries, clip boards) 7. Toner supplies 8. Badge supplies
6.18.5-18 (existing)	The Contractor shall provide the following breakroom supplies at Gateway Oaks Campus (Primary Project Worksite) over the duration of the Contract: 1. Paper Towels 2. Hand Soap
<u>6.18.5-19 (new)</u>	<u>The Contractor shall staff, manage, lead and execute all CalHEERS Business Support Services activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.18-1 – Project Worksite Maintenance Plan.</u>

6.18.6 Facility Asset Inventory Reports

Table 6-58: Facility Asset Inventory Reports

Req #	SOW Requirement
6.18.6-01 (modified)	The Contractor shall develop, or takeover and update, maintain and provide Asset Inventory Reports for all Project Worksites throughout the term of the Contract, providing the State with Asset Inventory Reports as follows: 1. Facility Asset Inventory Report (non-technical) - provided annually or upon State request

6.19 SERVICE CENTER SERVICES

The Contractor, at the direction of the State, provides Service Center services for CalHEERS. The Service Center services include hosting provider, day-to-day operational support, planning, execution, reporting, performance monitoring, capacity planning and sizing, technology recovery, and evaluating and resolving issues.

6.19.1 Service Center Management Plan

Table 6-59: Service Center Management Plan (CD-6.19-1)

Req #	SOW Requirement
6.19.1-01 (new)	The Contractor shall takeover, update, enhance, deliver, and maintain the CD-6.19-1 - Service Center Management Plan, which includes but is not limited to:

Req #	SOW Requirement
	1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH AND METHODOLOGY 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. ROLES AND RESPONSIBILITIES 6. SYSTEM DEVELOPMENT 7. RELEASE MANAGEMENT 7.1 Release Management Overview 7.1.1 Resources (Tools, Documents and Sites) 7.2 Continued Improvement 7.2.1 Cross – Functional Responsibilities by Team 7.2.2 Principles of Agile Software Development 7.2.3 Overview of Scrum Roles 7.2.4 Key Scrum Ceremonies 7.2.5 Team Members and Roles 7.2.6 Build & Enhance Workflow for the Service Center 7.2.7 DevOps Process Alignment 8. SYSTEM ENVIRONMENTS 8.1 Overview 9. OPERATIONS MAINTENANCE 9.1 Operations Process and Procedures 9.2 Case/Incident Management 10. GLOSSARY AND ACRONYMS 10.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.19.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
6.19.1-03 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.19.1-04 (new)	The Contractor shall update the following appendices and attach them to the Project Worksite Maintenance Plan: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist

Req #	SOW Requirement
	Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.19.2 Service Center Services Execution

Table 6-60: Service Center Services Execution

Req #	SOW Requirement
6.19.2-01 (new)	The Contractor shall staff, manage, lead, and execute all activities defined in the CD-6.19-1 – Service Center Management Plan.
6.19.2-02	<u>Intentionally Left Blank</u>
6.19.2-03 (new)	The Contractor shall provide a Service Center Maintenance Support team to provide functional design solutions for the technology stack utilized by the Service Center (ACD and IVR currently utilizing the Amazon Connect system; Workforce Management and Quality Assurance through Verint; and other call center reporting and Operational support applications.).
6.19.2-04 (new)	The Contractor shall maintain the service center planning, execution, reporting, <u>real-time</u> performance monitoring <u>and</u> , <u>monthly performance reports</u> , capacity planning and sizing, technology recovery, and shall evaluate and resolve all issues.
6.19.2-05 (new)	The Contractor shall add, remove, maintain, implement, and operationalize all elements and <u>Services</u> for the CalHEERS Service Center.
6.19.2-06 (new)	The Contractor shall ensure that all existing or new Toll-Free Numbers (TFNs) are procured and implemented as directed by the State.
6.19.2-07 (new)	The Contractor shall analyze, manage, and optimize the mapping of TFNs to system flows as directed by the State.
6.19.2-08 (new)	The Contractor shall configure the list of TFNs to route to the precise flow as directed by the State.
6.19.2-09 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
6.19.2-10 (new)	The <u>Contractor</u> shall <u>implement, manage, maintain and store</u> ten (10) years of <u>historical Service Center</u> audio recordings and one (1) year of <u>Service Center</u> screen recordings.
6.19.2-11 (new)	The Contractor shall <u>ensure</u> all call recordings <u>are</u> stored within the CalHEERS environment.

Req #	SOW Requirement
6.19.2-12 (new)	The Contractor shall make all <u>Service Center</u> recordings available upon the State's request.
6.19.2-13 (new)	The Contractor shall <u>implement and manage</u> configuration or platform changes to the Service Center technology stack <u>in support of</u> existing tools and <u>external interfaces</u> .
6.19.2-14 (new)	The Contractor shall evaluate the <u>Service Center</u> system upgrades and correct <u>all</u> regression issues <u>identified in accordance with the Special Provisions, Service Level Agreement</u> .
6.19.2-15 (new)	The Contractor shall evaluate and maintain <u>the</u> technology stack to meet the changing needs of the business. <u>The Contractor shall implement changes, at a minimum on a monthly basis, and</u> in the prioritized order determined <u>between the State and the Contractor</u> .
6.19.2-16 (new)	The Contractor shall acquire and configure any new tools used to support the Service Center operations <u>and at True Cost</u> .
6.19.2-17 (new)	The Contractor shall maintain a Service Center Maintenance Support team with a consistent number of core resources to address Service Center operational and business needs as defined by the State to ensure the Service Center SLAs as defined in Appendix A-2.3 SERVICE LEVEL AGREEMENTS (SLA) & LIQUIDATED DAMAGES.

6.20 WEBSITE MANAGEMENT

The Web Content Management Plan defines the processes and procedures for managing the content for the CalHEERS website. The plan defines the web content change management process, roles, responsibilities, formal communication requirements, and a Site Map for the current web portal solution. The Contractor shall perform the services described in this section.

6.20.1 Web Content Management Plan

Table 6-61: Web Content Management Plan (CD-6.20-1)

Req #	SOW Requirement
6.20.1-01 (new)	The Contractor shall develop, enhance, deliver, and maintain the CD-6.20-1 - Web Content Management Plan, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS, AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. OTHER Sections as needed 8. GLOSSARY AND ACRONYMS 8.1 New Acronyms and Terms APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
6.20.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
6.20.1-03 (existing)	The Web Content Management Plan shall meet the requirements of ISO/IEC/IEEE 23026-2015 – Systems and Software engineering - Engineering and management of websites for systems, Software, and services information (Section 10.1 - Website life cycle management) standards pertaining to Web Site Management.
6.20.1-04 (new)	The Web Content Management Plan shall ensure that all CalHEERS web content complies with the Web Content Accessibility Guidelines (WCAG) 2.1 AA and Section 508 requirements. The Contractor shall integrate accessibility best practices into content governance, validation processes, and the Deliverable Compliance Checklist to ensure ongoing compliance.
6.20.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
6.20.1-06 (new)	The Contractor shall update the following appendices and attach them to the Web Content Management Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

6.20.2 Web Content Management Execution

Table 6-62: Web Content Management Execution

Req #	SOW Requirement
6.20.2-01 (new)	The Contractor shall staff, manage, lead and execute all Web Content Management activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-6.20-1 - Web Content Management Plan.
6.20.2-02 (existing)	The Contractor shall develop and expose web services to consumers using the following open standards: 1. XML 2. WSDL 3. Simple Object Access Protocol (SOAP) 4. WS-I Web Services 5. WS-Security
6.20.2-03 (new)	The Contractor shall regression test all internal and external links in the CalHEERS System within each major release, reporting all broken internal/external links to the State.
6.20.2-04 (new)	Any internal link (where the linked-to location is within the Contractor's control), <u>as well as any external link (where the linked-to location is to an external location)</u> , that is not working shall be corrected at no additional cost to the State.
6.20.2-05 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

Figure 7-3: The Transition-In (Takeover) TIP1 Deliverable Relationship Diagram.....	2

7 TRANSITION REQUIREMENTS

Transition for this Contract is the transfer of System Development, Maintenance and Operations (SDMO) to the selected Contractor or State and the contractual closeout with the incumbent Contractor. The State will work closely with the incumbent Contractor during this process and must approve all updates to the Contractor's Transition approach and plans. All data and information provided by the Contractor as required by this Contract shall be accompanied by letter, signed by the Contractor's authorized representative or their designee, attesting that the supplied material(s) is/are current, accurate, and complete.

Transition consists of a variety of overlapping activities between the incumbent contractor and the SI for the new contract as depicted in Figure 7-1 below. It will be important that both the incumbent and the winner of the new SI contract be in sync during the first year of the new contract.

Therefore, the State has already incorporated a similar transition set of requirements into the incumbent contract (called Transition Out). The incumbent already is aware of this expectation and is contractually obligated to participate and interact with the Transition-In contract as shown in the figure below.

Figure 7-1. Transition Activities and Timelines

Transition-In Phase 1 (Takeover)- This phase (hereafter referred to as TIP1) occurs in the first year of the new contract and involves identifying and executing all activities required to allow the Contractor to transition-in (onboard) and take over all services, functions, and responsibilities for operating and maintaining the California Healthcare Eligibility, Enrollment, and Retention

System (CalHEERS). This phase concludes with the SI of the new contract fully responsible for the system's operational baseline, and Service Level Agreement (SLA) conditions as well as the successful completion of the Sunrise-Sunset Agreement between the incumbent contractor and the contractor of the new contract. This agreement must be planned for TIP1 to mark the peaceful handover of SLA responsibility and liability from the incumbent (Sunset) and the winning SI contractor (Sunrise). The Contractor will utilize the Transition-In Master Plan (TIMP) to describe this effort for TIP1. TIP1 requirements mostly include SOW requirements which are marked as "existing" and "modified" in the requirements tables. The State and Contractor will work collaboratively in defining details of the TIP1 in the development of the TIMP.

Transition-In Phase 2 (Transformation)- This phase (hereafter referred to as TIP2) involves executing all transformative changes called for by the Contract. Transformation changes include innovations, and other more time-consuming changes from the new contract that are best deferred until after the first phase is completed. The planning for the second phase will occur during the first phase. The Contractor will also utilize the TIMP to include the TIP2 phase planning. TIP2 requirements mostly include SOW requirements which are marked as "modified" or "new" in the requirements tables. The State and Contractor will work collaboratively in defining details of the TIP2 in the development and updates to the TIMP.

Transition-Out- This final phase involves the Contractor executing all activities required to roll off the CalHEERS Project by transitioning out and turning over all the responsibilities for the State-owned resources, documentation, and knowledge to a successor contractor or the State. Transition-Out will occur during the final year of the Contract term. Transition-Out activities of the Contract will overlap with Transition-In activities of the SI under the new Contract. The Contractor will utilize the Transition-Out Plan (TOP) to include all Transition-Out planning.

Please note that this section of the Sstatement of Work (SOW) references multiple sets of standards, which are subject to change over time. Please refer to Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

7.1 TRANSITION-IN PHASE 1 (TIP1) TAKEOVER

The Contractor has the overall responsibility for providing an orderly transition (takeover) that includes the onboarding of staff, system takeover, and baselining which is transparent and minimizes disruption of service to all users of the system.

NOTE: In the event that the incumbent is also the successor Contractor, TIP1 is minimal or not needed. The TIMP will still be required. However, it will be easier to implement.

During TIP1 the incumbent contractor and the successor Contractor shall coexist on the CalHEERS SDMO Project. A successful TIP1 transition results in the Contractor establishing a post transition operational baseline and assuming responsibility for providing SDMO support (e.g. services and functions) needed to maintain CalHEERS and support Sponsors without service disruption and inclusive of SLA responsibility.

The TIP1 operational baseline is met when the Contractor is providing SDMO support for all services and functions of CalHEERS, which includes meeting or exceeding each Service Level Agreement (SLA), as identified in the SOW.

The Transition-In Master Plan (TIMP) will initially be created during TIP1 and updated for the TIP2 activities. The TIMP will establish what must be initially transitioned, the approach to be utilized for transitioning, and the processes and procedures needed to carry out the transition and Cutover. Cutover is defined as multiple events whereby responsibility for an SDMO service, function, or component is transferred from the incumbent contractor to the Contractor or to the State. The Contractor's TIMP is the contractual governing document. The Contractor is

expected to implement a transition approach that is realistic and achievable (e.g., phased in some fashion, single Cutover period – “big-bang”) and manage TIP1 and TIP2 from both an overall perspective as well as at an individual transition component level within each transition area.

The Contractor will collaborate with the incumbent contractor to plan for and carry out transition activities. After Contract execution and upon receipt of the Contractor’s TIMP, the incumbent contractor is required to update (within 30 calendar days) their Project Closeout Plan to conform to the Contractor’s TIMP. During the initial project planning period, the Contractor and incumbent contractor discuss and clarify transition activities and timelines and ensure both plans are in alignment. Transition planning must consider the approach to transition the CalHEERS Application including CalHEERS component subsystems and services.

A Transition-In Work Plan (Including both TIP1 and TIP2) is required from the Contractor to first identify and manage all Transition-In activities and tasks required by the TIMP to allow for successful Cutover to the new Contract under TIP1, and then updated to include TIP2 activities.

The Contractor must demonstrate that they are ready to take over and run CalHEERS and deliver services to the Program, the end users, and business partners before assuming control and responsibility.

As part of TIP1, the Contractor must also define within the Transition Training and Knowledge Transfer Plan:

- What knowledge transfer activities the Contractor requires to obtain knowledge from the incumbent contractor, and
- What training the Contractor will provide State staff and those affected on transition activities/tools and any changes to how services and functionality will be delivered.

As part of TIP1, the Contractor must conduct readiness reviews for each group of identified transition components. During this review the Contractor provides their concurrence that the incumbent contractor has completed closeout, results from testing and/or validation, the activities and tasks required to implement Cutover, and confirm they are prepared to assume control and responsibility for delivering SDMO support.

Upon a successful transition readiness review, the State authorizes the Contractor to schedule and implement Cutover to establish a post transition operational baseline associated with the transition components included in the readiness review. Once Cutover is achieved the Contractor assumes full control and responsibility for the SDMO support related to the transition components that were implemented.

There is an initial operations period that begins immediately after Cutover. During this period, the incumbent contractor provides technical advice and assistance to the successor Contractor. The duration of the initial operational period and nature of incumbent contractor support is identified and agreed to by the State and incumbent contractor and included as part of Cutover activities.

The Contractor conducts a final review with the State prior to the end of the initial operations period to provide operational status and to determine if technical advice and assistance is still required. Once all transition components have been transitioned, the Contractor schedules a review with the State to show that all activities required by the Transition-In Work Plan have been completed and seeks State approval to end TIP1 activities.

The State requires an orderly Transition-In (new contract) and Transition-Out (incumbent contract) that is transparent and does not negatively impact:

- Project sponsors
- Interface partners
- Program partners
- System stakeholders

- End users
- Consumers/customers

The activities during the TIP1 phase and the outgoing incumbent contractor's Transition-Out phase must be collaboratively coordinated and synchronized to the greatest extent possible. The successor Contractor must work with all identified and/or referenced stakeholders, program partners and project sponsors under the incumbent contractor's current Transition-Out requirements, milestones and Deliverables and determine how they interface with the successor Contractor's Transition-In activities and project schedule. Best efforts will be made both by the successor and incumbent contractors to coordinate all Transition-In and Transition-Out activities. The figures below identify the relationship between the Deliverables for Transition-In (Takeover) and the logical progression of how they work in concert with one another.

Figure 7-2: The Deliverables Hierarchy for Transition-In (Takeover) TIP1

Figure 7-3: The Transition-In (Takeover) TIP1 Deliverable Relationship Diagram

7.1.1 Transition-In Master Plan (TIMP)

The TIMP will serve as a draft controlling document detailing the incoming Contractor's Transition-In approach for TIP1 and expected approach and activities for TIP2. TIP1 will include processes and procedures, timeline, and deliverables for the duration of the Transition-In phase. The incumbent Contractor's Project Closeout Plan shall conform to the Contractor's TIMP. Requirements of the TIMP will also address how and when transition components will be transitioned and tracked as part of TIP2.

Requirements in this section also address the plans, communication, and reporting mechanisms needed to support management and implementation of the Transition-In activities.

Refer to SOW Section 8, DELIVERABLES for more information on each of the Transition-In Deliverables required.

Table 7-1: Transition-In Master Plan (CD-7.1-1)

Req #	SOW Requirement
7.1.1-01 (new)	The Contractor shall review the currently approved DEL CD-7.1-1 Transition-In Master Plan dated 06/11/2020 as a guide to create, in collaboration with the State, a new Transition-In & Transformation Master Plan DED for review. The DED will then be the baseline for a new Transition-In & Transformation Master Plan deliverable, which includes but is not limited to: 1. TRANSITION-IN MASTER PLAN (TIMP) EXECUTIVE SUMMARY 1.1 Purpose of the TIMP 1.2 Transition Timeline 1.3 Transition Areas 1.4 Team Organization – Workstream Mapping to Transition Areas 2. TRANSITION APPROACH 2.1 Transition-In Scope 2.2 Transition-In Approach 2.3 Transition-In Work Plan 2.4 Transition-Out Approach 3. TRANSITION-IN ROLES AND RESPONSIBILITIES 4. TRANSITION-IN ACTIVITIES 4.1 Project Management 4.2 System Change & Enhancement 4.3 Program Support 4.4 Operations 5. TRANSITION DELIVERABLES & WORK PRODUCTS 5.1 Transition Deliverables (SOW Section 7) 5.2 Transition Work Products (SOW Sections 3 through 6) 6. TRANSITION PROCESSES 6.1 Collaboration with Incumbent SI 6.2 Organizational Change Management 6.3 Quality Management 6.4 Quality Assurance Team 6.5 Transition QA Process 6.6 QA Readiness Reviews 6.7 Communication Management / Weekly Meeting Cycle 6.8 Risk Management 6.9 Change Control Management 7. APPROACH TO MANAGING OTHER TRANSITION REQUIREMENTS 8. ASSUMPTIONS 9. CONSTRAINTS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST

Req #	SOW Requirement
	APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: STATE AND CONTRACTOR COUNTERPART CHART APPENDIX 5: STAFFING HISTOGRAM – TRANSITION (FROM BAFO) APPENDIX 6: MAJOR ACTIVITIES CONTRACTOR IS TRACKING
7.1.1-02 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.1-03 (modified)	The Contractor shall update the Transition-In Master Plan (TIMP) to reflect the Contractor's increased knowledge of the CalHEERS environment.
7.1.1-04 (modified)	The Contractor shall develop, deliver, maintain, and execute a TIMP and Transition-In phase that includes, but is not limited to, identifying and implementing all the activities, work flows, contracts, warranties and Deliverables (i.e., during the first year of the Contract term) required to allow the Contractor to transition in and take over all services, functions, and responsibilities for operating and maintaining the CalHEERS and its subsystems and databases.
7.1.1-05 (modified)	The Contractor shall create a TIMP that determines what must be transitioned, the approach to be utilized for transitioning, the processes and procedures needed to carry out the transition and Cutover, and a time schedule for all activities.
7.1.1-06 (modified)	The Contractor shall develop, deliver, maintain, and execute a Transition-In Work Plan that identifies and manages all Transition-In activities and tasks required by the TIMP to allow for successful Cutover to the new Contract.
7.1.1-07 (existing)	The Contractor shall provide a TIMP that includes, but not be limited to the following: 1. Compliance with the latest version of the Project Management Institute (PMI ®), A Guide to the Project Management Body of Knowledge (PMBOK ® Guide) for project management 2. Addresses Transition-In activities for all transition components and SDMO responsibilities as defined in the Contract 3. Acts as the Master Transition-In document by which the other transition documents are referred and traceable
7.1.1-08 (existing)	The Contractor shall develop, deliver, maintain, and execute a Transition Implementation Document that includes, but is not limited to, the following information: 1. Methodology 2. Schedule including task start and end dates 3. Roles and responsibilities of Contractor and State teams 4. Implementation Readiness and Checklists, including readiness criteria metrics 5. Entry and Exit Criteria for beginning and completion of Implementation. 6. Proven Practices (demonstrate that the plan is based upon proven practices) 7. Cutover Processes and Procedures 8. Implementation Support Plans 9. Contingency Plan 10. Recovery Plan

Req #	SOW Requirement
7.1.1-09 (existing)	The Contractor shall develop, deliver, maintain, and execute an Organizational Change Management Document. This Deliverable must include, but not be limited to the following information: 1. Approach and Schedule 2. Roles and Responsibilities of the Contractor and the State 3. Process and role gap analysis of existing workflow and procedures (As Is/To Be Analysis) which must include "a day in the life of" study of people in the roles that will be impacted by the new System 4. Gap Analysis between the existing environments and the new CalHEERS environment 5. Change Readiness Plan that must accurately include details regarding the change readiness process, inputs and outputs; readiness criteria; assessment methods; and change readiness tools utilized 6. Communications Strategies 7. Tasks and Expected Results 8. Method for Documenting and Dealing with Issues
7.1.1-10 (modified)	The Contractor shall provide a section in the TIMP for Quality Management that will guide the Contractor, the State, and the incumbent Contractor in managing quality during Transition-In & Transformation.
7.1.1-11 (modified)	The Contractor shall provide a TIMP that guides the efforts of the Transition-In activities. The TIMP must include, but not be limited to, the following information: 1. Description of the overall Transition-In Takeover (TIP1) approach and process to be used to transition all components identified in the four (4) Transition Areas detailed within SOW Sections 3, 4, 5 and 6. 2. Description of the Transition-In (Takeover) (TIP1) approach and processed to be used to take over the SOW requirements that are identified as 'modified' and 'existing' as well as how they will be addressed by the close of the Transition-In (Takeover) period. 3. Description of the Transition-In (Transformation) (TIP2) approach and processes to be used to transform the SOW requirements that are identified as "modified" or "new" as well as how they will be addressed by the close of the Transition-In (Transformation) period. 4. The transition approach shall include the Contractor activities to plan, execute, verify, Cutover, implement initial operations and conduct the final review, along with assumptions and constraints that are inherent with the proposed approach. 5. Description of the rationale for selecting this approach. 6. Planned transition activities and tasks that includes, but are not limited to, the planning, implementing, executing, tracking, and reporting of the overall transition effort as well as for each transition component. 7. Roles and responsibilities for implementing transition activities to include those for the State and incumbent Contractor. For planning purposes, the Contractor shall work with designated State staff subject matter experts from Sponsors, CalHEERS and State Project Office for issue resolution and coordination of activities required to support the transition. 8. Description of how the Contractor will collaborate with the incumbent Contractor to plan for and carry out transition activities as well as what the Contractor requires of the incumbent Contractor regarding knowledge transfer, data/information, and support for mitigating risk. 9. Risks inherent with the overall transition (e.g., risks related to duration and transition timing, risks inherent with the incumbent Contractor approach) and the Contractor's planned mitigation measures to ensure no disruption to CalHEERS services. 10. Approach to organizational change management. 11. Approach to transition training and knowledge transfer to include, but not be limited to:

Req #	SOW Requirement
	a. Knowledge transfer activities the Contractor requires to obtain knowledge from the incumbent Contractor. b. Transition activities/tools and any changes to how services and functionality will be delivered. 12. Approach to conducting transition component readiness reviews to obtain approval for Cutover that includes stakeholder involvement.
7.1.1-12 (modified)	The Contractor shall provide a Quality Management section in the TIMP that includes, but is not limited to, the following information: 1. The identification and approach for the Quality Assurance (QA) Team Organization, staffing, QA Team roles and responsibilities, QA processes, and QA reports that will be used to ensure that Transition-In activities are being accomplished. 2. The procedures the Contractor shall use to describe how the Contractor's QA Team shall oversee implementation of all the tasks listed in the Contract to ensure the tasks are performed in accordance with Contract requirements, the TIMP, as well as other required plans and reports. 3. The procedures the Contractor shall use for conducting a gap analysis between the incumbent Contractor SDMO activities and the Contractor's SOW and the format by which the Contractor will provide the State Project Director or designee with the results of the analysis and the integration of a get well plan for gaps identified as part of the Weekly Status Meetings and Performance Reporting activities. 4. The procedures the Contractor shall use to assume responsibility for providing all missing SDMO activities identified in the gap analysis prior to the end of the Transition-In period or when agreed to by the State Project Director or designee.
7.1.1-13 (modified)	The Contractor shall develop, deliver, maintain, and execute, the following Transition-In Deliverables, including but not limited to: 1. TIMP 2. Transition-In Work Plan (Schedule) 3. Transition Weekly Meeting Agendas/Minutes and Status Reports 4. Transition Component Worksheet 5. Project Management Service and Function Migration Plan 6. System Change & Enhancement Service and Function Migration Plan 7. Program Support Service and Function Migration Plan 8. Operations Service and Function Migration Plan 9. Transition Training and Knowledge Transfer Plan 10. Transition Readiness Reviews 11. Project Management Test and Validation Plan 12. System Change & Enhancement Test and Validation Plan 13. Program Support Test and Validation Plan 14. Operations Test and Validation Plan 15. Annual Deliverable Prioritization
7.1.1-14 (existing)	The Contractor's TIMP shall include a section on the approach to plan, develop, and implement, Service and Function Migration Plans for each of the four (4) transition areas that will guide the Contractor, the State, and the incumbent Contractor in managing plan specific transition activities.
7.1.1-15 (existing)	The Contractor's TIMP shall include a Communication Management section, in the TIMP, on managing communications that will guide the Contractor, the State, and the incumbent Contractor in managing communications during Transition-In.

Req #	SOW Requirement
7.1.1-16 (modified)	The Contractor's Service and Function Migration Plans section of the TIMP shall include, but not be limited to, the following information: 1. Definition for each Transition Area the approach to transition services and functions to be operationalized and Cutover to the Contractor. 2. Identification of key high-level activities that must be accomplished to allow for a successful transition of Transition Area services or functions. These activities include preparatory actions being taken to establish and prepare facilities, obtain service Contracts, establish capabilities, prepare for testing/validation, and those actions taken subsequent to successful testing/validation and needed to implement Cutover. 3. Identification of how Test Readiness Reviews will be planned and coordinated with the State and in coordination with the incumbent Contractor's Project Closeout Plan.
7.1.1-17 (modified)	The Contractor's Communication Management section in the TIMP shall include, but not be limited to, the following information: 1. The processes and procedures for communication with State, county, business partners, and other stakeholders that will be utilized by the Contractor during the transition period. 2. The methods used to ensure timely and appropriate generation, collection, distribution, storage, retrieval, and ultimate disposition of Transition-In information. 3. Identify the critical links among people and information that are necessary for successful communications. 4. The communication approach and processes for communicating Transition-In activities to the State, counties, business partners, and incumbent Contractor. 5. The process for providing timely communications that keep the State, end users, and business partners informed of Transition-In activities. 6. Contractor shall attend meetings and provide status updates regarding the Transition-In activities. 7. The process for timely communication that keeps the State, affected business partners, end users, and the incumbent Contractor informed of any changes or delays in the Transition-In Work Plan.
7.1.1-18 (existing)	The Contractor shall provide a section in the TIMP on the approach to plan, develop, and implement area specific Transition Test and Validation Plans which guides the Contractor, the State, and the incumbent Contractor on completing specific test and validation activities.
7.1.1-19 (existing)	The Contractor shall include a section in the TIMP on Risk Management that will guide the Contractor, the State, and the incumbent Contractor in managing risks during Transition-In.
7.1.1-20 (existing)	The Contractor shall provide a Transition Test and Validation Plans section in the TIMP that includes, but not be limited to, the following information: 1. Identification of what transition component (functions or services) require testing or validation. 2. Description of how to determine what transition components require formal testing versus validation. 3. Identification and documentation of the approach and methods to be used to validate such as checklists or demonstrations.
7.1.1-21 (modified)	The Contractor shall provide a Risk Management section in the TIMP that includes, but is not limited to, the following information: 1. The approach for the development and execution of a Transition-In Work Plan that is realistic and achievable and has a minimal impact on Sponsor programs, business partners, and CalHEERS end user activities. This includes a description of how the schedule minimizes transition risk. 2. The identification of how risks associated with Transition-In will be identified, tracked, and managed; as well as the approaches to mitigate risks.

Req #	SOW Requirement
7.1.1-22 (existing)	The Contractor shall utilize the framework of existing CalHEERS Change Control Management processes and procedures, and the incumbent Contractor's Project Closeout Plan.
7.1.1-23 (existing)	The Contractor shall provide a section on Change Control Management in the TIMP that will guide the Contractor, the State, and the incumbent Contractor in managing changes during Transition-In once this responsibility has been assumed by the Contractor.
7.1.1-24 (modified)	The Contractor shall provide a Change Control Management section in the TIMP that includes, but is not limited to, the following information: 1. The approach, processes, and procedures the Contractor shall utilize when proposing critical Change Request (CRs) that need to be made to the system during Transition-In that allow implementation of the transfer process. 2. The procedures the Contractor will use for proposing a critical change, including documentation that identifies the critical nature of the change as well as validates how the change will not impact the State's ability to test the system, execute normal system operations, or impede transition. 3. The procedures the Contractor will use for proposing noncritical change requests that enhance or facilitate implementation of Transition-In activities. 4. The procedures the Contractor shall use for proposing a noncritical change, provide documentation that identifies the nature of the change, how it enhances/benefits the Transition-In effort, and validates that the change will not impact the State's ability to test the system, execute normal system operations, or impede transition. 5. The procedures the Contractor shall use to implement State required CRs during the Transition-In period as identified by the TIMP and the incumbent Contractor's Project Closeout Plan. 6. The procedures the Contractor shall use to implement production defect fixes during the Transition-In period as identified by the TIMP and the incumbent Contractor's Project Closeout Plan. 7. The procedures the Contractor shall use to review and analyze the existing System/Software Development Life Cycle (SDLC), identification of any guidelines, processes and standards (e.g., IEEE, PMBOK, ITIL, etc.) that can be applied to revise or improve the life cycle, in support of cost savings and process improvement.
7.1.1-25 (existing)	The Contractor shall manage the implementation of all releases beginning in the 7th month after the "Contract Execution" date.
7.1.1-26 (existing)	The Contractor shall manage all CalHEERS CRs that have not been implemented on or before the last release managed by the incumbent Contractor. This includes, but is not limited to, the following item: • Historical information for all CRs that have been implemented into production
7.1.1-27 (existing)	The Contractor's TIMP shall also include a section on managing other transition management requirements that will guide the Contractor, the State, and the incumbent Contractor in managing other transition management requirements during Transition-In.

Req #	SOW Requirement
7.1.1-28 (existing)	The Contractor shall provide a section on managing other transition management in the TIMP that includes, but is not limited to, the following information: 1. The Contractor's use of the procedures in the CalHEERS Operations Manual to support and successfully execute and publish the results of the daily backup and recovery activities. 2. The procedures the Contractor shall use to work with the incumbent Contractor to transfer control of all CalHEERS environments as identified in the incumbent Contractor's Closeout Plan. 3. The procedures the Contractor shall use to work with the State and the incumbent Contractor to understand the incumbent Contractor's Project Closeout Plan and determine how to integrate the Project Closeout Plan and Project Closeout Work Plan with the Contractor's TIMP and Transition-In Work Plan. 4. The procedures the Contractor shall use to work with the incumbent Contractor to determine the file transfer methodology to be used during data migration or conversion activities as identified at the component level. 5. The procedures the Contractor shall use to support the State Transition Manager and the Contractor Transition Manager and provide onsite support to the transition group. 6. The Contractor's expectations from the State in terms of roles, responsibilities, resources, or additional items in order to implement the Transition-In activities. 7. The procedures the Contractor shall use to store transition Deliverables, files, and data in a State approved location identified in TIMP that is accessible to the State.
7.1.1-29 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.1-30 (existing)	The Contractor shall accurately document and provide detailed Knowledge Transfer (written and training) any and all system, software, hardware and database information for Transition-In activities and Deliverables.
7.1.1-31 (existing)	The Contractor shall create, deliver, maintain, and execute a Transition-In Plan which includes, but is not limited to resources, staffing, schedule, process description, accurate system and operation system documentation, design documentation, software, hardware, all operational activities and dependencies to successfully transition, maintain and operate CalHEERS.
7.1.1-32 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.1-33 (modified)	The Contractor shall update the following appendices and attach them to the Transition-In & Transformation Master Plan: Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable)

Req #	SOW Requirement
	4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.2 TIP1 Execution

Table 7-2: Transition-In Execution

Req #	SOW Requirement
7.1.2-01 (new)	The Contractor shall staff, manage, lead and execute all Transition-In activities on CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-1 – Transition-In & Transformation Master Plan.
7.1.2-02 (modified)	The Contractor shall execute and oversee all activities specified in the approved TIMP throughout the Transition-In period.
7.1.2-03 (new)	The Contractor shall, during Transition-In, re-disposition all defects from Not Under Warranty (NUW) to a disposition of Warranty, as Not Under Warranty (NUW) is no longer a disposition in use on CalHEERS (refer to Section 10.1.2 - NOT UNDER WARRANTY (NUW), of the Special Provisions).
7.1.2-04 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

7.1.3 TIP1 Meetings, Agendas, and Minutes

The Contractor is responsible for accurately documenting, tracking, sharing and recording the Meetings, Agendas and Minutes for any/all meeting related to Transition (Transition work plan, manager, and executive meetings). The Contractor shall perform the services described in this section.

Table 7-3: Transition Meetings, Agendas, and Minutes (CD-7.1-2)

Req #	SOW Requirement
7.1.3-01 (new)	The Contractor shall adopt the currently approved DEL <u>D-7.1-2 Transition Meetings, agendas, and Minutes</u> dated 02/05/2020 as a guide to create, in collaboration with the State, a new Transition Meetings, Agendas, and Minutes DED for review. The DED will then be the baseline for a new Transition Meetings, Agendas, and Minutes deliverable, which includes but is not limited to: 1. Introduction 2. Weekly Transition Work Plan Meeting Views 2.1 Phase View

Req #	SOW Requirement
	2.2 Tasks Completed from Prior Week View 2.3 Tasks Due for the Coming Week View 2.4 Late and Slipping Tasks View 2.5 Key Milestones View 2.6 Level of Effort Tasks View 3. Weekly Transition Meeting Cycle 4. Monthly Transition-In Work Plan Meeting
7.1.3-02 (modified)	The Contractor shall maintain sufficient Project Staff throughout the Transition-In period to satisfy and maintain compliance with all Performance Standards and Requirements identified in this Contract.
7.1.3-03 (modified)	The Contractor shall organize and facilitate at a minimum, series of three (3) meetings with the State at multiple levels to report on the progress of the Transition-In effort. Based on the information provided by the Contractor during these meetings, the State will assess whether the Contractor is on track to complete the transition and assume control and responsibility for all CalHEERS SDMO support within the Transition-In period. 1. The Contractor shall facilitate the weekly transition meeting to specifically review the details of the Transition-In Work Plan with the State and working-level teams. 2. The Contractor shall facilitate a weekly transition meeting to review the status of Transition-In activities with managers, supervisors, and leads. 3. The Contractor shall facilitate a twice monthly transition meeting for executive level audiences (e.g., CalHEERS, Sponsors) to review the overall progress of the Transition-In effort along with any key risks or issues associated with transition.
7.1.3-04 (existing)	The Contractor shall ensure that all meetings will be accompanied by meeting agendas and accurate meeting minutes as mutually agreed between the State and the Contractor.

7.1.3.1 TIP1 Transition Work Plan Meetings

The Contractor is responsible for coordinating, developing and facilitating the Transition Work Plan meetings. The Contractor shall perform the services described in this section.

Table 7-4: Transition Work Plan Meetings (CD-7.1-3)

Req #	SOW Requirement
7.1.3-05 (new)	The Contractor shall adopt the currently approved DEL D-7.1-3 Transition Work Plan Meetings dated 02/05/2020 as a guide to create, in collaboration with the State, a new Transition Work Plan Meetings DED for review. The DED will then be the baseline for a new Transition Work Plan Meetings deliverable, which includes but is not limited to: 1. Introduction 2. Weekly Transition Work Plan Meeting Views 2.1 Phase View 2.2 Tasks Completed from Prior Week View 2.3 Tasks Due for the Coming Week View 2.4 Late and Slipping Tasks View 2.5 Key Milestones View 2.6 Level of Effort Tasks View 3. Weekly Transition Meeting Cycle 4. Monthly Transition-In Work Plan Meeting
7.1.3-06 (new)	The Contractor shall staff, manage, lead and execute Transition-In Work Plan activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-3 – Transition-In Work Plan Meetings.
7.1.3-07 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
7.1.3-08 (existing)	The Contractor shall prepare and present a written report that contains direct outputs from the Transition-In Work Plan (Schedule). Materials provided must be easy to understand, and that includes but is not limited to the following information: 1. Tasks completed from the prior week. 2. Tasks due for the coming week 3. Areas in the work plan (Schedule) which require attention (behind schedule) 4. Critical Path analysis 5. Suggested changes to maintain the schedule timelines. 6. Schedule Issues 7. Schedule Risks 8. Other areas requiring discussion

7.1.3.2 TIP1 Transition Manager Meetings

The Contractor is responsible for coordinating, developing and facilitating the Transition Manager meetings (During both TIP1 and TIP2). The Contractor shall perform the services described in this section.

Table 7-5: Transition Manager Meetings Reports (CD-7.1-4)

Req #	SOW Requirement
7.1.3-09 (modified)	The Contractor shall adopt the currently approved DED dated 05/21/2020 as a guide to create, in collaboration with the State, a new Transition Manager Meeting Reports DED for review. The DED will then be the baseline for a new Transition Manager Meeting Reports deliverable, which includes but is not limited to: 1. Transition Progress Update Summary 2. Transition-In Work Plan (Microsoft Project High-Level Gantt Chart) with variances. 3. Transition Dashboard (Stop light metrics) covering areas such as but not limited to: a. Overall status of Transition Components b. Status by Gates (Plan, Execute, Verify, Cutover, Initial Operations, Final Review) c. Transition Component Timeliness – On Schedule, Behind < 15 Days, Behind > 15 Days d. Transition Work Plan Completion Chart – Represents the work that has been done versus the planned transition work forecast e. Total Transition Components that have reached any one (1) gate f. Overall Transition Area Status g. Top three (3) risks, issues and milestones 4. Changes 5. Issues 6. Risks 7. Communication activities 8. QA status and results: a. Migration Plan reviews - Checklists required and completed b. Test and Validation reviews - Checklists required and completed 9. Findings
7.1.3-10 (new)	The Contractor shall staff, manage, lead and execute Transition-In Manager Meeting Report activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-4 – Transition-In Manager Meetings Reports.
7.1.3-11 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.3-12 (existing)	The Contractor shall assist the State in creating and maintaining a Transition Dashboard as provided in the sample meeting minutes by the State in the Bidders' Library.

Req #	SOW Requirement
7.1.3-13 (existing)	The Contractor shall include a Transition Dashboard as a part of the Transition Meeting Reports. The Contractor must maintain the Transition Dashboard as a separate file for easy access and updates by both Contractor and State staff.

7.1.3.3 TIP1 Executive Meetings

Transition executive meetings will occur twice a month. The Contractor is responsible for developing the Transition Executive Meeting Report(s) that will be used to facilitate those meetings.

Table 7-6: Executive Meetings (CD-7.1-5)

Req #	SOW Requirement
7.1.3-14 (new)	The Contractor shall adopt the currently approved DED dated 10/30/2019 as a guide to create, in collaboration with the State, a new Transition-In Executive Meetings DED for review. The DED will then be the baseline for a new Transition-In Executive Meetings deliverable.
7.1.3-15 (existing)	The Contractor shall prepare and present a written report for executive level audiences in an agreed to format. The materials presented must be easy to understand, and include but not be limited to the following information: 1. Noteworthy accomplishments 2. Dashboard 3. Schedule updates 4. Key milestones 5. Critical dependencies (between the incumbent Contractor and the Contractor) 6. Key risks 7. Key issues 8. Action items 9. Other topics needing discussion

7.1.4 TIP1 Sunrise Agreement

Table 7-7: Sunrise Agreement

Req #	SOW Requirement
7.1.4-01 (new)	The Contractor shall develop, seek approval, and execute a Sunrise Agreement with the State and the incumbent SI contractor. This agreement will be arranged to ensure the successful transition of SLA liability from the incumbent SI and the SI under the new contract. The State will provide the template and a sample Agreement for the SI to use as a starting point. The Sunrise agreement will be treated as an artifact (work product) under this contract.
7.1.4-02 (new)	The Sunrise Agreement shall be signed by both the Contractor, State, and incumbent SI (of the prior contract) to mark the exact moment and under what conditions will transition of SLA-driven requirements be officially the responsibility of the contractor (under this contract).

7.1.5 TIP1 Sunset Agreement

Table 7-8: Sunset Agreement

Req #	SOW Requirement
7.1.5-01 (new)	The Contractor shall develop, seek approval, and execute a Sunset Agreement with the State and the incumbent SI contractor. This agreement will be arranged to ensure the successful transition of SLA liability from the contractor (of this contract) and the SI under a new contract. The State will provide the template and a sample Agreement for the SI to use as a starting point. The Sunset agreement will be treated as an artifact (work product) under this contract.
7.1.5-02 (new)	The Sunset Agreement shall be signed by both the Contractor (of this contract), State, and Contractor (of a new contract) to mark the exact moment and under what conditions will transition of SLA-driven requirements be officially the responsibility of the contractor (under the new contract).

7.1.6 TIP1 Final Review

The Contractor is responsible for coordinating, developing, documenting and facilitating the Transition-In Final Reviews (for both TIP1 and TIP2). The Contractor shall perform the services described in this section.

Table 7-9: TIP1 Final Review

Req #	SOW Requirement
7.1.6-01 (new)	The Contractor shall collaborate with the State to deliver and present a TIP1 Final Review presentation. The Contractor shall utilize the sample provided in the Bidders' Library to assist in creation of documentation.
7.1.6-02 (existing)	The Contractor shall conduct and facilitate a meeting for executive level audiences to show that Transition-In (TIP1) activities are complete and provide information that shows all transition components are transitioned, work plan activities are complete, and the Contractor is now responsible for all CalHEERS SDMO support.
7.1.6-03 (existing)	The Contractor shall present information in a PowerPoint presentation format which must be easy to understand, and include but not be limited to the following information: 1. Final Dashboard 2. Final Schedule 3. Issues Pertaining to Ongoing SDMO activities. 4. Lessons Learned 5. Request to Close Transition Note: The Final Review shall be conducted at or near the end of the Transition-In (TIP1) period.

7.1.7 TIP1 Work Plan (Schedule)

The Transition-In Work Plan (Schedule) encompasses the scope of activities and tasks and is used to track the progress of the Contractor's efforts during the TIP1 and TIP2 Transition-In periods for the appropriate component area identified by the State.

These activities and tasks include but are not limited to service and function migrations, knowledge transfer, training, data transfer, documentation maintenance, change management, customer support, progress reporting, facilities preparation installation, training, systems testing, quality assurance, Cutover, systems assumption, and communication.

The TIP1 Transition-In Work Plan (Schedule) also includes the integration of activities between the State, incumbent Contractor, and the Contractor transition activities, as well as incorporates risk management implications into the schedule. The Transition-In Work Plan (schedule) is

created in Microsoft Project and provides the detailed project schedule that organizes and implements the Work Breakdown Structure (WBS) as mutually developed by the Contractor and the State.

The Transition-In Work Plan (Schedule) created by the Contractor shall allow the Contractor to understand the overall timeframe required for completing Transition-In and Cutover.

Table 7-10: Transition-In Work Plan (Schedule) (CD-7.1-6)

Req #	SOW Requirement
7.1.7-01 (new)	The Contractor shall adopt the currently approved DED dated 11/15/2019 as a guide to create, in collaboration with the State, a new Transition-In Work Plan (Schedule) DED for review. The DED will then be the baseline for a new Transition-In Work Plan (Schedule) deliverable.
7.1.7-02 (modified)	The Contractor shall update and maintain a Transition-In Work Plan that represents the entire Transition-In phase as defined in the four (4) component areas of Transition-In as follows: 1. Project Management as identified in SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS 2. System Change & Enhancement as identified in SOW Section 4, SYSTEM CHANGE & ENHANCEMENT REQUIREMENTS 3. Program Support as identified in SOW Section 5, PROGRAM SUPPORT REQUIREMENTS 4. Operations as identified in SOW Section 6, OPERATIONS REQUIREMENTS
7.1.7-03 (existing)	The Contractor shall develop and maintain the Transition-In Work Plan from the Transition-In Work Plan Template provided in the Bidders Library, which shall include, but not be limited to, the following information: 1. Transition schedule 2. Transition Milestones and Deliverables 3. Activities and tasks that may apply to each transition component including, but not limited to: a. Knowledge Transfer b. Training c. Data Transfer d. Documentation Maintenance e. Change Management f. Customer Support g. Progress Reporting h. Facilities Preparation/Installation i. Systems Testing j. Test and Validation k. Transition Readiness l. Quality Assurance m. Systems Assumption 4. Gantt Chart showing planned and actual start dates, finish dates, and percent complete for activities and tasks 5. Identification of critical path activities and tasks
7.1.7-04 (modified)	The Contractor shall develop a Transition-In Work Plan and schedule in accordance with the structure and project work plan timeframes in the approved Schedule Management Plan.
7.1.7-05 (existing)	The structure of the Contractor's Transition-In Work Plan shall be in compliance with the approved Schedule Management Plan, Physical Work Plan Structure, Work Breakdown Structure Outline Structure, Logical Work Plan Structure, and Define Project Resource Structure and Build Global Resource Pool.

Req #	SOW Requirement
7.1.7-06 (modified)	The extent of the detail in the Contractor's Transition-In Work Plan shall be in accordance with the approved Schedule Management Plan, and Schedule Development Process defined in SOW Section 3.2, SCHEDULE MANAGEMENT, and shall include, but not be limited to: 1. Summary tasks, tasks and subtasks with clear and meaningful tasks names. 2. Tasks or subtasks for Contractor development of each Contract Transition Phase Deliverable. 3. Tasks or subtasks for State review of each Contract Transition Phase Deliverable. 4. Tasks or subtasks for the Contractor revision of each Contract Transition Phase Deliverable after State review of each Contract Transition Phase Deliverable. 5. State review of each Contract Transition Phase Deliverable after Contractor revision of each Contract Transition Phase Deliverable. 6. State approval of each Contract Transition Phase Deliverable. 7. Predecessor and successor dependencies for tasks without subtasks. 8. Predecessor and successor dependencies for subtasks. 9. Resource assignments for tasks without subtasks. 10. Resource assignments for subtasks. 11. Estimated hours and durations for tasks without subtasks. 12. Estimated hours and durations for subtasks. 13. Custom task fields and custom resource fields as specified in the approved Schedule Management Plan, Work Plan Standards.
7.1.7-07 (existing)	The Contractor shall develop, deliver, maintain, and execute a Transition-In Work Plan that is in accordance with the sequence and project work plan timeframes specified in the approved Schedule Management Plan, Create Physical Work Plans, and Baseline Work Plans and Schedule that includes, but is not limited to, the following: 1. The Contractor's review of the Transition-In Work Plan Template provided by the State. 2. The Contractor's review of requirements and specifications in the Contract, and Appendix A-4, STATEMENT OF WORK (SOW). 3. The Contractor's comparison of the TIP1 Transition-In Work Plan Template to the requirements and specifications in the Contract, and Appendix A-4, SOW to ensure that all Milestones (WBS outline level 2 summary tasks) and Deliverables (WBS outline level 3 summary tasks) necessary for the Contractor, State, counties and incumbent Contractor to accomplish the goals, objectives, requirements, and timelines of the Transition-In phase are included in the TIP1 Transition-In Work Plan. 4. The Contractor's submission of a Schedule Change Request Form to the State Project Director or designee requesting any additions, changes or deletions to Milestones (WBS outline level 2 summary tasks) and Deliverables (WBS outline level 3 summary tasks) in the Transition-In Work Plan before the Contractor produces the finalized Transition-In Work Plan by adding Activities (WBS outline level 4 summary tasks) and Tasks (WBS outline level 5 tasks). 5. The State's review and approval of the Schedule CR Form submitted by the Contractor requesting additions, change or deletions to the Transition-In Work Plan. 6. The Contractor making approved additions, changes and deletions to the Transition-In Work Plan. 7. The Contractor's submission of the revised Transition-In Work Plan to the State Project Director or designee for review and approval. 8. The Contractor's development of the Transition-In Work Plan by adding Activities (WBS outline structure level 4 summary tasks) and tasks (WBS outline structure level 5 tasks). 9. The Contractor's submission of the finalized Transition-In Work Plan to the State Project Director or designee for review and approval. 10. The Contractor baselining the approved Transition-In Work Plan.

Req #	SOW Requirement
7.1.7-08 (existing)	The Contractor shall develop, deliver, maintain, and execute the Transition-In Work Plan in accordance with the instructions, best practices, guidelines and standards specified in the approved Schedule Management Plan, Define Project Resource Structure and Build Global Resource Pool, and Create and Integrate work plans and generate schedule.
7.1.7-09 (existing)	The Contractor shall provide a Transition-In Work Plan that identifies activities and tasks, including expected durations and completion dates, which are expected to be completed by Contractor, State, county, and incumbent Contractor Staff in order to meet the estimated Transition-In schedule.
7.1.7-10 (existing)	All tasks in the Contractor's Transition-In Work Plan shall have appropriate Contractor, State, county and incumbent Contractor resource assignments and estimated hours. Near term tasks (where near term is defined to be within 60 Business Days in the future) shall have actual resource names assigned to the tasks. Tasks that are not classified as near term may have generic resource titles (e.g., such as a role, classification or vacant position) assigned to the tasks.
7.1.7-11 (existing)	The Contractor shall document the duration of any single near-term task in the Transition-In Work Plan, and it shall not exceed ten (10) Business Days without prior approval of the State Project Director or designee.
7.1.7-12 (existing)	Near term tasks in project work plans shall be resource leveled with a maximum of 50 hours of assigned work per week for Contractor Staff and 35 hours per week maximum for State, county and incumbent Contractor Staff.
7.1.7-13 (existing)	Tasks in the Transition-In Work Plan that are assigned to the Contractor's Staff, shall be started and completed by the Contractor according to the scheduled start and finish dates of the tasks.
7.1.7-14 (existing)	The Contractor shall maintain and update the Transition-In Work Plan through the completion of Transition-In. This shall be done in accordance with the approved Schedule Management Plan, Schedule Maintenance Process, and Schedule Elaboration Process.
7.1.7-15 (existing)	The Contractor shall continue to submit the updated Transition-In Work Plan to the State Project Director or designee until Transition-In is approved and completed.
7.1.7-16 (existing)	The Contractor shall produce and include in the Transition Master Plan a Transition Milestone Schedule Summary from the baselined Transition Work Plan.

7.1.8 TIP1 Transition Components Worksheet (TCW)

Transition Component requirements address what is to be transitioned and are defined in terms of the services, functions, and other items that are being used to meet M&O support requirements.

The incumbent Contractor's Project Closeout Plan identifies inventory components for closeout which can be used to help the Contractor identify transition components for each of the M&O support areas and other transition items.

The Contractor creates a transition component inventory which identify what must be transitioned so that the Contractor can assume operational control of CalHEERS and become responsible for all M&O support.

The Contractor then manages updates to the component inventory until all components are successfully transitioned.

Table 7-11: Transition Components Worksheet (CD-7.1-7)

Req #	SOW Requirement
7.1.8-01 (new)	The Contractor shall adopt the currently approved DEL <u>D-7.1-7 System Development, Maintenance and Operations (SMDO) Project</u> dated 02/06/2020 as a guide to create, in collaboration with the State, a new Transition Components Worksheet DED for review. The DED will then be the baseline for a new Transition Components Worksheet deliverable, which includes but is not limited to: • Instructions • TCW Source
7.1.8-02 (new)	The Contractor shall staff, manage, lead and execute TCW activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-7 – Transition Components Worksheet.
7.1.8-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.8-04 (modified)	The Contractor shall utilize the Transition Component Worksheet provided in the Bidders' Library as a starting point for identifying and assessing the transition components and attribute characteristics needed to properly plan and execute transition activities for the following support areas defined in the SOW: 1. Project Management as identified in SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS 2. System Change & Enhancement as identified in SOW Section 4, SYSTEM CHANGE & ENHANCEMENT REQUIREMENTS 3. Program Support as identified in SOW Section 5, PROGRAM SUPPORT REQUIREMENTS 4. Operations as identified in SOW Section 6, OPERATIONS REQUIREMENTS
7.1.8-05 (existing)	The Contractor shall create an inventory of all transition components for each of the four (4) M&O Support Areas.
7.1.8-06 (existing)	The Contractor shall update (and modify as needed) the Transition Component Worksheet with the assessment findings and use the worksheet as a guide for development of the Service and Function Migration Plans.
7.1.8-07 (existing)	The Contractor shall validate that all components which must be transitioned to include the services, functions, and other items (e.g., Deliverables) being provided by the incumbent Contractor, and their Subcontractors. These components are identified in the Transition Component Worksheet, and are consistent with the components identified in the incumbent Contractor's Project Closeout Plan, and components as stated within the SOW.
7.1.8-08 (existing)	The Contractor shall compare the Transition Component Worksheet, SOW, and the incumbent Contractor's Project Closeout Plan to identify inconsistencies.
7.1.8-09 (existing)	The Contractor shall provide the identified inconsistencies between the SOW and incumbent Contractor's Project Closeout Plan, present them as part of the weekly status meetings, and seek direction from the State Project Director or designee for resolution to problem areas.
7.1.8-10 (existing)	The Contractor shall identify any additional transition components not included within the incumbent Contractor's Project Closeout Plan or within the SOW, deemed necessary for successful transition and assumption of maintenance and operations activities.
7.1.8-11 (existing)	The Contractor shall develop, deliver, maintain, and execute the Transition Component Worksheet throughout the Transition-In process (as applicable) until all components are successfully transitioned.
7.1.8-12 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.8-13 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

7.1.9 TIP1 Service and Function Migration

The overall goal of the Contractor's Service and Function Migration is to identify, prepare, and implement Transition-In activities that allow for a smooth transition of responsibility for services, functions, facilities, and other transition components from the incumbent Contractor to the Contractor.

7.1.9.1 Service and Function Migration Plan (SFMP)

Table 7-12: SFMP (CD-7.1-8)

Req #	SOW Requirement
7.1.9-01 (new)	The Contractor shall adopt the currently approved DEL <u>D-7.1-8 Service and Function Migration Plan</u> dated 02/27/2020 as a guide to create, in collaboration with the State, a new Service and Function Migration Work Products DED for review. The DED will then be the baseline for a new Service and Function Migration Work Products deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Development, Review, and Acceptance Process 3.2 Work Product Storage and Content Management 3.3 Add/Remove Work Product Process 3.4 Update Work Product Process 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risks 5. REQUIREMENTS 6. ROLES AND RESPONSIBILITIES 7. GLOSSARY AND ACRONYMS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: WORK PRODUCT TEMPLATE APPENDIX 5: WORK PRODUCT PRIORITIZATION LIST
7.1.9-02 (new)	The Contractor shall staff, manage, lead and execute SFMP activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-8 – Service and Function Migration Plan.
7.1.9-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.9-04 (existing)	The Contractor shall accurately provide to the State copies of specified, available Work Product upon the State's request.
7.1.9-05 (existing)	The Contractor shall ensure the Work Products shall accurately be deemed works made for hire of the State for all purposes of copyright law, and copyright shall accurately belong solely to the State.
7.1.9-06 (existing)	In the event that any such Work Product is adjudged to be not a work made for hire, the Contractor agrees to assign, and hereby assigns, all copyright in such Work Product to the State.
7.1.9-07 (existing)	The Contractor shall accurately, at the expense of the State, assist the State or its nominees to obtain copyrights and trademarks for all such Work Products in the United

Req #	SOW Requirement
	States and any other countries.
7.1.9-08 (existing)	The Contractor agrees to execute all papers and to give all facts known to it necessary to secure United States or foreign country copyrights and to transfer or cause to transfer to the State all the right, title and interest in and to such Work Products (subject to Contractor's rights).
7.1.9-09 (existing)	The Contractor shall waive and not assert any moral rights it may have in any such works.
7.1.9-10 (existing)	As between the parties, the Work Products shall accurately be deemed works made for hire of the State for all purposes of copyright law, and copyright shall accurately belong solely to the State.
7.1.9-11 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.9-12 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.9-13 (new)	The Contractor shall update the following appendices and attach them to the Service and Function Migration Plan Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.9.2 Project Management Service and Function Migration

Table 7-13: Project Management SFMP (CD-7.1-9)

Req #	SOW Requirement
7.1.9-14 (new)	The Contractor shall review the currently approved DEL ~~CD~~-7.1-9 Project Management Service and Function Migration dated 02/29/2020 as a guide to create, in collaboration with the State, a new Project Management Service and Migration Plan DED for review. The DED will then be the baseline for a new Project Management Service and Migration Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Overall Approach 3.2 Approach to Transition Work Products 3.3 Resources Assigned 3.4 Project Management Component Area (SOW 3.1) 3.5 Schedule Management Component Area (SOW 3.2) 3.6 Cost/Cost Estimating Management Component Area (SOW 3.3) 3.7 Human Resource Management Component (SOW 3.4) 3.8 Risk and Issue Management Component Area (SOW 3.5) 3.9 Communication Management Component Area (SOW 3.6) 3.10 Document Management Component Area (SOW 3.7) 3.11 SOW Requirements Management Component Area (SOW 3.8) 3.12 Problem Escalation Component Area (SOW 3.9) 3.13 Quality Management Component Area (SOW 3.10) 3.14 Contract Management Component Area (SOW 3.11) 3.15 CalHEERS Project Enterprise Tools Component Area (SOW 3.12) 3.16 CalHEERS Project Processes Component Area (SOW 3.13) 3.17 CalHEERS Project Training Component Area (SOW 3.14) 3.18 Strategic Planning and Management Component Area (SOW 3.15) 3.19 Policy and Legislative Impact Analysis Impact Analysis and Change Support Component Area (SOW 3.16) 3.20 Audit Evaluation and Findings Services Component Area (SOW 3.17) 3.21 CalHEERS Components Not Listed in SOW, but are covered in Contractor's TOP 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Issues 4.4 Risk Management 4.4.1 Known Risks 4.4.2 Emergent Risks 5. ROLES AND RESPONSIBILITIES 6. GLOSSARY AND ACRONYMS 7. REPORTING AND COMMUNICATIONS 7.1 Timing, Audience, and Media 7.2 Readiness Confidence Criteria APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: CONTRACTOR CUTOVER TIMELINE

Req #	SOW Requirement
7.1.9-15 (new)	The Contractor shall staff, manage, lead and execute PM SFMP activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-9 – Project Management Service and Function Migration.
7.1.9-16 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.9-17 (existing)	The Contractor shall develop, deliver, maintain and execute a Project Management Service and Function Migration Plan to specifically assist the State in defining and executing the migration of all project management functions needed in support of SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS.
7.1.9-18 (existing)	The Contractor shall execute and oversee all activities specified in the approved Project Management Service and Function Migration Plan throughout the Transition-In period.
7.1.9-19 (existing)	The Contractor shall manage updates and changes to the Project Management Service and Function Migration Plan (as needed) throughout the Transition-In period.
7.1.9-20 (existing)	The Contractor shall utilize the Transition Component Worksheet to identify the Project Management transition components that need to be included as part of the service and function migration plan for Project Management.
7.1.9-21 (existing)	The Contractor's Project Management Service and Function Migration Plan shall include, but not be limited to, the following information: 1. Definition of how each service or function, being performed by the incumbent Contractor, will be operationalized and Cutover to the Contractor. 2. Identification of the activities and tasks that must be accomplished to allow for a successful transition of operational control of a service or function. These activities include preparatory actions being taken to obtain service Contracts, establish capabilities, prepare for testing/validation, and those actions taken subsequent to successful testing/validation, needed to implement Cutover. 3. Definition of the roles and responsibilities for completing migration activities and tasks. 4. Plan the timing, audience, media and message for communication events. Define the measurements to validate or test the completion of transition of services or functions. 5. Provide the plan for the Readiness Reviews in coordination with the State and the incumbent Contractor's Project Closeout Plan. 6. Identification of Cutover activities and the target Cutover date. 7. Identification of risks and issues tied to the migration and planned mitigation measures/issues resolution. 8. Definition of contingency plans to troubleshoot high risk transition activities. Identify what technical advice and assistance the Contractor will require from the incumbent Contractor (e.g., number of hours, position expertise).
7.1.9-22 (existing)	The Contractor's Project Management Service and Function Migration Plan shall explain what the Contractor proposes to do to successfully assume all Project Management related M&O responsibilities including but not limited to the following information: 1. Establishing an approach, process, and procedures needed to assume responsibility for all services, functions, and other items identified as transition components. 2. Explaining how the Contractor will demonstrate readiness, provide evidence and confirmation that they are prepared to accept responsibility, and obtain State approval to do so with an effective date.
7.1.9-23 (existing)	The Contractor shall provide a Project Management Service and Function Migration Plan that explains how training and knowledge transfer activities will occur (e.g., materials, courses, Question & Answer (Q&A) session preparation, dates, times, participants) to familiarize the State staff with all of the Contractor's operations, processes and tools.
7.1.9-24 (existing)	The Contractor shall be responsible to ensure that State staff are familiar with all of the Contractor's services and any of the new processes and tools used by the Contractor upon transition from the incumbent Contractor (e.g., CalHEERS Service Desk).

Req #	SOW Requirement
7.1.9-25 (existing)	The Contractor shall provide leadership in working with the State and the incumbent Contractor to integrate the incumbent Contractor's Closeout Plan and Closeout Work Plan with the Contractor's Project Management Service and Function Migration Plan.
7.1.9-26 (existing)	The Contractor shall complete transition and assume responsibility for all project management related business services and functions.
7.1.9-27 (existing)	The Contractor shall participate in the transfer of data and files including but not limited to e-mails, historical transmission files, archived database records, documentation and any other project management related data files.
7.1.9-28 (new)	The Contractor shall collaborate with the State to develop, implement, and maintain a Content Management approach as part of the Document Management Component that identifies transition activities to mature the Project SharePoint site and other content management tools utilized by the Project.
7.1.9-29 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.9-30 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.9-31 (modified)	The Contractor shall update the following appendices and attach them to the Project Management Service and Function Migration Plan: Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.9.3 System Change & Enhancement SFMP

Table 7-14: System Change & Enhancement SFMP (CD-7.1-10)

Req #	SOW Requirement
7.1.9-32 (new)	The Contractor shall review the currently approved DEL D-7.1-10 Maintenance (via CR) Service and Function Migration Plan dated 02/28/2020 as a guide to create, in collaboration with the State, a new System Change & Enhancement Service and Function Migration Plan DED for review. The DED will then be the baseline for a new System Change & Enhancement Service and Function Migration Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Overall Approach 3.2 Approach to Transition Work Products 3.3 Resources Assigned 3.4 System/Software Development Lifecycle (SDLC) Component Area (SOW 4.1) 3.5 Change Management and Configuration Management (System) Component Area (SOW 4.2) 3.6 Change/Refresh/Upgrades Component Area (SOW 4.3) 3.7 Code Development Component Area (SOW 4.4) 3.8 System Requirements Management Component Area (SOW 4.5) 3.9 Release Management Component Area (SOW 4.6) 3.10 Organization & Business Change Management Component Area (SOW 4.7) 3.11 Testing Component Area (SOW 4.8) 3.12 Defect Management Component Area (SOW 4.9) 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Issues 4.4 Risk Management 4.4.1 Known Risks 4.4.2 Emergent Risks 5. ROLES AND RESPONSIBILITIES 6. GLOSSARY AND ACRONYMS 6.1 Glossary and Acronyms list can be found at this SharePoint link. 7. REPORTING AND COMMUNICATION 7.1 Timing, Audience, and Media 7.2 Readiness Confidence Criteria APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: CONTRACTOR CUTOVER TIMELINE
7.1.9-33 (new)	The Contractor shall staff, manage, lead and execute System Change & Enhancement SFMP activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-10 – System Change & Enhancement Service and Function Migration Plan.
7.1.9-34 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
7.1.9-35 (modified)	The Contractor shall develop, deliver, maintain and execute a System Change & Enhancement Service and Function Migration Plan to specifically assist the State in defining and executing the migration of all services and functions needed in support of SOW Section 4, SYSTEM CHANGE & ENHANCEMENT REQUIREMENTS.
7.1.9-36 (modified)	The Contractor shall execute and oversee all activities specified in the approved System Change & Enhancement Service and Function Migration Plan throughout the Transition-In period.
7.1.9-37 (modified)	The Contractor shall manage updates and changes to the System Change & Enhancement Service and Function Migration Plan (as needed) throughout the Transition-In period.
7.1.9-38 (modified)	The Contractor shall utilize the Transition Component Worksheet to identify System Change & Enhancement transition components that need to be included as part of the service and function migration plan for System Change & Enhancement .
7.1.9-39 (modified)	The Contractor shall provide a System Change & Enhancement Service and Function Migration Plan that includes, but is not limited to, the following information: 1. Definition of how each service or function, being performed by the incumbent Contractor, will be operationalized and Cutover to the Contractor. 2. Identification the activities and tasks that must be accomplished to allow for a successful transition of operational control of a service or function. These activities include preparatory actions being taken to obtain service Contracts, establish capabilities, prepare for testing/validation, and those actions taken subsequent to successful testing/validation, needed to implement Cutover. 3. Definition of the roles and responsibilities for completing migration activities and tasks. 4. A Plan of the timing, audience, media and message for communication events. Definition of the measurements to validate or test the completion of transition of services or functions. 5. A plan for the Readiness Reviews in coordination with the State and the incumbent Contractor's Project Closeout Plan. 6. Identification of Cutover activities and the target Cutover date. 7. Identification of risks and issues tied to the migration and planned mitigation measures/issues resolution. 8. Definition of contingency plans to troubleshoot high risk transition activities. Identify what technical advice and assistance the Contractor will require from the incumbent Contractor (e.g., number of hours, position expertise).
7.1.9-40 (modified)	The Contractor shall provide a System Change & Enhancement Service and Function Migration Plan that explains how training and knowledge transfer activities will occur (e.g., materials, courses, Q&A session preparation, dates, times, participants) to familiarize the State staff with all of the Contractor's operations, processes and tools.
7.1.9-41 (existing)	The Contractor shall be responsible for ensuring that State staff are familiar with all of the Contractor's services and any of the new processes and tools used by the Contractor upon transition from the incumbent Contractor.
7.1.9-42 (modified)	The Contractor shall participate in the transfer of data and files including but not limited to e-mails, historical transmission files, archived database records, documentation, software configuration items, test scenarios, test cases and scripts, test data and any other System Change & Enhancement related data files.
7.1.9-43 (modified)	The Contractor shall take over the CalHEERS Software as modified and provide a signed formal letter of acceptance, which states that the Contractor accepts responsibility for the source code.
7.1.9-44 (existing)	The Contractor shall take all actions required to install the component systems equipment and software required to support application maintenance at their development site.
7.1.9-45 (existing)	The Contractor, in consultation with the State staff, shall review and transfer all existing open and closed CRs and attachments into the Contractor's CR tool.

Req #	SOW Requirement
7.1.9-46 (existing)	The Contractor shall transition all System/Software Development Life Cycle (SDLC) Support Functions, required to support defect resolution, change management, and release management requirements in coordination with the incumbent Contractor's Project Closeout Plan that includes but is not limited to the following information: 1. Design 2. Development 3. Tools 4. Data 5. Testing 6. Defect Management 7. Code repository and source code 8. Nonproduction environments 9. UAT support activities 10. Migration 11. Warranties 12. All related documentation
7.1.9-47 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.9-48 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.9-49 (modified)	The Contractor shall update the following appendices and attach them to the System Change & Enhancement Service and Function Migration Plan Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency

Req #	SOW Requirement
	7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.9.4 Program Support SFMP

Table 7-15: Program Support SFMP (CD-7.1-11)

Req #	SOW Requirement
7.1.9-50 (new)	The Contractor shall review the currently approved DEL D-7.1-11 Maintenance (via Program Support) Service and Function Migration Plan dated 02/28/2020 as a guide to create, in collaboration with the State, a new Program Support Service and Function Migration Plan DED for review. The DED will then be the baseline for a new Program Support Service and Function Migration Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Overall Approach 3.2 Approach to Transition Work Products 3.3 Resources Assigned 3.4 Program Support Services Component Area (SOW 5.1) 3.5 Consumer Experience Services Component Area (SOW 5.2) 3.6 Reasonable Opportunity Period Batch Services Component Area (SOW 5.3) 3.7 BOT Services Component Area (SOW 5.4) 3.8 Small Change Notices Services Component Area (SOW 5.5) 3.9 Salesforce Application Maintenance Services Component Area (SOW 5.6) 3.10 Intelligent Document Processing Services Component Area (SOW 5.7) 3.11 Application Maintenance Services Component Area (SOW 5.8) 3.12 Usability Research Services Component Area (SOW 5.9) 3.13 Electronic Health Information Transfer (eHIT) Services Component Area (SOW 5.10) 3.14 Federal Regulatory Analysis and Implementation Services Component Area (SOW 5.11) 3.15 State Regulatory Analysis and Implementation Services Component Area (SOW 5.12) 3.16 Data Usage & Analytics Innovations Component Area (SOW 5.13) 3.17 Print Mail Center Support Services Component Area (SOW 5.14) 3.18 General Innovations Component Area (SOW 5.15) 3.19 Data Usage Innovations Component Area (SOW 5.16) 3.20 Consumer Journey & Experience Innovations Component Area (SOW 5.17) 3.21 Artificial Intelligence Innovations Component Area (SOW 5.18) 3.22 Organizational Innovations Component Area (SOW 5.19) 3.23 Security Innovations Component Area (SOW 5.20) 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Issues 4.4 Risk Management 4.4.1 Known Risks

Req #	SOW Requirement
	4.4.2 Emergent Risks 5. ROLES AND RESPONSIBILITIES 6. GLOSSARY AND ACRONYMS 7. REPORTING AND COMMUNICATION 7.1 Timing, Audience, and Media 7.2 Readiness Measurement Criteria APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 2: CONTRACTOR CUTOVER TIMELINE
7.1.9-51 (new)	The Contractor shall staff, manage, lead and execute Program Support SFMP activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-11 –Program Support Service and Function Migration Plan.
7.1.9-52 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.9-53 (modified)	The Contractor shall develop, deliver, maintain and execute a Program Support Service and Function Migration Plan to specifically assist the State in defining and executing the migration of all services and functions needed in support of SOW Section 5, PROGRAM SUPPORT REQUIREMENTS.
7.1.9-54 (modified)	The Contractor shall execute and oversee all activities specified in the approved Program Support Service and Function Migration Plan throughout the Transition-In period.
7.1.9-55 (modified)	The Contractor shall utilize the Transition Component Worksheet to identify the Program Support transition components that need to be included as part of the service and function migration plan for Program Support.
7.1.9-56 (modified)	The Contractor shall provide a Program Support Service and Function that includes but is not limited to the following information: 1. Definition of how each service or function, being performed by the incumbent Contractor, will be operationalized and Cutover to the Contractor. 2. Identification of the activities and tasks that must be accomplished to allow for a successful transition of operational control of a service or function. These activities include preparatory actions being taken to establish and prepare facilities, obtain service Contracts, establish capabilities, prepare for testing/validation, and those actions taken subsequent to successful testing/validation, needed to implement Cutover. 3. Definition of the roles and responsibilities for completing migration activities and tasks. 4. A Plan of the timing, audience, media and message for communication events. 5. Definition the measurements to validate or test the completion of transition of services or functions. 6. A Plan for the Readiness Reviews in coordination with the State and the incumbent Contractor's Project Closeout Plan. 7. Identification of Cutover activities and the target Cutover date. 8. Identification of risks and issues tied to the migration and planned mitigation measures/issues resolution. 9. Definition of the contingency plans to troubleshoot high risk transition activities. 10. Identification of what technical advice and assistance the Contractor will require from the incumbent Contractor (e.g., number of hours, position expertise). Include how and where the Contractor intends to stand up component subsystems, the CalHEERS Service Desk and Program Support Services (back office). 11. Include facilities preparation and installation planning. The Contractor facilities will be used to accommodate the delivery of services and functions that support the maintenance and operations of CalHEERS.

Req #	SOW Requirement
7.1.9-57 (modified)	The Contractor shall provide an Program Support Service and Function Migration Plan that addresses how and when data will be migrated for component subsystems, service desk, archives, nonproduction environments, and contained in tools used to support M&O activities.
7.1.9-58 (modified)	The Contractor shall provide an Program Support Service and Function Migration Plan that explains what the Contractor proposes to do to successfully assume complete and full operation of CalHEERS and all related M&O responsibilities including, but not limited to: 1. Explaining how the Contractor will demonstrate readiness, provide evidence and confirmation that they are prepared to accept responsibility, and obtain State approval to do so with an effective date. 2. Establishing an approach, process, and procedures needed to Cutover and assume responsibility for all services, functions, and activities identified as transition components.
7.1.9-59 (modified)	The Contractor shall provide an Program Support Service and Function Migration Plan that explains how training and knowledge transfer activities will occur (e.g., materials, courses, Q&A session preparation, dates, times, participants) to familiarize the State staff with all of the Contractor's operations, processes and tools.
7.1.9-60 (existing)	The Contractor shall be responsible for ensuring that State staff are familiar with all of the Contractor's services and any of the new processes and tools used by the Contractor upon transition from the incumbent Contractor (e.g., CalHEERS Service Desk).
7.1.9-61 (existing)	The Contractor shall transition all incumbent Contractor's Print Center Services in coordination with the incumbent Contractor's Project Closeout Plan and Operations Manual.
7.1.9-62 (existing)	The Contractor shall transition all CalHEERS Website Services in coordination with the incumbent Contractor's Project Closeout Plan.
7.1.9-63 (existing)	The Contractor shall transition all Blind or Visually Impaired (BVI) Services in coordination with the incumbent Contractor's Project Closeout Plan.
7.1.9-64 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.9-65 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.9-66 (modified)	The Contractor shall update the following appendices and attach them to the Program Support Service and Function Migration Plan Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable)

Req #	SOW Requirement
	4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.9.5 Operations SFMP

Table 7-16: Operations SFMP (CD-7.1-12)

Req #	SOW Requirement
7.1.9-67 (new)	The Contractor shall review the currently approved DEL ~~CD~~-7.1-12 Operations Service and Function Migration Plan dated 02/28/2020 as a guide to create, in collaboration with the State, a new Operations Service and Function Migration Plan DED for review. The DED will then be the baseline for a new Operations Service and Function Migration Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 3.1 Overall Approach 3.2 Approach to Transition Work Products 3.3 Resources Assigned 3.4 Operations Planning and Management Component Area (SOW 6.1) 3.5 Operations Manual Component Area (SOW 6.2) 3.6 Operations Reporting, Data, and Analytics Component Area (SOW 6.3) 3.7 Operations Maintenance Component Area (SOW 6.4) 3.8 Interface Support Component Area (SOW 6.5) 3.9 Technology Refresh Component Area (SOW 6.6) 3.10 System Security Component Area (SOW 6.7) 3.11 Data Retention, Backup and Recovery Component Area (SOW 6.8) 3.12 Data Management Component Area (SOW 6.9) 3.13 Technology Recovery Component Area (SOW 6.10) 3.14 Business Continuity Component Area (SOW 6.11) 3.15 System Environments Component Area (SOW 6.12) 3.16 System Performance Component Area (SOW 6.13) 3.17 System Hardware/Software Component Area (SOW 6.14) 3.18 Problem Management Component Area (SOW 6.15) 3.19 Help Desk Services Component Area (SOW 6.16)

Req #	SOW Requirement
	3.20 Hosting Services Component Area (SOW 6.17) 3.21 Project Support Services Component Area (SOW 6.18) 3.22 Service Center Services Component Area (SOW 6.19) 3.23 Website Management Component Area (SOW 6.20) 3.24 ServiceNow, SharePoint, and EWM 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Issues 4.4 Risk Management 4.4.1 Known Risks 4.4.2 Emergent Risks 5. ROLES AND RESPONSIBILITIES 6. GLOSSARY AND ACRONYMS 7. REPORTING AND COMMUNICATIONS 7.1 Timing, Audience, and Media 7.2 Readiness Confidence Criteria APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: CONTRACTOR CUTOVER TIMELINE
7.1.9-68 (new)	The Contractor shall staff, manage, lead and execute Operations SFMP activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-12 – Operations Service and Function Migration Plan.
7.1.9-69 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.9-70 (modified)	The Contractor shall develop, deliver, maintain and execute an Operations Service and Function Migration Plan to specifically assist the State in defining and executing the migration of all services and functions needed in support of SOW Section 6, OPERATIONS REQUIREMENTS.
7.1.9-71 (existing)	The Contractor shall execute and oversee all activities specified in the approved Operations Service and Function Migration Plan throughout the Transition-In period.
7.1.9-72 (existing)	The Contractor shall manage updates and changes to the Operations Service and Function Migration Plan (as needed) throughout the Transition-In period.
7.1.9-73 (existing)	The Contractor shall utilize the Transition Component Worksheet to identify the Operations transition components that need to be included as part of the service and function migration plan for Operations.
7.1.9-74 (existing)	The Contractor shall provide an Operations Service and Function Migration Plan that includes but is not limited to the following information: 1. Definition of how each service or function, being performed by the incumbent Contractor, will be operationalized and Cutover to the Contractor. 2. Identification of the activities and tasks that must be accomplished to allow for a successful transition of operational control of a service or function. These activities include preparatory actions being taken to establish and prepare facilities, obtain service Contracts, establish capabilities, prepare for testing/validation, and those actions taken subsequent to successful testing/validation, needed to implement Cutover. 3. Definition of the roles and responsibilities for completing migration activities and tasks. 4. A Plan of the timing, audience, media and message for communication events. Define the measurements to validate or test the completion of transition of services or functions. 5. A Plan for the Readiness Reviews in coordination with the State and the incumbent Contractors Project Closeout Plan. 6. Identification of Cutover activities and the target Cutover date.

Req #	SOW Requirement
	7. Identification of risks and issues tied to the migration and planned mitigation measures/issues resolution. 8. Definition of contingency plans to troubleshoot high risk transition activities. Identify what technical advice and assistance the Contractor will require from the incumbent Contractor (e.g., number of hours, position expertise)
7.1.9-75 (modified)	The Contactor shall provide an Operations Service and Function Migration Plan that explains what the Contractor proposes to do to successfully assume complete and full operation of CalHEERS and all related M&O responsibilities including but not limited to: 1. Explaining how the Contractor will demonstrate readiness, provide evidence and confirmation that they are prepared to accept responsibility, and obtain State approval to do so with an effective date. 2. Establishing an approach, process, and procedures needed to Cutover and assume responsibility for all services, functions, and activities identified as transition components.
7.1.9-76 (existing)	The Contractor shall provide an Operations Service and Function Migration Plan that explains how training and knowledge transfer activities will occur (e.g., materials, courses, Q&A session preparation, dates, times, participants) to familiarize the State staff with all of the Contractor's operations, processes and tools.
7.1.9-77 (existing)	The Contractor shall be responsible for ensuring that State staff are familiar with all of the Contractor's services and any of the new processes and tools used by the Contractor upon transition from the incumbent Contractor.
7.1.9-78 (existing)	The Contractor shall participate in the transfer of data and files including but not limited to e-mails, historical transmission files, archived database records, historical system logs, documentation, and any other Operations related data files that would be mandatory or beneficial to the continuance of the system.
7.1.9-79 (existing)	The Contractor shall provide an Operations Service and Function Migration Plan that includes provisions for transition of all Data Management Functions, including, but not limited to the following items in the incumbent Contractor's Project Closeout Plan: 1. Data Administration 2. Database Administration 3. Data Encryption 4. Data Archiving 5. Backup and Recovery 6. Test Data Management
7.1.9-80 (modified)	The Contractor shall provide an Operations Service and Function Migration Plan that includes provisions for any facilities they are establishing to support a service or function. Such services or functions that may require facilities include but are not limited to the following: 1. Print Center Facility 2. ADA Support Facilities 3. Service Desk Facilities 4. Workload Automation (AutoSys - batch processing) 5. Service Center Facilities
7.1.9-81 (modified)	The Contractor shall provide an Operations Service and Function Migration Plan that includes, but is not limited to the following topics relating the facility preparation and installation planning: 1. Approach 2. Strategy (Prime and backup facilities) 3. Roles and Responsibilities (Contractor, state, Data Center, and other key stakeholders) 4. Schedule 5. Risks 6. Security 7. Network connectivity. 8. Specialized commercial building modifications

Req #	SOW Requirement
	9. Specialized computer electrical equipment 10. Specialized environmental conditioning equipment 11. Assumptions
7.1.9-82 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.9-83 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.9-84 (modified)	The Contractor shall update the following appendices and attach them to the Operations Service and Function Migration Plan Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.10 TIP1 Training and Knowledge Transfer

Transition Training and Knowledge Transfer services are conducted with Staff for each Service or Function identified as part of the Service and Function Migration Plans and ensures all appropriate Staff are appropriately and effectively trained to be ready assume operational and system control and responsibility for fulfilling M&O support requirements and have coordinated Cutover tasks and timing with the incumbent Contractor. The Contractor shall perform the Transition Readiness services described in this section.

Table 7-17: Transition-In Training and Knowledge Transfer Plan (CD-7.1-13)

Req #	SOW Requirement
7.1.10-01 (new)	The Contractor shall ~~adopt~~ <u>review</u> the currently approved ~~DEL~~ <u>CD-7.10-1 Transition-In Training and Knowledge Transfer Plan</u> dated 02/28/2020 as a guide to create, in collaboration with the State, a new Transition-In Training and Knowledge Transfer Plan DED for review. The DED will then be the baseline for a new Transition-In Training and Knowledge Transfer Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 1.2 List of Reference Documents 1.3 Audience 2. SUMMARY 2.1 Scope 3. APPROACH 4. ASSUMPTIONS, CONSTRAINTS AND RISKS 4.1 Assumptions 4.2 Constraints 4.3 Risk Management 5. KNOWLEDGE TRANSFER AND DISCOVERY ACTIVITIES APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: KNOWLEDGE TRANSFER (KT) AND DISCOVERY SESSIONS

Req #	SOW Requirement
7.1.10-02 (new)	The Contractor shall staff, manage, lead and execute Training and Knowledge Transfer activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-13 – Training and Knowledge Transfer.
7.1.10-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.10-04 (modified)	The Contractor shall develop, deliver, maintain, and execute a Transition-In Training and Knowledge Transfer Plan that addresses training and knowledge transfer needs for Contractor and State staff and training needs for all CalHEERS end users and stakeholders, and for any changes to services and functions provided within each of the transition component areas as follows: 1. Project Management as identified in SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS 2. System Change & Enhancement as identified in SOW Section 4, SYSTEM CHANGE & ENHANCEMENT REQUIREMENTS 3. Program Support as identified in SOW Section 5, PROGRAM SUPPORT REQUIREMENTS 4. Operations as identified in SOW Section 6, OPERATIONS REQUIREMENTS
7.1.10-05 (existing)	The Contractor shall execute and oversee all activities specified in the approved Transition-In Training and Knowledge Transfer Plan throughout the Transition-In period.
7.1.10-06 (existing)	The Contractor shall manage updates and changes to the Transition-In Training and Knowledge Transfer Plan (as needed) throughout the Transition-In period.
7.1.10-07 (existing)	The Contractor shall provide a Transition-In Training and Knowledge Transfer Plan that describes training and knowledge transfer expectations and planning, and for the transition period. This plan must include different perspectives, such as but not limited to: 1. The knowledge transfer activities that Contractor Staff will require from the incumbent Contractor in order to prepare for assumption of M&O support for a given service or function identified in the Contractor's Transition Plan. 2. Training that the Contractor conducts internally to prepare their Staff to implement activities, processes, and procedures needed to provide M&O support for a given service or function identified in the Contractor's TIMP. 3. Training of State staff regarding the Contractor's transition approach, processes, activities, and tools for managing the transition effort and reporting status. 4. Training of State staff, Stakeholders, and CalHEERS end users regarding changes to M&O services/functions and to service delivery means.
7.1.10-08 (existing)	The Contractor shall provide a Transition-In Training and Knowledge Transfer Plan which serves as the single source of planning for training and knowledge transfer expectations during the transition period so that upon transition completion, Contractor Staff is equipped to operate the system and the processes for managing these systems.
7.1.10-09 (existing)	The Contractor shall provide knowledge transfer and internal training activities that specify the methods to be used – examples include, but are not limited: 1. Documentation Reviews – shall be the review of CalHEERS documentation relevant to the responsibilities to be assumed by the Contractor's Staff. 2. Q&A Sessions – shall be meetings to ask the incumbent Contractor clarifying questions on the documentation to validate the understanding of CalHEERS processes and procedures. 3. Walkthroughs – shall be discussions or meetings between the Contractor and incumbent Contractor to step through operational processes, procedures, scripts, workflow, HW/SW configuration, etc. 4. Training – shall be the learning that takes place to prepare the Contractor's Staff to implement activities, processes, and procedures needed to provide M&O support for a given service or function identified in the Contractor's TIMP. 5. Demonstration – shall show the Contractor's Staff can successfully demonstrate capability to implement activities, processes, and procedures needed to provide M&O support for a given service or function identified in the Contractor's TIMP.

Req #	SOW Requirement
7.1.10-10 (modified)	The Contractor shall provide a Transition-In Training and Knowledge Transfer Plan that includes but is not limited to: 1. Training approach, instruction/courses, and training materials to be delivered to familiarize the State staff and stakeholders, and CalHEERS end users, as appropriate, with the Contractor's transition plans and reporting tools and any enhancements or changes to M&O services or functions, and 2. Knowledge transfer and internal training exercises that will be conducted to equip and verify the Contractor's Staff can implement the activities, processes, and procedures needed to provide M&O support for each given service or function identified in the Contractor's TIMP.
7.1.10-11 (existing)	The Contractor shall ensure that any transition to new Staff will not affect the Schedule or provisions of Services set forth in this Contract
7.1.10-12 (modified)	While constructing and developing the Deliverables, the Contractor shall demonstrate and provide information to Staff designated by the State about the functions and operations of all such Software in accordance with the Specifications, any executed CRs and the Work Plan.
7.1.10-13 (existing)	The Contractor shall be responsible for ensuring that State staff are familiar with all of the Contractor's services (e.g., CalHEERS Service Desk).
7.1.10-14 (new)	The Contractor shall identify and document any and all project artifacts identified or developed during knowledge transfer in the Project Artifact Inventory.
7.1.10-15 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.10-16 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.10-17 (modified)	The Contractor shall update the following appendices and attach them to the Training and Knowledge Transfer. Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL

Req #	SOW Requirement
	3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.11 TIP1 Readiness Reviews

Transition Readiness Reviews are conducted with the State for each Service or Function identified as part of the Service and Function Migration Plans and provide evidence that the Contractor is ready to assume operational control and responsibility for fulfilling M&O support requirements and have coordinated Cutover tasks and timing with the incumbent Contractor. The Contractor shall perform the Transition Readiness services described in this section.

Table 7-18: Transition Readiness Reviews (CD-7.1-14)

Req #	SOW Requirement
7.1.11-01 (new)	The Contractor shall adopt the currently approved DEL D-7.1-14 Transition Readiness Reviews dated 04/21/2020 as a guide to create, in collaboration with the State, a new Transition Readiness Reviews DED for review. The DED will then be the baseline for a new Transition Readiness Reviews deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 2. SCOPE 2.1 Readiness Review Schedule 2.2 Readiness Review Checklist 2.3 Readiness Review Presentation 2.4 Go/No-Go Decision Packet 2.5 Cutover Content Repository 3. GLOSSARY AND ACRONYMS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS
7.1.11-02 (new)	The Contractor shall staff, manage, lead and execute Transition Readiness Review activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-14 – Transition Readiness Reviews.
7.1.11-03 (new)	The Contractor shall only alter or modify this Deliverable’s structure or content with the approval of the State Project Director or designee.
7.1.11-04 (modified)	The Contractor shall conduct a series of Transition Readiness Reviews with the State for each Service or Function identified as part of the Service and Function Migration Plans and provide evidence that they are ready to assume operational control and responsibility for fulfilling M&O support requirements and have coordinated Cutover tasks and timing with the incumbent Contractor. Transition Readiness Reviews apply to each of the following transition area: 1. Project Management as identified in SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS 2. System Change & Enhancement as identified in SOW Section 4, SYSTEM CHANGE & ENHANCEMENT REQUIREMENTS 3. Program Support as identified in SOW Section 5, PROGRAM SUPPORT REQUIREMENTS 4. Operations as identified in SOW Section 6, OPERATIONS REQUIREMENTS

Req #	SOW Requirement
7.1.11-05 (existing)	The Contractor shall provide Transition Readiness Reviews that include but are not limited to the following: 1. Incumbent Contractor's Closeout Checklist 2. Status of Transition Component Migration Activities and Tasks 3. Training and/or Knowledge Transfer 4. Contractor's Test or Validation Results 5. Proposed Cutover Activities and Date 6. Contractor's Confirmation of Readiness 7. State Go/No Go Decision
7.1.11-06 (existing)	The Contractor shall conduct a Transition Readiness Review with the State to obtain State Project Director or designee approval to assume operational control of CalHEERS.
7.1.11-07 (existing)	The Contractor shall show evidence and confirm that they can operate the system in production as indicated but not limited to the following: 1. Start up and shut down of CalHEERS Application 2. Monitor and support Running Batch 3. Support Running Backups 4. Producing the CalHEERS Daily Operations Status Report 5. Perform operations management and system administration
7.1.11-08 (existing)	The Contractor shall also show that they have identified and coordinated Cutover tasks and timing with the incumbent Contractor.
7.1.11-09 (existing)	The Contractor shall include the effort that specifies the methods, processes, and reviews to be used to confirm readiness to accept responsibility for operating and maintaining identified services, functions, and other transition component items identified in the Service and Function Migration Plans.
7.1.11-10 (modified)	The Contractor shall ensure that the incumbent Contractor Project Closeout Plan turnover processes and procedures conform to the TIMP.
7.1.11-11 (existing)	Upon implementing Cutover for a transition component, the Contractor shall confirm for the State Project Director or designee that Transition-In is complete and the Contractor has assumed full M&O responsibility for providing and managing the service, function or other transition item.
7.1.11-12 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.11-13 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.11-14 (new)	The Contractor shall update the following appendices and attach them to the Transition Readiness Review. Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s)

Req #	SOW Requirement
	3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.12 TIP1 Test and Validation

The overall goal of the Contractor's Transition Test and Validation is to demonstrate that the Contractor is capable of successfully maintaining and operating CalHEERS, standing up replacement component subsystem services, operating the CalHEERS Service Desk, providing program support services, and supporting SDLC activities.

7.1.12.1 TIP1 Project Management Test and Validation

Table 7-19: Project Management Test and Validation Plan (CD-7.1-15)

Req #	SOW Requirement
7.1.12-01 (new)	The Contractor shall adopt the currently approved DEL D-7.1-15 Project Management Transition Test and Validation Plan dated 04/21/2020 as a guide to create, in collaboration with the State, a new Project Management Transition Test and Validation Plan DED for review. The DED will then be the baseline for a new Project Management Transition Test and Validation Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 2. SCOPE 2.1 Transition Test and Validation Plan (Word Document) 2.1 Transition Test and Validation Tracker (Excel Sheet) 3. APPROACH 4. GLOSSARY AND ACRONYMS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: TTVP FOR SOW 3 PROJECT MANAGEMENT
7.1.12-02 (new)	The Contractor shall staff, manage, lead and execute Project Management Test Validation activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-15 – Project Management Test and Validation Plan.
7.1.12-03 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.

Req #	SOW Requirement
7.1.12-04 (modified)	The Contractor shall develop, maintain, and execute a Project Management Transition Test and Validation Plan to specifically assist the State in defining and executing the test and validation activities of all project management functions needed in support of SOW Section 3, PROJECT MANAGEMENT REQUIREMENTS. Areas to consider include but are not limited to the validation of systems in place to manage: 1. Processes for project management 2. Risk and issue tracking. 3. Schedule management 4. Document management. 5. Content Management (Storage of Project Management artifacts) 6. Meetings and other communications 7. Correspondence/E-mail
7.1.12-05 (existing)	The Contractor shall execute and oversee all activities specified in the approved Project Management Service and Function Migration Plan throughout the Transition-In period.
7.1.12-06 (existing)	The Contractor shall manage updates and changes to the Project Management Transition Test and Validation Plan (as needed) throughout the Transition-In period.
7.1.12-07 (existing)	The Contractor shall provide a Project Management Transition Test and Validation Plan that includes, but is not limited to, the following information: 1. Identify which transition components require validation and describes the approach and methods to be used to validate. 2. Indicate that the Contractor shall create a detailed validation plan specific to each transition component (or group of components) identified for validation along with the documentation needed to implement validation and record results. 3. Include a test and validation work plan to schedule, monitor, and report the progress of all test and validation activities.
7.1.12-08 (existing)	During testing and/or validation, conducting walkthroughs for State staff to review, the Contractor shall provide but not be limited to the following activities/tasks: 1. Demonstration of areas where performance is acceptable 2. Demonstration of areas of unacceptable performance, problems, and issues 3. Identification of where the problem occurred and an explanation of the differences between expected and actual results 4. Summary analysis of the problem and the corrective action process and results for each problem or issue
7.1.12-09 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.12-10 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.12-11 (modified)	The Contractor shall update the following appendices and attach them to the Project Management Test Validation Plan. Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to:

Req #	SOW Requirement
	1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.12.2 TIP1 System Change & Enhancement Test and Validation

Table 7-20: System Change & Enhancement Test and Validation Plan (CD-7.1-16)

Req #	SOW Requirement
7.1.12-12 (new)	The Contractor shall review the currently approved DEL D-7.1-16 Maintenance (via CR) Transition Test and Validation Plan dated 04/21/2020 as a guide to create, in collaboration with the State, a new System Change & Enhancement Transition Test and Validation Plan DED for review. The DED will then be the baseline for a new System Change & Enhancement Transition Test and Validation Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 2. SCOPE 2.1 Transition Test and Validation Plan (Word Document) 2.2 Transition Test and Validation Tracker (Excel Sheet) 3. APPROACH 4. GLOSSARY AND ACRONYMS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: TTVP FOR SOW 4 SYSTEM CHANGE & ENHANCEMENTS
7.1.12-13 (new)	The Contractor shall staff, manage, lead and execute System Change & Enhancements Test Validation activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-16 – System Change & Enhancements Transitions Test and Validation Plan.
7.1.12-14 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.12-15 (modified)	The Contractor shall develop, maintain, and execute a System Change & Enhancements Transition Test and Validation Plan to specifically assist the State in defining and executing the test and validation activities of all Maintenance (via CRs) functions needed in support of SOW Section 4, SYSTEM CHANGE & ENHANCEMENT REQUIREMENTS.

Req #	SOW Requirement
7.1.12-16 (modified)	The Contractor shall execute and oversee all activities specified in the approved System Change & Enhancement Transition Test and Validation Plan throughout the Transition-In period.
7.1.12-17 (modified)	The Contractor shall manage updates and changes to the System Change & Enhancement Transition Test and Validation Plan (as needed) throughout the Transition-In period.
7.1.12-18 (existing)	The Contractor shall successfully validate their capability to provide full SDLC support for design, development, test, and implementation in support of application change requests.
7.1.12-19 (existing)	During testing and/or validation, conducting walkthroughs for State staff to review, the Contractor shall at a minimum provide (but not be limited to) the following: 1. Observation of test execution 2. Demonstration of areas where performance is acceptable. 3. Demonstration of areas of unacceptable performance, problems, and issues 4. Identification of where the problem occurred and an explanation of the differences between expected and actual results. 5. Summary analysis of the problem, including subsystems affected, and the corrective action plan
7.1.12-20 (existing)	The Contractor shall document the executed transition system test showing the results of each test and shall submit it to the State Project Director or designee no later than one (1) week after the test. Additional documentation and related materials requested by the State shall be provided no later than 48 hours after the request.
7.1.12-21 (existing)	Following test execution, the Contractor shall deliver or make available to the State all system and component subsystem test documentation, including files, materials, reports, and scripts that were used to validate test results within five (5) Business Days.
7.1.12-22 (existing)	During system and component subsystem testing, the Contractor shall provide the State staff with an updated list of all the test related findings and results at regularly scheduled meetings.
7.1.12-23 (existing)	The Contractor shall utilize a tool to support defect management and this tool must track the status of each defect found during testing activities.
7.1.12-24 (existing)	The Contractor shall identify and resolve inconclusive or incomplete areas of system testing prior to the start of Transition Customer Readiness Testing.
7.1.12-25 (existing)	All deficiencies identified by the Contractor during system and component subsystem testing shall be fully documented through the defect management process, as defined within the existing Transition Test and Validation Plan.
7.1.12-26 (existing)	The Contractor shall correct all defects found during system and component subsystem testing, that are determined to be the responsibility of the Contractor at no cost to the State.
7.1.12-27 (modified)	The Contractor shall, during testing, conduct weekly status meetings with State staff to summarize at a management review level, at a minimum, the following: 1. Summary of status for test execution. 2. Summary of areas where performance is unacceptable. 3. Summary of problems, and issues logged within the defect management tool. 4. Identification of where the problem occurred and an explanation of the differences between expected and actual results. 5. The differences between expected and actual results, and how they will be addressed. 6. Identification of when testing is expected to be completed.
7.1.12-28 (existing)	The Contractor shall perform system and component subsystem testing and provide walkthroughs of the associated test plans and test approaches for State staff.

Req #	SOW Requirement
7.1.12-29 (existing)	The Contractor shall allow the State full access to the Contractor's Transition test plans and test documentation which includes, but is not limited to: 1. Test cases. 2. Test scripts. 3. Test data. 4. Test procedures. 5. Test results
7.1.12-30 (existing)	The Contractor shall conduct Transition Customer Readiness Testing in an environment that mirrors production.
7.1.12-31 (existing)	The Contractor shall conduct Customer Readiness Testing with State participation for all testing identified in the Transition Test and Validation Plan.
7.1.12-32 (existing)	The Contractor shall in collaboration with the State, identify State roles and participation for each component subsystem Customer Readiness Test.
7.1.12-33 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.12-34 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.12-35 (new)	The Contractor shall update the following appendices and attach them to the System Change & Enhancements Test Validation Plan. Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.12.3 TIP1 Program Support Test and Validation

Table 7-21: Program Support Test & Validation Plan (CD-7.1-17)

Req #	SOW Requirement
7.1.12-36 (new)	The Contractor shall review the currently approved DEL D-7.1-17 Maintenance (via Program Support) Transition Test & Validation Plan dated 04/21/2020 as a guide to create, in collaboration with the State, a new Program Support Transition Test & Validation Plan DED for review. The DED will then be the baseline for a new Program Support Transition Test & Validation Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 2. SCOPE 2.1 Transition Test and Validation Plan (Word Document) 2.2 Transition Test and Validation Tracker (Excel Sheet) 3. APPROACH 4. GLOSSARY AND ACRONYMS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: TTVP FOR SOW 5 PROGRAM SUPPORT
7.1.12-37 (new)	The Contractor shall staff, manage, lead and execute Program Support Test Validation activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-17 – Program Support Transitions Test and Validation Plan.
7.1.12-38 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.12-39 (modified)	The Contractor shall develop, maintain, and execute a Program Support Transition Test and Validation Plan to specifically assist the State in defining and executing the test and validation activities of all Program Support functions needed in support of SOW Section 5, PROGRAM SUPPORT REQUIREMENTS.
7.1.12-40 (modified)	The Contractor shall execute and oversee all activities specified in the approved Program Support Transition Test and Validation Plan throughout the Transition-In period.
7.1.12-41 (modified)	The Contractor shall manage updates and changes to the Program Support Transition Test and Validation Plan (as needed) throughout the Transition-In period.
7.1.12-42 (existing)	During testing and/or validation, conducting walkthroughs for State staff, the Contractor shall document and provide a review that includes but is not limited to the following information: 1. Observation of test execution 2. Demonstration of areas where performance is acceptable. 3. Demonstration of areas of unacceptable performance, problems, and issues 4. Identification of where the problem occurred and an explanation of the differences between expected and actual results. 5. Summary analysis of the problem, including subsystems affected, and the corrective action process and results for each defect, problem, or issue
7.1.12-43 (existing)	The Contractor shall document the executed transition system test showing the results of each test and shall submit it to the State Project Director or designee no later than one (1) week after the test. Additional documentation and related materials requested by the State shall be provided no later than 48 hours after the request.

Req #	SOW Requirement
7.1.12-44 (existing)	The Contractor shall, during testing, conduct weekly status meetings with State staff to summarize at a management review level, at a minimum, the following: 1. Summary of status for test execution 2. Summary of areas where performance is unacceptable. 3. Summary of problems, and issues logged within the defect management tool. 4. Identification of where the problem occurred and an explanation of the differences between expected and actual results. 5. The differences between expected and actual results, and how they will be addressed. 6. Identification of when testing is expected to be completed
7.1.12-45 (existing)	The Contractor shall perform system and component subsystem testing and provide walkthroughs of the associated test plans and test approaches for State staff.
7.1.12-46 (existing)	The Contractor shall allow the State full access to the Contractor's Transition test plans, and test documentation that includes, but is not limited to, the following information: 1. Test cases. 2. Test scripts. 3. Test data. 4. Test procedures. 5. Test results
7.1.12-47 (existing)	The Contractor shall conduct Transition Customer Readiness Testing in an environment that mirrors production.
7.1.12-48 (existing)	The Contractor shall conduct Customer Readiness Testing with State participation for all testing identified in the Transition Test and Validation Plan.
7.1.12-49 (existing)	The Contractor shall in collaboration with the State, identify State roles and participation for each component subsystem Customer Readiness Test.
7.1.12-50 (existing)	Following test execution, the Contractor shall deliver or make available to the State all system and component subsystem test documentation, including files, materials, reports and scripts that were used to validate test results within five (5) Business Days.
7.1.12-51 (existing)	The Contractor shall, during system and component subsystem testing, provide the State staff with an updated list of all the test related findings and results at regularly scheduled meetings.
7.1.12-52 (existing)	The Contractor shall utilize a tool to support defect management and this tool must track the status of each defect found during testing activities. The tool shall also be accessible to the State for use and shall include administrative rights for designated State staff.
7.1.12-53 (existing)	The Contractor shall identify and resolve inconclusive or incomplete areas of system testing prior to the start of Transition Customer Readiness Testing.
7.1.12-54 (existing)	All deficiencies identified by the Contractor during system and component subsystem testing shall be fully documented through the defect management process, as defined within the existing Transition Test and Validation Plan.
7.1.12-55 (existing)	The Contractor shall correct all defects found during system and component subsystem testing, that are determined to be the responsibility of the Contractor at no cost to the State.
7.1.12-56 (existing)	During functional, integration, and regression testing, the Contractor shall test to: 1. Confirm that each component Subsystem conforms to the System specifications. 2. Validate interoperability between System and component Subsystems and Client (recipient/provider) correspondence output. 3. Validate receipt and delivery of interfaces files. 4. Confirm operating performance as necessary for each component Subsystem. 5. Execute batch jobs as necessary to verify component Subsystem outputs. 6. Validate generation and delivery of data download files.
7.1.12-57 (existing)	The Contractor shall conduct a test readiness review with the State utilizing the State's User Acceptance Testing (UAT) entry and exit criteria to show that the Contractor is properly prepared to execute Customer Readiness Testing prior to initiating test activities.

Req #	SOW Requirement
7.1.12-58 (existing)	The Contractor shall perform full load and stress testing of components Subsystems to demonstrate the ability to process expected workloads accurately and within prescribed time frames.
7.1.12-59 (existing)	All defects and/or deficiencies identified by the Contractor during System and Component Subsystem Testing, shall be corrected by the Contractor prior to the start of System Operations unless authorized by the State Project Director or designee.
7.1.12-60 (existing)	The Contractor shall successfully and accurately test and/or validate its capability to conduct all business services functions.
7.1.12-61 (existing)	The Contractor shall successfully and accurately test and/or validate its capability to operate all Service Desk functions.
7.1.12-62 (existing)	The Contractor shall successfully and accurately test and/or validate its capability to successfully interact with the CalHEERS Application in receiving, handling, scanning, reading, and generating data files as well as storage and retrieval of images.
7.1.12-63 (existing)	The Contractor shall successfully and accurately test and/or validate its capability to perform all current Print Center functions to include but not limited to printing and mailing information notices, notice of actions (NOA) and correspondence.
7.1.12-64 (existing)	As a minimum, the Contractor shall conduct Test Readiness Reviews with the State to obtain State Project Director or designee approval to initiate System Testing for the following specific transition components: 1. Training Services 2. Website Management Services 3. User's Manual Services, Program Support (Back Office) 4. Operations Forms Support (Print Center) 5. Operations Reporting Support
7.1.12-65 (existing)	The Contractor shall confirm and provide evidence that they are capable of providing these services as specified by the TIMP and have coordinated Cutover tasks and timing with the incumbent Contractor.
7.1.12-66 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.12-67 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.12-68 (modified)	The Contractor shall update the following appendices and attach them to the Program Support Test Validation Plan. Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance)

Req #	SOW Requirement
	5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.1.12.4 TIP1 Operations Test and Validation

Table 7-22: Operations Test and Validation Plan (CD-7.1-18)

Req #	SOW Requirement
7.1.12-69 (new)	The Contractor shall adopt the currently approved DEL <u>D-7.1-18 Operations Transition Test and Validation Plan</u> dated 04/21/2020 as a guide to create, in collaboration with the State, a new Operations Transition Test and Validation Plan DED for review. The DED will then be the baseline for a new Operations Transition Test and Validation Plan deliverable, which includes but is not limited to: 1. INTRODUCTION 1.1 Purpose 2. SCOPE 2.1 Transition Test and Validation Plan (Word Document) 2.2 Transition Test and Validation Tracker (Excel Sheet) 3. APPROACH 4. GLOSSARY AND ACRONYMS APPENDIX 1: SOW TO DELIVERABLE TRACEABILITY CHECKLIST APPENDIX 2: DELIVERABLE COMPLIANCE AND VALIDATION CHECKLIST APPENDIX 3: ASSOCIATED ARTIFACTS APPENDIX 4: TTVP FOR SOW 6 OPERATIONS
7.1.12-70 (new)	The Contractor shall staff, manage, lead and execute Operations Test Validation activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.1-18 – Operations Transitions Test and Validation Plan.
7.1.12-71 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.1.12-72 (existing)	The Contractor shall develop, maintain, and execute an Operations Transition Test and Validation Plan to specifically assist the State in defining and executing the test and validation activities of all Operations functions needed in support of SOW Section 6, OPERATION REQUIREMENTS.
7.1.12-73 (existing)	The Contractor shall execute and oversee all activities specified in the approved Operations Transition Test and Validation Plan throughout the Transition-In period.
7.1.12-74 (existing)	The Contractor shall manage updates and changes to the Operations Transition Test and Validation Plan (as needed) throughout the Transition-In period.
7.1.12-75 (existing)	The Contractor shall successfully validate their capability to operate the CalHEERS System, in accordance with SOW Section 6, OPERATIONS REQUIREMENTS.

Req #	SOW Requirement
7.1.12-76 (existing)	During testing and/or validation, conducting walkthroughs for State staff to review, the Contractor shall at a minimum provide (but not be limited to) the following: 1. Observation of test execution 2. Demonstration of areas where performance is acceptable. 3. Demonstration of areas of unacceptable performance, problems, and issues 4. Identification of where the problem occurred and an explanation of the differences between expected and actual results. 5. Summary analysis of the problem, including subsystems affected, and the corrective action plan
7.1.12-77 (existing)	The Contractor shall document the executed transition system test showing the results of each test and shall submit it to the State Project Director or designee no later than one (1) week after the test. Additional documentation and related materials requested by the State shall be provided no later than 48 hours after the request.
7.1.12-78 (existing)	Following test execution, the Contractor shall deliver or make available to the State all system and component subsystem test documentation, including files, materials, reports and scripts that were used to validate test results within five (5) Business Days.
7.1.12-79 (existing)	During system and component subsystem testing, the Contractor shall provide the State staff with an updated list of all the test related findings and results at regularly scheduled meetings.
7.1.12-80 (existing)	The Contractor shall utilize a tool to support defect management and this tool must track the status of each defect found during testing activities.
7.1.12-81 (existing)	The Contractor shall identify and resolve inconclusive or incomplete areas of system testing prior to the start of Transition Customer Readiness Testing.
7.1.12-82 (existing)	All deficiencies identified by the Contractor during system and component subsystem testing shall be fully documented through the defect management process, as defined within the existing Transition Test and Validation Plan.
7.1.12-83 (existing)	The Contractor shall correct all defects found during system and component subsystem testing, that are determined to be the responsibility of the Contractor at no cost to the State.
7.1.12-84 (modified)	The Contractor shall, during testing, conduct weekly status meetings with State staff to summarize at a management review level, at a minimum, the following: 1. Summary of status for test execution 2. Summary of areas where performance is unacceptable. 3. Summary of problems, and issues logged within the defect management tool. 4. Identification of where the problem occurred and an explanation of the differences between expected and actual results. 5. The differences between expected and actual results, and how they will be addressed. 6. Identification of when testing is expected to be completed
7.1.12-85 (existing)	The Contractor shall perform system and component subsystem testing and provide walkthroughs of the associated test plans and test approaches for State staff.
7.1.12-86 (existing)	The Contractor shall allow the State full access to the Contractor's Transition test plans and test documentation which includes, but is not limited to: 1. Test cases. 2. Test scripts. 3. Test data. 4. Test procedures. 5. Test results
7.1.12-87 (existing)	The Contractor shall conduct Transition Customer Readiness Testing in an environment that mirrors production.
7.1.12-88 (existing)	The Contractor shall conduct Customer Readiness Testing with State participation for all testing identified in the Transition Test and Validation Plan.
7.1.12-89 (existing)	The Contractor shall in collaboration with the State, identify State roles and participation for each component subsystem Customer Readiness Test.

Req #	SOW Requirement
7.1.12-90 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.1.12-91 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.1.12-92 (new)	The Contractor shall update the following appendices and attach them to the Operations Test Validation Plan. Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.2 TRANSITION-IN PHASE 2 (TIP2) TRANSFORMATION

7.2.1 TIP2 TIMP Updates

The TIP2 TMMP will include a retrospect of TIP1 activities and include updates and improvements on expectations in TIP1 based on new information collected and lessons learned.

Table 7-23: TIP2 TIMP Updates (CD-7.2-1)

Req #	SOW Requirement
7.2.1-01 (new)	The Contractor shall update the TIMP to incorporate TIP2 activities, which includes but is not limited to, identifying all items to be transformed, the approach to be utilized for the transformation of each item, the processes and procedures needed to carry out the transformation of each item, the resources, roles and responsibilities necessary to execute the transformation of each item, a timeline for the execution of all transformation activities, and include lessons learned documented throughout the effort. This shall include the approach to how all SOW requirements that are identified as “modified” and “new” will be addressed by the close of the Transformation period.
7.2.1-02 (new)	The Contractor shall analyze, create and maintain an inventory of all contract transformation items by the four (4) SOW Maintenance & Operations (M&O) Support Areas: • Project Management • System Change & Enhancements • Program Support • Operations
7.2.1-03 (new)	The Contractor shall conduct a gap analysis which identifies the “as-is” state and “to-be” state planned for each contract transformation item.
7.2.1-04 (new)	The Contractor shall plan for, and execute the update of, all project Deliverables impacted by the Contract Transformation Phase activities.
7.2.1-05 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.2.1-06 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

7.2.2 TIP2 Meetings, Agendas, and Minutes

Table 7-24: TIP2 Transformation Meetings, Agendas, and Minutes (CD-7.2-2)

Req #	SOW Requirement
7.2.2-01 (new)	The Contractor shall provide continued support for TIP2 Meetings, Agendas, and Minutes requirements as provided for the TIP1 (see requirements above).

7.2.3 TIP2 Final Review

Table 7-25: TIP2 Final Review

Req #	SOW Requirement
7.2.3-01 (new)	The Contractor shall provide continued support for TIP2 Final Review requirements as provided for the TIP1 Final Review requirements.

7.2.4 TIP2 Project Work Plan Updates

Table 7-26: TIP2 Project Work Plan Updates (CD-7.2-3)

Req #	SOW Requirement
7.2.4-01 (new)	The Contractor shall develop, deliver, update, and maintain a Contract Transformation Project Work Plan that represents the entire body of work within the Contract Transformation phase, breaking out transformation activities across the four (4) component areas of the Contract: 1. Project Management 2. System Change & Enhancements 3. Program Support 4. Operations
7.2.4-02 (new)	The Contractor shall develop the Contract Transformation Project Work Plan in accordance with the structure, process and procedures identified in the approved Schedule Management Plan.
7.2.4-03 (new)	The Contractor shall ensure that the Contract Transformation Project Work Plan integrates into the Master Project Schedule.

7.2.5 TIP2 Transformation Short-Term Staffing

Table 7-27: TIP2 Transformation Short-Term Staffing

Req #	SOW Requirement
7.2.5-01 (new)	The Contractor shall provide the additional, short-term staffing necessary to complete all State approved TIP2 Project Work Plan transformation activities.

7.2.6 TIP2 Transformation Execution

Table 7-28: TIP2 Transformation Execution

Req #	SOW Requirement
7.2.6-01 (new)	The Contractor shall manage and execute the Contract Transformation Project using and in compliance with all CalHEERS Project process, including but not limited to: • Project Management • Schedule Management • Risk and Issue Management • Release Management • The Change Request Process • Technical Processes (e.g., Architectural Review Board) • Organizational Change Management • Quality Management • Tool access • Training
7.2.6-02 (new)	The Contractor, when planning the Contract Transformation activities, shall take into consideration the State's resource capacity.
7.2.6-03 (new)	The Contractor shall integrate the Contract Transformation Project activities into both the Functional and Technical Strategic 24-month Roadmaps.

7.2.7 TIP2 Design Document True-up Report

Table 7-29: TIP2 Design Document True-up Report

Req #	SOW Requirement
7.2.7-01 (new)	The Contractor shall plan, staff, and execute a true-up of the CalHEERS Design Documentation, ensuring accurate representation of the current system.
7.2.7-02 (New)	The Contractor shall develop, submit and maintain a Design Documentation Assessment & True-Up Report artifact, which documents the contractor's design document assessment findings & recommendations, and provides the status of the Contractor's design document true-up effort. The Contractor shall provide status reporting and any associated presentations as directed by the State Project Director or designee.

7.2.8 TIP2 CalHEERS Deliverables Transformation Planning

Table 7-30: TIP2 CalHEERS Deliverables Transformation Planning

Req #	SOW Requirement
7.2.8-01 (new)	The Contactor shall plan for the transformation of all CalHEERS Project Deliverables and State identified Artifacts within the Transformation Phase, taking State direction on deliverable update order and priority.
7.2.8-02 (new)	The Contactor shall update all applicable deliverables, removing the use of the term Not Under Warranty (NUW), as that term and defect classification no longer exist on CalHEERS.

7.2.9 TIP2 State Designated Transformation Innovation

Table 7-31: TIP2 State Designated Transformation Innovation

Req #	SOW Requirement
7.2.9-01 (new)	The Contactor shall plan, staff, and execute the Innovation items identified by the State for implementation during the Transformation phase.

7.2.10 TIP2 Mandatory Optional Scope

Table 7-32: TIP2 Mandatory Optional Scope

Req #	SOW Requirement
7.2.10-01 (new)	The Contactor shall plan, staff, and execute the State optioned mandatory/optional items within the transformation of CalHEERS Project Deliverables, taking State direction on deliverable update order and priority.

7.3 TRANSITION-OUT

Transition-Out involves identifying and implementing all the activities required to roll off the project by transitioning out and turning over all control and responsibility for M&O support and State-owned resources, documentation, and knowledge to a successor Contractor or the State.

Note: Transition-Out is not to be confused with Contract Closeout, which occurs concurrently with Transition-Out, and is discussed in SOW Section 3.1.3, CONTRACT CLOSEOUT.

Transition-Out includes creating a Transition-Out Plan that determines what items and components must be transitioned, the approach to be utilized for transitioning, how knowledge transfer will be conducted, and the processes and procedures needed to carry out the transition

and Contract closeout activities. The process for transitioning components includes working in coordination with a successor Contractor or the State to Cutover M&O Services, functions and other items.

The Contractor is expected to develop a Component Worksheet to list all items and components and then utilize it to monitor status and manage the Transition-Out activities from both an overall perspective as well as at an individual Transition-Out item/component level.

A Transition-Out Work Plan (Schedule) is also required to identify and manage all Transition-Out activities and tasks required by the Transition-Out Plan.

The Contractor shall be responsible for successfully completing Transition-Out as specified in these plans and periodically reporting the status to the State.

7.3.1 Transition-Out Plan (TOP) – Draft & Update

The start of Transition-Out planning involves the creation of a Transition-Out Plan (TOP). The TOP shall be the governing document for the management and execution of the CalHEERS SDMO Transition-Out phase and include the approach, procedures, timeline, and documentation for the duration of the Transition-Out phase. Refer to Figure 1 Transition Activities and Timelines for the context of the TOP in the broader topic of Transition.

The Contractor Project Closeout Plan shall encompass the work done via the TOP and is described in SOW Section 3.1.3 CONTRACT CLOSEOUT. The TOP and Project Closeout Plan will be concurrent efforts during the end phase of the contract.

Requirements of the TOP shall also address how and when transition components will be transitioned and tracked. Transition-Out calls for planning and reporting at both the overall and specific transition component levels, and identification of requirements related to critical and noncritical changes that are needed or recommended during the Transition-Out period.

If the State exercises its option to extend the Contract, the extension shall result in a delay of all Transition-Out activities for a commensurate period.

Requirements in this section also address the plans, communication, and reporting mechanisms needed to support management and implementation of the Transition-Out activities.

7.3.1.1 TOP Draft – Final Year Minus 8 Months

Table 7-33: Transition-Out Plan (TOP) Draft - Final Year Minus 8 Months (CD-7.3-1)

Req #	SOW Requirement
7.3.1-01 (modified)	Eight (8) months PRIOR to the final year of the contract (1 yr. and 8 months) the Contractor shall submit a Transition-Out Plan for State Acceptance. The Transition-Out Plan shall include all tasks and Deliverables necessary to complete the termination of the Contract and successfully transfer of State operations to the State or successor contractor all occurring during the final year of the contract.
7.3.1-02 (modified)	Eight (8) months prior to the final year of the contract, the Contractor shall at a minimum (but not limited to) provide the following: 1. Submit a letter to the State Project Director or designee identifying the Staff to serve as Transition-Out management Staff, along with the start/stop timeframes they will serve. 2. Submit a detailed description of the Transition-Out methodology and Deliverable Expectation Document (DED) to the State for review and approval. 3. Begin Transition-Out activities, or upon direction from the State Project Director or designee. Note: The State may shorten or extend the M&O of the Contract at the discretion of the

Req #	SOW Requirement
	State Project Director or designee.
7.3.1-03 (new)	The Contract shall create the Transition-Out Plan to guide both State, incumbent SI, and successor Contractor through the Transition-Out activities during the final year of the contract. The TOP shall include such things as, but is not limited to the following: 1. A detailed Work Plan reflecting all tasks and Deliverables to be completed. The structure must be consistent with the CalHEERS Project Work Plan. 2. Narrative describing each task and Deliverable. 3. Contractor and State staff required and roles and responsibilities. 4. Summary of activities described in the weekly and monthly status reports. Creation and maintenance of a log of all problems, issues, and action items, including responsible parties, due dates and actions taken. 5. A plan and schedule for Transition-Out of all System documentation and Source Code 6. The approach and methods for transitioning of components that are hosted by the Contractor to a prospective successor contractor. 7. Approaches and methodologies the Contractor will employ to transfer knowledge to State Resources and a prospective successor contractor. This plan shall include, but may not be limited to the following: a. Schedule of planned training sessions, site visit tours, and demonstrations. b. Number of staff to be trained per topic area. c. Training topics with training objective descriptions and summaries for each topic. d. Length and location of each training session. 8. Capture Lessons Learned a. Incorporate applicable lessons learned from the Transition-In activities. b. Incorporate applicable guidance and lessons learned from the prior CalHEERS Transition-In. 9. Address Transition-In activities for all transition components and M&O responsibilities as defined in the Contract. 10. Describe how they will plan, organize, communicate, implement, monitor, and report the status of all Transition-Out activities. 11. Act as the Master Transition-Out document by which the other Transition-Out documents are referred and traceable. 12. Include support to the State with transition activities of the new Transition-In Contractor. 13. The approach for supporting the Cutover of services and functions to a successor Contractor or the State.
7.3.1-04 (new)	The Contractor shall update the following appendices and attach them to the Transition-Out Plan. Appendix 1–SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2–Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title

Req #	SOW Requirement
	2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples: 1. Artifact Name 2. Associated Parent DEL 3. State Approver 4. SI Point of Contact 5. Review Frequency 6. Submission Frequency 7. Artifact File Format 8. Artifact Location (e.g., SharePoint breadcrumb) 9. Link to artifact

7.3.1.2 TOP – Final Year Update

Upon award of the new SI contract, and possible successor contractor, the Transition-Out Plan will need to be updated to reflect changes from a successor contractor (if applicable). Collaboration between the State, incumbent SI (Transition-Out) and new contract SI (Transition-In) will need to begin.

Table 7-34: Transition-Out Plan (TOP) - Final Year Update (CD-7.3-2)

Req #	SOW Requirement
7.3.1-05 (new)	The Contractor shall submit for approval and update to the TOP to coincide with the start of the new SI contract. The contractor shall coordinate with the State as well as the successor contractor (if applicable) to ensure cohesive interaction between Transition-In activities (under the new contract), and transition-out activities under the existing contract.
7.3.1-06 (modified)	The Contractor shall manage updates and changes to the Transition-Out Plan (as needed) throughout the Transition-Out period in accordance with standard CalHEERS configuration management and document management practices.

7.3.2 Transition-Out Walkthrough Tours

Transition-Out walkthrough Tours ensure Transition-Out activities have been accurately and appropriately executed in timely manner. The Contractor shall perform the services described in this section.

Table 7-35: Transition-Out Walkthrough Tours (CD-7.3-3)

Req #	SOW Requirement
7.3.2-01 (new)	The Contractor shall staff, manage, lead and execute Transition-Out Walkthrough activities on the CalHEERS as defined in this Statement of Work.
7.3.2-02 (existing)	Two and one-half (2.5) years prior to the end of the Contract, the Contractor shall support and/or conduct onsite facility walkthroughs and/or demonstrations of the logical and actual operation of CalHEERS, annually for each site as requested by the State Project Director or designee. Potential sites and/or demonstrations include but are not limited to:

Req #	SOW Requirement
	1. CalHEERS Operations, Service Desk, Print Center. These tours, walkthroughs, and demonstrations shall be provided for up to ten (10) representatives of a prospective Contractor, per tour, during the Contractor's normal working hours. 2. Tour dates and times shall be arranged by the Contractor at the request of, and with the written acceptance of the State.
7.3.2-03 (existing)	The Contractor shall submit the content and format of the materials to be used in the walkthroughs and demonstrations for the State Project Director or designee prior to written acceptance.
7.3.2-04 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.3.2-05 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support the requirements described under this section (e.g. presentations, or handouts). New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.

7.3.3 Transition-Out Work Plan (Schedule)

The Transition-Out Work Plan (Schedule) encompasses the scope of activities and tasks and is used to track the progress of the Contractor's efforts during the Transition-Out period for the appropriate component area identified by the State.

These activities and tasks include but are not limited to service and function migrations, knowledge transfer, training, data transfer, documentation maintenance, change management, customer support, progress reporting, facilities preparation installation, training, systems testing, quality assurance, closeout, systems assumption, and communication.

The Transition-Out Work Plan (Schedule) also includes the integration of activities between State, Incumbent and the successor Contractor transition activities, as well as incorporates risk management implications into the schedule. The Transition-Out Work Plan is created in MS Project and provides the detailed project schedule that organizes and implements the Work Breakdown Structure (WBS).

The Transition-Out Work Plan (Schedule) created by the Contractor shall allow the Contractor to understand the overall timeframe required for completing Transition-Out and Closeout activities.

Table 7-36: Transition-Out Work Plan (Schedule) (CD-7.3-4)

Req #	SOW Requirement
7.3.3-01 (new)	In parallel with the creation of the Transition-Out Plan, the Contractor shall develop submit a Transition-Out schedule in MS Project. The schedule shall be consistent and be cohesive, compatible, and traceable to the approved TOP. The scheduled shall be managed to the rigor and quality as defined by the CalHEERS Schedule Management Plan.
7.3.3-02 (existing)	The Contractor shall, as part of Transition-Out activities, establish a data migration schedule and obtain acceptance, in writing, by the State Project Director or designee and successor Contractor.
7.3.3-03 (existing)	The Contractor shall implement support for Cutover of M&O Services and functions to a successor Contractor or the State as identified in the Transition-Out Plan and Transition-Out Work Plan.
7.3.3-04 (new)	Transition-Out activities shall begin during the final year of the contract (and during the Transition-In of a prospective new contractor) in accordance with the TOP and TOP schedule.
7.3.3-05 (new)	Transition-Out activities of the Contractor shall work in coordination and cohesion with the Transition-In activities of the successor contractor.

7.3.4 Transition-Out Meeting Agendas/Minutes and Status Reports

Transition-Out Meeting/Agenda/Minutes and Status reports show that that Transition-Out activities are complete and provide information that shows all transition components are transitioned, and work plan activities are complete.

Transition-Out status reports activities actively needed to track and provide status of Transition-Out activities. Requirements in this section also address the plans, communication, and reporting mechanisms needed to support management and implementation of the Transition-Out activities. The Contractor shall perform the services described in this section. The Contractor shall perform the services described in this section.

Table 7-37: Transition-Out Meeting Agendas/Minutes and Status Reports (CD-7.3-5)

Req #	SOW Requirement
7.3.4-01 (existing)	At the onset of the Transition-Out Period, the Contractor shall include Transition-Out status reporting in the Weekly Status Report. The Transition-Out portion of the Weekly Project Status Report shall include at a minimum a description of the progress made on each Task, Deliverable, and/or Milestone, including any variance from the baseline.
7.3.4-02 (existing)	The Contractor shall provide technical advice and assistance as identified and requested by the State Project Director or designee to support the successor Contractor or State after Cutover.

7.3.5 Transition-Out Training and Training Materials

Transition-Out Training and Training Materials are needed to provide comprehensive training to the successor Contractor, supervisory, and technical staff; the training shall utilize current and complete systems documentation; as well as instruction materials and handbooks. All training materials shall be based on the complete and current documentation required under this Contract. The Contractor shall perform the services described in this section.

Table 7-38: Transition-Out Training and Training Materials (CD-7.3-6)

Req #	SOW Requirement
7.3.5-01 (existing)	The Contractor shall conduct knowledge transfer activities as identified in the Transition-Out Plan and Transition-Out Work Plan.
7.3.5-02 (existing)	Twenty-nine (29) months prior to the end of the Contract, the Contractor shall provide training materials to be used in the walkthroughs and demonstrations, including the systems training for the State Project Director or designee's prior written acceptance.
7.3.5-03 (existing)	Upon the State Project Director or designee's written request, the Contractor shall provide the following at a minimum: comprehensive training to the successor Contractor, supervisory, and technical staff; the training shall utilize current and complete systems documentation; as well as instruction materials and handbooks. All training materials must be based on the complete and current documentation required under this Contract. Formal training sessions shall be provided for up to 30 successor Contractor or State staff for a minimum of 40 hours of class instruction per individual. Each class session shall have a maximum of 15 individuals. The training shall be centralized around hands-on training, as determined by the State Project Director or designee.

Req #	SOW Requirement
7.3.5-04 (existing)	Prior to the start of Transition-Out Training, the Contractor shall provide the State Project Director or designee with the following: 1. A schedule of planned training sessions. A description of the professional background, experience, knowledge of the subject, and previous training experience for each trainer. 2. Number of staff to be trained per area. 3. Training subjects. 4. Training methodology (include description of training material handouts and media format of this material). 5. Length of each training session. 6. Sample copies of material to be used in training sessions and location(s) of training sessions.
7.3.5-05 (new)	The Contractor shall staff, manage, lead and execute Transition-Out Walkthrough activities on the CalHEERS as defined in this Statement of Work and in accordance with the CD-7.3-6 – Transition-Out Training and Training Materials.
7.3.5-06 (new)	The Contractor shall only alter or modify this Deliverable's structure or content with the approval of the State Project Director or designee.
7.3.5-07 (existing)	The Contractor shall provide training in support of site walkthroughs and demonstrations and as identified in the schedule of planned training sessions.
7.3.5-08 (existing)	The Contractor shall turnover and develop, update, deliver, maintain, and execute the following Project Management Deliverables in accordance with the Contract, which are included within the M&O Fixed Price Services Costs of the Contract: • Transition-Out Work Plan
7.3.5-09 (existing)	The Contractor shall provide an M&O Transition Plan that gives the framework for the management and execution of the CalHEERS Transition-In and Out Phase from start-to-transition (close out). This shall include but not be limited to Transition-In and Transition-Out activities.
7.3.5-10 (existing)	The Contractor shall turn over, update, deliver, maintain, and execute a Transition-Out Plan which at a minimum shall include, but not be limited to resources, staffing, schedule, process description, accurate system and operation system documentation, design documentation, software, hardware, all operational activities, and dependencies to successfully Transition-Out, CalHEERS Operations.
7.3.5-11 (existing)	The Contractor shall develop and maintain the CalHEERS M&O Master Plan to include descriptions of the methods, tools, techniques, and assumptions used to estimate the Contract costs and associated confidence levels for planned activities as well as changes to scope.
7.3.5-12 (existing)	The Contractor shall develop and maintain the CalHEERS M&O Master Plan to include a plan for business processes and system migration at transition, Contract termination or at the end of the Contract.
7.3.5-13 (existing)	The Contractor shall develop and maintain the CalHEERS M&O Master Plan to include a plan that ensures the successful closeout of the Contract by the Contractor, including all CalHEERS hardware, software, source code, data, services, staffing, Deliverables, and archived project materials.
7.3.5-14 (existing)	The Contractor shall develop and maintain the CalHEERS M&O Master Plan to include tasks for the preparation of a final report, which shall include but not be limited to, lessons learned, and an analysis of objectives achieved.
7.3.5-15 (existing)	The Contractor shall update and maintain the CalHEERS M&O Master Plan to include descriptions of the Contractor's processes and activities for executing, monitoring, controlling, and Transition-Out Contract closeout services.
7.3.5-16 (existing)	The Contractor shall develop and maintain the CalHEERS Transition-Out Plan to include activities for conducting debriefings with the State in the event of Contract termination or Contract expiration.
7.3.5-17 (modified)	The Contractor shall accurately document and provide detailed Knowledge Transfer (written and training) for any and all system, software, hardware and database information for Transition-Out activities and Deliverables.

Req #	SOW Requirement
7.3.5-18 (existing)	The Contractor shall conduct knowledge transfer activities as identified in the Transition-Out Plan and Transition-Out Work Plan.
7.3.5-19 (existing)	The Contractor shall provide an overall structure of the Closeout Plan that includes, but is not limited to, the following: 1. Contract Closeout Planning and Execution 2. Project Management 3. Control Processes 4. Technical Processes 5. Program Support 6. Supporting Processes 7. Contract Closeout
7.3.5-20 (existing)	The Contractor shall resolve all Contract Closeout expectations that includes, but is not limited to, the following: 1. The resolution of all documented Contractor-responsible deficiencies associated with the present and any prior Deliverables as stipulated through the approved deficiency process. 2. The successful completion of all other work breakdown structure elements, tasks, and Deliverables for this milestone as specified in the Contract Closeout Work Plan (Schedule). 3. The successful completion of all other contractual obligations that were identified in the Closeout Plan.
7.3.5-21 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.
7.3.5-22 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.3.5-23 (modified)	The Contractor shall update the following appendices and attach them to the Transition-Out Training and Training Materials. Appendix 1—SOW to Deliverable Traceability Checklist Description: A table where the Contractor identifies the SOW requirements for this Deliverable, as specified within SOW Section 8, DELIVERABLES, and includes but is not limited to: 1. SOW Requirement ID # 2. SOW Requirement Text 3. Requirement Traceability (Contractor identified traceability from the requirements to the Deliverable) 4. Requirement Fulfillment (Define how the Contractor has fulfilled the SOW requirements in the Deliverable) Appendix 2—Deliverable Compliance and Validation Checklist Description: A QA Checklist that includes, but is not limited to: 1. Deliverable Section Number and Title 2. Deliverable Requirement Statement(s) 3. Requirement Completion (How the Contractor has complied with or will comply with the requirement statements within the Deliverable) 4. Validation Method (The method the Contractor used to validate Deliverable compliance) 5. The Contractor's QA Manager sign-off on compliance Appendix 3—Associated Artifacts Description: An extract from the Project Artifact Inventory List of artifacts associated with this Deliverable, and will include but is not limited to the following examples:

Req #	SOW Requirement
	- Artifact Name - Associated Parent DEL - State Approver - SI Point of Contact - Review Frequency - Submission Frequency - Artifact File Format - Artifact Location (e.g., SharePoint breadcrumb) - Link to artifact

7.3.6 Transition-Out Component Worksheet Updates

Transition Component requirements address what is to be transitioned and are defined in terms of the services, functions, and other items that are being used to meet M&O support requirements.

The incumbent Contractor's Project Closeout Plan and Transition-Out Plan identifies inventory components for closeout which can be used to help the Contractor identify transition components for each of the M&O support areas and other transition items.

The Contractor creates a transition component inventory which identify what must be transitioned so that the Successor Contractor can assume operational control of CalHEERS and become responsible for all M&O support.

The Contractor then manages updates to the component inventory until all components are successfully transitioned.

Table 7-39: Transition-Out Component Worksheet Updates

Req #	SOW Requirement
7.3.6-01 (existing)	Within ten (10) Days of receipt of the Notice of termination or expiration, the Contractor shall provide, in machine readable form, an up-to-date, usable copy of the Custom Software and Data and a copy of all Documentation needed by the State to utilize the Custom Software and Data.
7.3.6-02 (existing)	The Contractor shall ensure that all consents or approvals to allow Contractor and Subcontractors to provide the assistance required following termination or expiration have been obtained, on a contingent basis, in advance and will be provided by the applicable third parties at no cost or delay to the State.
7.3.6-03 (existing)	The Contractor shall provide to the successor, via the State, an initial and complete set of all State system software and Documentation.
7.3.6-04 (existing)	The Contractor shall provide daily updates of changes to the State System from that date forward (ten (10) Days from the receipt of the Notice of termination or expirations) through the end of the Contract Term and the completion of the transfer of all residual inventory and records to the successor contractor.
7.3.6-05 (existing)	The Contractor shall provide the State or the subsequent provider all appropriate Software and all Documentation, Data, test data, and procedures.
7.3.6-06 (existing)	Six (6) months after the Operations Effective Date, the Contractor shall provide an annual report of all failed backup and necessary restoration events in the previous reporting year to the State Project Director or designee. This report must include details of each event including date and time, full description of the event, actions taken and impact. At the request of the State Project Director or designee, the vendor shall be required to provide all backup and recovery logs for the past 12 months.

Req #	SOW Requirement
7.3.6-07 (existing)	The Contractor shall provide an annual report that shall include, but not limited to the following information: 1. Details of each event including date and time 2. Full description of the event 3. Actions taken and impact. At the request of the State Project Director or designee, the vendor shall be required to provide all backup and recovery logs for the past 12 months.
7.3.6-08 (existing)	Twelve (12) months prior to the end of the Term of Contract, the Contractor shall complete an inventory and assessment of all the items contained in the State. The assessment of Documentation shall include, but not be limited to the following: 1. Complete and comprehensive Review and evaluation of all State Project Documentation, including the following: a. All State project Deliverables. b. All State design documents, including the most current State data map, data dictionary, database descriptions, batch run books, and listing of all State Interfaces by Interface Partner. c. The most current and up-to-date State Source Code. d. All State Contracts, Contract Amendments and Change Orders. e. All State Project Audits. f. All State Project invoices and payment records. g. All State Project policies and procedures. h. A current detailed asset inventory, including start and end dates of all, warranties, software licenses, service Contracts and current location information including site, rack, server, and network connection point. This includes but is not limited to any other Documentation that would facilitate successor contractors' understanding of overall Standards, Network bandwidth needs, Hardware Capacity, Software needs, and Network topology to maintain and operate the current State System. 2. Any other information required by the State. 3. A Gap Analysis identifying specific State Project Documentation that requires updates or revisions. 4. The archiving, central storing, and file location listing of all State Project Documentation. Note: Many of the above listed items will be needed 24 months prior to the end of the Contract and, to support the procurement, shall be updated and produced during this time at the request of the State.
7.3.6-09 (existing)	The Contractor shall maintain and update the Component Worksheets developed under this Contract in support of Transition-Out activities.
7.3.6-10 (modified)	The Contractor shall maintain the Component Worksheets in an accessible location for State staff to access and provide feedback.
7.3.6-11 (existing)	The Contractor shall make any modifications to the Component Worksheets as deemed applicable for the new M&O Contract and approved by the State Project Director or designee.
7.3.6-12 (existing)	The Contractor shall manage and maintain the Component Worksheets throughout the Transition-Out process (as applicable) until all components are successfully transitioned.
7.3.6-13 (existing)	The Contractor shall maintain and update the Component Worksheets developed under this Contract in support of Transition-Out activities.

7.3.7 Transition-Out Execution Activities

Transition-out activities will be performed during the transition-out period and include the execution of work established by the TOP and other deliverables described under this section.

Table 7-40: Transition-Out Execution Activities

Req #	SOW Requirement
7.3.7-01 (new)	The Contractor shall staff, manage, lead and execute Transition-Out activities on the CalHEERS as defined in this Statement of Work and in accordance with the TOP.
7.3.7-02 (modified)	The Contractor shall execute and oversee all activities specified in the approved Transition-Out Work Plan (Word Document) and Transition-Out Work Plan (MS Project schedule) throughout the Transition-Out period.
7.3.7-03 (existing)	The Contractor's Transition-Out Management Team shall oversee the activities, completion, and implementation of all Transition-Out tasks listed in the Contract and/or subsequent Change Orders, including the assessment and update of State Project Documentation and the submission of a Transition-Out Project Plan.
7.3.7-04 (modified)	Upon the State Project Director or designee's Acceptance of the Transition-Out Plan, the Contractor shall start the execution of transition out activities by establishing the baseline for both the Transition-Out Plan document (using version control and track changes), and the Transition-Out Work Plan (schedule). The schedule baseline shall be utilized to track any variance(s) from the Transition-Out Work Plan.
7.3.7-05 (modified)	The Contractor shall plan, coordinate, and execute the Transition-Out activities of this Contract with the Transition-In activities of the successor Contractor or the State during the final year of the contract (and first year of a prospective new SI contractor).
7.3.7-06 (existing)	At the onset of the Transition-Out activities, the Contractor shall submit a letter to the State indicating which individuals have been identified to serve on a Transition-Out Management Team and the start/stop timeframes they will serve.
7.3.7-07 (existing)	Notwithstanding anything contained herein to the contrary, in the event this Contract is terminated by the State due to a material breach by the Contractor of its obligations hereunder or for the State's convenience, the State shall have the option to continue the use and operation of the Hosting Services and System for a period of not more than 180 Days after the effective date of termination or expiration of this Contract in order to identify and complete the transition to alternative software products and services.
7.3.7-08 (existing)	In addition, upon expiration of the Contract or Contractor's receipt of notice of termination of the Contract by the State, the Contractor will provide any turnover assistance Services necessary to enable the State or its designee to effectively close out the Contract and move the work to another vendor or to perform the work by itself.
7.3.7-09 (existing)	If the State exercises its option to extend the Term, the extension shall result in a delay of all Transition-Out activities for a commensurate period of time. The State shall work closely with the Contractor during this Process and must approve all updates to the Contractor's Transition-Out approach and plans.
7.3.7-10 (existing)	The Contractor shall manage updates and changes to the Transition-Out Work Plan (as needed) throughout the Transition-Out period.
7.3.7-11 (modified)	The Contractor shall provide all other files, application code, documentation, records, transaction information, and assistance the State identifies as necessary for the orderly and successful transfer of the system to the successor Contractor, or the State as directed by the State Project Director or designee. This includes, but is not limited to the following: 1. On the successor Contractor's Contract effective date or a date established by the State Project Director or designee, the Contractor shall provide to the State a summary of all reports produced by the Contractor, as required by the Contractor and the individuals/organizations to whom the reports are delivered, including a schedule of required delivery dates. 2. On the successor Contractor's Contract effective date or a date established by the State Project Director or designee, the Contractor shall provide to the successor Contractor, via the State, an initial complete set of the systems code and documentation. 3. The Contractor shall provide weekly updates of CRs to the system from the successor Contractor's Contract effective date or a date established by the State Project Director or designee forward through the end of the Transition-Out period and the completion of the transfer of all residual inventory and records to the

Req #	SOW Requirement
	successor Contractor or the State. 4. Beginning six (6) months prior to the end of the Transition-Out phase, the Contractor shall provide User Acceptance Testing support to both the State and the successor Contractor. The Contractor shall satisfy all requests for support within a reasonable time, but in no case longer than two (2) Business Days, unless given prior written acceptance by the State Project Director or designee. This support shall include, but not be limited to the following subtasks: - Provide to the State the System, files, test data files, tables, System document copies, and all other documentation and information requested by the State to support at least two (2) parallel tests, and other testing as determined by the State. - Provide successor Contractor or State staff with access to the required System. - Provide assistance to the State with interpretation and analysis of test results. - Provide any statistics requested by the State regarding the levels of accuracy of the System. - Provide to the successor Contractor or the State certified production copies (certifying in writing that each is complete, current, accurate and are what the Contractor uses for production) of each of the following on electronic media and/or secure transmissions: - System source code. - Source code library file(s). - A listing identifying which, if any modules are on-line or which, if any are batch processed. - Data element dictionary. - All Equipment/Software configurations, security, database schemas, build macros, and all configuration parameters of all tools utilized to support the operation of the System. - All operational parameters to operate and support the operation of System. 5. Any and all source related components necessary to perform the Contract's Statement of Work requirements shall be included in this requirement regardless of nomenclature.
7.3.7-12 (existing)	During the Transition-Out period, the Contractor shall facilitate an orderly transfer of the CalHEERS and corresponding application code from the Contractor to the State or a (successor) Contractor in accordance with the TOP and Sunset Agreement.
7.3.7-13 (existing)	The Contractor shall maintain Staff throughout the Transition-Out period to satisfy and maintain compliance with all performance standards and requirements of the Contract.
7.3.7-14 (existing)	Eight (8) months prior to the end of the Transition-Out phase, the Contractor shall provide the destination of the actual data transfers (e.g., portal, domain name system, etc.).
7.3.7-15 (existing)	The Contractor shall identify all data lines that are being utilized to support CalHEERS operations along with their purpose and planned disposition at end of operations to include working with the State to transfer or remove data lines. Not later than one (1) Business Day prior to the end of the operations period, the incumbent Contractor shall transfer to the new Contractor all data lines used for State terminal network communication or terminate those data lines in the event the respective carriers prohibit transfer. The Contractor shall inform the State of either action when taken and completed.
7.3.7-16 (existing)	The Contractor shall transfer items needed to allow the successor Contractor or the State to establish a development system environment. These items include but are not limited to the following: - Application Code - Hardware and Software Configuration - Data - Technical Information

Req #	SOW Requirement
7.3.7-17 (existing)	The Contractor's Transition-Out activities shall begin during the M&O phase and shall continue until the State Project Director or designee provides approval of system operation to a successor Contractor or the State.
7.3.7-18 (existing)	The Transition-Out phase shall be concluded upon successful completion of the Transition-Out Review as referenced in Milestone Reviews. The criterion for passing the Transition-Out Review is that the Contractor demonstrates that they have successfully completed the activities and Deliverables identified in the Transition-Out Work Plan.
7.3.7-19 (existing)	The Contractor shall cooperate with and assist the State and the successor Contractor(s) in end of Contract changeover planning, preparation, testing, and transfer of CalHEERS services and CalHEERS data (as needed) to the successor Contractor or the State.
7.3.7-20 (existing)	The Contractor shall work with the State to develop a Work Authorization for end of Contract changeover services.
7.3.7-21 (existing)	The Contractor shall participate in end of Contract changeover joint meetings with the State and the successor Contractor.
7.3.7-22 (existing)	The Contractor shall provide all CalHEERS data files as specified by the State, in support of the changeover services.
7.3.7-23 (existing)	The Contractor shall work with the State and the successor Contractor to define the format and layout of CalHEERS data files to be transferred to the successor Contractor and/or the State.
7.3.7-24 (existing)	The Contractor shall provide a minimum of three (3) sets of CalHEERS data files to the State and the successor Contractor for testing of data transfer processes.
7.3.7-25 (existing)	The Contractor shall provide CalHEERS files to the State and the successor Contractor for system Cutover to the successor Contractor.
7.3.7-26 (existing)	The Contractor shall develop and distribute a system disruption notification to all active (as defined by the State) CalHEERS users explaining the downtime associated with system Cutover.
7.3.7-27 (existing)	The Contractor shall transfer the Service Desk numbers to the successor Contractor.
7.3.7-28 (existing)	The Contractor shall manage the transfer of ownership, or return of, all equipment owned by the State, as defined within the CalHEERS Hardware and Software Inventory Management Plan Deliverable.
7.3.7-29 (existing)	The Contractor shall provide Transition-Out activities and Deliverables that is included within the fixed-price cost.
7.3.7-30 (existing)	The Contractor shall ensure all Transition-Out media or transmissions are secured and encrypted. This includes but shall not be limited to tapes, Digital Video Disks (DVDs), and file transfers.
7.3.7-31 (existing)	The Contractor shall ensure the Transition-Out media is readable and in an acceptable industry standard format.
7.3.7-32 (existing)	The Contractor shall implement knowledge transfer to help ensure that the successor Contractor or the State understands and is prepared to assume SDMO support responsibilities. Knowledge transfer shall include but is not limited to providing documentation, conducting formal training or walkthroughs/demonstrations of operational processes and procedures, Q&A sessions, job shadowing, and/or providing technical and advice and assistance during an initial operational period following Cutover as deemed adequate and appropriate by the State.
7.3.7-33 (existing)	The Contractor shall participate in Transition Readiness Reviews and provide information on the actions taken to prepare the successor Contractor or the State to assume responsibility for M&O support to include but is not limited to services, functions, or other items identified in the Transition-Out Plan.
7.3.7-34 (new)	The Contractor shall adopt and maintain all Project Artifacts that are associated with this Deliverable in the Project Artifact Inventory and manage them in accordance with the Project Artifact process.

Req #	SOW Requirement
7.3.7-35 (new)	The Contractor shall collaborate with the State to develop and maintain any new Project Artifacts necessary to support this section. New artifacts shall be added to the Project Artifacts Repository and managed in accordance with the Project Artifact process.
7.3.7-36 (existing)	Throughout the Transition-Out period, implement activities shall include but not be limited to the following: 1. Provide access to Facilities and support for the installation of Hardware and Software needed to accomplish the Transition-Out. 2. Make role and responsibility changes for the operation and support of the State system between the Incumbent and the new Contractor. These changes may occur throughout the course of the Transition-Out Period. 3. Support the installation of additional Network connectivity to State Facilities as necessary to accomplish the Transition-Out. It may be necessary to reimburse the Contractor for reasonable costs for this connectivity by the State if there is not adequate excess capacity or the Contractor does not pay for the connectivity directly. 4. Make State System and Network configuration changes necessary to accomplish the Transition-Out. 5. Permit network traffic to transit between the Contractor data centers and the Trusted State network necessary to accomplish the Transition-Out. 6. Continue to Support the components of the State System that are in the control and possession of the Contractor while potentially connected to components of the State System that are in the control and possession of the Contractor.

7.3.8 Transition-Out Completion Reports

The Transition-Out Completion Report will be the final report for all Transition-Out activities, and act as one of the inputs to the Contract Closeout found in SOW 3.1.3 CONTRACT CLOSEOUT as well as the Contract Closeout Plan (CD-3.1-2). Note: The Transition-Out completion report is specific to only the activities and expectations identified in SOW 7.3 TRANSITION-OUT. The contractor may reference this report as part of the Contract Closeout documentation.

Table 7-41: Transition-Out Execution Activities

Req #	SOW Requirement
7.3.8-01 (existing)	The Contractor shall prepare a Final Project Completion Report that includes but is not limited to: 1. Executive Summary: Scope, Schedule, Budget: Plan vs. Actuals Organization and Project Management Approach 2. Summaries by major Project Team: PMO, Application Development & Testing, Technical, Implementation, Training 3. Summary of key issues and risks 4. Key Best Practices and Lessons Learned 5. Requirements Summary 6. Administrative and Contract Closure 7. Contract Closure 8. Information Distribution & Archive

7.4 TRANSITION PAYMENTS

7.4.1 Transition-In (TIP1) Payments

Payments for Transition-In work is based on successful completion of the key milestones as identified and calculated in Appendix D-8.1, TRANSITION-IN PAYMENT.

Table 7-42: TIP1 Payment

Req #	SOW Requirement
7.4.1-01 (modified)	Payments for Transition-In (TIP1) work are based on successful completion of the key milestones as identified and calculated in Appendix D-8.1, TRANSITION-IN PAYMENT.

7.4.2 Transition-In (TIP2) Payments

Payments for Transformation work is based on successful completion of the key milestones as identified and calculated in Appendix D-8.1, TRANSITION-IN PAYMENT.

Table 7-43: TIP2 Payments

Req #	SOW Requirement
7.4.2-01 (modified)	Payments for Transition-In Transformation (TIP2) work are based on successful completion of the key milestones as identified and calculated in Appendix D-8.1, TRANSITION-IN PAYMENT.

7.4.3 Transition-Out Payments

Payments for Transition-Out work is based on successful completion of the key transition-out milestones as identified and calculated in Appendix D-8.3, TRANSITION-OUT PAYMENT.

Table 7-44: Transition-Out Payments

Req #	SOW Requirement
7.4.3-01 (existing)	The Contractor shall accurately take all actions necessary and transfer ownership of each Deliverable to the State upon payment therefor, subject to the exercise of the State's remedies, and each other Work Product upon its delivery.
7.4.3-02 (existing)	The State shall pay on a time and materials basis at rates in the Contract for turnover assistance, subject to mutual written agreement on such work to be performed, and Contractor agrees that any of its out-of-pocket costs, which will be reimbursed by the State, will not be marked up to include profits.
7.4.3-03 (new)	Payments for Transition-Out work are based on successful completion of the key milestones as identified and calculated in Appendix D-8.3, TRANSITION-OUT PAYMENT.

8 DELIVERABLES

The responsibility for development, production, delivery, and maintenance of CalHEERS Project Deliverables rests with the Contractor. The State expects the Contractor to adhere to the State's Standard Process for Deliverables, beginning with a Deliverable Expectation Document (DED), followed by a draft Deliverable, then a final Deliverable.

The State will meet with the Contractor to discuss and clarify specific expectations for each DED and Deliverable in advance of the DED due date. For periodic Deliverables, the State will work with the Contractor to identify those Deliverables for which both draft and final versions are required. For example, after the initial Monthly Status Report, the State does not expect a draft Monthly Status Report to be produced.

Once a DED, draft Deliverable, or final Deliverable is submitted, the State will conduct a review and provide consolidated comments using a standard template. The State understands and expects that multiple Deliverables may be in the development stage simultaneously.

In the event the State finds a Deliverable to be unsatisfactory, the State will notify the Contractor of the reason(s) for the rejection in writing and identify specific Deficiencies. State staff will meet and confer with the Contractor to provide clarification as requested or needed. Rejection of a Deliverable does not allow for schedule delays regarding subsequent Deliverables, unless approved in writing and in accordance with the Contract by the State Project Director, or designee.

Please note that this section of the Sstatement of ~~w~~Work (SOW) references multiple sets of standards, which are subject to change over time. Please refer to APPENDIX A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES, regarding project processes around standard updates.

8.1 GENERAL DELIVERABLE REQUIREMENTS

The following sections outline the general requirements for the development, formatting, preparation, submission, acceptance /approval of CalHEERS System Development Maintenance and Operations (SDMO) Informal and Formal Deliverables.

These general requirements help with the consistency and quality of documentation, facilitates communication, and provides for clear and concise instructions related to the content and quality of Contract required Deliverables.

8.1.1 Consistency and Quality

The Contractor's Deliverables must follow the guidelines in the Office of Technology & Solutions Integration (OTSI) Writing Style Guidelines. The following requirements apply to Deliverable consistency and quality.

Table 8-1: General Deliverable Requirements

Req #	SOW Requirement
8.1.1-01 (existing)	The Contractor shall be responsible for the development, production, delivery and maintenance of CalHEERS Project Informal and Formal Deliverables.
8.1.1-02 (new)	The Contractor shall replace and update all Appendix 1, 2, & 3's for all Deliverables.
8.1.1-03 (new)	The Contractor shall, for all deliverables with associated standards, refer to the standards update process defined in Appendix A-2, SPECIAL PROVISIONS, Section 7.7, UPDATES TO STANDARDS, REGULATIONS, AND CODES.

Req #	SOW Requirement
8.1.1-04 (new)	The Contractor shall only modify the structure and content of a Deliverable with State agreement, and the approval of the State Project Director or designee.
8.1.1-05 (existing)	The Contractor shall ensure that Informal and Formal Deliverables will use terminology consistent with Appendix C, GLOSSARY, the executed Contract and STATEMENT OF WORK (SOW), current CalHEERS System documentation, and other Contractor Deliverables.
8.1.1-06 (existing)	The Contractor shall perform an internal review of each Deliverable (and each Deliverable revision) to ensure that each Deliverable is free of formatting and typographical errors. In addition, any screen shots, graphs, and charts must be legible prior to submission to the State Project Director or designee. The Contractor shall ensure a quality product is submitted to the State that allows the State to approve the Informal or Formal Deliverable as submitted.
8.1.1-07 (existing)	For periodic Deliverables, the Contractor shall work with the State to identify those Deliverables for which both draft and final versions are required.
