SAVE OUR RESOURCES TEAM

Environmental Management System

Environmental responsibility in all we do

We live, we work and we play here, so lets protect it.

The Environmental Management System

The US Air Force has implemented an Environmental Management System to improve performance through sustainability:

- Commit to respect natural and human resources (policy)
- Reduce environmental risks
- Reduce costs, such as utilities (energy, water and waste)
- Advance processes and operations

Legal Background

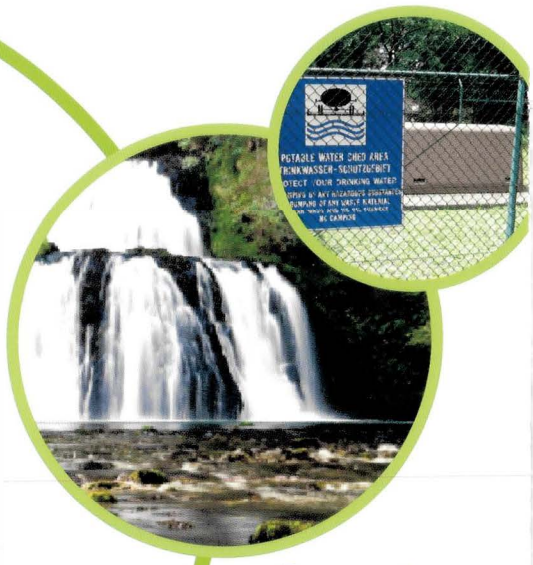
Air Force Instruction 32-7001, *"Environmental Mangement"*, instructs the AF EMS to use key components specified in ISO 14001:2015 to implement and operated and effective management system framework that meets mission requirements.

Rethink your consumer actions!

... the environment and your pocket will say thank you!

Avoid waste of resources

We **live**,
we **work** and
we **play** here,
so lets **protect** it!



Save water

Recycle as much as you can

Save energy

S.O.R.T.
SAVE OUR RESOURCES TEAM

Example on how do reduce waste

☑ What we PLAN

- smarter shopping decisions

☑ What we DO

- Buy products with less packaging

☑ How we ACT

- Ensure you are recycling as much as you can

☑ What we CHECK

- Check for new possibilities e.g. bring a basket instead of buying a bag.

Continious Improvement

PLAN → DO → ACT → CHECK
