1. Question: Hook mount hoists?
1. Answer: Yes, hook mounted hoists. Required to have an upper and lower hook. CLIN 0001 Specifications updated.

2. Question: Motor trolley (beam flange width and thickness)?
2. Answer: No need for a trolley with these hoists. We just need the air fall and no trolley unit. N/A, chain hoist upper hook will be placed into a shackle welded to the hull. CLIN 0001 Specifications updated.

3. Question: Chain container material?
3. Answer: Any, as long as it will hold all requested chain length safely.

4. Question: Is a larger rated capacity acceptable provided it is derated?
4. Answer: No
