Sources Sought Notice: SPRDL1-26-R-0141

Item Name: Power Supply

NSN: 6130-01-674-7138

Part Number: 57K7317

Quantity: 244

Proposed Contract Type: 5 Year IDIQ

End Item: Abrams V3

Response Date: 30 July 2026

Requirements Description: The Power Supply is a circuit card within the Mission Control Unit (MCU). The Power Supply LRM converts the vehicle's prime power to an isolated and regulated alternating 26Vrms 400Hz output to supply the M1A2 SEPv3 Abrams tank electrical system. It is a critical item of the M1A2 SEPv3 Abrams tank power and electrical system.

The Government does not have drawings for this item that are suitable for competitive procurement. The TDP is fully defined, but the government does not have full data rights.

This survey is published in compliance with FAR Part 10, Market Research. The purpose of this survey is to canvas the industry for any possible other sources. This request for capability information does not constitute a request for proposals. Submission of any information in response to this market research is purely voluntary. The Government assumes no financial responsibility for any costs incurred in responding or in any subsequent exchange of information.

Contractors interested in becoming a source of supply need to meet the requirements of the Source Approval Program including vehicle level qualification testing, at their own expense. The TACOM Life Cycle Management Command, Competition Management Office (CMO), is the lead proponent for the Source Approval Program. Specific information and point of contact for the Source Approval Program is available at https://tacom.army.mil/ and select Ombudsman from the menu.
