

Request for Proposals

Fleet Maintenance Information System

Proposals will be received until

12:00 Noon, July 14, 2026

Forsyth County is accepting proposals for the purchase of software for a fleet management information system capable of storing, managing, and providing management reports on all information pertaining to maintenance equipment assets. Vendor must provide the ability to receive data from the organization's automated fuel system and other fuel sources, and transfer data to the organization's accounting system, providing a database for management of all assets. These exchanges must be in electronic form. Vendor must perform conversion of present data.
