Version Dated October 1, 2014

## I. Introduction and Start-Up

The audit methodology utilized by the Charity Care Program is based on "Unit Dollar Sampling".

To prepare for the audit, hospitals shall submit Charity Care claims to the Department third party liaison, MOLINA, in order to price the claims at the Medicaid rate. MOLINA shall prepare a list of claims ranking the claims from the lowest to the highest claim charge amount. Also, included is a cumulative total. The list includes the claim charge amount and the Medicaid priced amount. This method remains consistent throughout the year.

Audit List Example:

| <u>Account</u> | <u>Amount</u> | <u>Cum.<br/>Amount</u> |
|----------------|---------------|------------------------|
| 1              | \$ 30.00      | \$ 30.00               |
| 2              | \$ 38.00      | \$ 68.00               |
| 3              | \$ 38.00      | \$106.00               |
| 4              | \$ 43.00      | \$149.00               |
| 382            | \$5,500.00    | \$5,500,000.00         |

For the above example, \$5,500,000 was used in order to prepare for the next steps on the following pages. This amount is called the "Threshold" because any amount over this would result in more than the minimum number of files (75) used in the audit. Also, any amount less than the "Threshold" would result in combining audits.

Either quarters 1 & 2 would be combined or quarters 2 & 3 or quarters 1, 2, & 3 would be combined. Also, quarter 3 would be combined with quarter 4 if quarter 3 alone does not reach the "Threshold".

All hospitals would have a 4<sup>th</sup> quarter audit. The minimum number of audits for each hospital per calendar year is 2, one of which is the 4<sup>th</sup> Quarter Audit.

Version Dated October 1, 2014

II. Sample Size Determination

A. From the listing total (shown on previous page) use the cumulative dollar amount in the following formula:

**State of New Jersey**  
**Department of Health**

$$\frac{\text{Listing Total} \times 1.5}{\text{Lower of \$110,000 or 2\% of listing total}} = \text{Number of Files Selected}$$

Using the previous page for example:

$$\frac{\$5,500,000 \times 1.5}{\$110,000} = \frac{\$8,250,000}{\$110,000} = \underline{75} \text{ Files}$$

B. The number of weighted files selected cannot be less than 5.

**CHARITY**  
**CARE**  
**CLAIMS**  
**AUDIT**  
**HANDBOOK**

Version Dated October 1, 2014

III. Interval Amount Determination

- A. The Interval amount is calculated by the following formula:

$$\frac{\text{Licensing Total}}{\text{Number of Files}} = \text{Interval Amount}$$
$$\frac{\$5,500,000}{75} = \$73,333$$

(From IIA)

***CHARITY  
CARE  
CLAIMS  
AUDIT  
HANDBOOK***

Version Dated October 1, 2014

#### IV. The Random Start Point to Select the Samples

##### A. Random Start Point Calculation

The Excel formula reads as follows: (Example)  
 (The following formula is a "nested" if statement)  
 where X = Interval Amount  
 and Y = Rand (This is a built-in Excel formula  
 that generates a random number  
 between the values of 0 and 1  
 from the random number table  
 initiated by the computer clock)

=IF(X<1000,(Y)\*(X),IF((((Y)\*(X))+0.5)<1000,  
 ROUND((((Y)\*(X))+0.5)\*10,0),ROUND((((Y)\*(X))+0.5,0)))

The translation of the above formula is as follows

If the Interval Amount is less than \$1,000,  
 multiply Rand \* Interval Amount ; Otherwise if  
 the Interval Amount is greater than or equal to  
 \$1,000, Multiply Rand \* Interval Amount + .5  
 If Rand \* Interval Amount + .5 < \$1,000, round  
 (Rand \* Interval Amount + .5) \* 10 to zero  
 decimal points.

Otherwise: If Interval is greater than or equal  
 to \$1,000 AND Rand \* Interval Amount + .5 is  
 greater than or equal to \$1,000, round  
 (Rand \* Interval Amount + .5) to zero  
 decimal points.

# CHARITY CARE CLAIMS AUDIT HANDBOOK

Version Dated October 1, 2014

V. Sample Selection

- A. Using the Random Start Point at the beginning of the listing select files for the Sample. At each Interval in the cumulative listing choose that file.

# State of New Jersey Department of Health

- B. Files with 2 or more Interval amounts

1. If an account is large enough, the Interval amount may stay in that account for more than 1 Interval. For example, if an Interval amount is \$11,000 and the account is \$15,000 the Interval might stay in the account 2 times. This account would then be assigned 2 weights, which means that it counts for 2 Sample files.

2. Another example is: If the Interval amount is \$11,000 and the account is \$60,000, the weight could be 5 or 6 depending on where the first Interval falls.

# CHARITY CARE CLAIMS AUDIT HANDBOOK

Version Dated October 1, 2014

VI. Sub-Sample Selection

- A. Starting with the first sample, counting by the weights, select every 3rd Sample (weight) to the end of Sample list.

**State of New Jersey**  
**Department of Health**

Some samples may be counted twice or more depending on the weighted value.  
 For example: Counting along in the 1 weight accounts you reach a 2 weight and another 2 weight...etc.

| <u>File</u> | <u>Sample Weight</u> | <u>Sub-Sample Count</u>   | <u>Audit</u>  |
|-------------|----------------------|---------------------------|---------------|
| 1           | 1                    | 1                         | No (1st File) |
| 2           | 1                    | 2                         | No            |
| 3           | 1                    | 3                         | Yes           |
| 4           | 1                    | 4                         | No            |
| 5           | 1                    | 5                         | No            |
| 6           | 2                    | <u>3</u> , 1              | Yes           |
| 7           | 2                    | 2, <u>3</u>               | Yes           |
| 8           | 2                    | 1, 2                      | No            |
| 9           | 2                    | <u>3</u> , 1              | Yes           |
| 10          | 3                    | 2, <u>3</u> , 1           | Yes           |
| 11          | 3                    | 2, 3, 1                   | Yes           |
| 12          | 4                    | 2, 3, 1, 2                | Yes           |
| * 13        | 4                    | <u>3</u> , 1, 2, <u>3</u> | Yes (Twice!)  |

\* In other words the file counts as 2 Sub-Samples!

- C. The Sub-Sample is also known as the "Weighted Sample Dollars"

**HANDBOOK**

VII. Audit Files Retrieval Schedule

Audit files need to be made available to the auditors by the beginning of a scheduled audit. The auditors shall provide the hospital with the audit Sample list prior to the scheduled audit.

# State of New Jersey Department of Health

A. In advance of scheduled audit

| Number of files to be retrieved | Time to retrieve |
|---------------------------------|------------------|
|---------------------------------|------------------|

|                |          |
|----------------|----------|
| 1 to 500 files | One week |
|----------------|----------|

|                   |           |
|-------------------|-----------|
| 501 to 1100 files | Two weeks |
|-------------------|-----------|

|                    |             |
|--------------------|-------------|
| 1101 to 1800 files | Three weeks |
|--------------------|-------------|

|                      |            |
|----------------------|------------|
| 1801 files and above | Four weeks |
|----------------------|------------|

## CHARITY

B. On-Site No Prior Notice Files

| Number to Retrieve | Time to retrieve |
|--------------------|------------------|
|--------------------|------------------|

|                     |                              |
|---------------------|------------------------------|
| Less than 101 files | Two hours for every 25 files |
|---------------------|------------------------------|

|                        |                             |
|------------------------|-----------------------------|
| Greater than 100 files | One day for every 100 files |
|------------------------|-----------------------------|

## CARE CLAIMS AUDIT HANDBOOK

Version Dated October 1, 2014

VIII. Alternative Documentation Calculations and Adjustment

- A. Any hospital with **more** than 10 % Alternative Documentation (Cumulative for the year) shall have their listing total adjusted by the percentage ABOVE 10 %.

# State of New Jersey Department of Health

1. The hospital shall submit their listing total.
2. The listing total shall be adjusted for accuracy and other adjustments.
3. The adjusted listing total shall then generate the audit Sample and Sub-sample.
4. If there is more than a 10% failure rate at the Sub-sample level, the auditor shall expand the audit to the Sample.
5. For this section, there is a 10% allowance of Alternative Documentation files for the audit year. If the final tally (Cumulative for the year) of Weighted Sample dollars is greater than 10%, the percentage above 10% is deducted as the penalty.

(7). Example: Using VI,B,1 above

An account valued at \$60,000 that has a sample weight of 4 and a sub-sample weight of 2. (This is a possibility, it could also have a sample weight of 5 and a sub-sample weight of 1) However, using the 4 & 2 scenario, the Alternative Documentation rate would be 4 %.

(2/50) Assuming no other sub-samples fail)

6. All Alternative Documentation adjustments shall be made against the adjusted listing total at the Medicaid rate.
7. The adjustments are in "Weighted Sample Dollars"

Version Dated October 1, 2014

B. Alternative Documentation Calculation

Example:

|                                        |                    |
|----------------------------------------|--------------------|
| Listing total submitted by hospital    | \$4,000,000        |
| Adjustments                            | 1,000,000          |
| Adjusted listing total                 | <u>\$3,000,000</u> |
| Adjusted listing total @ Medicaid rate | <u>\$1,800,000</u> |

# State of New Jersey Department of Health

Weighted sample dollars with  
 Alternative Documentation 8

|                               |           |
|-------------------------------|-----------|
| Total weighted sample dollars | <u>50</u> |
|-------------------------------|-----------|

|                                      |              |
|--------------------------------------|--------------|
| Alternative Documentation Percentage | <u>16.0%</u> |
|--------------------------------------|--------------|

C. Alternative Documentation Adjustment

|                                      |              |
|--------------------------------------|--------------|
| Alternative Documentation percentage | 16.0%        |
| Alternative Documentation Allowance  | <u>10.0%</u> |
| Alternative Documentation Adjustment | <u>6.0%</u>  |

|    |                                                          |                  |
|----|----------------------------------------------------------|------------------|
| 1. | Adjusted listing total<br>@Medicaid rate (VIII, B above) | \$1,800,000      |
|    | Multiplied by Alternative<br>Documentation Adjustment    | <u>6.0%</u>      |
|    | Alternative documentation<br>dollar adjustment           | <u>\$108,000</u> |

|                                                          |             |
|----------------------------------------------------------|-------------|
| Adjusted listing total<br>@Medicaid rate (VIII, B above) | \$1,800,000 |
|----------------------------------------------------------|-------------|

|                                                      |                    |
|------------------------------------------------------|--------------------|
| Alternative documentation<br>dollar adjustment       | <u>\$108,000</u>   |
| Allowable listing total<br>@Medicaid rate (See Note) | <u>\$1,692,000</u> |

Note: This amount represents the allowable audited total at this stage of calculations. The amount does not reflect any potential adjustments which may result from sections IX or X below.

Version Dated October 1, 2014

IX. Audit Compliance Failures Calculations and Adjustment

- A. Any hospital with a 10 % Audit Compliance Failure Rate (Cumulative for the year) shall have their listing total adjusted by the entire percentage.

**State of New Jersey**  
**Department of Health**

For this section, there is no allowance for 10% or any other adjustment for the Audit Compliance Failure Rate.

1. The hospital shall submit their listing total.
2. The listing total shall be adjusted for accuracy and other adjustments.
3. The adjusted listing total shall then generate the audit Sample and Sub-sample.
4. If there is a 10% failure rate at the Sub-sample level, the auditor shall expand the audit to the Sample.
5. Again for this section, there is no 10% allowance for the Audit Compliance Failure rate for the audit year. If the final tally (Cumulative for the year) of Weighted Sample dollar is 10% or more the entire percentage is deducted as the penalty.

(a). Example: Using VI,B,1 above

**AUDIT**  
**HANDBOOK**

An account valued at \$60,000 that has a sample weight of 4 and a sub-sample weight of 2. (This is a possibility, it could also have a sample weight of 5 and a sub-sample weight of 1) however, using the 4 & 2 scenario, the Audit Compliance Failure Rate would be 4 %. (2/50) (Assuming no other sub-samples fail)

6. All Audit Compliance Failure rate calculations shall be made against the adjusted listing total at the Medicaid rate.
7. The adjustments are in "Weighted Sample Version" dated October 1, 2014

B. Audit Compliance Failure Rate Adjustment Examples

1. Example #1

|                                |            |
|--------------------------------|------------|
| Failed Weighted Sample Dollars | 3          |
| Total Weighted Sample Dollars  | 50         |
| Audit Compliance Failure Rate  | <u>6 %</u> |

**State of New Jersey**  
**Department of Health**

The 6% failure rate determines that No adjustment would be applied against the allowable listing total at the Medicaid rate

2. Example #2

|                                |             |
|--------------------------------|-------------|
| Failed Weighted Sample Dollars | 5           |
| Total Weighted Sample Dollars  | 50          |
| Audit Compliance Failure Rate  | <u>10 %</u> |

**CHARITY CARE CLAIMS**

Since the Audit Compliance Failure Rate equals 10% or more, the audit shall be expanded to the entire sample. (See IX,A,4 above)

The 10% failure rate from example #2, would be applied against the allowable listing total at the Medicaid rate (see IX,A,5).

3. Example #3

|                                |             |
|--------------------------------|-------------|
| Failed Weighted Sample Dollars | 24          |
| Total Weighted Sample Dollars  | 150         |
| Audit Compliance Failure Rate  | <u>16 %</u> |

**AUDIT HANDBOOK**

Since the Audit Compliance Failure Rate equals 10% or more, the audit shall be expanded to the entire sample. (See IX,A,4 above)

The 16% failure rate from example #3, would be applied against the allowable listing total at the Medicaid rate (see IX,A,5).

Version Dated October 1, 2014

C. Audit Compliance Adjustment

Allowable listing total at the  
 @Medicaid rate (VIII,B above) \$1,800,000

Audit Compliance Failure Rate  
 (Using example #3 from above) 16 %

Audit Compliance Adjustment \$ 288,000

# State of New Jersey Department of Health

Allowable listing total at the  
 Medicaid rate (Amount after  
 Alternative Documentation  
 adjustment (VIII,C,1) \$1,692,000

Less: Audit Compliance Adjustment \$ 288,000

Allowable listing total  
 @Medicaid rate (See Note) \$1,404,000

Note:

This amount represents the allowable audited  
 total at this stage of calculations. The  
 amount does not reflect any potential  
 adjustments which may result from section X  
 below.

# CHARITY CARE CLAIMS AUDIT HANDBOOK

Version Dated October 1, 2014
