The ombudsman may refer the interested party to another official who can resolve the concern.

(b) Before consulting with an ombudsman, interested parties must first address their concerns, issues, disagreements, and/or recommendations to the contracting officer for resolution. Consulting an ombudsman does not alter or postpone the timelines for any other processes (e.g., agency level bid protests, GAO bid protests, requests for debriefings, employee-employer actions, contests of OMB Circular A-76 competition performance decisions).

(c) The Competition Advocate (CA) at each contracting activity/office (as defined in DLAD 2.101) shall act as the ombudsman and attempt to resolve contractor complaints. DLA AVIATION/AOB's CA/ombudsman can be reached at (385) 591-1672. Complaints which cannot be so resolved shall be forwarded to the HQ through J-72 for resolution by the DLA competition advocate. Each activity is responsible for developing procedures for executing the duties and responsibilities of its local ombudsman.

(d) The ombudsman has no authority to render a decision that binds the agency.

(e) Do not contact the ombudsman to request copies of the solicitation, verify offer due date, or clarify technical requirements. Such inquiries shall be directed to the contracting officer.

(a) *Definition:* "Qualification Requirement," as used in this clause, means a Government requirement for testing or

other quality assurance demonstration that must be completed before award.

(b) One or more qualification requirements apply to the supplies or services covered by this contract. For those supplies or services requiring qualification, whether the covered product or service is an end item, the product, manufacturer, or source must have demonstrated that it meets the standards prescribed for qualification before award of this contract. The product, manufacturer, or source must be qualified at the time of award whether or not the name of the product, manufacturer, or source is actually included on a qualified products list, qualified manufacturers list, or qualified bidders list. Offerors should contact the agency activity designated below to obtain all requirements that they or their products or services, or their subcontractors or their products or services, must satisfy to become qualified and to arrange for an opportunity to demonstrate their abilities to meet the standards specified for qualification.

This is necessary whether the Contractor or a subcontractor will ultimately provide the product or service in question. If, after award, the Contracting Officer discovers that an applicable qualification requirement was not in fact met at the time of award, the Contracting Officer may either terminate this contract for default or allow performance to continue if adequate consideration is offered and the action is determined to be otherwise in the Government's best interests.

(e) If an offeror, manufacturer, source, product, or service has met the qualification requirement but is not yet on a qualified products list, qualified manufacturers list, or qualified bidders list, the offeror must submit evidence of qualification prior to award of this contract. Unless determined to be in the Government's interest, award of this contract shall not be delayed to permit an offeror to submit evidence of qualification.

(f) Any change in location or ownership of the plant where a previously qualified product or service was manufactured or performed requires reevaluation of the qualification. Similarly, any change in location or ownership of a previously qualified manufacturer or source requires reevaluation of the qualification. (IAW DFARS 204.7604)

(a) *Definitions.* As used in this provision—

PART IV - REPRESENTATIONS AND INSTRUCTIONS
SECTION M
EVALUATION FACTORS FOR AWARD

EVALUATION FACTORS FOR AWARD USING LOWEST PRICE TECHNICALLY ACCEPTABLE PROCEDURES

a. Basis for Contract Award
This acquisition will utilize Lowest Price Technically Acceptable (LPTA) source selection procedures in accordance with Federal Acquisition Regulation (FAR) Part 15.101-2. Technical tradeoffs will not be made and no additional credit will be given for exceeding acceptability. Award will be made to the acceptable offeror with the lowest evaluated cost or price, which is deemed responsible in accordance with the Federal Acquisition Regulation and whose proposal confirms to the solicitation requirements. The solicitation requirements include all stated terms, conditions, representations, certifications, and all other information required by Section L of this solicitation. The Government intends to award without discussions/reserves the right to award without discussions. Therefore, each initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if determined necessary by the Contracting Officer.

b. Number of Contracts to be Awarded
The Government intends to select one contractor for the program. However, the Government reserves the right to award no contract at all, depending on the quality of the proposals and prices submitted and the availability of funds.

c. Rejection of Unrealistic Offers
The Government may reject any proposal that is evaluated to be unrealistic in terms of program commitments, including contract terms and conditions, or unrealistically high or low in cost/price when compared to Government estimates, such that the proposal is deemed to reflect an inherent lack of competence or failure to comprehend the complexity and risks of the program.

d. Correction Potential of Proposals

The Government will consider, throughout the evaluation, the "correction potential" of any deficiency or proposal inadequacy. The judgment of such "correction potential" is within the sole discretion of the Government. If an aspect of an offeror's proposal not meeting the Government's requirements is not considered correctable, the offeror may be eliminated from the competitive range.

PRE-AWARD SURVEY

The Government may conduct a pre-award survey (PAS) as part of this source selection. Results of the PAS (if conducted) will be evaluated to determine each offeror's capability to meet the requirements of the solicitation.

PLANT VISITS

In the event discussions are necessary, plant visits may be conducted during the evaluation phase to develop knowledge for judging the potential for correction of the deficiencies.

SOLICITATION REQUIREMENTS, TERMS AND CONDITIONS

Offerors are required to meet all solicitation requirements; such as terms and conditions, representations and certifications, and technical requirements, in addition to those identified as factors, subfactors to be eligible for award. Any aspect of the proposal judged to be unacceptable would render the entire proposal unacceptable. Failure to comply with the terms and conditions of the solicitation may result in the offeror being removed from consideration for award. Any exceptions to the solicitation's terms and conditions must be fully explained and justified.

EVALUATION CRITERIA FOR AWARD
(IAW FAR 13.106-2(b), 14.201-5(c), and 15.204-5(c))

For the purposes of award, offers will be evaluated for acceptability of evaluation factors described below:

FACTOR 1: Cost/Price
FACTOR 2: Technical

a. Order of Importance
Factor 1 (Cost/Price) and Factor 2 (Technical) are of equal importance.

b. Evaluation Methodology
Price will be evaluated first and the proposals will be listed from lowest to highest price. After price is evaluated the technical acceptability evaluation will begin; starting with the lowest evaluated priced offeror. The first proposal evaluated as technically acceptable will be considered the best value proposal and other technical evaluations will cease. Only those offerors determined to be technically acceptable will be considered for award. The technical factor rating depicts acceptable, and unacceptable.

c. Cost/Price Factor (IAW 5315.305(a)(1))

(1) For CLINs including range quantities, the offeror's cost/price proposal will be evaluated for award purposes by multiplying the proposed unit price by the total quantity. The quantity utilized for evaluation will be based on the total quantity required at time of award by the Government Requirements group.

(2) Unrealistically low proposed costs or prices, initially or subsequently, may be grounds for eliminating a proposal from competition either on the bases that the offeror does not understand the requirement or the offeror has made an unrealistic proposal.

(3) Offerors are cautioned against submitting an offer that contains unbalanced pricing. Unbalanced pricing may increase performance risk and could result in payment or unreasonably high prices. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more contract line items is significantly over or understated as indicated by the application of cost or price analysis techniques. The Government shall analyze offers to determine whether they are unbalanced with respect to separately priced line items or subline items. Offers that are determine to be unbalanced may be rejected if the contracting officer determines that the lack of balance poses an unacceptable risk to the government.

(4) Cost/price proposals submitted by vendors shall be evaluated by multiplying the proposed unit price by the quantity desired by the Government to determine the contractor's total price.

Proposals for CLIN 0001 (New Manufactured Material) will be evaluated as follows:

The contractor's proposal for the range quantity under CLIN 0001 is the price factor that will be used in evaluation. The quantity that will be used within the range will be determined by the Government Requirements group prior to award. Evaluation of award will be based on the proposed unit price multiplied by the required quantity.

(5) If incidental or miscellaneous expenses not related to specific CLIN structure accompany vendor proposals, these charges shall be added to the total CLIN cost/price to reach the final total cost/price proposed to the Government. In addition 'Price Analysis' shall be conducted in accordance with FAR 15.404-1, to determine 'Reasonableness' on all offers submitted by vendors.

*Unrealistically low costs/prices proposed either initially or subsequently may be grounds for elimination of an offer from the competition and shall be based upon the vendor not understanding requirements or because an unrealistic proposal was submitted.

e. Technical Factor

(1) Technical proposals are not required. Technical acceptability will be determined based on the offerors compliance with the requirement as stated in Section B Schedule and/or any referenced specifications, engineering notes and all other attachments herein.

(2) The delivery schedule will be evaluated based on the dates established in Section B of the solicitation. It should be noted that the Government's required delivery is based on the Requirements' need date, and may not be attainable. Therefore, if a proposed delivery does not meet the Government's required delivery, the proposed delivery may be considered responsive.

Technical acceptability will be ascertained based on one of the ratings described below. Proposals will be evaluated for compliance with solicitation; receipt of a responsive proposal to deliver the supplies in accordance with the solicitation and all other attachments herein.

Acceptable – The proposal meets specified minimum requirements necessary for acceptable contract performance.

Unacceptable – The proposal fails to meet specified minimum requirements necessary for contract performance. Proposals with an unacceptable rating are not awardable.

f. Discussions
It is the Government's intent to award without discussions, therefore, it is imperative that offeror's submit their best terms initially. However, if during the evaluation period, it is determined to be in the best interest of the Government to hold discussions, offeror responses to Evaluation Notices (ENs), and the Final Proposal Revisions (FPRs) will be considered in making the source selection decision.

EVALUATION COST FACTOR FOR FIRST ARTICLE (OCT 1988)
(IAW FAR 9.306(i))
The cost to the Government for first article testing or engineering review and approval of first article test reports (where preliminary Contractor testing is required), as applicable, shall be a factor in the evaluation of this solicitation. The factor to be used in evaluation shall be

Lot/Item	Evaluation cost
