W912P726QA010 | Lake Sonoma Sewage Pumping Vault and Portable Restroom Rental Services
Date: 29 June 2026

Question #	Question	Response
1	Is this a brand-new contract OR if there is (was) an incumbent performing these services. If not brand new, could you please provide the current / previous contract number and what the total contract value was?	This is a replacement contract for W912P721P0012. Incumbent is United Site Services of California. Total contract value is $343,213.32.
2	Based on my review of the PWS, it appears there are approximately 25 portable restrooms during the off-season and 29 during the on-season under the base requirement. Should the contractor expect those quantities to remain relatively consistent throughout the contract, or will they fluctuate significantly?	Yes, very consistent.
3	It appears the portable restrooms are serviced once per week during the off-season and twice per week during the peak season. Will all portable restroom locations follow the same service frequency, or do some locations have different servicing requirements?	All will follow the same service frequency.
4	I noticed the solicitation references both 24-hour and 48-hour response times for non-emergency pumping requests. Could you please clarify which response time will govern the contract?	48-hour response times for non-emergency requests. See revised PWS dated 29 June 2026.
