

All components of sewage treatment system (STS) must have a 10' minimum offset from any hardscape or property line and 50' offset from any water source or impoundment

Driveway and utility locations are not to run over proposed septic areas unless alternate septic areas are approved by the Health Department

Caution: Underground utilities may exist on site. Locations must be determined prior to excavation.

Property lines, contours, and existing improvement locations are derived from County GIS data, LIDAR, and/or aerial photos.
