

ATTACHMENT L  
Commitment and Support for Electrification Project

Successful deployment of electric vehicles and equipment largely relies on the support and engagement of Project Partner personnel, including vehicle/equipment operators, maintenance staff, leadership, and others.

In the space provided below, please describe how these stakeholders have been involved and how their buy-in has been secured. For public entities, please indicate if any meetings, hearings, or votes need to occur or have already occurred in relation to the project.
